In another example the United States Bureau of Census reports exports of tractors and agricultural implements in 1946 of $85,142,000. However, the Bureau of Foreign Commerce and Navigation, in the same United States Department of Commerce, reports that exports for the calendar year 1946 amounted to $157,559,000, another difference of $72,417,000. In this case also the larger figures include shipments to Canada as well as shipments under UNRRA.

Some of these differences may be explainable by the fact that the Bureau of Census figures are not based on shippers' export declarations at point of export but rather upon reports received from manufacturing companies. "Therefore," states the Bureau of Census, "the statistics are limited in their reliability by the extent to which the manufacturer knows that the farm equipment shipped from his plant will be actually exported."

On the other hand, the export figures of the Bureau of Foreign Commerce and Navigation are based on actual shipping declarations (f. a. s.) and include UNRRA shipments for the periods mentioned.

A more specific analysis of these statistics will certainly be helpful in the consideration of the Marshall plan. The western European small-acreage farmer who never needed, wanted, nor expected complete mechanization of his few acres should not be provided United States equipment now at the expense of American farmers whose 1948 average goals set by the United States Department of Agriculture are substantially higher than 1947.

Last September, in traveling over many farming areas in nine countries of western Europe, I noted particularly the need for small hand tool farm equipment and horse-drawn implements.

I quote from a statement made by Paul M. Mulliken, executive secretary of the National Retail Farm Equipment Association, before the Senate Foreign Relations Committee:

No group is more aware of the value of farm mechanization to the agriculture of a nation

than the farm equipment dealer members of our organization who do business exclusively with farmers. We also recognize fully the need for farm machinery in western Europe. However, we believe that farming conditions in western Europe vary greatly from those prevailing in the United States due largely to the size of the individual farms.

For example, in France the average farm consists of only 24 acres, while in Texas, which has relatively the same total area, the average size of farm is 329 acres. In the Netherlands 90 percent of all farms are under 50 acres in size and 50 percent of them are less than 10 acres.

Sweden has a total of 420,000 farms but 120,000 of them consist of less than 5 acres; 270,000 have between 5 and 50 acres. Thus, 93 percent of the total of the farms in Sweden are smaller than 50 acres in size.

In the whole of the United Kingdom the average amount of all cropland per farm is less than 35 acres.

Only one-fifth of the area of Greece is under cultivation. The 6,000,000 acres of farm land are split up into nearly 1,000,000 farms with less than 7 acres on the average. Only 13 percent of all farms consisted of more than 12½ acres.

In Italy only one-tenth of the land is arable. The average size of Italian farms is less than 16 acres. In 1939 there were 8,756,858 persons engaged in agriculture. It is rather obvious that with less than 2 acres of farm land per person engaged in farming there is not much need for power farm equipment.

It should be most readily apparent that modern power farm equipment such as is currently being built by our factories would be neither practical nor feasible on farms comprising 5, 24, or even 35 acres where the individual fields would be still smaller. The knowledge of farmers' needs possessed by the farm equipment retailers of the United States convinces us that exporting huge quantities of tractors, combines, pick-up balers, and other power farm equipment to Europe is unsound. Even if ample supplies of fuel were available, there would be a shortage of trained operators, skilled mechanics, and adequate service facilities.

As executive secretary of the National Retail Farm Equipment Association, I am here to offer the assistance of our membership to the agency that the Congress may designate to administer the European recovery program. We believe that there is a way whereby the greater part of the farm machinery needs of European farmers can be met without materially diminishing the supply of new power equipment for our own American farmers. We know that there are sizable quantities of good usable—but not needed—items of horse-drawn machines to be found on the farms of the Nation. Much of this equipment is reasonably new. It was retained by the farmer as stand-by equipment when he mechanized his farming operations.

In order that we might be certain of our facts, we made a small-scale survey in December. Letters were written to some 250 representative dealers in 45 States. Replies were received from 213 dealers coming from 44 States. We asked dealers to advise us (1) if there was any usable machinery on the farms in their trade territories; (2) if farmers would dispose of it at a fair price; and (3) if the dealers would be willing to cooperate in collecting it, reconditioning it, and make it available for export. From the replies received, we are convinced that there are ample quantities of most horse-drawn machines, although the supply is not uniformly distributed over the country. Many dealers report that they have discussed this proposal with their farmer customers and invariably the farmers are most enthusiastic.

We propose to use the manpower and facilities of our 17,000 dealer members throughout the Nation to comb the farms for usable horse-drawn equipment, bring it in to the dealers' repair shops, thoroughly recondition it and make it available for shipment abroad. This is as far as we could proceed since retailers do not have the knowledge or facilities needed to engage in export work.

It is much easier to ship tractors, combines, pick-up balers, and other power equipment in bulk than to provide the horse-drawn and hand-tool equipment that these people in western Europe are in the habit of using. It is high time we developed some common sense in preparing our export program to foreign countries.

In closing, it seems to me it is about time that we reexamine and carefully analyze what has been going on in the exporting of farm machinery, and that we carefully consider what is being contemplated under the Marshall plan by way of shipping farm power equipment. What we need to ship to those countries is farm hand tools and horse-drawn equipment.

In traveling over nine countries in western Europe we could count the tractors we saw almost on the fingers of our right hand, but we saw hundreds of horses and bulls at work in the fields of those nine countries. If we are going to help those countries, the thing we should do is analyze carefully what they need and send them the equipment for the bulls to pull, and we will get a lot further than we will sending them power farm equipment that no one knows anything about, and which will be standing in the corner for lack of repairs and proper service equipment and men trained to handle it.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Minnesota.

Mr. AUGUST H. ANDRESEN. The gentleman visited 11 countries in Europe last fall and made a very careful study of the needs of agriculture. The gentleman will recollect that when he visited Italy he found that they had a tremendous surplus of labor. If we send a great deal of mechanized farm equipment to Italy, we will aggravate that surplus labor situation.

Mr. HILL. There is no doubt of that.

Mr. AUGUST H. ANDRESEN. Probably we can get 200,000 or 300,000 of those Italians to come over to the United States to help in the sugar-beet fields and elsewhere, to do some of the stoop labor over here. We also ran into people over there who wanted to come to the United States from areas in Germany. The gentleman will remember that. I will not comment on that, but we certainly need certain types of farm labor in this country that we cannot produce from our own citizens.

I feel that the gentleman has made an excellent contribution to the study of the need for farm machinery on the part of American farmers and also of what we should ship abroad. The gentleman knows that we would probably have to send trained experts over there, for a good many people in those countries could not use mechanized farm equipment if we sent it to them. The farms are not big enough. What they need over there is moisture to make the crops grow and then tools they can handle, to do the customary thing in the way they have done for a good many years.

Mr. HILL. I thank the gentleman for his contribution. May I say that all over Europe we could not help but notice the shortage of hand tools. They positively do not have them. Further, no one can fail to see all over Europe the thousands and thousands of tons of steel, twisted and lying in the buildings, with no one attempting to do anything about it.

Mr. AUGUST H. ANDRESEN. The gentleman also knows that people that talked to us about getting hand tools and parts for farm machinery said they had been getting them in Germany, but now the factories in Germany where they made the parts for farm machinery are being torn down. The gentleman knows that probably the parts situation is more critical than furnishing them with mechanized equipment.

Mr. HILL. That is especially true of tractors. We found tractor after tractor that had been sold in France from Germany standing in the fields with no repairs, and with no repairs possible because there were no plants to make the parts for the tractors.

Mr. ROCKWELL. Mr. Speaker, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Colorado.

Mr. ROCKWELL. I commend the gentleman on his remarks on a very vital subject. I happen to be in the ranching business myself. During these days of shortage of labor we have need more and more for tractors and other machinery. My personal experience has been that 18 months ago we ordered an additional tractor for our ranch, and it finally was delivered just a few days ago. This delay caused the loss of a great deal of the crop. I am interested to know where these tractors have been going. I think it has been brought out here very clearly that the need abroad is for small tools, as the gentleman from Colorado has just stated. In this country we certainly need the big mechanized equipment to overcome the lack of labor on our farms and ranches today.

Mr. HILL. I thank the gentleman for his contribution.

Mr. PEDEN. Mr. Speaker, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Oklahoma.

Mr. PEDEN. May I compliment the gentleman on calling the attention of the House to a subject which is very vital. I represent a strictly agricultural district. Only today I had three letters upon this subject, pleading for Congress to do something to provide equipment with which to farm. This is a critical problem. I think this Congress owes a duty to the American farmer, who has done so much to provide the food that is needed to be shipped abroad, to try to give him some relief.

SPECIAL ORDER

The SPEAKER pro tempore (Mr. RIEHLMAN). Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 15 minutes.

(Mr. HESELTON asked and was given permission to revise and extend his remarks and include certain tables and editorials.)

THE FUEL OIL SITUATION

Mr. HESELTON. Mr. Speaker, I apologize for imposing on the House further today. I deeply appreciate the generous acceptance of the suggestion I made and the support that was given to it. I cannot tell my friends from Massachusetts who are here today how much I know their fine cooperation means to the people of my district, as well as of New England generally. I want to read first a portion of an editorial from the Boston Post of Monday, which really reflects, I think, the growing uneasiness and unhappiness of the people in Massachusetts as to the way this thing is developing. It is headed "We want oil":

WE WANT OIL

The prospect of bleak, heatless days in weeks to come because of a shortage of oil is scarcely made more encouraging by the sudden self-righteousness of those who are supposed to be planning means of providing New England with the oil that it needs.

As in the case of all shortages caused by bungling and inefficient planning, it is the public which must serve as whipping-boy. Those who are supposed to plan ways and means of getting oil and distributing it fairly now raise the cry that the consumers are not cooperating, that they are not shoveling paths to the oil-intake pipes, and that deliveries are delayed, and the work of the oil men is made more difficult.

The assertion can be disposed of in a very few words. The failure to plow out side streets in the way that they should be plowed out is the chief factor in delivery delays. The real reason for the shortage is that not enough oil is being shipped to New England, and what is being shipped is sold at scandalously high prices completely out of line with what people in Europe are paying for American oil.

The export of fuel oil from the United States is averaging 12,000,000 barrels a month, and during the first 9 months of 1947, when the oil industry first began to issue warnings of a fuel oil shortage in the Northeastern States, almost $1,000,000 worth of oil was shipped to our dear friends, the Soviet Union.

That is pretty bitter language, but I think it can be demonstrated that it is an accurate opinion.

Mr. PHILBIN. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. PHILBIN. Will the gentleman repeat the figures on the shipment of oil to the Soviet Union?

Mr. HESELTON. The Post gives the figure as $3,000,000. I am confused; you are confused, and I think everybody else is confused because reference is made one day to tons, the next day to barrels, and the next day to dollars. I wish they would use one single standard that we all could understand. I am going to keep on trying to make them do that.

The editorial reads further as follows:

Moreover, tankers used in hauling this oil abroad, to be sold at prices cheaper than those we now pay for oil, are vitally needed to bring oil to the Northeast.

These are not newly discovered facts. Indeed, the same facts were called to the attention of the executive branch of our Federal Government, and Secretary of Commerce Averill Harriman testified before a congressional committee last November that he could regulate the export or stop the export of oil to foreign countries.

Secretary Harriman was asked if he could divert this export oil to the area of this country now suffering from a fuel-oil shortage, and his assistant, a Mr. Blaisdell, testified that he could accomplish this diversion in 15 minutes.

But it is simpler for those who are dealing with the oil shortage on an executive level to lambaste the poor public and blame it for the oil shortage.

That is in the CONGRESSIONAL RECORD and you will find it there in the issue of December 19, when the gentleman from Michigan took the floor. I referred, at page 11747, to the record of the hearings before a congressional committee and the examination of Mr. Harriman by the chairman of the committee on November 26. Secretary Harriman was asked if he could divert these exports of oil to areas now suffering from a fuel-oil shortage. His assistant, Mr. Blaisdell testified on December 19 that he could accomplish this diversion in 15 minutes. That is the testimony of Mr. Blaisdell before the Committee on Interstate and Foreign Commerce.

We have heard many remarks by some of our friends from the Midwest about an alleged inconsistency on the part of some of us in the Northeast in being willing to support a decent European-aid program, because we say it is advisable first, for humanitarian reasons; second, because of our own self-interest; and third, because we want this country to remain strong in this world. But let us see what the Post says:

If the growing opposition to the European-recovery plan surprises the administration or the proponents of the plan, they have merely to contemplate the natural resentment that people of the Northeast feel when they see their taxes going to finance huge oil shipments to Europe at a cost far lower than they can buy it themselves.

The New England States are not asking for charity. They seek the means of keeping themselves from freezing in one of the worst winters on record.

In a time when distribution systems are as far advanced as they are today it is shameful that New Englanders must follow the progress of a single tanker loaded with fuel oil toward port as if it were a treasure ship bearing a long-awaited fortune.

So much for that. That is accurate.

Governor Bradford wired yesterday as follows:

BOSTON, MASS., *February 3, 1948.*

Hon. JOHN W. HESELTON,

House Office Building, Washington, D. C.:

If we had 514,000 barrels of kerosene and 610,000 barrels of No. 2 to the end of March in addition to what suppliers say they expect we would have sufficient to take care of all means. For first 10 days of February we have 76 percent of kerosene demand and 80 percent of No. 2.

ROBERT F. BRADFORD.

That is of great interest to my friend, the minority whip, because his continued cooperation and sound counsel have meant so much to the rest of us in struggling for a solution of this problem.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. McCORMACK. The gentleman from Massachusetts [Mr. McCORMACK] and the Senator from Massachusetts, Senator SALTONSTALL, sent some wires last night to some big oil companies trying to get some kerosene. I received a reply from one company that we took a gamble on and I suppose Senator SALTONSTALL has too, and Governor Bradford, who by the way I wish had kept the fuel coordinator in existence instead of letting him go in the latter part of last year. You know the story on that. You know what happened in Massachusetts on the State level. We just stand it so long. In any event, I got a telegram back and we got 450,000 gallons of grade No. 2, and we are still fighting for more. There is a situation up there that must be corrected. I hope the gentleman from Massachusetts will keep it on a nonpartisan level, because there is no politics involved in this and there should not be.

Mr. HESELTON. There are not. I said to the House the other day that a Democrat gets just as cold as a Republican up our way. As far as I am concerned, the Democrats in my district are of just as much importance to me as I know the Republicans in your district are to you. You are going to fight for the Republicans in your district and I am going to fight for the Democrats in my district. If we make any mistakes, we are big enough to admit it. If they make some mistakes downtown, I am going to challenge them and ask them to explain, because we ought to learn from past mistakes.

Today, when the House acted as it did, I think the House is to be congratulated, and so are you, and so is the respected former Speaker of this House who lent his great influence to that effort.

Mr. McCORMACK. Will the gentleman yield again?

Mr. HESELTON. I yield.

Mr. McCORMACK. We are all working together, the whole New England delegation.

Mr. HESELTON. Right.

Mr. McCORMACK. There is a lot involved in this. There is congressional action in disposing of the tankers——

Mr. HESELTON. Now, I do not yield any further on that point. Let me say to you that you should read the minutes of the Maritime Commission if you want to be enlightened on the responsibility of Congress for the disposition of the tankers. That decision was taken downtown on December 17, if I recall correctly. I will change that date if I am in error. But it was taken right in the midst of the hearings before the House Committee on Interstate and Foreign Commerce, while they knew we needed these tankers. I do not care who they are. I do not know and I am not interested in their political views. I am simply saying that you and I need the tankers to take fuel up to our constituents in the Northeast, and I know you will help me to try to get them.

Mr. McCORMACK. And I hope you will help me.

Mr. HESELTON. I will do anything I can.

Mr. McCORMACK. Let us work together.

Mr. HESELTON. Right. I want the Members of the House to hear the testimony of Commissioner McKeough and the table as to the sale at this time. The printed report is not yet available, I understand, but the effort to hold these tankers in east coast service for at least 2 months is of great importance.

Mr. HESELTON. Have you any time you would like to adjourn?

I would like to get a little clearer your testimony in answer to the chairman's questions this morning.

As I understand it, there was a Cabinet request or suggestion or directive somewhere along the middle of June for the consideration and sale of 100 oceangoing tankers to foreign purchasers; am I right about that?

Commissioner McKEOUGH. Yes.

Mr. HESELTON. There was then formed a committee which went into consultation, presumably with representatives of these governments that you have listed, who now have title to the 83 tankers.

Commissioner McKEOUGH. Yes.

Mr. HESELTON. As a result of that, some allocations were made.

Were any contracts made with those people at that time?

Commissioner McKEOUGH. Well, Mr. Congressman, the contracts were probably a matter of the results of it, because it was, first, the action to sell and, second, the contract negotiations with reference to the number and other features, and then actually the contracts.

Now, the dates of the signing of the contracts is a matter that the chairman asked for, and which we have agreed to find from our records and furnish.

Mr. HESELTON. I want to get your procedure clear. Let us take it actually as to these without specifying anyone.

The Commission, after having gone over the request which was allocated or assigned or indicated in some manner, formally, to these foreign representatives—that they were to have title to these tankers after all negotiations were concluded?

Commissioner McKEOUGH. Yes.

Mr. HESELTON. Was that by formal vote of the Commission, or was it by a memorandum issued to them, or was it by the signing of a contract, or what is your procedure at that stage?

Commissioner McKEOUGH. The procedure at that stage, Mr. Congressman, is that the Commission by its action normally gives formal consummation of the arrangement.

Mr. HESELTON. By a formal vote?

Commissioner McKEOUGH. Yes.

Mr. HESELTON. A written vote?

Commissioner McKEOUGH. Not written except as it is recorded in a written manner in the minutes.

Mr. HESELTON. In the minutes of the Commission as of a certain date?

Commissioner McKEOUGH. Yes.

Mr. HESELTON. So that as to these 83 tankers, am I to understand there is a record, an official record from the minutes, showing on what date the Commission approved the sale of these tankers?

Commissioner McKEOUGH. Well, I do not know. I do not know whether the minutes so record that in detail. I think the minutes are quite illuminating as to the actions taken with a view to making the requirement for the staff to make.

Mr. HESELTON. Let us go a little step further.

There is some other step to be taken before delivery is consummated?

Commissioner McKEOUGH. Yes.

Mr. HESELTON. What other step has to be taken by the Commission in order to get the actual title and physical possession of these tankers into the hands of the purchasers?

Commissioner McKEOUGH. You mean from the time the Commission makes its approval of the proposed sale?

Mr. HESELTON. I am assuming that the minutes you speak of is the official thing that is done by the Commission indicating its approval, and then assume that there has to be some other step taken by the Commission in order actually to vest title and physical possession in the purchaser; am I right about that?

Commissioner McKEOUGH. I would not say that you were, but I think I would have to yield to Mr. Pimper, who is in the sales section, to give you the technical mechanism of the move.

Mr. PIMPER. I assume that your question is, after the Commission has formally approved the sale of these tankers to anyone, they then empower the staff to do the necessary details for the transfer of the title to the vessel.

It would be the formation of a contract, and the signing of the contract, and the preparation of the bill of sale and mortgages, if necessary, and inventories taken, and so on.

Mr. HESELTON. May I interrupt?

There is a bill of sale prepared?

Mr. PIMPER. That is right.

Mr. HESELTON. And executed in behalf of the Commission by the staff?

Mr. PIMPER. Yes.

Mr. HESELTON. Were those bills of sale, or any of them, executed last Friday?

Mr. PIMPER. Some of them may have been.

Mr. HESELTON. Have you any recollection of how many of them were?

Mr. PIMPER. No, sir; I have not.

Mr. HESELTON. Would it be more than 10?

Mr. PIMPER. I would doubt if there were 10 executed on that day.

Mr. HESELTON. When was the Attorney General's opinion filed with the Commission?

The CHAIRMAN. I think it was addressed to the President and referred to the Commission.

Mr. HESELTON. When did it come to the Commission's knowledge?

Commissioner McKEOUGH. I believe Wednesday or Thursday, Mr. Congressman.

Mr. HESELTON. That is last week?

Mr. PIMPER. Yes.

Mr. HESELTON. When you speak of this action taken by the Commission which completely disposed of the balance of the 83 tankers, you are speaking of some staff detail work that was completed on Friday; is that right?

Mr. PIMPER. Some of them were completed on Friday; yes, sir.

Mr. HESELTON. You have available and can furnish to this committee the exact information as to what was done last week, so far as the Commission is concerned?

Mr. PIMPER. I think it can be furnished.

Mr. HESELTON. And you can also furnish for us information of the same nature from November up to last Friday; can you not?

Mr. PIMPER. Yes.

(See status table previously inserted.)

Mr. HESELTON. Now, may I address my question to you, sir?

I believe that you said the Commission became aware of this domestic crisis in November; is that right?

Commissioner McKEOUGH. I think that I said the American purchasers, Mr. Congressman, began to show a marked interest in the possibility of buying these tankers, beginning in October; I do not believe I said November.

Mr. HESELTON. When was the Commission aware of the crisis so far as these shortage areas were concerned?

Commissioner McKEOUGH. I don't recall the date that anyone in the way of a governor or a Member of the Congress ever wrote and told me about a very acute threatened shortage of oil in New England, until very recently; I would say the last 3 or 4 weeks.

Mr. HESELTON. Do you want to leave it that the Commission was not aware of a situation developing in New England until the last 2 or 3 weeks?

Commissioner McKEOUGH. I would assume so; 3 or 4 weeks, I said.

The CHAIRMAN. Will you yield for a moment?

Do I assume from the answer that you made to Mr. HESELTON's question that you had not received any communication from a Member of Congress, that the Maritime Commission or any of these other commissioners depend on Congress to bring a situation such as this to their attention; is that correct?

Commissioner McKEOUGH. I said, Mr. Chairman——

The CHAIRMAN. Do they not ever find out anything on their own?

Commissioner McKEOUGH. I said 3 or 4 weeks; that may well be 5 or 6 weeks. I would not want to be held to 3 or 4. Time runs pretty fast, and it may have been 5 or 6 weeks.

Mr. HESELTON. Let us take it as 5 or 6 weeks.

For a month and a half the Commission has been increasingly aware of this situation?

Commissioner McKEOUGH. I would say so.

Mr. HESELTON. Immediately upon the filing of this opinion by the Attorney General, the Commission weighed, I assume, the importance of a recommendation made last June in terms of the then existing situation, against the critical situation developing in a portion of this country; is that right?

Commissioner McKEOUGH. You mean with relation to consummating the sales to foreign nations?

Mr. HESELTON. Yes.

Commissioner McKEOUGH. I would say so.

Mr. HESELTON. You discussed it as a commissioner, as to whether you would proceed one way or the other; whether you would consummate the sales, or complete the sales and delivery of any portion of this 83 tankers, or whether you might make another decision for the benefit of people in this country who are in critical condition as far as their fuel is concerned, and so far as their industrial activities are concerned, and you came to the conclusion that you would disregard interests of the people who were affected in this country; is that right?

Commissioner McKEOUGH. No; I would not say that is right, Mr. Congressman. I don't think that tells the whole background and the whole story that resulted in the action of the Commission.

Mr. HESELTON. Will you tell me what the Commission did in the sense of what factors they weighed and how they came to this conclusion you told us about this morning?

Commissioner McKEOUGH. I will be very happy to tell you, sir. I may have to burden you with some repetition, but I will be happy to tell you from my standpoint what we did.

In June of this year we were asked to allocate 100 tankers for foreign sales, and it came from the level of this Government known as the Cabinet.

I would assume, if I were respecting the position of a Cabinet level, that such a request was worthy of very serious consideration, and, if possible, an accommodation to that request.

The Commission so decided, and in the interim conditions were changed.

Mr. HESELTON. What changed it?

Commissioner McKEOUGH. I cannot answer that. I do not pose here as one who knows all that took place in the way of change.

The only thing that I am familiar with, sir, is that the American operator, up until approximately the 1st of October, and maybe a week or 10 days on either side of it, had shown no interest at all in the buying of tankers, and that Commission that I happen to be a member of, under law, is required to sell tankers.

Another very respected committee of this Congress known as the House Merchant Marine and Fisheries Committee, as I recall, back in late April and early May of this year urged this Commission to do everything it could to sell tankers and if the Americans would not buy them, sell them on the foreign market.

Mr. HESELTON. Referring to the Ship Sales Act, is there anything in that act that would prohibit the Commission taking cognizance of a critical emergency condition in this country and on its own initiative doing exactly the same sort of thing that you very commendably did do with reference to the 50 tankers, and making an effort then to charter any remaining portion of these tankers during this one season in order to take care of this critical situation; what about that?

Commissioner MCKEOUGH. None; except that we would have that control if we refuse to complete the sale, of having contributed to the fleet for American use beginning November 1, in our control, to the degree that we may have failed to sell 20 or 30 of the 83 that were ultimately sold.

What that is, Mr. Congressman, I don't know at the moment. But let us assume that we stopped and made no further endeavor in the way of deliveries on contractual commitments in the fulfillment of that obligation; that we assumed that we had taken on when we had conducted these negotiations with these various representatives of the governments involved.

Let us assume that it was 20 or 25 tankers. I presume that your point is that then, knowing in November or December that that shortage was here, that we should have stopped that sale and kept them for American use.

Mr. HESELTON. That is exactly the point.

Commissioner MCKEOUGH. Now, I would like to address myself to that phase: I believe that I stated when I testified earlier that if we had sold all of the 83 to the Americans, no guaranty would have come to New England or to the west coast or the Gulf or to my section of the country in Chicago that another pint of oil would have been put into those tankers under the Americans' control.

Mr. HESELTON. You could charter them; could not you have done that?

Commissioner MCKEOUGH. No; we had to sell them American, that is just the point. We are compelled to sell them American. We have no choice under law.

Mr. HESELTON. You mean to say that if you had been able to devise a means of withholding the consummation of these sales foreign, until, let us say, next May or June, in terms of the situation you knew existed here in this country today, that you could not then under the law charter those that you were able to hold out from completion for service here?

Commissioner MCKEOUGH. No.

Mr. HESELTON. Why not?

Commissioner MCKEOUGH. Because you could not keep them; because under the law we are compelled to sell them.

Mr. HESELTON. When?

Commissioner MCKEOUGH. When an American meets the requirements of the law, you shall sell, it says; that is the law.

Mr. HESELTON. How many applications have you on hand today from Americans for those ships?

Commissioner MCKEOUGH. I believe we have a total of one-hundred-and-fifty-some-odd. We had 177 ships applied for.

Mr. HESELTON. For the balance of these ships or whatever they are?

Commissioner MCKEOUGH. Yes.

Mr. HESELTON. Americans did want to buy them; did they not?

Commissioner MCKEOUGH. Yes; but they did not start to want them until about the 1st of October or thereabout, and these commitments were made on our part in good faith.

Mr. HESELTON. I am not challenging your good faith; I am challenging the judgment exercised.

Commissioner MCKEOUGH. That is anybody's privilege; to question the judgment of anyone.

Mr. HESELTON. I think it is our responsibility.

Sale of 83 tankers to noncitizens as of Dec. 17, 1947

You will note the delivery dates of the bills of sale for the *Council Crest, Fort Matanzas, Fort Jupiter, Rosebud, Pulpit Rock, Tule Canyon,* and *Hadley.*

You will note the fact that no indication of such deliveries as to 1947. The Committee on Interstate and Foreign Commerce is making further inquiries as to how far its recommendations have been followed.

Mr. McCORMACK. But keep politics out of it, because you know that on the State level the fuel coordinator was let go the early part of last year, when a fuel coordinator in our State was vitally important. There was an emergency fuel coordinator put in right when the winter was on top of us.

Mr. HESELTON. My friend knows he is not responsible for what is done in the State, and I am not either.

Mr. McCORMACK. That is true, as long as you stick on a nonpartisan level.

Mr. HESELTON. That is true, and that is where I want to stick, because you are a valuable asset. So are the gentlemen from Massachusetts [Mr. PHILBIN, Mr. LANE, Mr. DONOHUE, and Mr. KENNEDY] and the gentlemen from Rhode Island [Mr. FORAND and Mr. FOGARTY]. They have been helping to bring this about and each is entitled to thanks and praise for the united efforts. I thank you for your assistance which means a great deal to us all and for your contribution.

Now, let me carry on a little further. The Governor said:

> If we had 514,000 barrels of kerosene and 610,000 barrels of No. 2 to the end of March in addition to what suppliers say they expect, we would have sufficient to take care of all means. For the first 10 days of February we have 76 percent of kerosene demand and 80 percent of No. 2.

This afternoon I received from the Department of Commerce their proposed revised figures for the first quarter. We took the first step today. We are going to take more steps, in my opinion, if I understand the temper of this House and the earnestness and sincerity of my friends on both sides.

That table will be in the RECORD tomorrow morning. It will show you where the reductions are as I have computed them. That is not enough. I have a bill before our committee insisting that they revise that down to at least 50 percent. Canada went down 50 percent. Surely, Canada is just as cold as a good many other parts of this world where we are shipping kerosene. They cut out 5,000 tons from Denmark, 5,000 to our friends in Ireland. They reduced 110,000 by 25,000 to China; they reduced Australia from 70,000, down to 20,000. United Kingdom, 130,000, down to 50,000. In other words, we found that through the united efforts of the New England delegation and the persistent efforts of the House Committee on Interstate and Foreign Commerce and the constant pressure we have been putting on them, we got 300,000 barrels of kerosene—and they only need 514,000 to get them out of the mess. So that is another step in the right direction. Look at the headings "Gas oil" and "Residual oil" and I think you will be encouraged and our people at home will be encouraged. But we are not through. It is not enough yet.

Let me call attention to one other thing. I am not satisfied with what we did here this afternoon. I am not satisfied that any of you are satisfied. I do not think they should have gone ahead and converted that marine hospital in Boston in the face of all this; I do not think it was good judgment, and I think we acted very properly in supporting the amendment. I am going over with this problem to the other body and I hope we can join in trying to prevail upon them to appropriate enough funds so that we can get the Federal Government out of the oil-heating business. The Federal Government should be leading, not following. I think we can all agree on that. They should not be heating with oil down here. Here is the Navy Annex. A witness before my committee recently testified it is so hot there that he has to open the windows.

For the record I quote the following from a history of the Petroleum Administration for War, page 109:

> During the first upsurge of overland shipments in the fall of 1941, PAW suggested and obtained antitrust protection for a pool of the east-coast companies which would voluntarily distribute the burden of the excess transportation costs among all the companies in proportion to their normal sales volume. The oil companies formed this pool with only a promise from PAW to plead their case before the OPA, and for many months it was a deficit pool only. OPA finally made its first meager price increase on January 21, 1942. At that date the pool showed a deficit of many million dollars, and reached a peak of $38,446,800 by June 1942.

My argument is going to be this. It will cost us, according to estimates we have here, to convert to coal—as the Navy has done so splendidly—in all of these 80 or 90 Government-owned or leased buildings, $441,000. I say that is a capital investment. I think it is a justifiable expense but the cost can be allocated over the entire period of these 5 years since they tell us there will be at least 5 years of shortages. It is also a matter of national security. That is over $38,000,000 absorbed by the oil industry because the Federal Government would not pay. Now, today, we all know who is paying for this. It is the consumer, and that is one of the reasons why these companies come down here and testify before us that they have to increase their price by another 50 cents a barrel to take care of their exceedingly uneconomic transportation costs from Texas clear up into New England. I think we are going to find a lot of things that need to be checked and I have high hope that with the continued splendid cooperation, and it has been a nonpartisan cooperation of the New England delegation, and with the sympathetic understanding of our friends from the other parts of this Nation, we are going to help our people get out of this crisis this winter; but I do not want to have to go through this next winter if I am back, as you will be, or the following winter or the winter following that. Let us do this job once and for all while we are at it. I hope the gentlemen will try to arrange to go with me. Let us all go together.

Mr. PHILBIN. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. PHILBIN. I want wholeheartedly to commend the gentleman for his energetic efforts in this matter, but that brings up another question, that is, whether it is advisable for private individuals to convert from oil to coal. I wonder if the gentleman can give me any assurances that when this step is taken we will not suffer from coal shortages.

Mr. HESELTON. That is a good question, and I think a just one. The only thing that I would recommend in the case of an individual wanting to convert to coal is for him to get in touch with his dealer and see if he can guarantee uninterrupted coal deliveries. If he can, I would say convert.

You heard the story of the emergency situation in Northampton from the gentleman from Massachusetts [Mr. CLASON]. All I can do is to ask those of

you interested to join me in presenting this matter to the other body.

At this point I wish to thank the gentleman from Texas [Mr. RAYBURN], former Speaker of the House, for helping us out. We deeply appreciate his understanding, that of his colleague the gentleman from Texas [Mr. THOMAS], of the gentleman from Florida [Mr. HENDRICKS], and of the gentleman from Alabama [Mr. ANDREWS]. We appreciate the help all of you gave us in this first step. We are sure you will continue to listen sympathetically to any suggestion which you feel is constructive. When you suffer from disasters, such as tornadoes, floods, or explosion, I think you have found a quick and unquestioning response from the Northeast when you called for assistance. Our neighbors, our constituents in the Northeast, need your help now. And we are confident of your response. It is a weighing of the resources we have to judge. Our own committee has recommended unanimously making a prompt study of this whole long-range problem by a joint committee, and I have yet to see a single editorial against it.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. BATES of Massachusetts. Mr. Speaker, I ask unanimous consent that the gentleman may proceed for five additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, that is my plea. You may be sure we will do the best we can. I have been told that the bituminous stocks in New England are adequate. It is true, of course, that they may not be able to get the kind of coal they want. You might have to burn something different than you would like to burn.

Mr. PHILBIN. But the supply may not be adequate if we convert too many of these oil-burning units. There is another question I would like to ask at this point. Could the gentleman give the House any enlightenment as to the status of the oil and petroleum embargo bill that he introduced and which I understand is now pending in committee? May we expect that to be considered by the House very shortly?

Mr. HESELTON. Hearings are scheduled to begin tomorrow. I believe witnesses are listed for tomorrow and Friday. I may say very frankly to the gentleman that there is a growing sentiment among a lot of our colleagues to advocate full embargoes on petroleum and petroleum shipments. I do not altogether share this point of view because I think it might be very dangerous. I am not an expert in this thing. I think though we might upset our present intricate trade arrangements in other fields. However, I would like to see an embargo imposed at once until we can find out what the situation is, an embargo of 15, 20, 25, or 30 days. My bill does not provide for that. I have two alternatives. My second bill advocates that we cut down 50 percent to key into the Canadian export program and the exports of countries that have been dependent upon us. But to any country that cannot show that we have exported to them from 1934 to 1938 we are justified in saying "We are sorry, but we cannot send more over to you just now."

Mr. PHILBIN. Could the gentleman give us any idea when we may expect this legislation to reach the floor of the House for action?

Mr. HESELTON. I cannot. As far as I am concerned, I shall urge quick action. I hope we can get to it next week, but I do not know. I think that is a question that should be addressed to the chairman and ranking members of the committee.

Mr. PHILBIN. May I make a further inquiry of the gentleman? Do I understand that the gentleman's position is he advocates an immediate and total embargo pending a determination of these questions as to whether or not we can provide enough oil for our own people?

Mr. HESELTON. That is the unanimous recommendation of the committee, as you will find in the RECORD. It is a drastic thing, but we are trying to meet a drastic condition.

Mr. PHILBIN. I am glad to have that information.

Mr. BATES of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield to the gentleman from Massachusetts.

Mr. BATES of Massachusetts. I would be a little remiss if I did not compliment the Member from Massachusetts for the very excellent work he has been doing in respect to the petroleum situation. May I further say that in all my years of experience here I have never seen both sides of the aisle so completely represented in joint action as in reference to this very important matter that is affecting the welfare of the people of our part of the country. I know the Speaker of the House, the majority leader, and the gentleman from Massachusetts [Mr. MCCORMACK] have been working hand in hand, and the entire New England delegation has been working as a unit in respect to this matter. There has been no partisanship involved. We are trying to do what we can for the common good of our part of the country irrespective of party lines, because this is not a party issue. This is a matter that is of importance to all the people we represent here in Congress. All these men are doing an excellent work.

Mr. HESELTON. I agree with the gentleman and I think we owe a debt of gratitude to all of the gentlemen who have taken the lead in this matter.

Mr. MCCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield to the gentleman from Massachusetts.

Mr. MCCORMACK. That is the thing I want to see maintained. I sat here very comfortably until the gentleman mentioned my name, and I wondered why the gentleman picked on me especially. Naturally under those circumstances, I respond as gently as I can.

Mr. HESELTON. The reason I picked on the gentleman is because I am very fond of him, and always like to have him help me in my struggles. He will recall that in my first year here, he tried to help me in a motion I thought would be fairer to the farmers of New England. That is characteristic of him.

Mr. MCCORMACK. That is mutual, I assure the gentleman. I want to amplify what the gentleman from Massachusetts [Mr. BATES] stated and the gentleman from Massachusetts [Mr. PHILBIN] stated. During the war we had our trying problems and we always worked together.

Mr. HESELTON. The gentleman would not want me to give a secret away, would he, how he worked so effectively with some one during the war?

Mr. MCCORMACK. That is over with now. But, my friend, the gentleman from Massachusetts [Mr. BATES], of the Committee on Naval Affairs, cooperated with me when we got some tankers up to Boston in the middle of the winter one time when it was 20 degrees below zero; at a time when the German U-boats were sinking our tankers and our ships, but particularly our tankers, and the Navy cooperated very effectively. There has always been cooperation. The New England delegation has always cooperated on this and on any other situation that called for attention in our section of the country.

Mr. HESELTON. And if I have a situation in my part of the State and you have a situation in your part of the State, we always cooperate.

Mr. MCCORMACK. I would cooperate in every way possible and, again, we want to keep that close cooperation intact.

Mr. HESELTON. I agree with the gentleman.

Mr. MCCORMACK. Let me ask the gentleman one further question. Has the gentleman any views as to whether or not the situation existing is such, at least so far as those tankers that were owned by the Government are concerned, and disposed of, that there should be power in an emergency some place, in some Federal agency, to direct the American companies to use those tankers to meet the emergency, whether in New England, New York, New Jersey, Pennsylvania, or any other section of the country?

Mr. HESELTON. I have a definite personal opinion. The gentleman may not know it, but the chairman of my committee filed a bill to extend the power of the Maritime Commission to do just that. I think it is an excellent idea. I think we have to meet this situation. The Interstate and Foreign Commerce Committee has demanded that the Maritime Commission do just exactly that, and they have undertaken to do it, and to some extent they have been successful. We propose to carry that fight right straight along.

Mr. MCCORMACK. I might also say that the observation of the gentleman about next winter and the winter after, looking ahead, is a very sound one, because while we have to meet the immediate situation as best we can, we have

to realize that this is probably a condition that will continue from 3 to 5 years, and we should do our planning now.

Mr. HESELTON. Right.

Mr. McCORMACK. And judging by our experience now, it will be very beneficial in minimizing the impact next winter and the next three or four winters to come.

Mr. HESELTON. I thank the gentleman very much for his contribution, and also my colleagues from all New England.

Revised first quarter, 1948, country quotas of petroleum products

The SPEAKER. Under previous order of the House, the gentleman from Pennsylvania [Mr. BUCHANAN] is recognized for 20 minutes.

THE HOUSING SHORTAGE

Mr. BUCHANAN. Mr. Speaker, the continuing critical housing shortage throughout the United States is the basic reason for continuing rent control. Among the many factors which have contributed to the housing shortage are three: First, the lack of normal residential construction during the war years; second, the increase in the number of marriages and new families; and, third, the great shifts in population from rural areas to urban centers. The Bureau of the Census reports that for all nonfarm dwelling units in the United States the vacancy rate in 1947 for habitable dwelling units offered for rent was only one-half of 1 percent. A further indication of the shortage may be found in the number of families who are living doubled up with other families. According to the Bureau of the Census, about 2,764,000 married couples, or 8.3 percent of all married couples in private households, were living doubled up in April 1947. This represents an increase of about 50 percent over the corresponding number of 1,864,000 who were living doubled up in 1940.

The House Banking Committee opened hearings on rent control yesterday and heard the Housing Expediter, Mr. Woods, and today we heard representatives of the veterans' groups.

There are many bills before our committee, but I should like to comment briefly on H. R. 4728, which contain essentially the Housing Expediter's recommendations.

H. R. 4728 amends the Housing and Rent Act of 1947 and would be known as the Housing and Rent Extension Act of 1948. Essentially, it would continue the programs of rent control, limitations on construction for amusement or recreational purposes, and veterans' preference until March 1, 1950, and would continue the Office of the Housing Expediter to that date for the purpose of administering them. In addition, it clarifies the purposes of the Housing and Rent Act by adding a declaration of purposes, sets the rent agreed upon under the present 15-percent lease provision as the maximum rent for the effective period of the lease but deletes the provisions removing housing accommodations so leased from rent control, gives the Housing Expediter the right to sue for overcharges if the tenant does not, strengthens the enforcement and eviction provisions by providing for criminal sanctions for willful violations of the act and by authorizing the Housing Expediter to conduct investigations and hearings.

Under the present rent act, units on which landlord and tenant sign a voluntary lease for not more than 15 percent above the maximum rent which carry over until at least January 1, 1949, are decontrolled as of December 31, 1947. This means that should any tenant violate an obligation of his tenancy or otherwise terminate his lease, the unit is thereafter free from control. It is fairly evident that there would be tremendous pressure to void these leases so as to remove these units from all controls. This bill would amend the present act to continue to hold these units under rent control but to honor the 15-percent rent increase for as long as the lease exists.

This bill continues the local advisory boards with all the powers they now have to recommend to the Housing Expediter actions on decontrol, the adequacy of the general rent level, operations of the local rent office and individual hardship cases. It would continue to allow the Housing Expediter to exercise his judgment as to whether a local board recommendation has been properly substantiated and is in accordance with the provisions of the act.

This bill strengthens the enforcement provisions so as to give the Housing Expediter the right of treble-damage action against willful and flagrant violators and also to permit the Housing Expediter to refer to the Attorney General willful and flagrant violators for criminal action. This is a necessary amendment because the present provision of the act giving the tenant the right of treble damage has failed to cure violations. It is not working because tenants are more afraid of losing the roof over their heads than they are desirous of obtaining monetary damages. Experience shows that generally law-abiding landlords who always obey the law are still obeying but that the old violators are boldly overcharging and accepting bonuses and side payments. When they are caught, they simply make restitution and unless an injunction is obtained proceed to commit the same violations all over again.

The following data will be of interest in connection with rent control:

As of June 30, 1947, there were 17,004,325 registration statements of rental housing units on file in area rent offices. This figure is the total number of registrations filed by landlords in areas under rent control on June 30, 1946, and includes all housing units rented at any time during the period of rent control.

It is estimated that there were 15,700,000 housing units actually being rented on June 30, 1947. This estimate was calculated by deducting from the total number of registrations the 937,675 rented units for which certificates of eviction were issued for purchaser occupancy in the files. It should be noted that the estimate of 15,700,000 units being rented on June 30, 1947, includes certain sublet housing units which are excluded from rental housing estimates by the Bureau of the Census.

It is estimated that, as of December 1, 1947, there were 63,000 newly constructed housing units, 24,000 converted units, and 10,000 units not rented between February 1, 1945, and January 31, 1947, which were decontrolled by the Housing and Rent Act of 1947.

From July 1, 1947, to January 2, 1948, the Housing Expediter issued 19 decontrol orders affecting an estimated 30,780 housing rental units. Of the 19 decontrol orders issued, 14 were taken upon recommendation of local rent advisory boards and 5 were taken by the Expediter upon his own initiative.

As of January 2, 1948, there were 1,634,855 copies of leases, providing for

rent increases up to 15 percent, on file in area rent offices. The housing units covered by these leases were decontrolled January 1, 1948. No tabulation has been kept of the amount of rent increase stipulated in these leases but area rent directors have indicated that the vast majority provided for the full 15-percent increase permitted under the act.

It is estimated that 1,250,000 rental units in hotels, motor courts, and tourist homes were automatically decontrolled by the Housing and Rent Act of 1947. This estimate is based on monthly reports from area-rent offices, estimates of the American Automobile Association and the Census of Business. The Census of Business for 1939 indicated that there were almost 1,500,000 hotel rooms in the United States. (No deduction was made from this figure for hotel rooms in areas not under rent control since it was assumed that such a deduction would be offset by the increase in hotel rooms since 1939.) Prior to July 1, 1947, applications for decontrol of transient rooms in hotels were filed with area-rent officers for almost 500,000 rooms. Of the 1,000,000 hotel rooms remaining under control on June 30, 1947, it is estimated that 700,000 became eligible for decontrol under the Housing and Rent Act of 1947. The American Automobile Association estimates that there are 550,000 units in motor courts and tourist camps. It is estimated that 450,000 units are in controlled areas and were decontrolled under the Housing and Rent Act. The American Automobile Association also estimated that prior to the war there were about 50,000 tourist homes with an average of four units each and that the number today is approximately the same. It is estimated that about half of the 200,000 rooms in tourist homes became eligible for decontrol under the new act. It is thus estimated that there were 700,000 units decontrolled in hotels, 450,000 units in motor courts, and 100,000 units in tourist homes.

It is estimated that there were 2,215,000 rooming-house units under rent control as of July 1, 1947. This figure was estimated by subtracting the number of units decontrolled in hotels, motor courts, and tourist homes from the number of units subject to the hotel- and rooming-house regulation on June 30, 1947.

As of January 2, 1948, 667 local rent-advisory boards have been appointed in 553 areas. Of this number 37 have recommended decontrol actions, 14 of which were approved, 13 rejected for lack of substantiating evidence, and 10 were pending final action. As of the same date, 36 boards have recommended general rent increases, 2 of which were approved, 4 rejected for lack of substantiating evidence and 30 were pending final action. None of the recommendations were more than 30 days old.

In addition to specific recommendations for decontrol and general rent increases, the local rent advisory boards have submitted many suggestions and recommendations which have been very helpful in improving operations generally in the local area rent offices. As of the end of December, 241 of the 667 rent advisory boards appointed had also accepted 3,426 individual hardship cases for review.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Can the gentleman state what the average increase in residential rents was from the time we put on an effective rent-control law? As I remember, from the latter part of 1942 until the law was virtually repealed on June 30, 1947, the average increase was 1.1 percent.

Mr. BUCHANAN. You are substantially correct. I was going to say much less than 2 percent.

Mr. McCORMACK. My recollection is that it is 1.1 percent. It is my recollection also in a survey of thirty-odd cities made by the Department of Labor under the present law that during July, August, September, and October, 4 months, it was found that the average increase was 5.2 percent. In other words, in that period of 4 months, residential rents increased nearly five times as much as they did for approximately 4½ years prior to June 30, 1947.

Mr. BUCHANAN. The gentleman is substantially correct.

Mr. McCORMACK. My investigation also shows that about 1,600,000 leases were made under the 15-percent provision.

Mr. BUCHANAN. That is about 10 percent of the total number.

Mr. McCORMACK. Yes; about 10 percent. About 16,000,000 families in America are involved.

Mr. BUCHANAN. That is correct.

Mr. McCORMACK. However, there is a large percentage of violations where there is no lease and where there are increases above the ceiling which cannot be ascertained because the tenants are afraid to make a complaint. Is that not the situation?

Mr. BUCHANAN. That is exactly the situation. That was testified to yesterday and again this morning by the Housing Expediter.

Mr. McCORMACK. What happened when the majority of the Congress and the gentleman from Pennsylvania and I opposed it last year was that this legislation resulted in an invitation practically to go ahead and make increases without regard to the tenants because the tenants were afraid to make reports to the Housing Expediter or the regional offices.

Mr. BUCHANAN. The tenants were afraid to complain. They wanted a roof over their heads.

Mr. McCORMACK. One case was called to my attention where a man was paying $60 a month rent according to his check, but he had to pay $40 cash in addition.

Mr. BUCHANAN. Many cases like that have been reported.

Mr. McCORMACK. That situation is growing, as I understand it. The Housing Expediter had the power to control during the war because the Housing Expediter or the representative in the regional office could go into court and collect treble damages.

Mr. BUCHANAN. That is true.

Mr. McCORMACK. That authority has been taken away.

Mr. BUCHANAN. That is right. It has been taken away.

Mr. McCORMACK. Now the only thing that remains is that the tenant can go into court and sue and get three times the damages but the tenants are not suing. Is that not correct?

Mr. BUCHANAN. The gentleman is exactly right, because the tenants are too fearful of the consequences.

Mr. McCORMACK. In other words, when the dignity and strength of the Federal Government was involved and a Federal official could go in and sue, then the law was respected.

Mr. BUCHANAN. We had effective rent control then.

Mr. McCORMACK. Furthermore whenever there was a vacancy the landlord had to make a report to the rent control office or the Housing Expediter's office. Is that not correct?

Mr. BUCHANAN. That is right.

Mr. McCORMACK. That does not have to be done now, does it?

Mr. BUCHANAN. That is true; they do not have to make a report now.

Mr. McCORMACK. So last year we took away the real power to effectively control rents and the conditions throughout the country at the present time are terrible and growing worse and worse. Is that not right?

Mr. BUCHANAN. We have a skeleton compliance force now; that is about all.

Mr. McCORMACK. In addition the appropriations were reduced last year for this fiscal year for the Housing Expediter and the regional offices to even carry out the very slight powers that were generously permitted to remain in the act which was passed by a majority of this body last year, is that not correct?

Mr. BUCHANAN. That is correct.

Mr. McCORMACK. Up in New England I remember they had to reduce the regional offices from about 170 to 69. On the one hand they took away the power to enforce and on the other they reduced appropriations, so that they could not employ enough help to carry out with any degree of effectiveness the slight powers that remained in the present law, is that not correct?

Mr. BUCHANAN. Yes; and the same is true with regard to the construction limitation regulation pertaining to recreational and amusement construction. The Housing Expediter specifically stated that he had merely a compliance force of about 40 and that he needed a minimum of about 300 if he was going to be able to make the compliance provisions effective, and that he recommended that either they take this provision out of the law or give him the necessary compliance officers to enforce the CLR regulation.

Mr. McCORMACK. In addition the law passed last year wiped away any controls over nonessential construction, which interfered with the building of homes; is that not correct?

Mr. BUCHANAN. That is true.

Mr. McCORMACK. The only thing they left under control was bowling alleys and recreational buildings such as that.

Mr. BUCHANAN. With the beforementioned weaknesses.

Mr. McCORMACK. The gentleman is an authority on this and has devoted his attention to this type of legislation. What is the gentleman's opinion as to the law that was passed last year in regard to protection of the tenants in this emergency?

Mr. BUCHANAN. I opposed the law last year, as did my colleague, on the basis that the law as set up had a skeleton framework for effectively carrying out the provisions of the act as written. In addition to that, it had the weapon of a so-called voluntary blackjack provision, which I opposed vehemently and which by experience has proven that it has been ineffective and has not worked, because less than 10 percent have entered into such lease agreements. However, in reenacting this law, I believe that those people should be protected for the period of any extension, if there is to be an extension.

Mr. McCORMACK. Certainly, because they are decontrolled now.

Mr. BUCHANAN. That is right.

Mr. McCORMACK. The only protection they have is their lease until the end of the year, but if they move out for any reason——

Mr. BUCHANAN. That property is decontrolled.

Mr. McCORMACK. Or, if any conditions are imposed where the tenant cannot tolerate them, then they move out and there is complete decontrol.

Mr. BUCHANAN. That is right.

Mr. McCORMACK. Is it the gentleman's opinion that the rent-control law should be extended and some teeth put into it?

Mr. BUCHANAN. We should augment it and strengthen it by making these weak provisions strong and effectively workable. Unless we do that we are going to have a continuous degrading of the act and complete refusal to comply with the provisions. So rather than have a weak, ineffective law, as we do have now, let us write into the extension of the rent-control law provisions which will be effective and will give the Housing Expediter the necessary legal implements to enforce compliance, or else let us not have any further extension at all.

Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Massachusetts [Mr. LANE] is recognized for 15 minutes.

NEW POST OFFICE SITES NEEDED FOR LAWRENCE, MASS., AND NORTH ANDOVER, MASS.

Mr. LANE. Mr. Speaker, the small and cramped quarters of the post offices at Lawrence, Mass., and at North Andover, Mass., do not permit these essential agencies to give prompt and convenient service to the citizens and the business interests of these areas.

In both cases, a steadily increasing volume of mail has led to demands for more space in order to handle the greater work load.

This is reflected in the results of a recent survey made by the Post Office Department which recommends a sizable addition to the number of employees in this postal district. Clearly, more workers need more space.

With this in mind, I ask for favorable consideration of a bill which I am introducing today "to provide for the construction of certain public buildings, and for other purposes," so amended as "to provide for the acquisition of sites and the preparation of plans for Federal public buildings, and for other purposes."

There is a need for extra facilities at Lawrence and North Andover, Mass., now. There will be a greater need later. Even if we cannot secure the new buildings at once, we can lay the ground work for the future. By anticipating, we can be ready.

The Lawrence post office is 44 years old. It was built to accommodate the needs of a community that is much larger than it was in 1904. Apart from the population factor, the functions of the post-office building has added to the strain.

During the 1930's, when there was a huge Federal building program in operation designed to take up the work slack in our depressed economy, Lawrence was bypassed.

To the west of us, the city of Lowell got a brand-new post office and Federal building. To the east, in the city of Haverhill, another was built. To the south, in Lynn, a large and beautiful structure was erected.

But in Lawrence, only a small annex was attached to a post office that was fast becoming obsolete.

Apart from the expanding needs of the post-office department, this building is not large enough to house other Federal agencies. The Veterans' Administration is forced to rent space in a private building, at considerable extra cost to the Government, to serve the veterans in this section.

The Government is also suffering from the acute housing shortage with consequent impairment of service.

The Navy recruiters at the Lawrence Post Office are crowded into a 6 by 8 room. The Army recruiter has a chair and a table in the corridor. The marine recruiter stands up.

When the rent-control representative comes to this city, he has to borrow the civil-service examination room. The Department of Justice—Immigration Service—does likewise. When an examination is on, they have to borrow a corner in some other office, where the troubles of individual citizens are aired to everyone's embarrassment.

In this city with an area of 3 miles by 2 miles and a population of 84,000, it is necessary for the post office to hire quarters for a substation in a more central location to provide for the overflow of postal business and in order to service the industries and the merchants of this community.

As far back as August 12, 1946, a field investigation conducted by the Federal Works Agency of the Public Buildings Administration revealed that:

> While existing postal facilities are adequate for the time being, there appears to be a future requirement of approximately 6,000 square feet of additional office space for nonpostal agencies of the Government located at Lawrence.

On August 14, 1946, the Fourth Assistant Postmaster General reported that:

> The inspector states further, that there has been considerable criticism of the inadequate facilities at city hall station, and some comment that the main post office should be located near the center of business.

Still earlier, on October 3, 1945, under a program submitted to Congress by Federal Works Administrator Philip B. Fleming and Postmaster General Robert Hannegan, authorizing Federal building construction throughout the country, funds were earmarked in the amount of $95,000 for the North Andover branch of the Lawrence postal district.

The Lawrence post office is located north of the Merrimack River and the railroad station is south of it. This causes loss of time and extra wear and tear on vehicles engaged in collecting and delivering mail to the trains.

Furthermore, because of insufficient space in the Lawrence post office, all parcel-post packages have to be taken to the second floor for sorting and then taken down again to the main floor, resulting in extra effort, which costs the Government more in the long run.

Lawrence is the halfway point on the main artery leading from Boston, Mass., to Manchester, N. H. Ten miles to the west, on the Merrimack River, is the city of Lowell. Eight miles to the east, also on the Merrimack, is the city of Haverhill. Lawrence is, therefore, the communications hub for northeastern Massachusetts, and should properly be the center for all district offices of the Federal Government in this area. Due to lack of foresight in providing a large and adequate post office and Federal building at Lawrence, the cities and towns of the Merrimack Valley have been unable to enjoy the convenient service of the many agencies operating under the Federal Government.

The bill I propose will amend the act approved May 25, 1926, to provide for the acquisition of sites and preparations of plans for such Federal public buildings as may be deemed necessary by the Public Buildings Commissioner under the supervision of the Federal Works Administrator, with the concurrence of the Postmaster General where his Department is involved.

The Public Buildings Commissioner, under the above-mentioned supervision, is authorized to acquire by purchase, condemnation, donation, exchange, or otherwise lands or interest in lands or sites or additions to sites for Federal public building projects previously authorized and for such new projects as may be deemed necessary by the Public Buildings Commissioner, and to cause to be prepared plans, drawings, and specifications for such projects.

The total estimated cost of the sites and plans for the project to be selected under the provisions of this act shall not exceed in the aggregate $25,000,000. Selection of new projects for the foregoing purposes shall be made by the Federal Works Administrator and the Postmaster

General from the list contained in their revised report.

In making such selections, they shall endeavor to distribute the selected projects equitably throughout the United States upon the basis of the relative need for the projects and the comparative costs of providing suitable accommodations in leased space.

The need for a new post office and Federal building at both Lawrence and North Andover, Mass., was evident even before the war, but has been put off for 8 years due to wartime and postwar emergencies.

There can be no further delay in meeting these needs without interfering with the efficient operations of the various Federal services in northeastern Massachusetts.

It is my considered opinion that this bill should become law, so that we may be able to give improved service to the individuals and to the business establishments of those areas such as Lawrence and North Andover which are in need of larger accommodations.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 664. An act for the relief of Mr. and Mrs. Edward H. Isenhart;

S. 1005. An act to amend the act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union";

S. 1394. An act to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; and

S. 1411. An act for the relief of Willie Ruth Chapman.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 54 minutes p. m.) the House adjourned until tomorrow, Thursday, February 5, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1286. A letter from the Secretary of Labor, transmitting a report on the economy of Hawaii in 1947, with special reference to wages, working conditions, and industrial relations; to the Committee on Public Lands.

1287. A letter from the Secretary, United State Department of Justice, transmitting the Annual Report of the Directors of the Federal Prison Industries, Inc., for the fiscal year 1947; to the Committee on the Judiciary.

1288. A letter from the Secretary of the Interior, transmitting a report on the activities of, expenditures by, and donations to the Bureau of Mines anthracite research laboratory to be constructed at Schuylkill Haven, Pa.; to the Committee on Public Lands.

1289. A letter from the Attorney General, transmitting the seventeenth and last report of the Attorney General, covering the period from October 1, 1947, through January 25, 1948; to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WOLVERTON: Committee on Interstate and Foreign Commerce. Progress report on fuel investigation, pursuant to section 136 of the Legislative Reorganization Act of 1946; without amendment (Rept. No. 1321). Ordered to be printed.

Mr. BROWN of Ohio: Committee on Rules. House Resolution 447. Resolution authorizing the Committee on Armed Services to continue its investigation on matters coming within jurisdiction of the committee; without amendment (Rept. No. 1322). Referred to the House Calendar.

Mr. BROWN of Ohio: Committee on Rules. House Resolution 453. Resolution for consideration of H. R. 2161, a bill to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190); without amendment (Rept. No. 1323). Referred to the House Calendar.

Mr. LECOMPTE: Committee on House Administration. House Resolution 359. Resolution authorizing the printing as a document the reports of the Special Tax Study Committee to the Committee on Ways and Means, dated November 4, 1947, and providing for additional copies thereof; with an amendment (Rept. No. 1324). Referred to the House Calendar.

Mr. LECOMPTE: Committee on House Administration. House Resolution 421. Resolution providing additional funds for the conduct of the investigation and study of reorganization and home rule for the District of Columbia; without amendment (Rept. No. 1325). Referred to the House Calendar.

Mr. LECOMPTE: Committee on House Administration. House Resolution 405. Resolution to provide funds for the expenses of the investigation and study authorized by House Resolution 18; with an amendment (Rept. No. 1326). Referred to the House Calendar.

Mr. ELSTON: Committee on Armed Services. S. 1961. An act to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; without amendment (Rept. No. 1327). Referred to the Committee of the Whole House on the State of the Union.

Mr. HESS: Committee on Armed Services. H. R. 4721. A bill to remove the statutory limit of appropriation expenditures for repairs or changes to a vessel of the Navy; without amendment (Rept. No. 1328). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JENNINGS: Committee on the Judiciary. H. R. 1392. A bill for the relief of Mrs. Charlotte E. Harvey; with an amendment (Rept. No. 1329). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 1667. A bill for the relief of the estate of T. L. Morris; without amendment (Rept. No. 1330). Referred to the Committee of the Whole House.

Mr. CRAVENS: Committee on the Judiciary. H. R. 1786. A bill for the relief of Jesse A. Lott; with an amendment (Rept. No. 1331). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. H. R. 2013. A bill for the relief of Mrs. Sirvart Arsenian; without amendment (Rept. No. 1332). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2633. A bill for the relief of Claude T. Thomas, legal guardian of Elizabeth Ann Mervine, a minor, and the estates of Mary L. Poole, deceased, and Hazel S. Thomas, deceased; with an amendment (Rept. No. 1333). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2806. A bill for the relief of the estate of H. M. McCorvey; without amendment (Rept. No. 1334). Referred to the Committee of the Whole House.

Mr. CRAVENS: Committee on the Judiciary: H. R. 3964. A bill for the relief of Thomas D. Sherrard; without amendment (Rept. No. 1335). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 4246. A bill for the relief of J. L. Hitt; without amendment (Rept. No. 1336). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 4541. A bill for the relief of Jesse F. Cannon, Jackson Jones, and the estate of John Halstadt; without amendment (Rept. No. 1337). Referred to the Committee of the Whole House.

Mr. CRAVENS: Committee on the Judiciary. H. R. 4569. A bill for the relief of Herbert L. Hunter; without amendment (Rept. No. 1338). Referred to the Committee of the Whole House.

Mr. CRAVENS: Committee on the Judiciary. H. R. 4570. A bill for the relief of Howard A. Yeager; without amendment (Rept. No. 1339). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 4593. A bill for the relief of Abraham Spevak; with an amendment (Rept. No. 1340). Referred to the Committee of the Whole House.

Mr. CRAVENS: Committee on the Judiciary. H. R. 4672. A bill for the relief of John Cameron Henry; without amendment (Rept. No. 1341). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COLE of Missouri:

H. R. 5272. A bill relating to the compensation of certain railway postal clerks; to the Committee on Post Office and Civil Service.

By Mr. GRAHAM:

H. R. 5273. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. HERTER:

H. R. 5274. A bill to amend the Norris-LaGuardia Act with respect to the definition of the term "labor dispute"; to the Committee on the Judiciary.

By Mr. HOLMES:

H. R. 5275. A bill to amend the Tariff Act of 1930 to provide for the free importation of limestone to be used in the manufacture of fertilizer; to the Committee on Ways and Means.

By Mr. LANE:

H. R. 5276. A bill to amend the act entitled "An act to provide for the construction of certain public buildings, and for other purposes," approved May 25, 1926, to provide for the acquisition of sites and the preparation of plans for Federal public buildings, and for other purposes; to the Committee on Public Works.

By Mr. MURRAY of Wisconsin:

H. R. 5277. A bill to repeal the act of June 5, 1940, entitled "An act to prohibit the exportation of tobacco seed and plants, except for experimental purposes"; to the Committee on Agriculture.

By Mr. CROW:

H. R. 5278. A bill to provide for limiting participation as beneficiary under National Service Life Insurance Act, as amended, and for other purposes; to the Committee on Veterans' Affairs.

H. R. 5279. A bill to amend the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DIRKSEN:

H. R. 5280. A bill to amend section 106 of the act of October 31, 1945, so as to eliminate the segregation of races at the Washington National Airport; to the Committee on the District of Columbia.

By Mr. GEARHART:

H. R. 5281. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. HAGEN:

H. R. 5282. A bill to increase the pensions of widows and children of deceased veterans of World Wars I and II and to liberalize certain of the eligibility requirements for such pensions; to the Committee on Veterans' Affairs.

By Mr. HARDY:

H. R. 5283. A bill to provide for the disposal of surplus sand at Fort Story, Va.; to the Committee on Armed Services.

By Mr. MITCHELL:

H. R. 5284. A bill repealing certain provisions of the Internal Revenue Code, relating to the tax on oleomargarine, and for other purposes; to the Committee on Agriculture.

By Mr. JAVITS:

H. R. 5285 A bill to amend the Internal Revenue Code, act of February 10, 1939; to the Committee on Ways and Means.

By Mr. ENGLE of California:

H. R. 5286. A bill to amend the Federal Airport Act; to the Committee on Interstate and Foreign Commerce.

By Mr. REED of Illinois:

H. R. 5287. A bill to amend section 58d of an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

By Mr. RUSSELL:

H. R. 5288. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. RIVERS:

H. J. Res. 318. Joint resolution to prohibit the Civil Aeronautics Board from rendering any decisions until the existing vacancies on the Board are filled; to the Committee on Interstate and Foreign Commerce.

By Mr. LESINSKI:

H. Res. 454. Resolution to investigate whether the provisions of the Public Utility Holding Company Act of 1935, as amended, and regulations promulgated thereunder have been violated; to the Committee on Rules.

By Mr. ANDREWS of New York:

H. Res. 455. Resolution providing funds for the expenses of conducting the studies and investigations to be continued under the authority of H. Res. 447, Eightieth Congress; to the Committee on House Administration.

By Mr. FARRINGTON:

H. Res. 456. Resolution authorizing the printing as a House document of a report entitled "The Economy of Hawaii in 1947"; to the Committee on House Administration.

By Mr. DINGELL:

H. Res. 457. Resolution to investigate shortages of natural gas, fuel oil, and other petroleum products in the State of Michigan; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLOOM:

H. R. 5289. A bill for the relief of Miroslav (Fred) Schiller; to the Committee on the Judiciary.

By Mrs. ST. GEORGE:

H. R. 5290. A bill for the relief of Ewa K. Sudol; to the Committee on the Judiciary.

By Mr. SHEPPARD:

H. R. 5291. A bill for the relief of Harry Warren; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1303. By Mr. BARTLETT: Petition of Post No. 4352, Veterans of Foreign Wars, Ketchikan, Alaska; American Legion Auxiliary, Ketchikan, Alaska, Ketchikan Union, No. 3; Ketchikan, Alaska, Chamber of Commerce; Business and Professional Women's Club, Ketchikan, Alaska; Post No. 4352, Veterans of Foreign Wars Auxiliary, Ketchikan, Alaska; Women of Moose, Ketchikan, Alaska; American Legion Post, No. 3, Ketchikan, Alaska; American Legion Auxiliary, Anchorage, Alaska; American Legion Auxiliary, Sitka, Alaska; to the Committee on Armed Services.

1304. By Mr. ELSTON: Petition of Frederic E. Holmes and 30 other citizens of Cincinnati, Ohio, in support of universal military training; to the Committee on Armed Services.

1305. Also, petition of Frederick Laffey and 96 other citizens of Cincinnati and Madeira, Ohio, and vicinity, in support of universal military training; to the Committee on Armed Services.

1306. Also, petition of Gilbert Holocher and 44 other citizens of Cincinnati, Ohio, and vicinity, in support of S. 1849, a bill to increase the compensation of postal employees $1,000 a year, and H. R. 2985, a bill to grant postal employees appointed subsequent to armed service in World War II credit for time spent in the armed forces for purposes of determining their salary grade; to the Committee on Post Office and Civil Service.

1307. Also, petition of Verner G. Rowe and 33 other citizens of Cincinnati, Ohio, and vicinity, in support of universal military training; to the Committee on Armed Services.

1308. By Mr. JENSEN: Petition of Louis J. Duewel and 65 others, of Tabor, Iowa, for complete abolition of liquor traffic; to the Committee on Interstate and Foreign Commerce.

1309. By Mr. JENISON: Petition signed by 216 residents of Edgar County, Ill., submitted by John G. Keller, national defense chairman, the American Legion, Paris Post, No. 211, Paris, Ill., petitioning the Congress to enact legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1310. By Mr. WELCH: Resolution of the Board of Supervisors of the City and County of San Francisco, San Francisco, Calif., petitioning Congress that the construction limitation regulations of the Federal Office of Housing Expediter be amended to permit immediate construction of adequate facilities for physical culture to diminish the juvenile problem; to the Committee on Banking and Currency.

SENATE

THURSDAY, FEBRUARY 5, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

We confess, O Lord, that we think too much of ourselves, for ourselves, and about ourselves.

If our Lord had thought about Himself, we would not now be bowed in prayer, nor have the liberty in which and for which to pray.

If the great men whom we honor for their part in building our Nation had thought about themselves, we would have no free Republic today. Help us to see, O Lord, that "I" is in the middle of sin, and let no man among us think more highly of himself than he ought to think, to the end that we may be used of Thee in Thy service for the good of all mankind.

Through Jesus Christ our Lord. Amen.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, February 4, 1948, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, announced that the House insisted upon its amendments to the bill (S. 1393) to increase the permitted rate of allowance and compensation for training on the job under Veterans' Regulation No. 1 (a), as amended, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mrs. ROGERS of Massachusetts, Mr. KEARNEY, Mr. O'KONSKI, Mr. RANKIN, and Mr. ALLEN of Louisiana were appointed managers on the part of the House at the conference.

The message also announced that the House had passed a bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive

bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes, in which it requested the concurrence of the Senate.

MEETINGS OF COMMITTEES DURING SESSION OF THE SENATE

Mr. WHERRY asked and obtained consent for the Subcommittee on Allocation of Grains of the Committee on Banking and Currency to hold a hearing today during the session of the Senate.

Mr. LANGER asked and obtained consent for the Subcommittee on Civil Service of the Committee on Post Office and Civil Service to hold a hearing this afternoon during the session of the Senate.

Mr. CAIN asked and obtained consent for the Subcommittee on Rents and Housing of the Committee on Banking and Currency to hold a hearing this afternoon.

Mr. KNOWLAND asked and obtained consent for the Senate Committee on Labor and Public Welfare to meet during this afternoon's session of the Senate.

Mr. KNOWLAND (on behalf of Mr. MOORE) asked and obtained consent for a subcommittee of the Committee on Interstate and Foreign Commerce to meet during the session of the Senate.

REPORT OF OPERATIONS UNDER BOULDER CANYON PROJECT ADJUSTMENT ACT

The PRESIDENT pro tempore laid before the Senate a letter from the Under Secretary of the Interior, transmitting, pursuant to law, the sixth annual report of operations under the Boulder Canyon Project Adjustment Act, which, with accompanying papers, was referred to the Committee on Interior and Insular Affairs.

EUROPEAN RECOVERY PROGRAM—RESOLUTIONS OF SENATE OF COMMONWEALTH OF MASSACHUSETTS

Mr. LODGE. Mr. President, on behalf of my colleague the senior Senator from Massachusetts [Mr. SALTONSTALL] and myself, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD resolutions adopted by the State Senate of the Commonwealth of Massachusetts memorializing the Congress to enact a sound and effective European recovery program.

There being no objection, the resolutions were received, referred to the Committee on Foreign Relations, and, under the rule, ordered to be printed in the RECORD, as follows:

Resolutions memorializing Congress to enact a sound and effective European recovery program

Whereas there is great need of aid by the United States to certain countries of Europe in order to protect the inhabitants of such countries from privation and starvation to assist them in their own efforts to restore their shattered economies and to prevent the spread of communism and to preserve the democratic form of life: Therefore be it

Resolved, That the Senate of the Commonwealth of Massachusetts hereby respectfully urges the Congress of the United States to enact as speedily as may be consonant with careful consideration a sound and effective European recovery program; and be it further

Resolved, That copies of these resolutions be sent forthwith by the secretary of the commonwealth to the President of the United States, to the Presiding Officer of each branch of Congress, and to the Members thereof from this Commonwealth.

In senate, adopted January 29, 1948.

IRVING N. HAYDEN,
Clerk.

A true copy. Attest:

[SEAL] T. W. COOK,
Secretary of the Commonwealth.

EUROPEAN RECOVERY PROGRAM

Mr. IVES. Mr. President, at its recent annual meeting the New York State Bar Association adopted a resolution pertaining to the European recovery program. The resolution has a distinct bearing on a question now before the Congress, and for that reason I feel it should appear in the RECORD. Therefore, I ask unanimous consent to present the resolution for appropriate reference and request that it be printed in the RECORD.

There being no objection, the resolution was received, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

"The New York State Bar Association recommends that Congress enact legislation in furtherance of the program for European recovery set forth in section 2 (b) of the draft bill that accompanied the President's message of December 19, 1947, to the Congress on this subject."

CERTIFICATE

I, Chester Wood, secretary of the New York State Bar Association, hereby certify that the foregoing is a true copy of the original resolution which was duly adopted by the association on the recommendation of its committee on international law, William Roy Vallance, chairman, at a regular session of the association held during its annual meeting on January 23, 1948, at the house of the association of the bar of the city of New York.

In witness whereof, I have hereunto set my hand and affixed the seal of said association, this 30th day of January 1948.

[SEAL] CHESTER WOOD,
Secretary.

NOTE.—The section 2 (b) referred to in the resolution was quoted in the printed report of the committee of the association, as follows:

"Section 2 (b) Purposes of act.—It is the purpose of this act to effectuate the policy set forth in subsection (a) of this section by furnishing material and financial assistance to the participating countries in such a manner as to aid them, through their own individual and concerted efforts, to become independent of abnormal outside economic assistance within the period of operations under this act, by

"(1) Promoting industrial and agricultural production in the participating countries;

"(2) Furthering the restoration or maintenance of the soundness of European currencies, budgets, and finances;

"(3) Facilitating and stimulating the growth of international trade of participating countries with one another and with other countries by appropriate measures including reduction of barriers which may hamper such trade."

COMMITTEE SERVICE

On motion of Mr. KNOWLAND (for Mr. ROBERTSON of Wyoming), and by unanimous consent, it was

Ordered, That the Senator from Idaho, Mr. DWORSHAK, be assigned to service on the Committee on the District of Columbia, to fill an existing vacancy thereon.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. GURNEY (for Mr. WILSON), from the Committee on Armed Services:

S. 1795. A bill to repeal section 1 of the act of April 20, 1874, prescribing regulations governing inquiries to be made in connection with disbursements made by disbursing officers of the Army (18 Stat. 33; 10 U. S. C. 174); without amendment (Rept. No. 884).

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on February 4, 1948, he presented to the President of the United States the following enrolled bills:

S. 664. An act for the relief of Mr. and Mrs. Edward H. Isenhart;

S. 1005. An act to amend the act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union";

S. 1394. An act to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; and

S. 1411. An act for the relief of Willie Ruth Chapman.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. TAFT, from the Committee on Labor and Public Welfare:

Sundry appointments and promotions in the United States Public Health Service.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

(Mr. WILEY (by request) introduced Senate bill 2131, for the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury claim board, which was referred to the Committee on the Judiciary, and appears under a separate heading.)

By Mr. BUTLER:

S. 2132. A bill to authorize the participation of States in revenues from national parks, national monuments, and other areas subject to the primary administrative jurisdiction of the National Park Service; to establish a National Park Land Commission and provide for the acquisition of lands within areas subject to the primary administrative jurisdiction of the National Park Service; and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ROBERTSON of Wyoming:

S. 2133. A bill transferring from the Secretary of the Navy to the Secretary of the Interior jurisdiction over lands of the United States within the boundaries of Naval Petroleum Reserves Nos. 2 and 3, and abolishing such naval petroleum reserves; to the Committee on Armed Services.

By Mr. CORDON:

S. 2134. A bill to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the postwar construction of highways, and for other purposes; to the Committee on Public Works.

By Mr. BALDWIN:

S. 2135. A bill to amend the Lanham Act so as to permit private sales of permanent

war housing to local communities; to the Committee on Banking and Currency.

S. 2136. A bill to permit members of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service, who have dependents, to occupy on a rental basis and without loss of rental allowances temporary housing facilities under the jurisdiction of any such service; to the Committee on Armed Services.

CLAIMS OF CERTAIN OFFICERS AND EMPLOYEES OF TREASURY DEPARTMENT

Mr. WILEY. Mr. President, by request of the Treasury Department, I ask unanimous consent to introduce for appropriate reference a bill to provide relief for certain officers and employees of that Department for losses sustained as a result of war conditions, and I request that the text of a letter which I received from the Acting Secretary of the Treasury, describing the bill and the reasons for it, be printed at this point in the RECORD.

The PRESIDENT pro tempore. Without objection, the bill will be received and appropriately referred, and, without objection, the letter will be printed in the RECORD.

There being no objection, the bill (S. 2131) for the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury Claim Board, introduced by Mr. WILEY (by request), was received, read twice by its title, and referred to the Committee on the Judiciary.

JANUARY 26, 1948.

The PRESIDENT PRO TEMPORE OF THE SENATE.

MY DEAR MR. PRESIDENT: There is transmitted herewith a draft of a proposed bill, "For the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury Claim Board."

The proposed bill would authorize and direct the Secretary of the Treasury to pay sums totaling not to exceed $19,259.80 to 25 persons employed by the Treasury Department. During the war these employees were stationed in foreign countries and engaged in the performance of official duties. The employees sustained losses of property due to bombing, fires, looting, damage or pilferage while in transit, and other reasons.

The Treasury Department had no authority to settle these losses, and with the view of submitting relief legislation to the Congress, a Treasury Claim Board was established to consider and process the claims presented by the employees for such losses. The Department has received claims from 25 employees, aggregating $28,845.12, of which amount, after careful consideration of the merits of each claim by the Claim Board, $19,259.80 is recommended for approval by the Congress. There is attached a memorandum setting forth in detail a summary of the basis of the claims involved, indicating in each case the amount claimed, the amount disallowed, and the amount recommended for approval by the Department.

The Congress has on two previous occasions enacted legislation providing for the relief, under similar circumstances, of certain officers and employees of the Foreign Service of the United States, namely, Private Law 145 (78th Cong.) and Private Law 13 (79th Cong.). Also there is pending in this Congress H. R. 3726, a bill for a similar purpose for Foreign Service employees, which was passed by the Senate on July 24, 1947.

This Department is of the opinion that these claims of officers and employees of the Treasury Department have merit, and it is strongly recommended that the proposed legislation be enacted.

It would be appreciated if you would lay the proposed bill before the Senate, and it is earnestly recommended that it be given prompt consideration. A draft of the proposed bill has been transmitted to the Speaker of the House of Representatives.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

A. L. M. WIGGINS,
Acting Secretary of the Treasury.

HOUSE BILL REFERRED

The bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes, was read twice by its title, and referred to the Committee on Appropriations.

EUROPEAN RECOVERY PROGRAM—ADDITIONAL COPIES OF HEARINGS BEFORE COMMITTEE ON FOREIGN RELATIONS

The PRESIDENT pro tempore. The Chair would like to announce to the Senate that the Senate Committee on Foreign Relations this morning concluded its hearings on the European recovery program. It is very essential that additional printed copies of the hearings be made immediately available, and if there is no objection, and without displacing the business pending before the Senate, from the Committee on Foreign Relations, the Chair asks unanimous consent to report an original resolution, and requests its immediate consideration.

There being no objection, the resolution (S. Res. 195) was considered and agreed to, as follows:

Resolved, That 1,000 additional copies of the hearings held before the Committee on Foreign Relations on the European recovery program be printed for the use of said committee.

INVESTIGATION OF CERTAIN MATTERS RELATING TO ISLANDS OF THE PACIFIC

Mr. CORDON submitted the following resolution (S. Res. 196), which was referred to the Committee on Interior and Insular Affairs:

Resolved, That the Committee on Interior and Insular Affairs or any duly authorized subcommittee thereof, is authorized and directed make a study and investigation of such matters as it may deem appropriate relating to the islands, groups of islands, or other areas included within the trust territory of the Pacific, or relating to other islands, groups of islands, or areas of the Pacific which are possessions of, or subject to the authority of, the United States, including study and and investigation of—

(a) the peoples, customs, laws, economies, resources, and governments of such areas;

(b) the interrelation, and the natural or appropriate integration, of such areas;

(c) measures designed to advance the security and well-being of the peoples and economies of such areas; and

(d) such other matters relating to such areas as the committee may deem appropriate.

The committee shall report to the Senate at the earliest practicable date the results of its study, recommending such organic and other legislation as may be necessary to provide for the civil government of such areas, and to assure to the peoples of such areas justice, peace, and tranquility, a voice in their civic affairs and government, the development of their economies and the protection of their civil rights, all with due regard to the established customs of such peoples. For the purposes of the studies and investigations authorized and directed by this resolution the committee, or any duly authorized subcommittee thereof, is authorized to employ such consultants, specialists, clerks, and other assistants, to travel, and authorize its assistants to travel, and to utilize such transportation, housing, and other facilities which the Army, Navy, Marine Corps, Coast Guard, or Air Force may make available, as it deems advisable.

SEC. 2. The committee or any duly authorized subcommittee thereof, for the purpose of making a study and investigation of any matter referred to such committee, is authorized to hold such hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Senate, to employ such experts, and such clerical, stenographic, and other assistants, to require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures as it deems advisable. The cost of stenographic services shall not be in excess of 25 cents per hundred words. The expenses of the committee under this resolution, which shall not exceed $50,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

LINCOLN DAY ADDRESS BY SENATOR BREWSTER

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD a portion of the address delivered by him at the Lincoln Day banquet, at Knights of Columbus Hall, Detroit, Mich., February 4, 1948, which appears in the Appendix.]

VETERANS IN COLLEGE TRAINING—RELEASES BY THE AMERICAN COUNCIL ON EDUCATION

[Mr. MORSE asked and obtained leave to have printed in the RECORD five releases on the subject of veterans in college training, by the American Council on Education, which appear in the Appendix.]

THE TAFT-HARTLEY ACT—ARTICLE BY SENATOR TAFT

[Mr. BUTLER asked and obtained leave to have printed in the RECORD an article entitled "The Taft-Hartley Act: What It Does Do, What It Does Not Do," by Senator TAFT, which appears in the Appendix.]

STATEMENT BY SENATOR WAGNER MADE IN CONNECTION WITH BROADCASTS ON HOUSING

[Mr. MURRAY asked and obtained leave to have printed in the RECORD a statement made by Senator WAGNER dealing with a series of broadcasts on the housing problem as well as a broadcast on the subject from Station WNBC, New York City, which appear in the Appendix.]

THE REPUBLICAN PARTY'S CONTRIBUTION TO PEACE—ADDRESS BY ALF M. LANDON

[Mr. CAPPER asked and obtained leave to have printed in the RECORD an address

on the subject The Republican Party's Contribution to Peace, by Alf M. Landon, before the Republican Club at Ottawa University, Ottawa, Kans., February 4, 1948, which appears in the Appendix.]

AWARD TO POSTMASTER ALBERT GOLDMAN, OF NEW YORK, BY THE VETERANS OF FOREIGN WARS

[Mr. IVES asked and obtained leave to have printed in the RECORD a citation presented to Albert Goldman, postmaster of the city of New York, by General Theodorus Bailey Post, No. 104, of the Veterans of Foreign Wars, which appears in the Appendix.]

AWARD TO ROBERT I. QUEEN BY DELTA SIGMA LAMBDA FRATERNITY

[Mr. IVES asked and obtained leave to have printed in the RECORD an article describing honor paid Robert I. Queen, past county commander of the Bronx County Disabled American Veterans, by the Delta Sigma Lambda Fraternity, which appears in the Appendix.]

WILLAMETTE VALLEY PROJECT—RESOLUTION OF THE PORTLAND CHAMBER OF COMMERCE

[Mr. MORSE asked and obtained leave to have printed in the RECORD a resolution on the subject of the Willamette Valley project, adopted by the board of directors of the Portland (Oreg.) Chamber of Commerce, which appears in the Appendix.]

THE MARSHALL PLAN—EDITORIAL BY MARK M. SHAW

[Mr. KNOWLAND, on behalf of Mr. WHERRY, asked and obtained leave to have printed in the RECORD an article entitled "The Shaw Plan," by Mark M. Shaw, from the Greater Nebraskan, which appears in the Appendix.]

F. S. SHATTUCK RIPS MILITARY TRAINING PLAN—NEWSPAPER ARTICLE

[Mr. TAFT asked and obtained leave to have printed in the RECORD an article entitled "E. S. Shattuck Rips Military Training Plan," published in the Los Angeles Daily News of January 20, 1948, which appears in the Appendix.]

CELEBRATION OF FIFTIETH ANNIVERSARY OF FREEDOM OF CUBA

Mr. MARTIN. Mr. President, last Friday a report from a committee appointed from the House of Representatives and the Senate to recommend a celebration of the fiftieth anniversary of the freedom of Cuba was brought up, and at that time I asked unanimous consent for the consideration of three concurrent resolutions. The distinguished senior Senator from Illinois [Mr. LUCAS] objected to the consideration of the resolutions at that time, but he has now withdrawn his objection, and owing to the fact that part of the celebration will start a week from the coming Sunday, it is necessary for the Congress to act if we are to carry out the plan, and I ask unanimous consent that Senate Concurrent Resolution 39 be considered at this time.

The PRESIDENT pro tempore. Unfortunately, the concurrent resolution is in the Committee on the Judiciary. The committee would have to be discharged before the Senate could proceed to consider the concurrent resolution, although of course that could be done by unanimous consent.

Mr. MARTIN. Mr. President, I have taken the matter up with the distinguished chairman of the Committee on the Judiciary, the Senator from Wisconsin [Mr. WILEY], and I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of the concurrent resolution.

The PRESIDENT pro tempore. Is that satisfactory to the chairman of the Committee on the Judiciary?

Mr. WILEY. Mr. President, the procedure is not satisfactory, but in this particular instance we will agree to it.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Pennsylvania?

There being no objection, the concurrent resolution (S. Con. Res. 39) was read, considered, and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That in commemoration of the fiftieth anniversary of the victory over Spain, resulting in the liberation of Cuba, the two Houses of Congress shall assemble in the Hall of the House of Representatives at 1 o'clock in the afternoon, on Monday, April 19, 1948.

That the joint committee created by House Concurrent Resolution 108, Eightieth Congress, is empowered to make suitable arrangements for fitting and proper exercises for the joint session of Congress herein authorized.

That invitations to attend the exercises be extended to the President of the United States and the members of his Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, the Diplomatic Corps (through the Secretary of State), the General of the Armies, the Chief of Staff to the Commander in Chief, the Chief of Staff, United States Army, the Chief of Naval Operations, the Chief of Staff, United States Air Force, the Commandant of the Marine Corps, and the Commandant of the Coast Guard, and such other persons as the joint committee shall deem proper.

That the President of the United States is hereby invited to address the American people at the joint session of the Congress in commemoration of the fiftieth anniversary of the victory over Spain.

Mr. MARTIN. Mr. President, I make the same request respecting Senate Concurrent Resolution 40.

The PRESIDENT pro tempore. The clerk will report the resolution, and under the same understanding existing as to the concurrent resolution just agreed to, the Committee on the Judiciary will be discharged from the further consideration of the concurrent resolution, and by unanimous consent it will be considered at this time.

There being no objection, the concurrent resolution (S. Con. Res. 40) was read, considered, and agreed to, as follows:

Resolved, That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by striking out the last sentence of section 2 (b) and inserting in lieu thereof the following: "The committee shall cease to exist upon the expiration of 30 days after April 19, 1948."

Mr. MARTIN. Mr. President, I ask for the same action with regard to Senate Concurrent Resolution 41.

The PRESIDENT pro tempore. The Senator from Pennsylvania asks for the consideration, under similar circumstances, of Senate Concurrent Resolution 41, which will be read.

The concurrent resolution (S. Con. Res. 41) was read, as follows:

Resolved, That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by adding at the end of section 3 thereof the following: "The funds made available under this concurrent resolution shall be available for paying the expenses of a delegation to attend the ceremonies that will be held in Habana, Cuba, on Sunday, February 15, 1948, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*, to be composed of two Members of the Senate to be appointed by the President of the Senate, two Members of the House of Representatives to be appointed by the Speaker, and two representatives of the United Spanish War Veterans, consisting of the commander in chief and one other member of that organization, together with the expenses of any of the employees of the committee whose services are required in connection with this ceremony."

The PRESIDENT pro tempore. The Parliamentarian suggests that this concurrent resolution should go to the Committee on Rules and Administration, inasmuch as it deals with the contingent fund.

Mr. WHERRY. That is correct.

Mr. MARTIN. Mr. President, the matter has already been taken up with the chairman of that committee and it is agreeable to the Committee on Rules and Administration that the Senate give immediate consideration to the concurrent resolution.

Mr. WHERRY. Was the matter presented to the Committee on Rules and Administration?

Mr. MARTIN. It was.

Mr. WHERRY. Did the chairman of the committee notify the distinguished Senator that the Committee on Rules and Administration was favorable to the resolution?

Mr. MARTIN. Yes.

Mr. WHERRY. Does the Senator know whether or not the Senator from Illinois polled the committee?

Mr. MARTIN. I do not know.

Mr. WHERRY. I shall not object, if the matter has been approved by the chairman of the Committee on Rules and Administration.

The PRESIDENT pro tempore. The Chair would very much dislike to have this considered as any sort of precedent, because it is not the proper procedure when the contingent fund of the Senate is involved.

Mr. WHERRY. I suggest that the distinguished Senator from Pennsylvania refer the matter to the chairman of the Committee on Rules and Administration and have the committee polled.

Mr. MARTIN. I shall do so.

The PRESIDENT pro tempore. Undoubtedly the Senator from Pennsylvania can proceed with the subject later in the day.

Mr. MARTIN. Very well.

Senate Concurrent Resolution 41 was referred to the Committee on Rules and Administration.

Mr. KNOWLAND subsequently said: Mr. President, early today the Senator from Pennsylvania [Mr. MARTIN] requested consideration of Senate Concurrent Resolution 41, relative to the expenses of a delegation to attend the ceremonies in Habana, Cuba, in con-

nection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*. However, at the request of the President pro tempore and the Senator from Nebraska [Mr. WHERRY], the concurrent resolution was referred to the Committee on Rules and Administration. I wish to point out to the Members of the Senate that the concurrent resolution does not call for any additional appropriation. It merely provides that the funds which are already available shall be made available for the use of sending of the American delegation to Habana, to consist of two Members of the Senate, to be appointed by the President of the Senate, two Members of the House, to be appointed by the Speaker of the House of Representatives, and two representatives of the United Spanish War Veterans.

From the Committee on Rules and Administration, I now ask unanimous consent to report the concurrent resolution favorably, without amendment, and request its consideration.

There being no objection, the concurrent resolution was considered and agreed to.

REGULATION OF BUSINESS OF LIFE INSURANCE IN THE DISTRICT—CORRECTIONS IN ENROLLMENT OF BILL

The PRESIDENT pro tempore laid before the Senate House Concurrent Resolution 146, which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in the enrollment of the bill (H. R. 1634) to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia", and to add sections 5a, 5b, and 5c thereto, is authorized and directed to make the following corrections in the House engrossed bill:

Page 13, line 20, strike out "5" and insert in lieu thereof the following: "5b."

Page 13, line 20, strike out "in" and insert in lieu thereof the following: "In."

Mr. CAIN. Mr. President, I move that the Senate agree to the concurrent resolution.

The motion was agreed to.

THE LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, several Senators have asked what the program for today will be. I desire to say to the Senate that several Senators will deliver speeches on the St. Lawrence seaway project today. The distinguished Senator from Utah [Mr. THOMAS], the distinguished Senator from Vermont [Mr. AIKEN], and possibly one or two other Senators will speak on the subject. If the speeches themselves or the colloquies in connection with them run late into the afternoon, too late for the Senate to take up other business, it will then, I believe, be the intention to recess until Monday, unless something comes up at the end of the session that should demand attention tomorrow.

I might also add that in the event the debate on the St. Lawrence seaway is concluded today, and there is ample time for consideration of other legislation, it is the intention that the Senate be asked to consider several bills now on the calendar. It is not the intention to bring up legislation respecting which there is controversy. One measure is Senate Joint Resolution 173, Calendar No. 902, to be found on page 9 of the calendar. That is a joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes. My understanding is that the authority will expire the latter part of February, and that there should be consideration had by the Senate, as soon as convenient, with respect to whether the authority should be continued.

Request has been made for immediate consideration of Senate bill 1004, Calendar No. 897, if possible at the conclusion of the debate on the St. Lawrence seaway today. The bill was introduced by the Senator from California [Mr. KNOWLAND]. Senators will find from a reading of the title of the bill that it explains fully the subject matter dealt with by the bill.

Members of the Senate will remember that when the legislative calendar was called last Monday the distinguished Senator from Connecticut [Mr. BALDWIN] stated that as soon as the legislation dealing with the St. Lawrence seaway had been acted upon—and it will not be concluded for some time, but is now the business pending before the Senate—or at the first opportunity, he would ask unanimous consent, or move, as I recall his words, and I might be mistaken as to which words he used, to bring up for consideration Senate bill 1557, Calendar No. 702, and, I think, Senate bill 1375, Calendar No. 704. Senators will find the last two bills on page 8 of the calendar.

Request will also be made for consideration of Senate bill 1356, Calendar No. 696, the last bill on page 7 of the calendar, which is legislation similar to that contained in the other two bills to which I referred. No doubt if one of these bills is brought up for consideration request will be made that all three be considered.

Mr. President, in view of the gentleman's agreement respecting what shall be done next week, I think that before any Senators leave the city attention should be called to two other very important pieces of legislation. One deals with rent control, on which action must be taken by February 18, which is a week from Wednesday. If there is any objection to consideration of that measure, I wish the Senator or Senators who have objection would take the matter up with the chairman of the policy committee and see if the objections can be ironed out.

There is another measure, introduced by the distinguished Senator from Ohio [Mr. TAFT], dealing with the budget, which may possibly be ready for consideration next week.

Mr. TAFT. Mr. President, that measure certainly will have to be taken up not later than immediately at the beginning of week after next, 16th or the 17th of February.

Mr. WHERRY. That, Mr. President, is about the legislative program. The two latter pieces of legislation might involve debate. Objections may be raised. If there should be objections and they cannot be ironed out, I think we should stand by the "gentleman's agreement" which has been entered into. But, as to the other matters to which I have referred, which are on the calendar, I am quite sure they will meet with the approval of all Members of the Senate and can be given early consideration.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LUCAS. Am I to understand from the remarks made by the acting majority leader that any one of these bills which are now on the calendar to which he has referred may be taken up this afternoon?

Mr. WHERRY. That was the announcement, yes, in the event the debate on the St. Lawrence seaway shall be concluded in time for such action to be taken at today's session.

Mr. LUCAS. The Senator has presented what seems to me to be a rather ambitious program.

Mr. WHERRY. I wish to say to the distinguished Senator from Illinois that it is our intention to ask unanimous consent for consideration of the measures I mentioned. It is the intention to try to have some legislation considered on which all Members of the Senate can agree.

Mr. LUCAS. I know nothing about Senate Joint Resolution 173, Calendar No. 902, or Senate bill 1004, Calendar No. 897. I imagine there may be some objection to the latter bill.

Mr. WHERRY. If there is any objection, very well. It was the intention to have the Senate consider some piece or pieces of legislation which are available for consideration and to which there would be no objection.

The Senator from Washington [Mr. MAGNUSON] is very anxious that Senate Joint Resolution 173, Calendar No. 902, be taken up for consideration as quickly as possible. I suggest to the distinguished Senator from Illinois that inasmuch as the speeches which will be made on the St. Lawrence seaway will occupy considerable time today, if he will take the matter up with the Senator from Washington, or any other Senator, and if he finds that there is objection to the joint resolution he can make it known. If not, I think that possibly consideration of Senate Joint Resolution 173 should be proceeded with today, if possible.

Mr. LUCAS. I was wondering whether the absence of a quorum would not be in order before action is taken on any piece of legislation.

Mr. WHERRY. That will have to be done. If unanimous consent is made to take up any measure it will be necessary that the absence of a quorum be suggested.

Mr. LUCAS. Before any of these bills are taken up.

Mr. WHERRY. Yes, I think so.

Mr. LUCAS. I will say frankly that I know nothing about any of the measures referred to. I imagine members of committees which considered the measures would want to be present when they were taken up for consideration.

Mr. WHERRY. Yes. I simply stated the contemplated procedure with the idea that it would be for the benefit and

information of the Senate. As I stated before, in the event the debate on the St. Lawrence seaway continues until a late hour, then a recess will be taken, but I thought that in view of the fact that consideration of certain pieces of legislation had been suggested by Members of the Senate on both sides of the aisle, attempt would be made to have them brought up for consideration, if there were no objection, and if there would be time today to do so.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 1366) to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes.

The message also announced that the House insisted upon its amendment to the bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ANDREWS of New York, Mr. COLE of New York, and Mr. VINSON were appointed managers on the part of the House at the conference.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. THOMAS of Utah. Mr. President, I know from the discussion which has preceded that the question before us leads to the type of argument which makes it not out of place for me to start with a subject which does not deal with the St. Lawrence waterway. When I say that, I am sure that it is rather consistent with what has occurred during the past half hour in the Senate.

I am certain about one thing, Mr. President, the Marshall plan entered into the discussion long after the St. Lawrence waterway project was before us. The Marshall plan has been brought into the argument in this way: It is said that at a time when we are planning to spend so much money for the relief and stability of Europe, it would be improper to spend money for the St. Lawrence waterway.

Mr. President, I am one of those who did not take exception to the President's message in which he united the idea of interim relief and the idea of price stabilization. We cannot stabilize conditions in Europe if we allow further instability in our own country. All these questions are closely related; and because they are closely related I believe that it would be wise for me to say a word or two about the bill which I introduced yesterday on behalf of the Senator from New York [Mr. WAGNER] and myself in an attempt to bring out a plan which might help in the price situation.

It should also be said, if one is to attempt to appreciate the philosophy of the bill, that I was one of those who in the beginning of our attempt at controls stood wholeheartedly on the theory that there should be entire control and not piecemeal control. I shall not criticize what was done. I realize that what was done was done after due deliberation and careful consideration of an overall control plan. However, I feel that in fairness to the authors of the bill I should say that I was one of those who wanted wholehearted control of our economy in order to attempt to keep prices, and all that goes with prices, before our country as a single problem.

Yesterday I introduced Senate bill 2126, a bill to provide for a coordinated anti-inflation program. The Senator from New York [Mr. WAGNER] joined in the presentation of this bill. I have introduced the bill because I feel that none of the bills now before the Senate Banking and Currency Committee meets the need of the day.

Prices are rising steadily. The consumers' price index of the Department of Labor, which measures the cost of living, increased on the average of 1 percent a month during the last 3 months of 1947. There is every indication that this consumers' price index will continue to increase about this rate in the coming months of this year.

But rising prices are not our only problem. In order effectively to carry out our commitments in the European recovery program with the least possible effect upon our domestic economy, it is necessary that basic products and commodities be channeled into their proper and most worth-while uses.

After examining and giving consideration to the bills now before the Senate Banking and Currency Committee, I decided that not one met the need existing today to stop inflation. Therefore, I have introduced Senate bill 2126, which:

First. Freezes prices as of January 5, 1948, and provides for the elimination from this price freeze of all those commodities not basically affecting the cost of living and industrial and agricultural production.

Second. Provides for authority to be granted to permit the allocation and rationing of basic commodities which affect the cost of living or industrial or agricultural production.

Third. Provides for controls over bank credits.

I have incorporated into the bill the proposal made to the Senate Banking and Currency Committee by Marriner C. Eccles, of the Federal Reserve Board, suggesting that the Federal Reserve Board be permitted to require commercial banks to establish special reserves, thus limiting the amount of demand and time deposits which those banks can use as collateral for extending commercial loans.

Fourth. Provides for the creation of an economic stabilization coordinator. If we are to have an effective anti-inflation program, it is essential that authority be granted to the President to create an administrator who will coordinate the many Government agencies that will be responsible for carrying out the various phases of such a program.

Fifth. Provides for adequate enforcement machinery. This is necessary if we are properly to administer and make effective the provisions of the bill.

Sixth. In addition I suggest that the powers and authority under this act extend for at least a 2-year period, to March 31, 1950, with authority to terminate at a sooner date if deemed advisable. This provision will prevent hoarding and withholding from the market in anticipation of quick elimination of price ceilings.

In introducing this bill I have attempted to put into one package a well-coordinated and effective anti-inflation program. I have accepted the principle of price freezes as proposed by the Senator from Indiana [Mr. CAPEHART]. I have further written into this single bill the allocation and rationing authority contained in the bill introduced by the Senator from New Hampshire [Mr. TOBEY] on behalf of the Department of Commerce. I have further included the idea contained in the bill of the Senator from Oregon [Mr. MORSE] to establish an economic stabilization coordinator. I have also incorporated the kind of enforcement procedures contained in a bill introduced by the Senator from Idaho [Mr. TAYLOR]. In addition, as I have heretofore mentioned, I have accepted the recommendations of Marriner C. Eccles of the Federal Reserve Board on the problem of bank credits.

I have attempted to coordinate the best parts of the various provisions of the bills now before the Senate Banking and Currency Committee into a single, coordinated, effective anti-inflation program.

At the hearing before the Committee on Foreign Relations this morning there was a witness who bore testimony to the need for this program. The President pro tempore commended him for his statement, and for his great contribution to the hearing.

Mr. President, the contribution consisted primarily in the fact that the witness pointed out that the program was to be all-embracing, taking into consideration all the economic characteristics which prevail throughout our entire economy.

I repeat, we cannot bring stability anywhere else if we do not have it here. There is no use in our planning for stability in the world if we cannot provide stability for ourselves. Mr. President, that brings me to the point I wish to make above all other points in regard to the St. Lawrence seaway. It is not a local proposition; it is not a proposition which deals primarily with the setting up of a seaway to compete with our railways; it is not a proposition which has to do with the Northeast. It is a proposition which deals with the entire economy of the United States of America; and it is a proposition which has been reviewed time and time again and has been under discussion by the American people since the logic of the waterway first became apparent to them.

The St. Lawrence River is a boundary in some parts of our country. It was necessary to enter into treaties regarding treatment of the river in other parts. In some parts of the country it is really a national river, just as portions of the Great Lakes are wholly national. There-

fore the problem is bigger than the American national Government; it is bigger than the American National Government and the Canadian Government. It is so big, as the Panama Canal was so big, that in time it may not only prove itself a great relief to a crowded economy, both here and in Canada, but may be a shaper of commercial and economic habits, fitting into the whole relief scheme.

We have done much in the history of our country in the last 150 years, and have ratified all we have done, to bring about unity of the Americas for the purpose of defense, of understanding, of dealing with one another as we hoped from the very beginning other Republics in this hemisphere would deal with one another for the purpose of complementing and helping the cause of peace, for the purpose of saying to one part of the world which has a philosophy of life which is inconsistent with that of America and upon which it was founded, that it may come so far and no farther.

The origin of the theory which primarily brought into being the hemispheric defense idea is bigger than just an act. It is a world-wide theory which has been applied in other parts of the world. We speak of a Monroe Doctrine for this country or for some other part of the world. It is spoken of rather glibly throughout the land. There has always been, Mr. President, one part of the Western Hemisphere which has never seen eye to eye with this Nation in regard to pan-American union and in regard to hemispheric defense.

For the purpose of argument in connection with the pending joint resolution, it has been said by many Senators that the resolution is hardly in order; that we should have a treaty before us. I am very sure that the Pan American Union, which has grown into such a great institution and which has crystallized into what is probably the biggest idea in the Western Hemisphere, was not established by treaty but by an agreement. I may be wrong in that statement, because it has been a long time since I read the origin of the Pan American Union. I think, however, it was set up by agreement.

Mr. President, Canada, because of its connections east and west, has always been outside of the thinking and the philosophy of the Pan American Union, but not outside of its ideals. Canada knows, as we know, that our defense is intermingled; that one country cannot remain free and the other captive in time of war. Canada knows, and we know, that our economies are almost interchangeable. Those persons from my part of the country who went into Canada and settled there thought, until the beginning of the First World War, that they were probably not even changing their citizenship. They came and went with complete happiness, thinking American principles, thinking American ideals; and the American flag was as much displayed as was the British flag. That is one of the great evidences that such a situation should be continued. Every bond of friendship which can be thought of, every ideal, and every institution which can make the two countries more of a unit is statesmanlike forethought on the part of the two nations.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. THOMAS of Utah. I am glad to yield to the Senator from Illinois.

Mr. LUCAS. I want to congratulate the Senator upon the type of address he is making. I want to say, candidly, that from time to time I have been opposed to the St. Lawrence waterway treaty or the seaway agreement, but in view of the conditions in the world as they exist at this time, and in view of the fact that through former Secretary of State Cordell Hull, the late Franklin D. Roosevelt, and others who have followed, much has been done toward a good-neighbor policy in the way of setting up a hemispheric solidarity as a matter of sound, adequate national defense, I can think of nothing at this particular time, insofar as this country and Canada are concerned, which could do more to cement the ties of friendship and once again move in the direction of hemispheric solidarity than now to begin construction of the seaway between this country and Canada.

Mr. THOMAS of Utah. I thank the Senator from Illinois. I appreciate what he has said. It seems to me what he has said can be extended a little bit further than to the Americas. The good-neighbor policy was not intended to work only north and south; it was also intended to work east and west.

I repeat what I said in the beginning, that if we can not keep stability in our own country there is no use talking about establishing it somewhere else. Practically every witness who has appeared before the Foreign Relations Committee on the European recovery plan has pointed out the need of European unity, and we have accepted their logic. Practically every Senator who has considered the problem has realized that economic unity is of the greatest importance. I do not mean entire political unity. It is difficult to draw a line. There should be unity in thought, unity in the desire to succeed in a unified way. The American people say to 16 European countries which have ideals and civilizations much like our own, "Unite so that you may attain your objective." Then in the same breath we refuse, because we say we have not the genius or ability, to go into a partnership with the Dominion of Canada, right on our own border, in regard to a proposition on which we have been in partnership since 1794.

Mr. President, that is the logic of the situation, and it is the basic idea which I think underlines all we are trying to do.

Toward the end of the session yesterday one Member of the Senate objected to the measure now before us on the theory that it leaves the question of the use of all the St. Lawrence waterways perpetually dangling. I think the word "dangling" was the one he used. Mr. President, it would be hard indeed to leave dangling any question that comes before us, especially in view of what has gone before. How can we think that in acting here on a given measure we act in a great vacuum, that nothing has gone before and nothing will come after, but that we are creating something absolutely new? Such a notion is the sort of thing I could never understand in people any time, when I read their history.

When we adopted the Constitution of the United States we did not do something in a vacuum. Mr. President, all we have to do is look at the seal of the United States as it appears on one of our dollar bills, and there we see the words showing that the founding fathers asked the blessings of God upon their beginning in the establishment of a new order in the world. It is worth pointing out that when one of the great Chief Justices of the United States handed down a decision, which was perfectly logical and fitted in with the scheme and patriotism of the founding fathers—a decision based on the theory that a new order had been established and that therefore they did not have to consider the past—the people of the United States rose up and adopted a constitutional amendment calling attention to the fact that all that had gone before belonged to them in this new order, and that nothing was set up in a vacuum, that nothing was started without regard to what had previously happened, but that there was antecedent for what they did. So, Mr. President, the Constitution of the United States was a document of delegated powers by which the people of the United States said where the powers were to be placed.

I make that point to show that we are not acting in a vacuum in connection with this matter and are not doing something new, but are doing something in the course of the evolution of a great idea, and also to show that the influence of what has gone before remains upon us.

In addition, I should like to point out the striking difference between the Constitution of the United States and the constitution which governs the people of Canada. Under our Constitution, the people of the United States reserve to the States all the powers that are not granted to the Federal Government; but the states in the Canadian union allow that union, and not the individual provinces, to have the reserved powers. In this proposition we are dealing with a union, Mr. President.

Yesterday it was pointed out, Mr. President, that the idea in regard to perpetual use of the waterway was left dangling because the pending measure provides for future negotiations and future treaties in regard to certain phases of the matter. It is necessary in the RECORD to call attention to the fact that we began thinking about the joint use, if not the joint control, of these waterways as early as 1794. In 1794 our country ratified a treaty dealing with the navigation on that waterway. I shall read part of that treaty to show that all that should have been done has been done to make way for the future negotiations which should be carried on in an orderly way, consistent with what has been done in the past. Article III of the treaty of 1794 reads as follows:

ARTICLE III. It is agreed that it shall at all times be free to His Majesty's subjects, and to

the citizens of the United States, and also to the Indians dwelling on either side of the said boundary line—

That refers to the part of the St. Lawrence which is the boundary line between the United States and Canada—

freely to pass and repass by land or inland navigation, into the respective territories and countries of the two parties, on the Continent of America (the country within the limits of the Hudson's Bay Co. only excepted), and to navigate all the lakes, rivers, and waters thereof, and freely to carry on trade and commerce with each other.

Article XIV reads as follows:

ARTICLE XIV. There shall be between all the dominions of His Majesty in Europe and the territories of the United States a reciprocal and perfect liberty of commerce and navigation. The people and inhabitants of the two countries, respectively, shall have liberty freely and securely, and without hindrance and molestation, to come with their ships and cargoes to the lands, countries, cities, ports, places, and rivers within the dominions and territories aforesaid, to enter into the same, to resort there, and to remain and reside there without any limitation of time. Also to hire and possess houses and warehouses for the purposes of their commerce, and generally the merchants and traders on each side shall enjoy the most complete protection and security for their commerce; but subject always as to what respects this article to the laws and statutes of the two countries respectively.

Mr. President, that very broad usage has continued.

In the Reciprocal Treaty of 1854 the same ideas were stated, and by that treaty those practices were continued.

The Treaty of Washington, in 1871, provides an expanding notion.

When we come down to the Boundary Waters Treaty of 1909 between the United States and Great Britain, we find expressed in it the same ideas, but expanded still further, and leaving the peoples and citizens of both countries free to use the boundary waters in the way in which they wish to use them, either by national use or cooperative use. At any rate, the idea still persists.

Then we find that, still later, in the debate in the Senate on the Canadian Reciprocity Act of 1911, it was stated by one of the Senators from Michigan that—

It is well known that one of the objects of the treaty of 1854 was the improvement of the St. Lawrence River.

That statement was made only 37 years ago, but it is a pronouncement showing us that all that is being done, and all that has been done, and all that it is contemplated to do is thoroughly consistent with what has been the will of the United States and the will of Canada for at least 40 years.

Mr. President, there is considerable legal authority in support of the view expressed by Assistant Secretary Adee. Thus, in the case of Canada Malting Company against Patterson Steamships, the court stated:

On this motion for rehearing proctors for respondent point out that by treaty relations between Great Britain and the United States the boundary waters of the Great Lakes, meaning thereby the entire body of water comprising lakes, rivers, and waterways separating the two countries, with respect to navigation have become international waterways and equally free to citizens of Canada and citizens of the United States. (See Root-Bryce Treaty of 1909, and President's proclamation of May 13, 1910 (36 Stat. 2448), Moore's Digest of International Law, vol. I, p. 674.)

In view of this treaty, there exists, it seems to me, additional reason for declining jurisdiction and relegating the parties to pursue their remedies and rights in the country of which they are citizens and subjects, in the place where the contract of carriage was made and performed, and further, where the witnesses reside.

That is from a decision of the court, which seems to have a direct bearing on what I have to say.

Similarly, in the act approved February 8, 1895, regulating navigation on the Great Lakes and their connecting tributary waters, the Congress specifically stated that "the following rules for preventing collisions shall be followed in the navigation of all public and private vessels of the United States upon the Great Lakes and their connecting and tributary waters as far east as Montreal."

These treaties, then, have vested in the United States reciprocal rights to navigation in boundary waters and in those waters of the Great Lakes-St. Lawrence system which are wholly located in Canadian territory. The only question that remains, therefore, is the method of further developing the usefulness of these rights through reciprocal improvements. For this purpose the parties agreed upon such a method in the 1909 treaty whereby special agreements may be entered into to improve the navigation of the system on the basis of reciprocal legislation.

Mr. President, there remains but one question that bothers those who are opposed to the pending measure. The various treaties and agreements, and the practice followed as a result of the treaties and agreements, are applicable to citizens of both the United States and Canada. Mutual rights are guaranteed to the citizens of each country. Someone will say it is contemplated there may be some sort of publicly owned utility based on the waterway, and that therefore the treaty provisions will not hold.

Mr. President, in a world like ours, in which the tendency the world over has been toward more and more national functioning and State functioning in what have been considered purely private affairs, to assume that all past understandings and treaties would not be brought into consideration when the time for a special agreement came is unwarranted. I think that the question of control of the St. Lawrence waterway, and of all that is done under the great system which is projected, has not been left dangling. I think there is much understanding and background, and that much that has preceded it should control the actions of negotiators to the end that the spirit which has been followed in the past may prevail in the future. That is all that is asked.

It is pointed out by some that they fear this spirit in the future. It is pointed out by some that because of the building of this great waterway some element of the American economy which is prosperous today may cease to be prosperous. That is the chance everyone takes in a changing world. I doubt very much whether, in an automotive age, anything can be done for the person who has, for example, spent all his business lifetime in making buggy whips, and yet adjustments are made by business quite as much as by individuals. Business corporations learn how to operate automobiles, just as the individual does who has been accustomed to riding and driving horses. The buggy-whip age may have gone, as far as industry is concerned, but those who took part in it have changed. I have noted in the history of the country that practically every new thing contributes to prosperity everywhere, and while the St. Lawrence waterway is not a new thing, it will relieve some of the extreme pressures from which the economy of the northeastern part of the United States is now suffering. Think of it, Mr. President, at a time like this, right here in Washington, there are people who are cold because the fuel they need for heating cannot be brought to them in abundance. Think of it, Mr. President, that in the northeastern part of the United States, particularly in the great centers of population, suggestions are being made of putting a complete embargo on the exportation of oil, because it is said the people are cold and do not have enough oil and coal. Think of it, Mr. President, that our railways are overextended; think how busy they are, how much they are doing; and yet people fear the effect of the St. Lawrence seaway on transportation.

Mr. President, in this country the things that are needed more than anything else are more transportation and more power. The St. Lawrence waterway will provide more transportation facilities and more power. We, in America, should realize what is going on in the world. We should realize the need for new trade routes, when we consider what our handicaps were during the last war because of our inability wholly and completely to fulfill all the necessities attendant upon the war, largely due to our transportation system, great as was its contribution to the war effort.

Mr. President, as chairman of the Senate Committee on Military Affairs during much of the war, dealing with this question from day to day, I know, and no one can tell me differently, what the worry of our country in the great defense effort rested upon. It was the inability of our country's transportation system and of our economic system to meet all the demands. We are not fearful. It will be discovered that every new use creates new demands. More power in the northeastern part of the United States will benefit the whole of the United States. More transportation facilities in the northeastern part of the United States will benefit all. The dream we all cherish for our country is that every national resource will be put into shape so that it can contribute its utmost to the economy and welfare of the American people, and incidentally, by so doing, that it will contribute to the economy and welfare of the whole world.

The railways in the United States were not built with their strategic value in mind. They began operating before railways were used in war, and the first war in which they were used was the War Between the States. European governments, in building their great railroad systems, built them on a strategic basis.

Mr. President, we may be going far afield, but I think it is necessary to go far afield in order to show to the whole Nation its need for and dependence upon the proposed waterway for defense purposes, as General Marshall has pointed out, if for nothing else.

I mentioned the fact that our railroads were not built on a strategic basis. Four of the great East and West trunk lines of the United States—as everyone who has ever read a timetable knows—run on tracks of two systems for many miles. There will be found the weakest links in those four trunk lines. There will be found the greatest cause for worry, because four great systems can be put out of service by a single bombing raid. Such a railroad system, Mr. President, is not a strategically wise railroad system. I am not attacking the railroads. The economy of my State, like the economy of the States of most Senators present—of practically every Senator who is present at the moment—grew up around a railroad.

Speaking of railways, Mr. President, I wish to say that in the midst of a great war, when the country was loaded with debt, at a time when nearly everyone said, "Railroads cannot be built because of the debts owing by the country," we had a great statesman in the White House, a man by the name of Abraham Lincoln, and despite the great debts, despite the war, despite every obstacle, he started the country on the program of building the great East and West railway.

Mr. President, something was said the other day about the pending measure being unconstitutional. I have said something about Abraham Lincoln and his statesmanship. When he considered the great, drastic, experimental, wealth- and labor-consuming, highly costly program, and realized the great need for the building of our railroads, he set that great need above the risk of the program, and signed the act which gave us our great East-West railway system.

But Lincoln gave more evidence of greatness than that. During President Buchanan's administration, which preceded that of Abraham Lincoln, there was passed by the Congress of the United States the Land Grant College Act. Since the question of constitutionality with respect to the pending measure has been brought up, I wish to point out that James Buchanan vetoed the Land Grant College Act because he said there was not a provision in the Constitution giving the Federal Government the right to do anything for education. But, Mr. President, when a great statesman came into power, when a great statesman sat in the White House, at a time when the Nation was loaded with debt, surrounded as he was by overwhelming problems, bent down by worry, faced by uncertainties, he yet knew the great fundamentals upon which the Government rested, and brought into existence the greatest educational act ever conceived by man. It was considered to be unconstitutional by one President, but was considered to be necessary by the other.

Mr. President, in spite of all the arguments that can be made about the Constitution being strictly an instrument of delegated power, it was never set up to stop the progress and the onward march of the American people in achieving their economic and their political objectives. It was set up to be a guide for them in attaining those ends. And that is what it is.

The St. Lawrence waterway program is as much necessary in the proper evolution and the proper growth and development of our country as were the other great programs I have mentioned. If we should follow through the ideas of Buchanan and turn our backs on the ideas of Lincoln, we would of course, retard the growth and development of the American people who conceived the idea of the development of the St. Lawrence 100 years ago, although an actual navigation treaty was entered into 150 years ago.

Mr. President, we all know that we are not going to permit to go to waste the great natural resources, the energy, the power, and the facilities which this system would give us, and leave them unused up to their maximum.

Mr. President, we see a wonderful picture when we realize that already in our country we have brought into existence the Columbia River project; already we have brought into existence the Colorado River project; so the Northwest and the Southwest have power. The Southeast has the TVA development. It also has power therefrom. The Northeast, which needs power even more, because of the greatness of its industrial life, is not going to be deprived of power forever. The American people will say "No" to a stand of that sort, because the American people are a unit when it comes to thinking through our defense and our whole economic life, when considered as one.

Mr. President, I wonder what we would have done in the wartimes were it not for the fact that we had the power which was provided in the Northwest, in the Southwest, and in the southeastern part of our United States. That power not only gave us the atomic bomb but it gave us all the other implements of war and other things we needed.

Mr. President, I heard a Senator tell us the other day that he was against the St. Lawrence seaway project because it could not be defended in time of war; that part of the project was wholly in Canadian territory, and therefore it could not be defended. If the world's war morals remain at the level they reached when we decided to use the atomic bomb, then I say it would be a waste of even an insignificant bomb to try to hit that part of the St. Lawrence seaway which is going through Canadian territory.

Mr. TOBEY. Mr. President, will the Senator yield?

Mr. THOMAS of Utah. I yield.

Mr. TOBEY. I merely wanted to interpolate that I heard that argument used, and it is going to be used again on the floor of the Senate. To me it is almost puerile. If I might use a stronger adjective, I would say it is almost asinine, and I know, or I hope, Senators will know what I mean by that.

I wish to point out that if we are going to have a religion of fear in our hearts in looking toward this great development of the St. Lawrence seaway, we ought to be thoroughly ashamed of ourselves. When the contention is made that we should not build the canal because of the danger of its destruction by an atomic bomb, if one should fall upon it with all its hellish fury, and destroy its usefulness—when that contention is made I raise my eyebrows.

I suggest to the distinguished Senator from Utah that if I were a foreign enemy I would direct my attack first at the Panama Canal, and endeavor to wreck it. I would then send an airplane over Washington and drop an atomic bomb on this Congress of men more or less brilliant, and put it out of business. If I were an enemy of this country, there are many points I would attack before I would attack the St. Lawrence seaway. The worry that has been expressed respecting the vulnerability to attack of the St. Lawrence Canal is the expression of a religion of fear.

Almighty God has placed on the face of the earth great bodies of water which men, through the great scientific ingenuity possessed by them, can harness up to improve and benefit mankind by providing better transportation and cheaper power. When men stand up in the Senate and say that such improvements should not be made because of the possibility that they may be destroyed by an enemy, I am ashamed of such an expression of religion of fear.

Mr. AIKEN. Mr. President, if the Senator from Utah will permit, I should like to ask the Senator from New Hampshire a question in connection with the assumption that Washington may possibly be the object of an atomic-bomb attack. If we are to assume that Congress will vote against the St. Lawrence seaway, and other projects which are designed to strengthen the American economy and industry, does the Senator still think that the Congress would have the same importance as an objective for an enemy attack?

Mr. TOBEY. If the Congress were to vote against the St. Lawrence project, I think it would mark Congress as being a little below par.

Mr. THOMAS of Utah. The Senator from New Hampshire may have in mind that while the Senator from Utah has the floor, with the small representation of the membership of the Senate present to hear the discussion, it might not do any great harm if an atomic bomb were to descend upon us, for only a few others than the Senator from Utah would be the target.

Mr. TOBEY. Mr. President, I am delighted to have the companionship of the Senator from Utah in this great objective. I have heard the St. Lawrence seaway project maligned from one end of the country to the other. I have heard the project attacked by those who are moved by provincialism, by those whose views may be said to be nothing other than archaic. More than that, the railroads of New England, instead of crying out concerning the project "Unclean, unclean," and using every possible means to hamstring the project, ought to sing a Te Deum and get behind it, because in 10 years after completion of the project they would be doing more business than

they did before the Canal was completed. The people of my State, Vermont, and other States would have their power rates cut in two—pro bono publico all along the line. I am for it.

Mr. THOMAS of Utah. I thank the Senator from New Hampshire and the Senator from Vermont.

Let me add one further sentence. If the morals of war sink to the level where we left them when the last war was over, it will be a waste of power to try to find the waterway. No general would sanction it when Chicago is within another half-hour's flight, and when the great city of New York is on the way, if they come from the east. If they come over the Pole, which they likely will do, then, of course, they will be in the economic center of the United States; and surely one little passageway would not be an objective when the entire economy could be petrified and thrown out of gear.

Wherever and whenever the enemy comes, if we are to fight a war on the basis of total destruction of everything, if we are to fight a war with biological effects, if we are to forget all the morals which mankind has tried to develop to take care of men even in wartime and cause them to think in terms of greater values—if we are to lose all those things, Mr. President, there is no use of assuming that one canal is going to be an objective when with a bomb so much greater damage can be done.

If our war ethics were as they have been at a time in the past, when noncombatants, women, children, people in hospitals, private property, and all those things were respected, then a canal running through Canadian waters would be a logical and sensible military objective. But since those things have gone, we may rest assured that the objectives will be where more deadly consequences lie, and no one will be satisfied with taking a chance on dropping a bomb into the mud.

Mr. President, I do not believe that more need be said on the defense angle. Both the St. Lawrence waterway and the development of power on the St. Lawrence will improve our economic life; and that which betters our economic life and improves the facilities whereby we produce for war contributes to our ability to take care of ourselves in war, and also contributes to our ability to make our country fair and provide for the general welfare in peace. It is that about which I would rather think, and which I would rather discuss, than the war aspects; but if the war aspects must be discussed—and they have been discussed—it is necessary to bring these factors into the picture.

There is one further point which has emerged from the debate, and which I think should be answered. We find it in the minority report. I read two paragraphs to give me a text:

> Let it be set down at the outset that we vigorously reemphasize that part of Senator WHITE'S report—
>
> Referring to a minority report against the waterway when it was previously before us—
>
> which establishes in detailed manner the fact that a project calling for the expenditure of hundreds of millions of dollars, which it will take from 4 to 6 years to complete; which involves long-term obligations by both countries; which gives to each Government sovereign rights in the other country, is by every test a treaty and not an agreement and always, heretofore, the President and the Senate have held this view.
>
> Senator WHITE calls attention to the growing resort in late years of the State Department to agreements so-called in the stead of treaties to be ratified by the Senate and points out that the present resolution is an effort to accomplish by indirection what the Senate has twice refused to sanction, first by refusing consent to the proposal in treaty form and later by rejection of an amendment to a river-and-harbor bill.

Mr. President, if there has been indirection, if there is anyone in the State Department who has an idea that he is fooling anyone in America by suggesting that this be done by resolution instead of by treaty, that is something out of someone's imagination.

I think I have attempted as much as any other Member of the Senate since I came here to say that so long as the provision remains in the Constitution with regard to treaties, the Senate has the last word with respect to treaties. I think it should also have a first word now and then.

There was a time in the past when there was better cooperation between the Senate and some of the departments than there is today; but that is not the question here. The idea was put forth undoubtedly because it was thought to be a good argument against the waterway. It is not a good argument.

It has been stated by some of the opponents that this resolution is unconstitutional because the subject should have come before us in the form of a treaty. Perhaps it should. It has come before us in the form of a treaty in times past. Probably it could be put in a treaty; but it was not put in a treaty, and the fact that it was not put in a treaty does not make it unconstitutional.

There is a provision in the Constitution of the United States which gives the President the power, with the advice and consent of two-thirds of the Senate, to enter into treaties with foreign governments. But, Mr. President, it would be an innocent schoolboy indeed who would say that all those things which refer to relations with other nations must be carried on by the treaty method. No, Mr. President. The right to make treaties did not foreclose all the other ways of carrying on relations with foreign governments. The Constitution provided a simple way, at a time when the founding fathers dreamed of what might be called a council of state. The key to what has taken place is not in the fact that resolutions have been developed and our foreign relations have been carried on as a result of resolutions, statutes, and laws quite as much as by means of treaties. The thing which has made the treaty system not work in our country has been the interpretation of the advice-and-consent provision in the Constitution. Almost since Washington's time there has not been resort to the advice feature in regard to negotiating treaties.

The term "advice and consent" is used in regard to appointments. Everyone knows that we reached the point where one of our Presidents, in defending one of his appointments which the Senate did not see fit to accept, laid down the proposition that the power of nomination remained wholly in the hands of the Executive. That was answered; and I am sure that the textbooks did not allow the law as stated by that President to remain a guide for our country. I am sure that when the time comes we shall go back to the real meaning of "advice and consent," and that we shall not consider it as it is now considered, and as the text writers have considered it, as one act and not two acts. It is extremely interesting to read, in one of the latest books by one of our secretaries of State, that he actually talks about a treaty receiving the "consent" of the Senate. There is not a word about advice. That tendency has gone on, and it is going on. It was because that tendency had gone so far that when we reorganized the Congress of the United States we did something about it. But so far as I know, the other branch of the Government has done nothing about it.

We all know that when the Senate was established it was, with reference to foreign relations, to be a council of state to advise with the President in the matter of who serve the people in their Government. We all know that our first President did not get along very well when he sought advice, and that therefore he did not return for any more. The next President followed suit, which course continued down through our history, until we have reached the point where consent is probably the only thing that is asked of the Senate. The Executive sends up to us the names of persons to serve in the Government. He asks for our consent, but he does not ask our advice. He sends up treaties with which the Congress has had nothing to do. Knowing that situation, and taking a hint from the Senator from Maine [Mr. WHITE], knowing that he was on the committee for the reorganization of Congress and sat with me through all the reorganization hearings, I think there is probably something bigger in what the Senator from Maine said. I read something bigger in it, because in the reorganization of Congress we provided again that the President of the United States should never be left without the kind of advice he should have when great questions faced him. We provided for a policy committee to be made up of Democrats and a policy committe to be made of Republicans. That provision exists in law, so that at any time the President of the United States wishes to have a council of state he will have one which is recognized by both of the parties in the Senate of the United States. He has not used it; no. The old habits continue, despite the action of Congress in attempting to change those habits. The President will use it some day—perhaps not the present President, and perhaps not the next President; but the time will come when we must get rid of the archaic way of acting in compartments and trying to force the will of one compartment on another. That

is no way to run the Government. The theory of the separation of power was never conceived of in that way.

I should like to repeat what I have probably said thousands of times when I have talked about the American Government. There is only one Government of the United States, not three. Sometimes Congress speaks for that Government; sometimes someone behind a desk speaks for it; once in a while the Supreme Court speaks for it; now and then the President speaks for the Government. But the theory was that there should be coordination of ideas and ideals, and that the Government of the United States was not made up simply of the Congress or the President or the Judiciary, but that the three together made one government. Those three branches together have made this country what it is.

Of course, we can find some decision somewhere that a council of state was never contemplated; that we do not want such a thing. We can get anything we want out of this Government by law if we seek far enough. But that is not the way in which our Government actually functions.

Perhaps this resolution should have come to us in the form of a treaty. Probably it would have been better as a treaty. But the fact that it did not come to us in that way does not make that which occurred unconstitutional.

I repeat, the fact that there is provision for the President to make treaties, with the advice and consent of the Senate, two-thirds of the Senate concurring, and so forth, does not mean that all matters relating to our foreign relations shall be handled by the treaty technique. To change the grant given in the Constitution of the United States by that sort of interpretation would bring nothing but chaos and disorder. It would put us into the greatest confusion that could come to us. No, Mr. President, probably the way the pending matter is being handled is not the best way, perhaps it is not the right way, perhaps it is the unwise way, but it is not an unconstitutional way.

I have already pointed out a number of great institutions dealing with foreign relations which have been established as the result of congressional action rather than by treaty action. I could cite a course of them running through our history.

I am sorry, Mr. President, when any Senator argues on the floor on a narrow line. I am also sorry when any Senator argues against a great national project which everyone realizes is necessary or may become necessary at any time. Arguments have been made against it on the score of expediency, or, as someone has said, sectionalism. There cannot be a sectionalist from the State from which I come, because the interests of Utah are so closely intertwined with the interests of every other part of the United States that our economy would fall, our history would fall, our country would fall, and all we strive for and all that we pray for would fall if we were sectionalists. We cannot deal with these great national questions on the basis of a State interest or a regional interest. It is the national interest of which we are thinking and for which we want to strive.

Speaking about the great habit-forming policies which affect our commerce, and, therefore, affect our whole life, let me ask the Senators who are present how many of them, if I may state it that way, would be proud to stand up and say, "I voted against Boulder Dam"? How many of them would be happy to be so listed? How many of them would point out to their grandchildren that "I voted against Boulder Dam"? or "I voted against the Panama Canal"?

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. THOMAS of Utah. I yield.

Mr. AIKEN. I think I can answer that question. I think the same number would be proud to get up and say today, "I voted against the Panama Canal," as would be proud to say 20 years from now, "I voted against the St. Lawrence seaway."

Mr. THOMAS of Utah. The Senator has given a good answer. But let me say to the Senator from Vermont that it would be an interesting thing if he would get out the speeches against Boulder Dam, against the Columbia River project, against the Panama Canal, against the building of railways, and against the road program. Think of it. The public road program had to go to the Supreme Court of the United States. Why? Because someone from some small State in which there was a big population said, "We will not help build roads through Utah and into California." They conceived of the road program of the United States as being something which was done for the villages in which they lived, and they did not see any sense in constructing roads throughout our country.

Read the debates. They make most interesting reading. The one thing that is fine in connection with the subject, Mr. President, is that as time goes on people change their minds and the old notions prevail for only a little while.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. THOMAS of Utah. I yield to the Senator from New Mexico.

Mr. HATCH. While the Senator was discussing this point I was reminded that sometime ago I had occasion to read the history of the Pure Food and Drug Act. I found that the right of a citizen to buy poisoned food and medicine was proclaimed as a constitutional right on the floor of the Senate.

Mr. THOMAS of Utah. That is correct.

Let us go even further, Mr. President. I am not a Son of the American Revolution. My parents came to this country, but they were Americans long before they left the old country. I read such things as Bryce's American Commonwealth before I was old enough to read such a book, because that is the sort of reading matter my parents had. When I became a candidate for a Ph. D. degree, I had been away from school for many years and had been active in various parts of the world. I faced a committee of 13 professors, one of whom asked me the question, "Do you know any books about the Government of the United States?" I was scared to answer the question. I hemmed and hawed, and said, "Well, I have been away from the university. I do not know much if anything about books." Then one professor thought he would save me by saying, "Why do you not mention Bryce's American Commonwealth?" I said, "I had better answer you truthfully. I was frightened, because I read it back in the 1890's, and that was quite a while ago. I was just scared to bring up an old book like that." He said, "Well, one as good has not been written since, so it is all right."

Then he wanted to know how it happened that I had read the book back in the nineties, and how it happened that out in my part of the country anyone happened to have such a book at that time. You see, Mr. President, he was a little sectional, and he could scarcely understand how anyone except an easterner would read the new and important books—although as a matter of fact he originally came from Canada.

But, Mr. President, when we study the history of our country and read its Constitution and understand it and see what it has done for the world and realize that anywhere in the world today there is not a constitution that is not fashioned in some way or other on it, and that the Constitution of the United States has become the mother of them all, then we realize that we are dealing with an institution that has meant much to mankind and will mean much more to mankind in the future.

Let me point out at this time that if I had lived in the days of the ratification of the Constitution, I would have hated, in talking to my grandchildren, to say, "Children, I stood with Patrick Henry; I thought the Constitution went too far. I stood with Luther Martin; I thought the Constitution went too far. I was against it"—just as all the bright, unseeing people who are thinking in terms of expediency are against it.

Mr. President, after having gone through so much in the last several generations, cannot we project ourselves? Do not the First World War and the Second World War and what took place between them and what is now occurring in the world give us the right to have hope and vision for the future? Let us never do anything that will stand in the way of keeping and making America strong, because the answer to the question whether the whole world will sink or swim now depends on the strength of America. And, Mr. President, the St. Lawrence waterway will certainly play an important part in making America strong.

So many good reasons can be advanced as justifications for the construction of the Great Lakes-St. Lawrence seaway and power project that it is difficult to determine which should receive the most emphasis.

However, in the present world situation there are a few which I believe to be of primary importance, and which should receive precedence in our consideration over the other reasons, however reasonable and strong they may be. Bearing in mind the tense, almost chaotic state of mind of the world, its uncertainties, and the lack of confidence

among nations in themselves and other countries, the building of the seaway assumes great significance. In the first place, it would offer concrete evidence of good will between the United States and Canada if they embarked immediately on a large-scale cooperative endeavor such as this project. In the second place, the need for every valid measure of self-defense and national preparedness is only too apparent. And finally, there is equal need to provide for the future.

The negotiation of this agreement for the cooperative construction of the seaway and power project would at once constitute an outstanding concrete example, for the world to see, of that of which there is so little in this day and age, namely, the desire of two adjoining nations to get along together. It would demonstrate their willingness to work together on one common cause for the common good, and their willingness to commit themselves to long-term cooperation. This project involves a certain amount of construction by the United States within the territory of Canada. In many quarters this would be viewed with great alarm as an invasion of the sovereignty of a nation. In this instance it simply means that the United States is willing to bear its share of the costs of one great project which will benefit each country equally, and that Canada has perfect confidence in our motives.

Let us show the world that here at least are two countries who trust each other, who in a healthy spirit of give-and-take are willing to join hands in constructing a magnificent seaway which not only will open up the great midlands of the two countries to the opportunities of water-borne foreign commerce, but also will be of untold benefit to the world.

Western Europe is densely populated and highly industrialized. It is now, and probably will be to an increasing degree in the future, dependent upon the Western Hemisphere to a large extent for its foodstuffs. In prewar years much of its food was obtained from eastern Europe, but now that source is closed to them and probably will remain closed. In the years to come, the United States and Canada will be called upon to supply the western European democracies with foodstuffs, mostly grain. Here in North America is to be found the most efficient, stable agricultural area of the world, producing a recurring surplus of food. This is due to the constant search for better varieties of food and to our efficient methods of culture and harvesting. There is lacking one thing to make available the fruits of this great endeavor—a cheap means of transporting the foodstuffs to where they are so desperately needed, where every dollar must be weighed so carefully and must be spent to accomplish the most good. Every dollar spent for food from the meager resources of the western European nations is spent at the expense of reconstruction and rehabilitation, setting back the day when those nations can stand on their own two feet. Let us provide the missing link between the producers and the consumers by constructing the St. Lawrence seaway. We shall thus provide the cheapest means of transportation known. We shall permit a greater effort to be devoted to reconstruction and rehabilitation. We shall speed the day when those nations can again assume their rightful place in the economic structure of the world.

Not only would the construction of the seaway help Europe, but the possibility of a steady market both for the agricultural products and the industrial products of the Midwest, would be tremendous. The area which would be most directly affected by the seaway has a population of 40,000,000 in the United States alone, and it produces one-half of all the wealth of the Nation, both agricultural and industrial. A steady market for agricultural products will add to the purchasing power of our farm population. This purchasing power, in turn, will create demands for the products of our own and other nations' industries. Such a situation could mean only one thing, prosperity, not alone for ourselves, but for other nations as well. The seaway will be open to the ships of all nations.

The presence of ships from other lands in the heart of our country, with the resultant interchange of commodities, to the advantage of both the buyer and the seller, will in itself contribute to international understanding and good will.

The fear of some of the port cities outside the Lakes area that they will suffer harm by loss of trade to the new seaway is not borne out by the substance of the testimony at the lengthy hearings held in the past on the subject.

From the evidence presented it appears that New York might lose some foreign traffic, but in its place it will gain sufficient traffic to and from lake and St. Lawrence River points to more than offset any loss in foreign trade. Boston will be the nearest of the great North Atlantic ports to the St. Lawrence River route. It can utilize the route to enable its own products and those of its hinterland to reach the great midwestern market, and by means of the same cheap transportation route it can obtain some of the raw materials needed for its industries. On the whole, Boston stands to gain from the construction of the seaway. The mere presence of an alternative means of reaching inland points might tend to reduce rail freight rates, which now are disadvantageous to Boston. Above all, the presence of a great block of hydroelectric power, such as is contemplated in the St. Lawrence project, in the northeast area, hitherto a power-deficit area, will help the industries of that section. New York, Boston, and other North Atlantic ports will then be used for its exports. A correlative saving to New England would appear in the cost of such products of the Middle West as dairy products, hay and feed grains, and automobiles. Savings of up to half of the present rail charges will be possible.

Construction of the waterway will aid Canada to develop her resources in unsettled land contiguous to the river.

This project constitutes only a final step in a logical procession of development. Below Montreal the St. Lawrence has already been improved by Canada to a minimum depth of 32 feet to the ocean. Above Ogdensburg the St. Lawrence and the connecting channels of the Great Lakes have been improved to a minimum depth of 21 feet. Canada has completed the Fourth Welland Canal, connecting Lake Erie and Lake Ontario, with a channel bypassing Niagara Falls. While the 1941 agreement was pending, the United States completed the MacArthur lock—800 feet long, 80 feet wide, and 30 feet deep over the sills—at Sault Ste. Marie, Mich., on the St. Mary's River, at the connection between Lakes Huron and Superior.

The Great Lakes themselves have ample, natural depth for ships of any type. When connecting rivers and channels of the Great Lakes system are improved, under the present plans, to a ruling depth of at least 27 feet, the entire system will accommodate all types of vessels loaded to a draft of about 25 feet in salt water. The project is not designed to accommodate the largest passenger liners or huge battleships such as now use some of our existing ocean ports.

Mr. President, both the United States and Canada stand to gain equally by the development of this cooperative endeavor.

The impelling reason, Mr. President, for the construction of this waterway is its value for the national defense, and I wish to emphasize this point in particular. The Joint Chiefs of Staff, through the Secretary of War, on February 16, 1946, expressed the opinion that construction of the St. Lawrence seaway and power project is important to the national security.

In that letter they stated that in the event of war or other national emergency the project would provide shipbuilding and ship-repair facilities, located in a relatively secure area, capable of expansion and of conversion for handling deep-sea vessels, of use as supplemental coastal shipyards. It would also be valuable as an additional line of communication, navigable by ocean shipping, which could, by diversion of some cargo for overseas destinations, ease the strain during wartime on rail transportation and the port facilities of the east and Gulf coasts. This seaway could also serve as a reserve route to be used in the event of interruption of other routes by enemy action. It would provide a large source of cheap, dependable power, which could be generated without the use of crowded rail or highway-transportation facilities. This power would be available in an area which had a power deficit during the past war.

In recent hearings on the subject Secretary of State Marshall confirmed the statements of the Joint Chiefs of Staff and added another and highly important asset affecting the war potential of the Nation to be gained as a result of the construction of the project. This is the over-all increase in industrial power of both Canada and the United States. They have agreed to continue joint efforts for the security of North America, which was announced on February 12, 1947, as being the official policy of the two Nations, implemented by the Permanent Joint Board of Defense.

Secretary of State Marshall said that the strength of the United States lies in its natural resources as we have developed them. It is the development of this power that has enabled us to defend ourselves successfully. Here, now, is another potential source of cheap, dependable electrical energy, and a low-cost means of transportation which can increase our productive capacity. Any means of increasing this capacity increases our ability to defend ourselves and should be attained at once.

Fortunately, we have here a magnificent project which can accomplish a great deal for the economies of two great countries and, at the same time, a very definite strengthening of the power of defense.

It is fundamental that in the Western Hemisphere there be unity and strength. Construction of the St. Lawrence seaway will have a very helpful influence in that direction.

We cannot overestimate the dangers arising out of a repetition of the tremendous crisis in transportation and power during the last war. At the same time, it should be noted that there are now occasional shortages of both, even in peacetime. In wartime or in periods of national emergency, every possible means of transportation and source of power would be utilized to the utmost. The facilities of transportation and sources of power which in ordinary times might even be called surplus are soon exhausted by the demands of war, and the cry is for more. We should in times of peace provide resources of immediate value which would also have a crucial value in wartime.

All the great leaders in the past war stated their belief that the St. Lawrence seaway has a distinct military advantage. Had it then been in existence, it would have been of immeasurable assistance, according to Nimitz, Eisenhower, Arnold, Eaker, and Leahy.

There is in existence at the present time a condition of power stringency which may actually become a shortage or deficit should any sudden strain be put on our power industry. Any national emergency now would call for rationing of electricity, and it might even result in a break-down of our industry. Additional electrical energy is needed now and more will have to be produced in the future as our population and industrial needs grow. There has seldom been such a thing as a power surplus. Electrical energy, when made available, is soon utilized. That has always been our experience in the past, and certainly as our industrial processes become more complex we will ever need more and more sources of power. This project is urgently needed now, as a result of a known situation.

Experience of the last war has shown that it is impossible to forecast the needs for power. During the peak of demand for power in 1944 the major electric utilities of the Nation were using nearly ten times the amount used in the last year of World War I. Much of our defense industry is dependent upon large amounts of power. It took 100,000,000 kilowatt-hours of power during the past war to create a single battleship, and 450,000 kilowatt-hours to produce one B–17, a plane which is already obsolete. Between 1938 and 1944 the utility generating capacity increased about 60 percent, but it was only because of what had hitherto been considered surplus power, available at federally constructed dams in the Tennessee, Columbia, and Colorado River Basins, that the challenge was met. Production of aluminum and magnesium, important metals in any defense program, require vast amounts of electricity, as does atomic research. It was mainly because of the so-called surplus power available on the Tennessee River and the Bonneville development that the Nation was able to carry on the tremendous work at Oak Ridge and Hanford resulting in the development of the atomic bomb.

Some have contended that the power plants on the St. Lawrence would be extremely vulnerable to air attack, presenting an inviting target. But the great concentration of steam-generating plants in the metropolitan New York area with a combined capacity of over 2,000,000 kilowatts are equally vulnerable. As well say that New York City should not build its power plants as to say that the St. Lawrence plant should not, because of vulnerability to attack. The St. Lawrence plant will be much easier to defend from attack by aerial bombs or directed missiles than would New York City. The United States now commands the approaches to the St. Lawrence from military, naval, and air bases acquired from Canada and constructed by the United States during the war.

We must also observe the fact that the power to be generated at the International Rapids will be available the year round because of its design. An ice cover is formed very early but water supply for turning the turbines will be drawn off underneath this cover. This freezing weather will not be a factor so far as the power program is concerned.

In evaluating projects of this type it is well to consider the long-range future needs of the Nation and the benefits that might be expected.

One very important possible development is the effect on the great iron and steel industry of the Middle West.

The vast deposits of high-grade iron ore of the Lake Superior region, long depended upon by that great industry, are now being exhausted of their best grades. The general feeling is that there is only about a 15-year supply left at the present rate of utilization of these ores. Somewhere, somehow, something must be found to take their place. Several possibilities are open, all of them requiring more or less readjustment.

There is the possibility of utilizing the other lower-grade ores of which there are huge quantities. This can be done only by an expensive and complicated process, on the research and improvement of which our steel industry is spending millions. There is the possibility of utilizing high-grade iron ores from other countries. This can be done by any one of several methods. One method is to transfer the iron ore from the ports where it is received by rail to the present site of the industry. This, however, would increase the total cost of production to such an extent that the industry might seriously consider moving the entire plant to the seaboard, truly a tremendous step. Its importance can hardly be estimated. The repercussions throughout the industrial structure of the entire Nation would be hard to calculate. The loss of such a large and important industry to the Middle West would be disastrous.

There remains a comparatively simple, relatively less costly remedy for this approaching dilemma in which an industry absolutely vital to the Nation in peace as well as in wartime will soon find itself. That solution is to build the St. Lawrence seaway. Through this waterway can be brought the high-grade ores of the Quebec-Labrador, Brazilian, and other fields. Private enterprise could soon adapt the present very efficient ore carriers to the open sea, and the iron and steel industry of the Midwest can be kept there. Its raw material, iron ore, can be secured at little higher cost than it is now. Construction of this seaway might well mean the salvation of iron and steel industry in the Midwest, and such a result should be almost sufficient reason alone for undertaking the project.

The impact of the power development on the northeastern part of the Nation is also worth considering seriously.

Through the International Rapids at the boundary of New York and Ontario passes the entire flow of the five Great Lakes. A great reservoir is formed insuring a minimum year-round flow of 230,000 cubic feet per second, available for power. This is enough water to provide generating capacity of 2,200,000 horsepower, or 1,640,000 kilowatts, and it would be second to the Grand Coulee project in magnitude. The United States share, one-half of this, would be exceeded only by Grand Coulee and Hoover Dams.

The water from these inland seas can be used without the necessity of building great dams and providing tremendous reservoirs to impound the water, nor would it be necessary to buy large amounts of land that might be flooded. Nature has provided the reservoir stabilizing the flow and we have a remarkably constant and economical source of power.

The Northeast has been losing population in recent years. Industry has moved away mostly because of the lack of cheap power. Make a large block of cheap power available to this power-deficient area and the trend can be checked, prosperity can return to an area where great labor skills and technological know-how await only a chance to be put to work. Give them a chance to regain their old prosperity by making cheap power available. This is not a project for one section of the country alone. Old industries revived, new industries begun, more products shipped from the great ports of the Northeast, more commodities imported, including raw materials for its industry—all can be set into motion by providing it with the largest single block of hydroelectric power available in the entire area.

Lack of developed hydroelectric power in the Northeast has unquestionably limited industrial expansion in northern New York and nearby areas while 4,000,000 domestic, rural, and small commercial customers for electric energy continue to pay relatively high rates.

The area for which the St. Lawrence power project will provide, including New York and New England, with the exception of Maine, has lagged behind the rest of the Nation in providing new sources of electrical power. In fact, it was necessary during the last war for the War Production Board to impose a ceiling on expansion of war production in the area because of the limited amounts of power available. Two great metallurgical plants, one at Massena on the St. Lawrence and one at Niagara Falls, were forced at rely on importation of steam-generated electricity from New York City, and any additional amounts which could be obtained by importation from Canadian sources and by temporary diversion of Niagara water through existing power turbines. This was a definite handicap to the war effort. We must prevent such a thing happening again. Ontario itself is short of power and we cannot depend on that source.

A competent study by the Federal Power Commission of the needs of the area for electricity has indicated that the entire St. Lawrence output could be absorbed in a very short time. Encroachment on normal reserves, delay in the retirement of old, inefficient generating units, and the development of new industrial demands in anticipation of the availability of St. Lawrence power might well result in absorption of power from this project within a year or so after it becomes available.

Many believe that benefits from this waterway would be as great as those derived from the Panama Canal. It would help a region placed at a disadvantage by the latter which puts eastern industry at an advantage in western markets by making available cheap water transportation from Atlantic to Pacific ports, and vice versa. This would relieve midlands industry now dependent upon relatively high-cost rail transport to reach the great markets of the eastern and western seaboards.

Prospective increases in freight traffic in the United States over the next 15 years will be such as to make the St. Lawrence seaway an absolute necessity in handling our ocean-bound traffic, according to a survey by the Department of Commerce in 1941.

The same survey states that many or all of the ports which claim to be in danger of ill effects from construction of the project will gain new traffic as the result not only of the normal growth of the United States but of the industrial expansion that will be stimulated through this project.

There are many other reasons for the construction of the St. Lawrence waterway. Every survey made, irrespective of cost estimates, has been favorable to the project. The case has been proved, the plans are ready, and the work should proceed. It is engineeringly feasible and economically justified.

Nature has provided a 90-percent complete waterway. Only 10 percent more needs to be constructed or improved. Canada has completed substantial improvements costing more than $133,000,000; the United States has already invested $32,000,000. Canada is prepared to join us in completion of the project. We should work with her to finish the job.

It is hardly possible for private industry to carry out the project because of the international complications involved. If it is to be done, it must be done by the two Governments.

The project will make available a cheap transportation facility for a vast area of the Middle West which has suffered for a long period from a disadvantageous position in the markets of the world due to high transportation costs. Savings of up to one-half of transportation costs have been estimated for many commodities. Its construction will aid greater industrialization of some sections of the Middle West which are now largely or completely agricultural, reducing dependence upon the vagaries of the international agricultural markets. Even so, the availability of a cheaper means of transportation will tend to be a stabilizing factor for the agriculture of the Middle West.

The low-cost transportation will make available in the Lakes region new and needed raw materials on which to base new industries. New commodities will reach this great market by the same route, at prices which up to now may have prevented their shipment.

The period of time during which the seaway will be entirely ice-free coincides with high-peak demand upon all transportation facilities. Thus it will tend to relieve some of the pressure on them which at times has almost caused a break-down, and at many other times has caused a car shortage on the Nation's railroads. This period covers the time during which the grain crops normally move to market. This grain movement year after year causes the recurring car shortages about which so much is said but so little actually ever done. Would not the construction of this waterway help the railroads rather than hurt them? Even use of the seaway's capacity to the extent of 25,000,000 tons annually would equal only about 4 percent of the railroads' total traffic.

Many have wondered about the possible effect of the construction of the seaway on the coal industry. However, if the experiences of the past are any criteria the coal industry will benefit as much as any other. This has been the experience in the Tennessee Valley region where it was believed that the coal industry would suffer greatly. However, the consumption of coal throughout that area has greatly increased since the inception of the TVA power program. The seaports of the Atlantic seaboard are even now open, as they have been for years, to possible competition from the so-called cheap foreign coals. Has anyone seen much foreign coal there to compete with our American coal? No, on the contrary, several of our great Atlantic ports are highly dependent upon the export of American coal for their prosperity.

New industries and expansion of older industries made possible by the seaway will, on the other hand, increase the demand for coal. Coal is one of the essential raw materials on which a large portion of our industry is based. Cheaper transportation facilities encourage the growth of industry which in turn creates a greater demand for coal. The logic is inescapable.

While New York, Boston, and Buffalo might at first suffer some loss of traffic—the latter particularly some of its terminal grain business—it must not be forgotten that between 80 and 90 percent of the interchange of commodities between the East and West is for domestic consumption and not for exports and imports, upon which the ports depend for their well being. In the long run the increased prosperity of another section of our great country made possible by this project cannot but help to increase the prosperity of our ports. Some certain commodities will still not use the seaway because of the time element. Whatever increases the prosperity of such a large area as the 16 States of the Middle West will increase the prosperity of the whole Nation.

While it is not now a question of primary importance, at some time in the fairly near future the need for more jobs may be of vital importance. During the construction period of from 4 to 8 years many thousands of man-days of labor will be utilized, not only at the site, but in industries throughout the Nation. This stimulation to employment will not, when construction is completed, silently fold up and steal away. It will have a lasting effect especially in the region where construction is located. This alone will far outweigh the cost of the entire project.

There has been some feeling that shipping will not use the seaway. It has been stated by one old in the ways of seafaring that where there is a dollar's worth of trade to be had some boat will go get it. The present shallow 14-foot canal is being used at near capacity now, and profitably. Wood pulp is reaching the farthest west of the lake ports from overseas. It hardly seems conceivable that these ships would engage in an unprofitable business. The present canal has 22 locks, while the projected deeper one would have only 8 locks over the same distance. This would make navigation simpler. Montreal has an average of 4 days of fog a year, while New York has an average of 44. This latter does not seem to prevent shipping from using New York as a port. The route will have the added advantage of enabling shipping to reach Europe from America with a thousand miles less of open water than is the case from the Atlantic ports.

There is no need to fear that cheaply operated foreign vessels will steal away our very profitable trade between ports on the Great Lakes. That is prohibited by the law which restricts coastwise trade to American vessels.

The entire project can be built at little or no cost to the taxpayer in the long

run. Through the medium of a system of tolls on the volume of traffic which testimony at the lengthy hearings on the project would lead us to expect would use the navigation facilities, it would be self-liquidating. Proceeds from a small toll charge, not to exceed $1.25 per ton, would return sufficient funds to pay operation and maintenance costs, as well as to provide for amortization at a reasonable rate of interest. The power phase of the project has been spoken for by the State of New York which will recompense the Federal Government for the cost of the works primarily for power, as well as one-fourth of the costs of those works common to navigation and power.

The PRESIDING OFFICER (Mr. ECTON in the chair). The clerk will state the first committee amendment.

The CHIEF CLERK. On page 2, line 16, it is proposed to strike out "St. Lawrence River" and insert in lieu thereof "Great Lakes-St. Lawrence system."

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gurney	O'Daniel
Baldwin	Hatch	O'Mahoney
Ball	Hawkes	Overton
Barkley	Hayden	Reed
Brewster	Hill	Revercomb
Bricker	Hoey	Robertson, Va.
Bridges	Ives	Robertson, Wyo.
Brooks	Jenner	Russell
Buck	Johnson, Colo.	Sparkman
Bushfield	Johnston, S. C.	Stennis
Butler	Kilgore	Stewart
Byrd	Knowland	Taft
Cain	Langer	Taylor
Capper	Lodge	Thomas, Okla.
Chavez	Lucas	Thomas, Utah
Connally	McClellan	Thye
Cooper	McFarland	Tobey
Cordon	McGrath	Tydings
Donnell	McKellar	Umstead
Downey	McMahon	Vandenberg
Dworshak	Magnuson	Watkins
Eastland	Martin	Wherry
Ecton	Maybank	Wiley
Ellender	Millikin	Williams
Flanders	Moore	Wilson
Fulbright	Morse	Young
George	Murray	
Green	Myers	

Mr. WHERRY. I announce that the Senator from Michigan [Mr. FERGUSON] is absent by leave of the Senate.

The Senator from Indiana [Mr. CAPEHART], the Senator from Missouri [Mr. KEM], the Senator from Wisconsin [Mr. MCCARTHY], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate on official business of the Joint Committee on Atomic Energy.

The Senator from Nevada [Mr. MALONE] is absent by leave of the Senate on official business of the National Resources Economic Subcommittee of the Committee on Interior and Insular Affairs.

The Senator from New Jersey [Mr. SMITH] is absent because of illness.

Mr. LUCAS. I announce that the Senators from Florida [Mr. HOLLAND and Mr. PEPPER] and the Senator from Nevada [Mr. MCCARRAN] are absent by leave of the Senate.

The Senator from Maryland [Mr. O'CONOR] is absent on official business.

The Senator from New York [Mr. WAGNER] is necessarily absent.

The PRESIDING OFFICER. Eighty-two Senators have answered to their names. A quorum is present.

Mr. HATCH. Mr. President, probably no Senator has a greater interest in the debate which is now going on than has the Senator from New York [Mr. WAGNER]. Unfortunately it is impossible for the Senator from New York to be present. He is very anxious that his views be made known to the Senate, and has prepared a statement which he has asked me to read in his behalf and in his stead. I shall now read the statement prepared by the Senator from New York. The views which he expresses, I might say, are also my own views, but at this time, as I read this statement, it will be the statement of the Senator from New York.

STATEMENT OF SENATOR ROBERT F. WAGNER ON THE ST. LAWRENCE SEAWAY PROJECT (S. J. RES. 111)

The people of the State of New York have long recognized that they possess a priceless asset in the resources of the St. Lawrence River and that these resources should be fully developed to serve the public good.

As a member of the Legislature of the State of New York and throughout my service in the United States Senate, I have fought for 40 years against the alienation of St. Lawrence power, and the undeveloped power on the Niagara as well, to private interests which have always been eager to get control over these resources for private gain.

Thanks to policies established under the administrations of Gov. Alfred E. Smith, Gov. Franklin D. Roosevelt, and Gov. Herbert H. Lehman, these great water powers were preserved under public control and are now available for public development and use for the general benefit of millions of residential, commercial, and rural customers for electric service within transmission distance of the power sites.

I was not prepared in 1934 when a plan for developing the Great Lakes-St. Lawrence seaway was presented to the Senate, to support the initiation of the project largely because of the existence of great surpluses of transportation and power facilities then prevailing. By 1941, however, the requirements of this country for more power and transportation facilities had expanded to a point at which it became evident that the development of the St. Lawrence for the dual purposes of power and navigation was urgently and imperatively needed. Accordingly, President Roosevelt and Secretary of State Hull negotiated with Canada the agreement of March 19, 1941, to complete the development, and to this agreement I have given my consistent support.

I voted for approval of the agreement and for authorization of the project in the Senate December 12, 1944, and as a member of the Committee on Foreign Relations June 13, 1946, and July 18, 1947. On October 2, 1945, I joined as a cosponsor with Senator BARKLEY, Senator VANDENBERG, Senator AIKEN, and others of a joint resolution to give effect to the United States-Canadian Agreement and to provide for construction of the project.

Long and careful study of the project as presented at public hearings before the committee and on the Senate floor has convinced me that the full development of the St. Lawrence River will be of incalculable value to the people of the entire State of New York, of the United States, and of the Dominion of Canada.

I am aware that fears have been expressed that further improvement of the St. Lawrence River, existing canals and locks of which are now used to capacity to carry a large commerce, might in some way adversely affect ports on the Atlantic and Gulf and other transportation facilities. Exhaustive investigation and extensive hearings have shown that these fears rest on no substantial foundations. The project has, in fact, been recommended as beneficial to existing ports and to the railroads in creating new traffic and a net gain in tonnage available to New York, Boston, Buffalo, and other great shipping centers, by the Corps of Engineers, the Department of Commerce, the United States Maritime Commission, and by the Committee on Foreign Relations in its reports June 13, 1946, and January 7, 1948. The overwhelming weight of the evidence before the committee fully supports these conclusions.

Because of the natural advantages which have made it the greatest port in the world, because of the immense population and productivity of the immediate area which account for the great bulk of the tonnage annually handled by the port, I have no fears for the future of the Port of New York. I would not support any measure which would harm the city of New York. On the other hand, I do not consider inimical to New York, and would not obstruct, the development of the great ports on the Atlantic, Gulf, and Pacific coasts, or on the Great Lakes, which do business with New York to their mutual benefit and share in the commerce of the Nation as a whole.

The direct benefits of the power development on the St. Lawrence River are so great that they stand virtually unchallenged on the record. Here on the New York-Ontario frontier is 2,200,000 horsepower of potential hydroelectric energy running to waste in the greatest market for power and electricity in the world.

During World War II it was necessary to restrict expansion of plants in New York State manufacturing essential war materials because of the lack of developed low-cost power in up-State areas. In 1947 a serious shortage developed in the area between Buffalo and Albany, resulting in October in curtailment of power use and interruptions in production in more than 90 industrial plants in the State.

The use of electricity in New York State, as in the United States, has steadily expanded in recent years until, in 1947, it rose above the peak established in World War II. The development of St. Lawrence power is imperatively necessary if the homes, farms, and industries of the area are to share in the benefits of increased electrification, greater use of electric appliances, and improved standards of living enjoyed in other areas where hydroelectric energy has been made available at low cost.

The development of the St. Lawrence will help to provide low-cost energy to meet a part of the growth in these demands—a growth which cannot otherwise be met except by increased consumption of oil, coal, and other exhaustible resources, at costs to the consumers far above the cost of hydroelectric energy, and with recurring shortages of oil and other fuels in the Northeast.

The fact that the St. Lawrence development is needed by and will benefit the neighboring Dominion of Canada, as well as the United States, emphasizes its value. These two great democracies have fought two world wars as allies since the project to complete the development of their greatest resource on the common frontier was first proposed.

America has grown great by developing its matchless resources. The Erie Canal, built by New York State, the Panama Canal, the TVA, and other great multiple-purpose projects throughout the country have contributed to the welfare of the whole Nation. The St. Lawrence development is in this tradition and in the American spirit of courageous enterprise, which we need today as never before.

In the light of our problems in the post-war world, and in view of the demonstrated need for the facilities to be provided by the

St. Lawrence development, I shall continue to support pending legislation to approve the United States-Canadian agreement and the joint resolution (S. J. Res. 111) to authorize construction of the project.

Mr. President, I am glad to have the privilege of submitting to the Senate the views of the Senator from New York as he has thus expressed them.

Mr. WILEY. Mr. President, I hope that during the period before the St. Lawrence seaway vote is finally taken, of February 27, my colleagues will become informed as to public opinion in their States and areas. I firmly believe that even men who are strongly committed to oppose the seaway will find that opinion in their areas supports this seaway.

I make this statement on the basis of all of the public-opinion polls which have been taken, which sustain my belief that the people of America are wholeheartedly behind the St. Lawrence seaway. Many of my colleagues will be returning to their home States during the next 2 weeks and to other States to make public statements. I trust that they will seek the reactions of their constituents and of as many American citizens as they can contact during this period. I believe that they will find that America believes, on the whole, that to oppose the St. Lawrence seaway is as illogical and unworthy as was opposition to the Suez Canal a half a century ago.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. No. I have not concluded my statement.

I appeal to my colleagues to listen to the voice of enlightened American citizens, looking forward to the needs of our expanding Nation, rather than to the fearists, the few selfish men who fear, although there is really no justification for their fear, that their narrow interests will be hurt by the St. Lawrence seaway.

There is widespread talk to the effect that the St. Lawrence seaway is already defeated on the basis of preliminary tallies which have been taken informally. I say that such talk is not only completely unjustified, but is absolutely unsound and untrue. The opponents of the seaway are trying to spread defeatism and pessimism among the seaway supporters. On the contrary, I am still confident that if my colleagues will approach this problem open-minded, if they will consider the national interests as against petty sectional interests, if they will listen to the voice of American public opinion rather than the voice of a few selfish interests, they will enable the seaway bill to be passed by the Senate.

Now I am very happy to yield.

Mr. LODGE. Mr. President, will the Senator from Wisconsin tell me what statement it is that he is reading?

Mr. WILEY. Certainly. It is a statement I have prepared.

Mr. LODGE. Does the Senator not think he ought to point out to the Senate that there is a difference between the Suez Canal and the St. Lawrence seaway, in that the Suez Canal is never frozen up?

Mr. WILEY. I think that has been discussed. I am just making an appeal now to the group who are going home this coming week to discuss the principles of Lincoln, and who are going to preach the patriotism that has made America great. They are going to talk about the unity Lincoln advocated. When a suggestion was made to "let the South go," Lincoln replied, "No; we are one Nation." Senators will be orating about the unity that Webster, a gentleman from the Senator's own State, exemplified when he said that we were one Nation, one and invincible, and that we want no East or West or North or South, that we were builders of a great Nation. We have our eye on the future, not on the past. That is why I make this appeal.

That is my statement. I could carry on in the same vein for hours, because I am sold on the merits of this great nation-building project.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. I am very happy to yield.

Mr. LODGE. I am sure the Senator could carry on for hours, and I know that I would enjoy listening to every word that he said.

Mr. WILEY. The Senator is kind.

Mr. LODGE. Not at all; I really mean it. I never tire of listening to the Senator from Wisconsin, because he comes forward with statements which are certainly very, very startling. But I do regret, I want to say again, as I have said it before, that in this statement, as in so many others, the Senator undertakes to accuse the opponents of the St. Lawrence project of selfish motives. I have never impugned the motives of the Senator from Wisconsin in this matter. I have always assumed that he was motivated by the loftiest patriotism. I have taken great care never by any kind of insinuation or implication or innuendo to make any argument that was not a national argument; and I am not going to change now. I am not going to impugn his motives now, but I do want to express regret that every time the Senator from Wisconsin rises to talk about the pending measure he seems to be so barren of real arguments that he finds it necessary to impugn the motives of the opposition.

Mr. FLANDERS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield?

Mr. WILEY. I wish to reply to the Senator from Massachusetts.

Mr. FLANDERS. Mr. President, will the Senator yield for 15 seconds? I wish to ask that permission be given for the Committee on the Allocation of Grain to hold hearings this afternoon.

Mr. WILEY. Mr. President, I realize that one of the motives that Abraham Lincoln——

Mr. FLANDERS. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER. The parliamentary situation is the Senator from Wisconsin. [Laughter.]

Mr. WILEY. I thank the Chair. I wish to inform the distinguished Senator from Massachusetts and his colleagues that the Senator from Wisconsin is in his place and is in a good situation.

I desire to say, in reply to the statement of the Senator from Massachusetts, that Lincoln always said that when a man indulged in impugning the motives of others, it indicated he had a poor case of his own. Yet, Mr. President, I also remember that the Good Book suggests that he who does not look after his own is unworthy. I am not impugning the motives of the Senator from Massachusetts. I am simply saying that he has too narrow a view, that he is provincial in his outlook, that he can see only the railroads and the Port of Boston. I am saying that this Nation is made up of 48 States. I am saying that when we have built the ports on the Atlantic and have spent hundreds of millions to build the ports on the Gulf and on the Pacific, we are entitled to have seven more locks built—we already have built eight—in a stretch of some 90 to 95 miles, which will give to America a fourth seacoast. That is all there is to it. So, when I suggested that when Senators return to their homes they consult their constituents, I am sure it was again a little element of fear in the Senator's bosom that he might find that his folks were leading the band wagon instead of his doing so that caused him to take exception to my remarks. I intended nothing personal. I love the Senator, I assure him, in spite of his shortcomings on the pending measure. He is always a gentleman, and I trust I shall always be one, but I can never refuse to bring to light a provincial or sectional view that impedes the general progress of the Nation, and that is my only purpose at this time.

Mr. JENNER. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Indianapolis Star of January 27, 1948, in relation to the St. Lawrence seaway.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LET ST. LAWRENCE SEAWAY WAIT

[From the Indianapolis Star of January 27, 1948]

Renewed proposals for spending hundreds of millions of public funds on the proposed St. Lawrence River seaway strikes a sour note at this time. The President has sent to Congress a record-breaking peacetime budget of $39,669,000,000. Members, in both parties, are earnestly studying items that could and should be cut.

No advocate of the St. Lawrence seaway is contending that it is an emergency project that cannot wait. Regardless of the advantages or lack of usefulness that may be urged concerning that proposal, it is not a must item. The taxpayers should not be assessed to finance any such undertaking as the St. Lawrence project. That proposal at least should be on the backlog of improvements to be taken up in seasons of business recession. There is bound to come times of unemployment. Federal funds could be used advantageously to take up the slack in such periods. Labor is scarce. The government should not be needlessly in competition with those seeking men and materials for housing and the other greatly needed construction.

It will be time enough to talk about that St. Lawrence improvement when we have labor and money to spare.

Mr. WILEY. Mr. President, one of the arguments advanced by the opposition to the St. Lawrence seaway is that the seaway would further cause bottleneck of railroad transportation, because it would complicate railroad transportation in the winter months, when the seaway would be closed up because of ice and when the railroads would already be jammed with traffic. That argument is effectively disproved on the basis of facts which I have just secured from the Department of Commerce. At my request, the Department submitted to me an analysis of railroad-car loadings. This analysis was based upon information supplied by the Association of American Railroads, and I ask unanimous consent that the tables be reproduced at this point in the CONGRESSIONAL RECORD.

As my colleagues know, I have sought consistently to keep insertions in the RECORD at a minimum, including only necessary materials. However, I do believe that these tables of car loadings are of outstanding importance not only to this St. Lawrence seaway project discussion, but to our consideration of the entire subject of railway transportation, which is uppermost in everyone's minds.

Now, what do these tables show? A brief inspection, even by a layman, shows that peak loadings occur for all commodities normally during the months ranging from August to November, inclusive. Thus, the position that we have taken that the St. Lawrence seaway, rather than complicate railroad traffic during the winter months, would actually serve to ease railroad traffic on the basis of all-year transportation is sustained in view of the fact that the peak of railroad traffic is during the late summer and fall months, at the very time that the seaway would be operating at maximum capacity.

The PRESIDING OFFICER. Is there objection?

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Total cars of revenue freight loaded, by months, 1937–47 [1]

TOTAL, ALL COMMODITIES

Month	1947	1946	1945	1944	1943	1942	1941	1940	1939	1938	1937

TRIBUTE TO JULIUS H. BARNES

Mr. WILEY. Mr. President, I have referred previously to some of the great men in business and in government who have contributed virtually their entire lifetimes to the advancement of the St. Lawrence seaway project. Their selfless endeavor is an inspiring story of American patriotism. I ask unanimous consent that there be printed at this point in the RECORD a brief statement, which I have prepared on the subject of one of these men, a world-renowned shipping authority and builder, to whom I have already referred, Mr. Julius Barnes, a great pioneer on behalf of the seaway project.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TRIBUTE TO MR. JULIUS H. BARNES

The ranks of the great pioneers for the St. Lawrence waterway are filled with some of the greatest names in recent American history—statesmen of public affairs and businessmen of farsighted vision. One such businessman is Mr. Julius H. Barnes, of Duluth, president of the National St. Lawrence Association, which has spearheaded efforts for the completion of this indispensable project. The record of this indefatigable leader speaks for itself. Mr. Barnes was president of the United States Food Administration Grain Corporation from 1917 to 1919. He was United States Wheat Director from 1919 to 1920. He was president of the United States Chamber of Commerce from 1922 to 1924, and chairman of the board of directors of the United States Chamber of Commerce from 1929 to 1931.

Mr. Barnes is a successful businessman who represents the very best and the very finest in the American free-enterprise system. Recently, he added to the long series of outstanding presentations which he has made on the seaway by preparation of a very interesting 71-page booklet entitled "Vast Peoples Are Stirring—Which Way—Americanism or Communism?" I wish that every one of my colleagues could read this booklet and grasp its vital message—the need for the St. Lawrence seaway to preserve American preeminence in world affairs and to counteract Russia's aggressive steps for industrial, political, and commercial expansion.

It is absolutely inevitable that the St. Lawrence waterway will one day soon be enacted. The forces of progress in our land are irresistible and this great project to which Mr. Julius H. Barnes has contributed of his efforts and his genius so long, so nobly, and so selflessly will, I trust, in the not-too-distant future reach fruition.

The Midwest and all America may well be proud of this great man whose efforts over the years have not been in vain, but will bear increasing fruit in the years and the decades and the generations to come.

BOY SCOUTS OF AMERICA AND THE WORLD OF TOMORROW

Mr. CAPPER. Mr. President, this year one of the great organizations of our country is observing its thirty-eighth anniversary. Boy Scout Week is being observed over the entire Nation the week of February 6 to 12. Since 1910, when it was first founded, over 14,500,000 persons have been members, and a great many of them say their membership has profoundly affected all of their lives. This is the Boy Scouts of America which is, of course, well-known to all Senators by reputation, and in many cases I know, by their personal association.

The Scout idea is becoming increasingly important throughout the world, and in my judgment may well become an important factor in promising international good will. Throughout the world, there are over 4,400,000 Boy Scouts organized in 42 countries. They all have the same code and follow more or less the same program, an important feature of which is that a Scout is friendly and a brother to every other Scout. They certainly carry this out in a practical way.

Last summer some 32,000 of them camped together in France for 2 weeks. This was called the Scout Jamboree of Peace and was the sixth such gathering to be held. They plan to hold another in 4 years. Think what it means to bring these boys from practically every civilized country on earth—except the dictator countries—to take part in adventure with mutual good will and understanding of this sort.

Of course, the Boy Scouts of America are helping their brother Scouts abroad in more practical ways, too. They have a world friendship fund to which the Scouts themselves contribute, and the proceeds of which are used for Scouts abroad who need it. They take up collections of used uniforms, camping equipment, Scout books, and all sorts of things which will help revive Scouting in war-torn countries.

Altogether this is a demonstration of international good will which is interesting to watch. All these boys got along wonderfully together in their camp last summer, with no friction, no misunderstanding, just friendly good will, and the promise of more friendship to come. If we are going to have a peaceful world in the future, probably one important

thing is to begin educating the citizens of the future throughout the world right now. The Boy Scouts of America is one American agency that is doing its part. I hope that the American people will continue to give them support and leadership.

COMMUNIST CIVIL RIGHTS CONGRESS AND PRESIDENT TRUMAN'S COMMITTEE ON CIVIL RIGHTS

Mr. O'DANIEL. Mr. President, the President of the United States has recently recommended the passage of certain measures contained in a report made to him by what is known as his Civil Rights Committee. I want to take time to state that the communistic philosophy contained in the President's recommendations originated in Moscow, and explain how the orders of Joe Stalin trickled down through his stooges right into our White House.

The President's Civil Rights Committee had its being and was nurtured into life as the warped and twisted offspring of the Communist Civil Rights Congress which met in Detroit in April of 1946, presumably to organize an offensive against the rising fascist aggression in the United States. Insofar as I have been able to learn the rising fascists about which the Civil Rights Congress was so concerned were southern Members of Congress; old-fashioned American businessmen who still believe in the competitive system of trade; the members of the House Committee on Un-American Activities; any American who does not believe in the new type alien social order, in fact, all the people whom the Communist and his fellow travelers do not like and who oppose communism.

The important and very, very dangerous thing about the Civil Rights Congress that had its inception in Detroit in April 1946 is the absolute fact that this Civil Rights Congress was formed by Communist-front organizations with histories that link them right back to Moscow in a straight unbroken line. Its stated and published aim, as proclaimed at the time of its origin, has been a program to strike chaos and disunity with all its attendant evils into the American scene of life. They strive with all their might to foster hatred between races in this country, not from any sincere interest they might have in the betterment of our minorities in America, but to exploit them, thereby creating confusion, and more hatred and confusion. For it is only in this manner that the Communist Party in America and its parent organization—the Politburo of Russia—can ever hope to achieve victory in America. Too many times has the Communist International laid out its pattern of evil for all to see and judge accordingly; therefore, we should know by now, after seeing the rape of most of Europe, what the Communist pattern is. It is internal strife and the greatest weapon of all is class and racial hatred.

We have unearthed too many documents recently on which the New Deal dynasty could not quite keep the lid clamped down, not to be absolutely certain that Stalin wants world domination and that he recognizes the fact that America is the only large stumbling-block in his path toward his Communist world-dream. The pattern is there for all to see. One of the first drastic steps was the organization in Detroit in 1946 of the Civil Rights Congress.

I intend to show, with references that will withstand any battering by the fellow-travelers, Reds, and Pinks in this country, that the fountainhead of both the Civil Rights Congress and the President's Committee on Civil Rights is the Communist International in Soviet Russia; that their declared aims and purposes are identical; that the same people and organizations were instrumental in forming both civil rights committees. Representatives from the same Communist-front organizations served both on the Civil Rights Congress and the President's Committee on Civil Rights.

The history begins in Russia, right after the Russian revolution in 1917, when the Communist International was formed with its underlying purpose to undermine and overthrow all governments of the world. The International formed the International Red Aid in 1922, which was part of an international network of organizations for the defense of Communists all over the world. It had different names in different countries, but its purpose was the same everywhere. In the United States it was known as the International Labor Defense, and has been under investigation by the House Committee on Un-American Activities since 1938. In 1939, Benjamin Gitlow, one of the original founders of the International Labor Defense, testified under oath:

> International Labor Defense is not a national organization, but an international organization * * * it is the legal defense organization of the Communist Party and the Communist International in this country and serves as a highly political and propagandist Communist organization.

When the Civil Rights Congress was formed in Detroit in April 1946, it was simply a merger of the International Labor Defense and the notorious Communist-front organization known as the National Federation for Constitutional Liberties. This National Federation was cited as communistic so many times by the Committee on Un-American Activities and other investigating groups that it lost its usefulness to the Communist Party and they decided to merge its identity with a new "front." So we find the Communist clan flocking to a new organization and under a clarion call that assured all and sundry that "an enemy offensive is now being waged against all the common people of the United States—labor, Negroes, Jewish people, the foreign-born, progressives, and others in a relentless drive to establish fascism in this country."

That, Mr. President, was the proclamation of the Communists, who assembled the Civil Rights Congress.

There can be no doubt but that the standard of living of the average Negro, Jew, foreign-born citizen, or any other person in the United States is far higher than that of the average Soviet worker under the Communist dictatorship of Joe Stalin. That much news does trickle out from behind his iron curtain occasionally. Another proof is the bitter fight which these red-hot Communists put up when an attempt is made by our Government to bar them from this country—or worse still, to send them back to Russia. That calls for the Army, the Navy, and the Marines.

In order to impress more vividly the similarity of the object of this call to organize the Civil Rights Congress in Detroit in April 1946 and the much publicized recommendations of the President's Committee on Civil Rights on October 29, 1947, I am inserting a photostatic record of this urgent summons to a Congress on Civil Rights on April 27 and 28, 1946. It is also well to bear in mind that the President's Committee on Civil Rights was formed in December of 1946, a few months following the Civil Rights Congress in April.

The draft call issued by the Congress on Civil Rights, which I said I would insert in the RECORD, reads as follows:

DRAFT CALL—URGENT SUMMONS TO A CONGRESS ON CIVIL RIGHTS IN DETROIT, APRIL 27 AND 28, 1946, TO ORGANIZE AN OFFENSIVE AGAINST RISING FASCIST AGGRESSION IN THE UNITED STATES

Today's drive to subvert our democratic liberties is well organized, well heeled, insidious. It presents an emergency that emergency measures alone can meet.

The great war against fascism is won, but the victory is far from secure. Only a coalition of all the forces of the people, through united action, can prevent its destruction.

Here's what is happening in the United States:

Reactionary forces, based on war-rich monopolies, die-hard union breakers, red-baiters, and race-haters, command the largest surviving fifth column in the world. They are turning the weapons and methods of fascism against the American people. They are prepared to destroy our democracy, even to the establishment of outright fascism.

Their program consists of smashing unions through strike provocation, injunctions, and legislation like the Case bill that would wipe out labor gains of a quarter of a century; spreading discrimination and hatred against minorities through violence against Negro civilians and veterans, particularly in the South, anti-Semitism, and destruction of FEPC; maintaining the poll-tax system to disfranchise 10,000,000 Negro and white Americans; sapping the strength of labor and other organizations by using Hitler's prime weapon of red-baiting, especially through revival of the Dies committee under RANKIN.

This reactionary program has met the growing organized resistance of the labor movement and other groups and individuals who believe firmly in democratic liberties.

The popular response to such campaigns as FEPC and poll-tax repeal shows that the people will organize. Veterans are fighting discrimination and challenging the pro-Fascist press. Committees everywhere have sprung up to defend victims of police and lynch violence; the renewed activity of such Fascist spokesmen as Gerald L. K. Smith has brought widespread, fighting protests.

Labor has sharply stiffened the defense of its civil rights, and people in all walks of life are rallying with enthusiasm to labor's defense.

Now more than ever the united action of the democratic forces is needed to enable each organization and individual to exert maximum effectiveness in the realization of a common program. The elaboration of a campaign or series of campaigns, coordinated in detail and Nation-wide in scope, is therefore essential to meet the challenges that today confront us all:

To safeguard and extend all democratic rights, especially the rights of labor, and of racial, political, religious and national minorities;

To combat all forms of discrimination against these groups;

To defend and aid victims of the fight for these rights;

To fight against domestic fascism and all its forms, Jim Crow, anti-Semitism, Red-baiting, discrimination against the foreign-born.

To these ends, we call upon civil rights, labor, religious, interracial and other organizations and individuals to attend a Congress on Civil Rights in Detroit on April 27 and 28, 1946, to formulate and agree upon a national program to defeat the offensive of reactionary and Fascist forces, and to consider all steps required to assure the maximum unification of effort to advance that program.

Mr. President, I have just finished reading the draft call issued by the Congress on Civil Rights for their meeting in Detroit on April 27 and 28, 1946. It will be noticed how nearly that call corresponds to the recommendations recently made by the President of the United States.

Now, so that all may know just how similar the Communist program is and this program handed to the Congress by President Truman, I quote from Mr. Truman's recommendations to the Congress as they appear in the CONGRESSIONAL RECORD as of February 2, 1948, on page 928:

1. Establishing a permanent Commission on Civil Rights, a Joint Congressional Committee on Civil Rights, and a Civil Rights Division in the Department of Justice.

2. Strengthening existing civil-rights statutes.

3. Providing Federal protection against lynching.

4. Protecting more adequately the right to vote.

5. Establishing a Fair Employment Practice Commission to prevent unfair discrimination in employment.

6. Prohibiting discrimination in interstate transportation facilities.

7. Providing home rule and suffrage in Presidential elections for the residents of the District of Columbia.

8. Providing statehood for Hawaii and Alaska and a greater measure of self-government for our island possessions.

9. Equalizing the opportunities for residents of the United States to become naturalized citizens.

10. Settling the evacuation claims of Japanese-Americans.

The line of thought and ideology are practically the same, and the reason for this similarity is not a coincidence. The truth is that the same presiding genius guided both groups.

Communists and fellow travelers from each of the 48 States were on hand as delegates to the Detroit meeting of the Civil Rights Congress. They represented practically every known Communist-front organization. From the files of the Committee on Un-American Activities we find that 43 persons who attended the Civil Rights Congress are also affiliated with the American Peace Mobilization. This organization was cited as subversive by Attorney General Clark on December 5, 1947. Some of the better-known names belonging to both organizations follow: Lewis Merrill, president, United Office and Professional Workers; Meyer Adelman, district director, United Steel Workers, Milwaukee; Philip M. Connelly, secretary, Los Angeles CIO Council; Councilman Eugene P. Connolly, New York City; Joseph Curran, president, National Maritime Union; former Representative Hugh De Lacy, Washington, D. C.; Donald Henderson, president, Food, Tobacco, Agricultural, and Allied Workers, writer for Communist press; Langston Hughes, Negro poet and writer, author of many atheistic poems, including Good-bye Christ; Rev. Jack R. McMichael, secretary, Methodist Federation for Social Service, recently denounced by Methodist ministers; Dr. Max Yergan, president, National Negro Congress; Paul Robeson, Negro singer and member of many Communist-front organizations; and Dr. Harry F. Ward, leader in the socialist church movement, Federal Council of Churches of Christ, also member of many Communist-front organizations.

Also from the files of the Committee on Un-American Activities comes a list of 83 individuals who aided the Civil Rights Congress in Detroit and were members of the notorious National Federation for Constitutional Liberties. In part, they are as follows: Louis Adamic, one-time protégé of Mrs. Eleanor Roosevelt; James Egert Allen, president, New York State Conference, National Association for the Advancement of Colored People; Mary McLeod Bethune, president, National Council of Negro Women; Elmer A. Benson, chairman, executive council, National Citizens PAC; Joseph R. Brodsky, attorney for the International Labor Defense, and attorney for the Communist Party in 1936–40, 1942, 1946, and 1947; former Representative Hugh De Lacy, sponsor of Civil Rights Congress, "beloved and cherished by the Communist Party" (CONGRESSIONAL RECORD, vol 91, part 9, page 11696); Stephen H. Fritchman, former editor, Christian Register, member of many Communist fronts, including North American Spanish-Aid Committee, Win-the-Peace Conference, sponsor of no less than 22 pro-Soviet organizations; and Lee Pressman, general counsel, CIO, who is in disagreement with his boss, Phil Murray, because of Pressman's affinity for the Red line.

The Civil Rights Congress has received the support of and has cooperated with numerous Communist fronts, of which the following are typical: American Labor Party; American Youth for Democracy; United Negro and Allied Veterans of America; International Workers Order, Lodge 572; American Committee for Protection of Foreign Born; and Council on African Affairs.

Key individuals who whipped into shape the Detroit Conference of the Civil Rights Congress are affiliated with all the better known Communist-front organizations, such as Michigan Civil Rights Federation; American Peace Mobilization; American League for Peace and Democracy; American Youth Congress; American Committee for Democracy and Intellectual Freedom; League of American Writers; National Council of American-Soviet Friendship; Joint Anti-Fascist Refugee Committee; Massachusetts Council of American-Soviet Friendship; National Negro Congress; Jewish People's Committee; American Student Union; League of Women Shoppers.

The above organizations were listed as Communist-fronts by the Committee on Un-American Activities in its report on Civil Rights Congress as a Communist-front organization on September 2, 1947, House Report No. 1115.

A delegation from my own home State of Texas attended this Civil Rights Congress in Detroit. Twelve people, 9 of whom were Negroes, from Houston paid their own fares to this conference to get help for their campaign in Texas. I have no record of what support they got, other than moral; but it is most probable that any donations raised were handled by the smart men who engineered the affair, and the Texas Civil Rights Congress repaired to Houston with advice only. This advice was probably flowered into full bloom on April 27, 1947, when the Daily Worker, Communist road-guide, said that "prominent Texans have petitioned the Texas Legislature against the passage of legislation which they charge would suppress ideas and political principles." They referred to a number of bills aimed at the suppression of the Communist Party. The Civil Rights Congress of Texas then proceeded to list 100 signers for all parts of Texas. Included were:

Educators: Prof. Clarence E. Ayers; Dr. Wendell C. Gordon; Mrs. J. H. Clauser; Dr. Clarence A. Wiley; Prof. Ernest A. Patterson; Dr. Harry E. Moore; Prof. E. E. Hale; Prof. N. Peach; Prof. J. H. Morton; Prof. Howard D. Asbury.

Ministers: Rev. Blake Smith; Rev. Fred E. Cole; Rev. L. N. Hawke; Rev. W. H. Holland; Rev. William C. Crawford.

Labor leaders: Ray Davidson, M. M. McKnight, Carl Garcia, Garland Butler, Arthur Leibson, R. J. Owen, Ed Dawley, C. A. Sanders, Ceferino Anchiando, Juan R. Benevidez.

Business, professional, and civic leaders: W. M. McMillan, Kenneth Lampkin, Regina Boyd, Mrs. U. V. Christian, Joe B. Dibrell, A. Maceo Smith, Jack Summerfield, Clare Ruggles, J. J. Jones, R. D. Dickson, Arthur Ruskin, A. A. Ormsby, C. D. Leake, Chester Frazier, Arthur DeWitty, Mrs. J. E. Craft, R. H. Duncan, and Mrs. L. M. Mitchell.

Students and veteran leaders: Melvin Webber, Stuart Chamberlin, Richard Sterba, Mr. and Mrs. Curry Gilmore, Mac E. Wallace, Louis Watel, Monroe Cohen, and Nicholas Seidita.

The references above are from the report on the Civil Rights Congress as a Communist-front organization by the Committee on Un-American Activities.

All of the foregoing brings us up to the President's Committee on Civil Rights. When he appointed his 15-man commission to look into things where racial and religious intolerance were threatening the very things we had just fought for, by some strange coincidence he managed to include at least six whose ideology runs parallel with that of the master minds who organized the Civil Rights Congress in Detroit in 1946. From the files of the Committee on Un-American Activities, I have before me the carefully recorded activities of these six

members of the President's Committee on Civil Rights. Who can say what motive is behind their cooperation on the President's committee? Why did they serve on the committee? Do we dare trust men who have belonged and do belong to organizations which have been found by a duly qualified congressional committee to be subversive? Have they had a change of heart and are really putting our country—America—ahead of any other in their planning? Or are they still—under the name of "liberals"—trying to tear down our Constitution, and substitute a socialized form of government patterned after that master of socialization, Soviet Russia. The Communist-front organizations to which they belonged had only one thing in mind, and that was to destroy our American form of government. Our various investigations have proved that very clearly. Is it not the duty of every American to seek out the facts and present them to the people, especially as the President's committee is merely an echo of the aims and recommended legislation published by the Civil Rights Congress in April 1946? Can we trust the motive behind this piece of business?

The members of President Truman's Committee on Civil Rights were: Rt. Rev. Henry Knox Sherrill, presiding bishop of the Protestant Church; Channing H. Tobias, New York City; Rabbi Roland B. Gittelsohn, of New York City; Francis P. Matthews, of Omaha, Nebr.; Morris L. Ernst, of New York City; John S. Dickey, president of Dartmouth College; James B. Carey, secretary of the CIO; Mrs. Sadie T. Alexander, of Philadelphia; C. E. Wilson, chairman, president of General Electric Corp.; Rev. Francis J. Haas, bishop of Grand Rapids; Mrs. M. E. Tilly, of Atlanta, Ga.; Boris Shishkin, Alexandria, Va.; Dr. Frank P. Graham, president of the University of North Carolina; Charles Luckman, of the Lever Bros. Co.; and Franklin D. Roosevelt, Jr.

The CIO News of November 10, 1947, states that Secretary-Treasurer James B. Carey, of the CIO, received from President Truman a letter thanking him for his part in preparing the report of the Committee on Civil Rights. Let us hope that James B. Carey's conversion, while fairly recent, has been thorough, for James B. Carey's affiliations and connections with Communist-front organizations go back to 1936. He has been a speaker for the Jewish People's Committee, an organization cited in 1944 by the Committee on Un-American Activities. That organization also had representatives at the Civil Rights Congress in Detroit, whether they attended officially or not. He has been a delegate to the World Youth Congress, most of whose sponsors were fellow travelers, and which also was represented at the Civil Rights Congress. He was a speaker for the American Student Union at their fourth convention in 1939, an organization cited by the Committee on Un-American Activities several times, which also had its members in attendance at the Detroit Civil Rights Congress. He was an honorary pallbearer at the funeral of Communist Tom Mooney in San Francisco in 1942. He is the signer of a petition to discontinue the Dies committee, originated in a letter by the Communist-front American Committee for Democracy and Intellectual Freedom in 1940. He spoke before the Washington Committee for Democratic Action in 1940. This organization was recently cited by Attorney General Clark. He has written for The Champion, Fight, and other publications cited as subversive. In 1940 Carey was a member of the National Council for American Peace Mobilization, the organization which furnished 43 of its members at the formation of the Civil Rights Congress in Detroit in 1946. Of course, at the present time James B. Carey seems to be putting up a real fight to clear the CIO of Communists. But with his background of affiliation with many dangerous Communist-front organizations, many of which were well represented at the Detroit Civil Rights Congress, one may still very well wonder if his conversion and about-face has been sincere and complete.

Morris L. Ernst, another of the President's Committee of Fifteen, has also been affiliated with organizations which have been cited as subversive and which were also represented at the Civil Rights Congress in Detroit. He has been a speaker for the League of American Writers and the American Youth Congress, and very active in the National Lawyers Guild. These organizations have all been cited by the Committee on Un-American Activities. He was connected with the medical bureau and North American Committee to Aid Spanish Democracy. He was a member of the Milk Consumers Protective Association, the League for Mutual Aid, and the Consumer-Farmer Milk Cooperative, Inc., all of which have been cited as subversive. At least three of these organizations were in attendance at the Detroit Civil Rights Congress.

Boris Shishkin, economist for the American Federation of Labor and 1 of the 15 on President Truman's committee, was at one time a member of the Washington Book Shop. He is well represented in the files of the Committee on Un-American Activities in this respect, and it should be remembered that the Washington Book Shop Association was very recently cited by Attorney General Tom Clark as subversive. Mr. Shishkin is one of the voluble speakers for the doctrines set forth in President Truman's Civil Rights Committee before organizations such as the Michigan Committee on Civil Rights, formerly the Michigan Council for Fair Employment Legislation.

Channing Tobias, of New York City, also on the President's Committee for Civil Rights, was recently classified by Mr. J. B. Matthews in a speech before the American Legion seminar as a confirmed fellow traveler. Mr. Tobias seems to have earned that distinction by way of association. He was an endorser of the American League for Peace and Democracy at its New York City conference in 1939. He has been affiliated with the National Committee To Win the Peace and the Southern Conference for Human Welfare, and was a member of Council on African Affairs. These organizations have all been investigated and cited as subversive by the Committee on Un-American Activities, and many of the same organizations were well represented at the Civil Rights Congress in Detroit in 1946.

Dr. Frank Porter Graham, also on the President's Committee, is not considered a Communist. He is, however, to quote a report on the Southern Conference for Human Welfare, which the Committee on Un-American Activities caused to be printed in June 1947, "one of those liberals who show a predilection for affiliation with various Communist-inspired front organizations." Dr. Graham's record and connections with Communist fronts is a long one. He urged freedom for Earl Browder, the Communist, and served as sponsor at a dinner held to celebrate the twenty-fifth anniversary of the Red army. He has been associated with the communistic International Labor Defense, legal arm of the Communist Party, the American League for Peace and Democracy, the American Committee for the Protection of Foreign Born, the American Committee for Democracy and Intellectual Freedom, the American Friends of Spanish Democracy, the China Aid Council, and other Communist fronts. The insidious thing is not in his belonging to and affiliating himself with these numerous fronts, which vary from a slightly pinkish tint to out-and-out red, and the International Labor Defense, which is an actual branch of the Communist Party, but the fact that many of these organizations with which Dr. Graham connects himself are also the front organizations whose members were featured strongly at the formation of the Civil Rights Congress in Detroit. The connection cannot be overlooked when it comes to weighing the doctrines enunciated by the President's committee, and it should be taken into consideration.

The Right Reverend Henry Knox Sherrill is a presiding bishop of the Episcopal Church. He is a member of the Massachusetts Committee on Racial and Religious Understanding, and on his record as such he was probably asked to serve on President Truman's Committee on Civil Rights. However, the files of the Committee on Un-American Activities also show another picture of Dr. Sherrill's life, wherein he affiliated himself with organizations cited as subversive. In 1943 he sponsored the Massachusetts Council of American-Soviet Friendship. Members of this organization were also very active in the formation of the Civil Rights Congress in Detroit. And the report on the Civil Rights Congress made by the Committee on Un-American Activities cites the organization as a "Communist front." Dr. Sherrill at various other times has been a sponsor for the National Council of American-Soviet Friendship, once as late as March 13, 1946. It will be remembered that the Civil Rights Congress met a month later, in April 1946. The National Council of American-Soviet Friendship had many of its representatives at the Civil Rights Congress, to express their views and doctrines. And the National Council of American-Soviet Friendship is one of the most subversive and un-American organizations on rec-

ord. It was even included by Attorney General Tom Clark when he made his report on subversive organizations in December 1947.

There, Mr. President, are the names of six members of President Truman's committee, each and every one of them with a record of service with Communist-front organizations. Yes, there were citizens on Mr. Truman's committee who do not bear the taint of communistic affiliation. They were put there to supply the window-dressing for the main show. They were put on the committee to lend an air of stability and conservatism to its acts, but Mr. Truman has reckoned badly with the knowledge of the American people, for the people are coming awake to the wiles of the Communist leadership which has crept into New Deal activities. Here we see Mr. Truman making a bold bid for the radical vote. He is out-Wallacing Wallace. He is hurling a boomerang that may come back to clip his own ears. I do not believe he can sell this bill of goods, even though it is wrapped in the habiliments of the Democratic Party. The program is an insult to the American people, regardless of race, creed, or color. It promotes class consciousness and inspires hates and racial prejudices. It is un-American, unconstitutional, and undemocratic. It is a stench in the nostrils of honest, self-respecting people, an abomination in the eyes of the Lord.

Here again we find the Communist radio blabbers in Russia running true to form. Anytime Joe Stalin wants to put something over on Uncle Sam, he first throws out the bait, and when he has his fish hooked, he starts propaganda in reverse. Joe and his politburo know if you want to put over anything communistic on Uncle Sam, the way to do it is to oppose that thing. His gang started the civil-rights program, and came in on the finish. Now comes the technique to get Congress to adopt the child of the Kremlin. As soon as Truman sends it to the Congress, Joe orders his radio stooges to denounce the program. They say it is an attempt by Truman to steal the liberals from Wallace and that the Kremlin is against it. But here in the United States we find the American Communists supporting the program and at the same time endorsing the candidacy of Henry Wallace. If Joe Stalin were to endorse the Truman civil-rights program, he knows that it would melt faster than a snowball cast into the burning fires of hell.

And, now, Mr. President, as a climax, we find the Communists gathering in Washington to lobby for the Truman program. We get this fresh from the hyena's mouth, the Daily Worker of February 4, page 3:

CRC ASKS TO MEET TRUMAN ON 10-POINT PLAN

The Civil Rights Congress yesterday asked for an interview with President Truman on Friday—

That is, tomorrow—

to discuss his recently issued 10-point civil-rights program. In a wire to the Chief Executive, Joseph Cadden, executive director, expressed support for the President's program but regretted that the message was long overdue.

"We regret also," said Cadden, "that the President waited until an election year for a move to enact such vital legislation. Every legislative proposal you submit in this message must run the gantlet of the white supremacists in Congress. If your message is to be more than a mere campaign document, we expect you, as a leader of the Democratic Party, to permit your party to invoke cloture in the Senate and thus defeat the inevitable attempt at a filibuster by Southern Democrats."

The Civil Rights Congress will have more than 100 persons in Washington on Friday—

That is, tomorrow—

from its various chapters to appear before the House Judiciary Committee considering the antilynching bill.

We hardly need to wonder that the Daily Worker and the Communist Party in the United States are working, and working hard, to see that the report of the President's Committee on Civil Rights goes through. The Communists center their attacks mostly on the southern Democrats because of the legislation in many Southern States on race segregation and, therefore, they make the Negro race the tragic pawn in the Communist movement to disrupt the country. The South today is going ahead soundly and steadily working for better educational and economic advantages for its millions of Negroes. The South was left helpless with this great problem at the end of the War Between the States, and she has made great strides to solve the problem in the only way possible. And that way is certainly not the way the President and his 15-man Committee on Civil Rights has outlined. The President's way is the way the Communists are hoping for and fighting for. It fits their purposes perfectly and we should weigh all the evidence at hand thoroughly before we accept the President's recommendations at all.

There is no problem affecting the lives of the white and black men in the South which the intelligent people of the two races are not working out satisfactorily. Decent whites and decent blacks respect each other. They work together and fraternize upon a basis of respect for the individual, each as he deserves, but they worship separately, live separately, attend different schools. Almost every known faith has its separate schools here in America. That is possible under the Constitution, for the Constitution enables men of any and all creeds, races, and colors to choose their associates, their religion, their schools, and their elective political officials. The Truman program proposes to throw all this in reverse. That is why, Mr. President, the Truman program is un-American and must be defeated.

SYNTHETIC LIQUID FUELS

Mr. TAFT obtained the floor.

Mr. LUCAS. Mr. President——

Mr. TAFT. Mr. President, does the Senator from Illinois wish to make a statement?

Mr. LUCAS. No. As I understand, the Senator from Nebraska wishes to have a bill considered at this time by unanimous consent. I have conferred with the Senator from Nebraska about it, and also have discussed the measure with the Senator from Wyoming [Mr. O'MAHONEY]. As I understand, there is no objection to the bill by any member of the committee from which it was reported.

Mr. BUTLER. I wish to say, Mr. President, that the bill in question was reported unanimously from the Committee on Interior and Insular Affairs. It is Senate bill 134.

Mr. LUCAS. Mr. President, I have no objection to a motion being made at this time that the pending business be temporarily laid aside and that the bill be considered.

Mr. TAFT. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of Senate bill 134, Calendar 916.

The PRESIDING OFFICER. Without objection——

Mr. RUSSELL. Just a moment. Reserving the right to object, I should like to look at the calendar.

Mr. LUCAS. Mr. President, if it is proposed that the Senate consider other bills in addition to Senate bill 134, I suggest that perhaps there should be a quorum call before any such action is taken.

Mr. TAFT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gurney	O'Daniel
Baldwin	Hatch	O'Mahoney
Ball	Hawkes	Overton
Barkley	Hayden	Reed
Brewster	Hill	Revercomb
Bricker	Hoey	Robertson, Va.
Bridges	Ives	Robertson, Wyo.
Brooks	Jenner	Russell
Buck	Johnson, Colo.	Sparkman
Bushfield	Johnston, S. C.	Stennis
Butler	Kilgore	Stewart
Byrd	Knowland	Taft
Cain	Langer	Taylor
Capper	Lodge	Thomas, Okla.
Chavez	Lucas	Thomas, Utah
Connally	McClellan	Thye
Cooper	McFarland	Tobey
Cordon	McGrath	Tydings
Donnell	McKellar	Umstead
Downey	McMahon	Vandenberg
Dworshak	Magnuson	Watkins
Eastland	Martin	Wherry
Ecton	Maybank	Wiley
Ellender	Millikin	Williams
Flanders	Moore	Wilson
Fulbright	Morse	Young
George	Murray	
Green	Myers	

The PRESIDING OFFICER. Eighty-two Senators have answered to their names. A quorum is present.

The Senator from Ohio [Mr. TAFT] asks unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of Senate bill 134, which will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 134) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190).

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

There being no objection, the Senate proceeded to consider the bill.

Mr. FULBRIGHT. Mr. President, are we to have an explanation of the bill?

Mr. BUTLER. Mr. President, I shall explain the bill very briefly, and then I shall yield to one or two other Senators who wish to make statements in connection with what I consider to be a very important piece of legislation.

During the past 2 years we have experienced an amazingly rapid increase in our requirements for petroleum products. In contrast, we have had no corresponding increase in petroleum resources or productive facilities. The result has been spot shortages in various parts of the country and increased dependence on foreign sources.

The long-term prospect with regard to our petroleum supplies is even more serious than the temporary shortages. No doubt these shortages will be cured if all goes well and if we remain at peace. However, the only cure in immediate prospect is through increased imports. Furthermore, if we should suddenly find ourselves at war, Secretary Forrestal tells us we would immediately be faced with a shortage of 2,000,000 barrels a day needed for all-out military operations. Although we shall certainly find some additional supplies of oil in this country, there seems to be no real prospect that they will be sufficient to fill the evergrowing demand. In other words, if petroleum were to be our only source of liquid fuel, we would come to be more and more dependent on foreign sources. Officials of the State Department and the Army-Navy Petroleum Board have expressed the opinion that by 1965, half of this country's oil requirements will have to be imported.

The Synthetic Liquid Fuels Act of 1944 was designed to meet this situation by proceeding as rapidly as possible with research and development of potential sources of liquid fuels from coal and oil shale. Under this bill, a number of programs to conduct the basic research and to perform pilot-plant and demonstration operations were to be started.

Two oil-shale mines and a demonstration plant for the production of shale oil were placed in operation near Rifle, Colo., early in 1947. A demonstration plant for production of gasoline by the hydrogenation of coal is being developed at Louisiana, Mo. Laboratory facilities for the development and improvement of the synthetic liquid-fuel process have been established at Pittsburgh, Pa.; Morgantown, W. Va.; and Laramie, Wyo. The Bureau of Mines is ready now to contract for the construction of a Fischer-Tropsch demonstration plant, but this will not be possible until new legislation is enacted. Laboratory work by the Department of Agriculture at Peoria, Ill., is also covered by this legislation, looking toward a utilization of agricultural products as a source of industrial alcohol.

The bill simply extends the program for 3 more years and increases the total authorized appropriation for the entire program from $30,000,000 to $60,000,000.

The principal effect of the bill will be to permit the program to go forward as originally planned. Very few new features are contemplated.

Progress has been slower than anticipated for several reasons. First, the Synthetic Liquid Fuel Act was passed in 1944 at the height of the war, and it was therefore not possible to get under way with some of the construction for some little time. Second, the program was seriously delayed during much of 1946 by a succession of disastrous strikes. Third, the Missouri Ordnance Works, which was to have been used under this program, was taken over by the War Department for fertilizer manufacture in 1946.

A large part of the increased authorization is necessary to take care of the higher level of costs due to the rise in the price level and salary scale since 1944.

In addition, certain new features have been added, based on experience to date, and on some of the developments of European research that have become available to us since the end of the war. New processes are being worked out for test and demonstration at the facilities at Pittsburgh, Pa., and Louisiana, Mo.

In my opinion, one of the most important aspects of this program lies in the development of efficient processes for the use of surplus agricultural products in the manufacture of industrial alcohol and other products. I mentioned the work that was being done at Peoria, Ill., in connection with this problem. It is my feeling that within a very few years we may again be faced with the necessity for disposing of agricultural surpluses in some way. If this research program is pushed aggressively and if we give adequate encouragement to those interested in this problem, I have hopes that we may meet a part of our shortage of liquid fuels and petroleum products through conversion of surplus agricultural crops into alcohol.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from Arkansas.

Mr. FULBRIGHT. The Senator has referred to the research which is being carried on. Will the Senator tell me what is being done with the plant at Omaha?

Mr. BUTLER. The plant at Omaha is under private operation. It is being operated, and is contributing to the needs of the times, but it is not in any way connected with the Government. It is not Government operated.

Mr. FULBRIGHT. It still belongs to the Government, and could be available for the purposes of the fuel program if we chose to extend the program to it, could it not?

Mr. BUTLER. I doubt that there is any provision in the bill which in any way affects the operation of the plant at Omaha.

Mr. FULBRIGHT. The reference to agricultural production would seem to be broad enough to include such a plant if the Government chose so to use it, would it not?

Mr. BUTLER. I say very frankly to the Senator that I see no reason at the moment why this piece of legislation could not be made adaptable to the situation which the Senator mentions.

Mr. FULBRIGHT. I should like to know on what scale the plant at Peoria is operating. I am not familiar with that operation.

Mr. BUTLER. The plant at Peoria is one of several experimental plants placed in operation under a previous law. There is one in New Orleans, one in the West at San Francisco, I believe, one in Philadelphia, all having to do with agricultural research. The fourth is at Peoria. The amount of the work being done on this phase of it is only incidental to the total over-all program.

Mr. FULBRIGHT. Is the Senator satisfied that that stage of the program will be adequately taken care of under this bill?

Mr. BUTLER. I certainly hope so.

Mr. FULBRIGHT. Is the Senator satisfied that it will be? I hope so, too, but I do not know anything about it.

Mr. BUTLER. I should not like to try to predict today exactly what the managers of it may do, but I know what I would like to have them do.

Mr. President, I have only a word or two more to say in this connection.

This bill is urgently recommended by the Department of the Interior, which points out that it must be passed soon in order to permit the Bureau of Mines promptly to contract for additional construction. The importance of some such legislation has also been emphasized by the Secretary of Defense. The petroleum industry and the special petroleum committees of both the Senate and the House have recognized the need for this work. The Committee on Interior and Insular Affairs unanimously reported the bill on Monday of this week.

Mr. WATKINS. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from Utah.

Mr. WATKINS. Mr. President, I desire to associate myself with the statement made by the Senator from Nebraska in relation to the bill and the need for such legislation. The plant in Colorado has been making a fine contribution. It is located in the very heart of the oil-shale fields in the Rocky Mountain States, and also in the coal fields. In Colorado, Wyoming, and Utah, there are immense deposits of oil shale, mostly on the surface, where it can be mined by open-cut mining. Many of the counties in those States are underlaid with coal. To the people in the intermountain West it is of great importance, and to the people of the United States and of the world it is of still greater importance, that these great reserves of oil to be produced from coal and shale should be brought to a point where it can be used in the years ahead.

I am glad to associate myself with the statement made by the senior Senator from Nebraska.

Mr. BUTLER. I thank the Senator from Utah for his splendid statement.

Mr. O'MAHONEY. Mr. President, will the Senator yield?

Mr. BUTLER. I am very willing to yield the floor to the Senator from Wyoming, who I know should speak at some length on this very important measure. He was the author, I believe, of the original legislative proposal, and is the author of the amendment which is under consideration.

Mr. O'MAHONEY. Mr. President, let me say that there is now pending in the House of Representatives a companion bill to Senate bill 134. It was unanimously recommended by the House Committee on Public Lands, just as this bill was unanimously recommended by the Senate Committee on Interior and Insular Affairs.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield to the Senator from Colorado.

Mr. MILLIKIN. For the sake of strict accuracy, I should like to say that because of a personal interest of mine which could be helped or hurt by the pending legislation I did not vote in connection with the committee's action on the bill.

Mr. O'MAHONEY. Mr. President, I am glad the Senator interrupted to point that out, because I am aware that he made the same statement in the committee. What I meant to say was that the bill was reported without objection.

I was about to say that I am happy to be able to advise the Senate that the Rules Committee of the House has today granted a special rule for the early consideration of the House bill. I was delayed in coming to the Senate during the quorum call because I had been requested by Mr. Bulkley Griffin, a correspondent of numerous newspapers in New England, to make a radio broadcast with him regarding the synthetic-fuel program. These two things indicate the widespread interest of the country in the development of synthetic fuels.

As the Senator from Nebraska has well said, researches in connection with the program began several years ago. Hearings were conducted by what was then the Senate Committee on Public Lands, in conjunction with the House Committee on Mines and Mining, in Washington, in Pittsburgh, in Utah, and in Wyoming. The testimony which was developed showed a general agreement upon the part of all experts in and out of private industry that the Bureau of Mines should be authorized to construct and operate demonstration plants, the purpose of which is to show that synthetic fuels can be made commercially from these great resources covered by the bill.

When the original bill was under consideration in the committees and on the floor, it was modified so as to include agricultural products, and the appropriations which are here authorized are available and may be made available for the Department of Agriculture to conduct its experiments for the manufacture of synthetic fuel from forestry products and any other agricultural products.

The significance of the measure I think can readily be recognized when it is pointed out that the United States, which has long been the world's greatest producer of petroleum, has petroleum reserves of approximately 22,000,000,000 or 23,000,000,000 barrels of oil; but discoveries in the Middle East, particularly in Saudi Arabia, and discoveries in Latin America would indicate that the center of gravity, so to speak, for the production of petroleum has passed from the United States to foreign countries. In Saudi Arabia it is estimated that the reserves of petroleum amount to at least 50,000,000,000 barrels. The Senator from Nebraska in his statement with respect to this bill pointed out that the oil shale deposits in Colorado alone are now estimated as capable of producing not less than 200,000,000,000 barrels of oil. That is four times the estimated reserve of Saudi Arabia in petroleum. But if we take into consideration the oil shale deposits of Utah and of Wyoming, in addition, the reserves on these three public-land States are not less than 300,000,000,000 barrels.

There are also reserves of oil shale in Montana, Nevada, and the Eastern States. I understand that it is estimated that in Pennsylvania the deposits of shale are sufficient to produce approximately from 13,000,000,000 to 20,000,000,000 barrels of oil—oil from shale. West Virginia has supplies of oil shale, and so does Ohio, and so do a score of other States.

But, Mr. President, we are not confined to the use of oil shale. The coal resources of the United States, which are almost beyond imagination, are capable of producing unlimited supplies of synthetic fuel. I need not remind the Senate that Hitler fueled his war machine with synthetic fuel manufactured from coal. The deposits of coal in the United States are estimated as being sufficient, at the present rate of consumption, to supply the United States for at least 2,500 years.

Mr. KILGORE. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. KILGORE. In regard to synthetic fuel, I wonder whether the Senator is aware that before VE-day the German war machine was all set up to power its equipment with synthetic fuel in the form of alcohol in certain mixtures. The Germans were not completely ready in that respect; but the chief of air said that, if they had been given 5 months more, they would have been able to prolong the war 5 years by the use of alcohol as a synthetic fuel.

Mr. O'MAHONEY. I thank the Senator. That is a correct statement of the situation.

Mr. President, the United States has reserves of natural resources sufficient to make it completely independent, in my judgment, of any foreign source of supply.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield to the Senator from Oregon.

Mr. MORSE. The remarks of the Senator from West Virginia in regard to the development of alcohol in Germany give me an opportunity to ask the Senator from Wyoming a question in regard to this bill. I am sure the Senator is aware of the fact that during the war a pilot plant for the manufacture of wood alcohol out of wood waste was started at Springfield, Oreg. As the Senator knows, there are great quantities of wood waste in my State. In fact, one of the great problems of the lumber industry is to develop methods for making use of the present waste in the lumber industry—the sawdust and all the parts of the trees that are not suitable for lumber and do not go into lumber.

Mr. O'MAHONEY. I may say to the Senator from Oregon that during the progress of the hearings on this subject, we were told that it was actually possible to make an appropriate feed for livestock out of wood waste.

Mr. MORSE. That has been alleged. I have not yet fed any of it in any of my livestock production.

The question I wish to raise is whether under this bill the Department of Agriculture could, if it decided to do so, take over that alcohol plant, under the funds provided for in the bill, and continue with its development, to the end of trying to determine whether an economic program for the manufacture of alcohol could be developed out of wood waste.

Mr. O'MAHONEY. It would be altogether within the terms of the bill. I point out to the Senator from Oregon that the hydrogenation experiments of the United States Bureau of Mines, which now are about to take place at Louisiana, Mo., are in a war plant which was constructed for the purpose of making ammonia, and was turned over to the Bureau of Mines by the War Department, for purposes of hydrogenation. Therefore there is no reason why a plant such as the one in Oregon which the Senator has described should not be turned over to the Department of Agriculture for its share of these experiments. The basic law, which by this bill is extended for 3 years, and the authorized appropriation, which is increased by $30,000,000, specifically provide that all work on agricultural and forestry products shall be carried on by the Department of Agriculture.

Mr. MORSE. I thank the Senator for his answer to my question.

I wish to say now, if the Senator will permit me to say a sentence or two more, that when one considers the great amount of the taxpayers money that has gone into the wood-alcohol plant at Springfield, Oreg., I think inquiry should be made by the Department of Agriculture, if this bill is passed, as to the possibility of continuing the operation of the plant under Government operation, at least for the time being. At the present time the plant has been turned over to the Surplus Property Administration; and as the Senator well knows, when it is disposed of or dismantled through the Surplus Property Administration, that will be done at tremendous loss to the taxpayers of the United States.

Mr. O'MAHONEY. Mr. President, I shall be glad to cooperate with the Senator or with anyone else to make sure that that plant and all other plants are used in the best interests of the people of the United States.

Mr. LUCAS. Mr. President, will the Senator yield to me?

Mr. O'MAHONEY. I yield.

Mr. LUCAS. Is the Senator familiar with the program which recently was

suggested by Secretary of the Interior Krug?

Mr. O'MAHONEY. Yes.

Mr. LUCAS. Does that dovetail in with the program the Senator is discussing in respect to his own bill?

Mr. O'MAHONEY. Completely. The Secretary of the Interior has approved this bill.

Mr. LUCAS. I read only part of what the Secretary of the Interior had to say; but it seemed to me that he laid great stress on synthetic fuel made in the way the Senator has described.

Mr. O'MAHONEY. I am glad to be able to tell the Senator that there appears to be complete unanimity between the industry and the experts in the Department of Agriculture and the Department of the Interior that this program should be carried out.

I should point out that at this moment there are cooperative agreements between the United States Bureau of Mines and the Standard Oil Development Co., a subsidiary of the Standard Oil Co. of New Jersey, and between the United States Bureau of Mines and the Union Oil Co. of California, and between the United States Bureau of Mines and the Standard Oil Co. of California, and between the United States Bureau of Mines and the Sinclair Refining Co. These cooperative agreements are for the following purposes: That between the Standard Oil Development Co. and the Bureau of Mines is for the purpose of drafting cost estimates for the construction of a coal hydrogenation plant sufficient to produce 30,000 barrels of oil a day from coal. The Standard Oil Development Co. is also conducting cooperative experiments on the refining of crude oil made from shale. The Standard Oil Co. of California and the Sinclair Co. are similarly conducting joint experiments on refining; and the Union Oil Co. is conducting experiments with the Bureau of Mines on the pumpability through pipe lines of crude petroleum made from shale.

So we have a program, through unanimous action by industry and Government, to produce a result which is very greatly indeed in the public interest.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield to the Senator from Colorado.

Mr. MILLIKIN. I think perhaps it might be emphasized to advantage that this is not something that is in the field of fantasy, but that the production of petroleum products from coal has been carried on a long time, notably in Germany; and that the production of petroleum products from oil shale has been carried on for a long time in a number of countries, including Scotland, on a commercial scale, and in Estonia, Lithuania, Manchukuo, Sweden, and also in Tasmania, the basic chemical and physical facts are well known in both fields.

Our problem in this country is to bring out the known facts, and others to be developed by experimentation, and develop processes which will result in products which can be brought into competition with existing petroleum products.

Mr. O'MAHONEY. The Senator is quite right, as the primary objective of the bill is to enable the United States Bureau of Mines to demonstrate the commercial possibilities of making the synthetic fuel at a cost which will enable it to compete with gasoline and fuel oil made from petroleum.

Mr. MILLIKIN. Mr. President, will the Senator yield to me for another observation?

Mr. O'MAHONEY. I yield.

Mr. MILLIKIN. In further response to the inquiry from the distinguished Senator from Illinois [Mr. LUCAS] I do not believe it can be said that this plan is a necessary forerunner of the full-scale Krug plan, but this plan will, it is hoped, develop those scientific and procedural facts out of which private industry could go ahead or Government industry could go ahead according to future decisions. The basic work, it seems to me, is very essential. If the Senator will permit, I would like to say that in the field of oil shale, away back in the 1920's Senator Phipps, of Colorado, sponsored a bill in the Senate calling for a demonstration plant, which was erected at Rulison, Colo., which is close to the site of the present plant.

In that connection, if I may make a personal reference, the then president of the Colorado School of Mines and I brought to Washington a small demonstration apparatus and erected it in one of the committee rooms here, and made oil out of oil shale. We had a very interested group of Senators and Representatives from States where there is oil shale. As the Senator from Wyoming has pointed out, I suppose there are 2 dozen such States, extending pretty well over the country.

Mr. President, as I stated before, I have a personal interest which might be helped or hurt by the proposed legislation, and as I did when the original bill was up before, I shall refrain from voting.

Mr. BREWSTER. Mr. President, will the Senator from Wyoming yield?

Mr. O'MAHONEY. I am very glad to yield to the Senator from Maine.

Mr. BREWSTER. Our attention has of course been increasingly directed to the problem of petroleum, particularly among those of our States that do not have these reserves. We have been getting a rather liberal education on these shortages in recent weeks. In that connection, from high authority in the Government, attention has been turned to the very great oil reserves of the Middle East. The result of their development, to which I know the Senator from Wyoming has directed considerable attention, has been the estimate that there are perhaps 100,000,000,000 barrels of oil out there in the Middle East. Do I understand that the Senator from Wyoming believes, from the studies thus far, that there could be made available ample supplies of petroleum in this country from these other sources on a sound economic basis?

Mr. O'MAHONEY. I have no personal doubt about it at all, I will say to the Senator. The Senator may recall that in the last Congress I introduced a bill to amend the Oil and Gas Lease Act so as to stimulate research for petroleum in the public-land States. That bill was enacted. It has become a law and has resulted in a very great stimulation of the search for petroleum. Many new discoveries have been brought in; not sufficient as yet, I am sorry to say, to make any tremendous addition to our reserves, but enough to indicate that we have not as yet thoroughly explored all our possibilities for petroleum. But due to the fact that in the United States exploration has been carried on over a period of fifty years, at a much more rapid rate than anywhere else in the world, there is no doubt that we are coming to the end of the road so far as new discoveries of petroleum here in the United States are concerned. But we are only beginning, so far as oil shale, coal, and agricultural products are concerned.

Mr. BREWSTER. If the Senator will yield further, does he feel that there is justification for the fear recently expressed that as long as petroleum continues to be a vital factor in modern economic life, we might arrive at a point where the reserves of the Middle East would be an absolutely essential factor in our functioning in war or peace?

Mr. O'MAHONEY. I have not shared that opinion. I know that it has been expressed. I feel that our resources here are sufficient to make the United States self-sufficient so far as liquid fuel is concerned.

Mr. BREWSTER. What does the Senator envision as to the time involved in this development, as to how soon we might arrive at the happy day when on some economic basis the production of petroleum from shale or coal or fuel from grains would be possible?

Mr. O'MAHONEY. There would be a difference, according to the emergency. In time of peace it probably would take a longer period. If we were required to prepare for war, for example, then of course we would expend the necessary sums to build the necessary plants, but the evidence which is before the committee is, in my opinion, sufficient to indicate that the degree of cooperation between industry and Government now has been developed to such an extent that within a few years we can depend upon an ample source of supply for synthetic fuel.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. CHAVEZ. I appreciate the importance of the original legislation, and I fully appreciate what is intended to be done by the proposed measure we are now discussing. But has the Senator from Wyoming any information as to the program of the Department of the Interior under which it proposes to proceed?

Mr. O'MAHONEY. Yes; that has been discussed in the original hearings and in the reports, and in connection with the work that has been done to date. We have these various plants, the one at Rifle, for oil shale; the one at Louisiana, Mo., for coal. If this measure is passed, I am sure the Department will have suggestions for some other plants.

Mr. CHAVEZ. Of course, the Senator knows that in the West, especially throughout the Rocky Mountain area, there are tremendous coal fields. In my State we have millions and millions of acres of coal. I was just wondering whether it is the opinion of the Senator that if the legislation goes through and the extra money is voted, all those areas will be treated alike, and some particular area not be picked out.

Mr. O'MAHONEY. I think without any doubt that all areas will be treated alike, but the degree of cooperation which is going on indicates to me clearly that private industry is now moving into the field and may be expected to do some of the work very shortly. I am advised, Mr. President, that certain of the oil companies are already buying coal lands for the purpose of getting ready, but I have not had the time to get specific information on that point.

Mr. CHAVEZ. Mr. President, I think it is very laudable on the part of the oil companies to cooperate in this wonderful endeavor. But, continuing with what I had in mind when I interrupted the Senator, my State is extremely exercised about the matter. I noticed an article in the paper today containing a statement given by the Interior Department to the press, designating certain States in which the work is to be done. New Mexico was not in the list. I was just desirous of ascertaining whether under the general law we in New Mexico could utilize our coal lands for this laudable idea, in view of the need for more fuel.

Mr. O'MAHONEY. The coal mines in New Mexico can be used and, I think, ought to be used.

Mr. MILLIKIN and Mr. LUCAS addressed the Chair.

Mr. O'MAHONEY. I think the Senator from Colorado wanted to ask a question.

Mr. MILLIKIN. Mr. President, I just wish to suggest, in response to an observation made by the Senator from Maine [Mr. BREWSTER], that it is not a question of providing, overnight, any substitute for our liquid oil supplies. They, of course, being a wasting asset, will decrease as time goes on, and our problem therefore is to supply an increasing supplemental synthetic supply. If we could envision an overnight stoppage of our liquid supplies, something which is not going to happen, we could not hope to replace those supplies within a short period of time with synthetic substitutes. That will be a lengthy process, and it should be developed, I suggest, in a constantly expanding way against that long-distant day, I hope, when our liquid supplies are gone. This merely emphasizes, I suggest, the importance of making a start and getting the techniques well understood.

Mr. O'MAHONEY. Mr. President, in my response to the Senator from Maine [Mr. BREWSTER] I had in mind that ultimate objective of the legislation and of the program.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. LUCAS. The inquiry propounded by the able Senator from Colorado is the same as that I was about to make, and has to do with the question raised by the Senator from Maine who inquired respecting the time element involved. We all know that there is a serious diversion of opinion respecting the oil reserves of the world. We know that a tremendous effort is being made for continuation of the control of the oil of the Middle East. The statement is frequently heard that whoever finally controls the oil in the Middle East will probably control Europe and Asia. In view of the fact that we do have a short supply, and that sooner or later we are going to run out of a liquid supply of fuel, the time element does seem to me to be very important. It is important to know how soon we may be able to get into sufficient production of synthetic fuel from shale and coal and other commodities to the end that at no time would we be caught in short supply of this vital material.

We all know that one of the causes for Hitler's downfall at an earlier period than it might have been was the fact that he ran out of some of the lubricating oil and other petroleum products that were so vital and necessary to the operation of his machine. Any future world conflict will be based, of course, in a great measure upon the quantity of oil any nation can produce.

I wish to state candidly that I knew very little about the program involved, but I want to commend both Senators and the committee for producing this constructive measure. It is my sincere hope that the Congress in the future will take hold of the program, not in a niggardly way, and go along with a further program something like that which was recently recommended by Secretary of the Interior Krug. I do not think we are going to be able to depend upon private industry to do the kind of job that ought to be done. Certainly this oil problem is in the public interest and the interest of national defense. I am glad to see the two able Senators promoting a measure of this character because of its tremendous importance to the future of our Nation.

Mr. O'MAHONEY. Mr. President, I am very grateful to the Senator from Illinois for that comment. It is precisely because I have believed for many years that the United States should concentrate upon the development of its natural resources that I introduced the previous bill, to which I alluded, to amend the Oil and Gas Leasing Act. That bill was enacted into law, and has resulted in finding for us new reserves of oil. The pending bill will find us new reserves of synthetic fuel from oil shale. We know that we can obtain oil from coal, and we should be stepping along as rapidly as possible so that our supplies will not be exhausted.

Mr. JOHNSON of Colorado. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. JOHNSON of Colorado. I commend the Senator from Wyoming for pressing this matter and for the results he is getting, but I hope he will go a little beyond providing appropriations. I hope that something may be done by the Congress to expedite action in this research. There is no question it has been lagging. It should not be lagging. I am sure the Congress will provide whatever funds are necessary. I do not know about the $9,000,000,000. I think that amount of money can probably be provided by private enterprise. But I have no doubt that Congress will take care of the research part of the program. Putting up the money is only part of the program. We must go beyond that, and we must see that those who are entrusted with the program get the lead out of their pants and really move forward in this great enterprise which the Congress is undertaking.

Mr. O'MAHONEY. I thank the Senator from Colorado. It is only fair to the Bureau of Mines to say that they have been diligently at work upon this program. One of their experts, Dr. Schroeder, immediately after VE-day made a special trip to Germany and examined all the German plants and brought home some of their blueprints to use in this program.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. WILEY. I compliment all the Senators who have spoken on this subject, especially when they have emphasized the point that America should stop wasting her national resources. Where there is wealth to be gotten for Americans, we should get it. I like the thought which was so ably expressed by the distinguished Senator that here we have a reserve of liquid coal that will make us competent to meet any challenge that may arise in the future. The main problem is to get under way and to meet the fears which have arisen. We have had fears suggested that the oil industry might be injured, and we know now that because of those fears the American people have been injured. In my own State people are freezing. They do not have the fuel they need. In other words, because of those fears, we have not provided for our people as we should have provided.

Mr. President, as I have many times before said, there is another resource of which we should avail ourselves. There are 2,200,000 horsepower going to waste on the St. Lawrence. There is opportunity to provide for transporting the fuel back and forth to 50,000,000 people.

I especially wish to compliment the distinguished Senator from Utah, who today so dramatically and eloquently set forth the needs of the Nation, and who so clearly called to our attention that we were all one people.

I join with my colleagues, Mr. President, some of whom have been in opposition to the St. Lawrence development, in the development of the program now under consideration because I am in favor of all things which are for the general welfare.

Mr. LODGE. Mr. President, will the Senator from Wyoming yield to me for a moment?

Mr. O'MAHONEY. I yield.

Mr. LODGE. It is always a pleasure to agree with the Senator from Wisconsin whenever I can do so, and this is certainly one occasion when I can do so with the greatest enthusiasm. I feel that the

extraction of synthetic oil is of great benefit to the country as a whole. It is a project which has real intelligence and practicality behind it, and is definitely in the national interest. I am happy to give it my support.

Mr. O'MAHONEY. Mr. President, I thank the Senator.

I will not take any further time of the Senate beyond asking unanimous consent that there may be printed in the RECORD at the conclusion of my remarks the full text of the report of the Special Committee Investigating Petroleum Resources in Relation to National Welfare, which I had the honor to file with the Senate on January 31, 1947.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

INVESTIGATION OF PETROLEUM RESOURCES IN RELATION TO THE NATIONAL WELFARE

INTRODUCTION

Until science succeeds in harnessing atomic energy to the everyday machines of the modern world, petroleum will continue to be the most essential fuel of industry both in peace and in war. The discovery, development, and utilization of petroleum in modern times was one of the principal factors which prior to World War II had made the United States the greatest industrial nation. It is also indisputable that during this war the intensive production of United States petroleum, at a rate in excess of that indicated by scientific principles for maximum efficient recovery, was one of the chief factors of military victory. Therefore, it is not too much to say that the evolution of modern industrial civilization and its preservation from Nazi totalitarianism may be attributed in very large measure to petroleum, to the American oil industry, and to the teamwork between the industry and the Government. But more than that, it is now clear that no nation which lacks a sure supply of liquid fuel can hope to maintain a position of leadership among the peoples of the world. It follows that if the United States is to hold the place it now occupies on the world stage as an effective leader in elevating the standard of living for people, it must develop a national petroleum policy which will make certain that we shall not become dependent upon any other country for our supply of liquid fuel.

This basic fact was recognized by the United States Senate when on March 13, 1944, in creating this special committee of 11 Senators, it declared that "adequate petroleum reserves are essential to our national security and economic welfare."[1] The committee was instructed "to make a full and complete study and investigation with respect to petroleum resources, and the production and consumption of petroleum and petroleum products, both within and outside the United States, in their relation to our national welfare and security," and to "report to the Senate at the earliest practicable date the results of such study and investigation, together with its recommendations for the formulation of a national petroleum policy."[2]

On April 6, 1945, the Intermediate Report[3] of the committee was submitted to the Senate, recording the principal activities of the committee up to the date of the death of Senator Francis Maloney, the former chairman, on January 16, 1945.

Prior to the date of the intermediate report the attention of the committee was largely directed (a) to the wartime proposal that the Government of the United States construct, own, and maintain a pipe-line system across the Arabian Peninsula designed to make Persian Gulf oil available to the United Nations in the Mediterranean theater, and (b) to the question whether the Anglo-American oil agreement should be an executive agreement or a treaty subject to approval by the Senate under the treaty-making power of the Constitution.

Obviously, the project to build and own a trans-Arabian petroleum pipe line, if carried out, would have taken the people of the United States through their Government into the active development abroad of the natural resources of foreign countries, thus effecting a revolutionary change in national policy. It would have made the Government an owner in an area over which it had no political jurisdiction, thus breaking down, beyond the geographical frontier of the United States, the line of demarcation between the industrial and economic function of the people as individual private citizens, and the political function of the Government as the agent of all the people. Suffice it to say that the executive hearings held by this committee, under the wise and extremely capable leadership of the late Senator Francis Maloney, and the advice given by him, as spokesman for the committee, to President Roosevelt resulted in the abandonment of the project.

As to the constitutional status of the Anglo-American oil agreement, the committee succeeded in having it submitted to the Senate as a treaty, despite the fact that it was originally designed by its authors to take effect between the United States and the United Kingdom merely as an executive agreement. In view of the far-reaching implications and the important subject matter of the agreement, the committee believed that there was no question but that it constituted a treaty and ought to be handled as such according to the Constitution. The committee had observed with alarm the increasing inroads made upon the treaty-making power in recent years through the device of the executive agreement. The committee therefore decided that it would be contrary to public policy and to constitutional limitations if this important international covenant were permitted to escape the scrutiny of the Senate. Again, the executive hearings by this committee (on which sat the chairman of the Committee on Foreign Relations) and the conferences between Senator Maloney and the highest executive officers of the Government, including the President, resulted in the agreement being transmitted on August 24, 1944, to the Senate as a treaty. Subsequently, on January 10, 1945, President Roosevelt withdrew the treaty for renegotiation with the United Kingdom. On November 1, 1945, the revised treaty was resubmitted by President Truman to the Senate, where it is now pending before the Committee on Foreign Relations.

Upon completing the activities referred to in the intermediate report aforesaid, the committee next addressed its attention to the underlying problem of the formulation of a national petroleum policy. In order that there would be made available to the Congress and to the public a complete exposition of the basic facts involved, without which no competent judgment could be rendered, the committee conducted public hearings in Washington, D. C., as follows:

1. Foreign Contracts Act. (S. 11.) Joint hearing with a subcommittee of the Committee on the Judiciary. (May 17, 18, 21, and 22, 1945.)

2. New Sources of Petroleum in the United States. (June 19, 20, 21, 22, and 25, 1945.)

3. American Petroleum Interests in Foreign Countries. (June 27 and 28, 1945.)

4. Petroleum Requirements — Postwar. (October 3 and 4, 1945.)

5. War Emergency Pipe-Line Systems and Other Petroleum Facilities. Joint hearing with Surplus Property Subcommittee of the Committee on Military Affairs. (November 15, 16, and 17, 1945.)

6. Wartime Petroleum Policy Under the Petroleum Administration for War. (November 28, 29, and 30, 1945.)

7. The Independent Petroleum Co. (March 19, 20, 21, 22, 27, and 28, 1946.)

8. The Oil and Gas Division of the Department of the Interior. (June 17, 1946.)

At each of the above hearings, with the exception of the last, the committee had the benefit of thorough factual presentations by representative groups selected by the petroleum industry. The statistics, charts, historical data, and elaborate descriptive material, thus assembled with painstaking care, together with their logical presentation at the hearings, have been of great aid to the committee in arriving at its conclusions. Likewise, the committee has benefited from the valuable testimony of numerous witnesses from governmental agencies charged with duties relating to certain phases of petroleum activity, and from interested members of the public—to all of whom the committee expresses its gratitude. Indeed, too much credit cannot be given to the representatives of industry and of Government for the thoroughness and the frankness with which they prepared and presented their evidence. The demand which the committee has had for the printed volumes of the hearings bears witness to the value of the material that was gathered.[4]

FACTUAL SUMMARY

The most pertinent facts developed at these hearings may be briefly summarized as follows:

1. Although the demand in the United States for petroleum and petroleum products is greater now than it ever has been, and although the demand gives every indication of continuing to increase,[5] this country is no longer the world's greatest reservoir of oil. More than 63 percent of all petroleum produced in the world between 1859 and 1941 was drawn from deposits within the boundaries of the continental United States.[6] It was United States oil that made this country the industrial leader of the world. It was United States oil primarily that fueled the armies, the fleets, and the air squadrons of the United Nations in the war against Germany, Italy, and Japan. Today, however, less than one-third of the proved oil reserves of the world are located in continental United States.[7]

2. Discoveries of new fields in the United States during the past 10 years have been decreasing in size and importance, while the opposite is true of discoveries made abroad.[8]

[7] The Petroleum Almanac, op. cit., p. 42. Hearings, American Petroleum Interests in Foreign Countries, pp. 199–201. In the Middle East alone, the proved reserves greatly exceed those of the United States. *Ibid.*, p. 73.

[8] Hearings, New Sources of Petroleum in the United States, pp. 275–280; Wartime Petroleum Policy Under the Petroleum Administration for War, pp. 6–7, 68 ff., 85, 217; the Independent Petroleum Company, pp. 216, 249, 262; American Petroleum Interests in Foreign Countries, pp. 5–7, 66 ff., 422.

The average new field discovered at the present day in the United States scarcely exceeds 2,000,000 barrels of recoverable oil, while the 300 fields discovered abroad during the 20 years prior to 1943 have an average ultimate yield of about 100,000,000 barrels each.[9]

3. In the United States one wildcat well has been drilled for every 12 square miles of prospective area, but in foreign countries only one wildcat has been drilled for every 480 square miles; and the best evidence available at the moment would indicate that the land area of Russia is a greater potential source of petroleum than continental United States.[10]

4. New sources of petroleum in the United States might be obtained, but to what extent no one can say with any degree of certainty, in the following ways:

(a) New exploratory drilling on the public domain and elsewhere;

(b) Deeper drilling, as a result of improved technology, to horizons hitherto untested;

(c) Stimulated production from old fields by improved methods of secondary recovery and by payment of governmental subsidies; [11]

(d) Exploration of the Continental Shelf; [12]

(e) Manufacture of gasoline and other products from natural gas; and

(f) Extraction of petroleum from oil shale, and manufacture of synthetic liquid fuel from coal as well as from agricultural commodities.

5. The discovery, production, refining, and distribution of petroleum and its products are operations too complex and costly to be feasible for individual enterprise, but may be conducted efficiently and profitably only by corporate organizations.

6. American groups, organized in the corporate form, have not only achieved a high degree of efficiency in the United States but have carried the industry to almost every quarter of the globe.

7. The development of the industry has been marked by the appearance of integration and concentration.[13]

8. During the year 1944, 83.51 percent of all crude oil run to stills in the United States was handled by 21 major companies. The remaining 16.49 percent was refined by approximately 234 independent companies.[14] In the same year, 61.3 percent of the gross domestic production of crude oil was produced by 21 major companies.[15] In the case of American oil companies with investments abroad, from 93 to 95 percent of the total investment is held by 22 companies and their subsidiaries and affiliates.[16]

9. American oil interests own or have a share of production or of proved crude-oil reserves in 20 foreign countries in both hemispheres.[17] American petroleum investment abroad increased at the rate of $100,000,000 per annum during the 20-year period beginning with 1920.[18] The American share of foreign proved reserves (excluding Russia) has grown from 22.7 percent of the estimated 9,175,000,000 barrels in 1928 to 46.3 percent of the estimated 37,554,000,000 barrels in 1945.[19] The American share of foreign proved reserves in the Western Hemisphere is 65.2 percent of the total foreign reserves in this hemisphere.[20]

10. The risks and financial costs involved in foreign operations are of such magnitude that only the larger companies can assume the hazards, and even these companies find the difficulties so great that they customarily operate through hundreds of subsidiaries and by means of joint ventures among themselves and with foreign corporations so as to distribute the risk.[21]

11. American oil companies, managed independently of the Government of the United States, are associated in some joint ventures with foreign oil companies that are controlled by foreign governments.[22]

12. Foreign concessions in which these investments are made involve operations of such magnitude, often affecting vast areas and large segments of native populations in the stage of agricultural or nomadic civilization, that the companies must engage in activities which are normally considered the function of government, charity, or industries of other types.[23]

13. The very size of many foreign concessions, covering areas sometimes greater than most States of the American Union, and affecting the economic welfare of all inhabitants of the regions where located, necessitates complicated negotiations between the companies and the foreign governments concerned. The resulting contracts have, therefore, an intimate relationship both with the economy and the politics of foreign countries.

14. The economic impact of the production and distribution of petroleum upon the people of all nations of the world is so great that not infrequently a strong movement develops toward nationalization of petroleum resources in those countries where oil deposits are found, and toward establishment of state oil-trade monopolies in other countries that are on an import basis.

15. There are vast areas of the globe which apparently are without petroleum deposits. Most of Africa and Australia offer little prospect to the driller. China, Japan, eastern Siberia, a large part of Russia in Europe, the Scandinavian peninsula, France, Spain, Italy, and the British Isles are virtually without local sources of oil supply. Except for the United States, which with approximately 20 percent of the world's potential oil-producing area has furnished more than 63 percent of the world's oil requirements, the more industrialized and populous countries must look beyond their own borders for the petroleum they require. Russia, however, which cherishes among its dominant aspirations the achievement of industrial leadership, possesses in the Ob basin of western Siberia a vast extent of potentially rich oil land, and also has control of important sources of supply in the Caucasus and in

[9] Testimony of James Terry Duce before subcommittee of the Committee on Public Lands and Surveys on S. 1243, 78th Cong., 1st sess., August 3, 1943, Synthetic Liquid Fuels, p. 63.

[10] Hearings, Foreign Contracts Act, pp. 129–131.

[11] By listing the payment of subsidies as a method of obtaining additional oil, the committee is not to be understood as taking a position either advocating or opposing a subsidy program.

[12] The Continental Shelf is sometimes defined as the submarine extension of the land mass of the coast to a depth of 100 fathoms.

[13] By "integration" is meant the consolidation under the same corporate management of the principal branches of the industry, namely, production, refining, transportation, and marketing. By "concentration" is meant the acquisition by a comparatively few companies of control over a substantial portion of the industry. Integration and concentration of control are the characteristics according to which, by common usage in the business, corporations are roughly designated as "majors" or "independents."

[14] Hearings, The Independent Petroleum Co., pp. 188–189.

[15] Ibid., p. 53. This corresponds roughly with the proportion of the proved reserves owned by the major companies. See statement prepared for the Temporary National Economic Committee by William S. Farish, president, Standard Oil Co. (N. J.), printed in hearings before the said committee (October 23, 1939), pt. 17, Petroleum Industry, sec. IV, pp. 9933–9935.

[16] Hearings, American Petroleum Interests in Foreign Countries, p. 182. Two of these companies (James B. Berry Sons' Co. and Tide Water Associated Oil Co.) have no investment in foreign exploration or production, but confine their investment abroad to other branches—to marketing in the case of the former of the two companies, and to refining and marketing in the case of the latter company.

[17] Hearings, American Petroleum Interests in Foreign Countries, p. 57. American oil interests are known to be directly or indirectly engaged in exploration in at least 11 foreign countries or areas in which there has not yet been developed commercial production or proved reserves. Ibid., p. 57.

[18] At the end of 1919 the total assets employed abroad were $399,000,000, and at the end of 1939 they were nearly $2,500,000,000—a growth of 526 percent. Ibid., pp. 157–161.

[19] Ibid., pp. 199–201.

[20] Ibid., p. 200. It should be noted that even in the Western Hemisphere there are vast stretches of untested territory, especially in South America, where the surface geology has been thoroughly studied in only a few countries, and where geophysical methods of exploration have not been applied on a large scale even in all of these. (See Oil Resources of South America, World Petroleum, December 1946, pp. 54–57.)

[21] Hearings, American Petroleum Interests in Foreign Countries, p. 182. For example, the Iraq Petroleum Co. is owned by British, Dutch, and French interests, together with the Standard Oil Co. (N. J.) and the Socony-Vacuum Oil Co. The Arabian American Oil Co., which holds the well-known concession in Saudi Arabia, is presently a joint venture of the Standard Oil Co. of California and the Texas Co. Recently it has been reported that negotiations are in progress looking to a further spreading of risk by the Arabian American Oil Co. through acquisition of substantial blocks of its stock by the Standard Oil Co. (N. J.) and the Socony-Vacuum Oil Co. The consummation of this realinement of ownership would appear to assume the termination of the famous "red line agreement" whereby the companies associated in the Turkish Petroleum Co. (Iraq Petroleum Co.) undertook not to engage in activity in former Ottoman territory beyond the borders of Mesopotamia (Iraq) except through the medium of the Turkish Petroleum Co. (See Diplomatic Production of American Petroleum Interests in Mesopotamia, Netherlands East Indies, and Mexico, p. 21. S. Doc. No. 43, 79th Cong., 1st sess., prepared by the chief counsel of the committee.)

[22] For instance, the Anglo-Iranian Oil Co., which is controlled through stock ownership by the British Government, owns a 23.75 percent interest in Iraq Petroleum Co. in which two American companies, the Standard Oil Co. (N. J.) and the Socony-Vacuum Oil Co., own an equivalent percentage. Another example is the equal division of control of the Kuwait Oil Co. between the Anglo-Iranian Oil Co. and the Gulf Oil Corp. Not the least of the advantages possessed by the privately owned company is its ability to enter a foreign country which might bar the door to operations therein by a company controlled by a foreign government. The vice president of the Arabian American Oil Co. has stated that King Ibn Saud remarked "that he was glad to make an agreement with a company which would not involve itself in the complicated politics of the Middle East but would carry out its commercial mission of exploring for and developing oil fields." (James Terry Duce, Aramco Concession, The Texaco Star, Saudi Arabian Number, 1946, pp. 16–18, at p. 17.)

[23] Thus, the companies often dredge channels, build roads, schools, light and power plants, hospitals, etc. (Infra, pp. 39–40.) Sometimes these activities are carried on by the companies in conjunction with foreign public authorities, and sometimes independently. (Hearings, American Petroleum Interests in Foreign Countries, pp. 61–65, 271–289.)

eastern European territory which is presently in the Soviet zone of influence as a result of World War II.[24]

16. American oil companies operating abroad have furnished a large proportion of Europe's needs from their Latin-American concessions,[25] and are now preparing to furnish an even larger proportion from their concessions and through their distributing facilities in the Near and Middle East.[26]

The mere recitation of the above facts makes it immediately obvious that the story of oil now unfolding on the international horizon is a political and economic drama of the first magnitude. It is a drama of peace and war and progress that may affect the future of civilization even more profoundly than it has the past.

The formulation of a national oil policy raises questions both domestic and international—questions as to production and consumption at home and abroad; questions of the relationship between the "independents" and the "majors," among the majors themselves, and between the majors and foreign governments; questions of cartelization and imperialism; questions of the relationship between American operators and the Government of the United States; and finally, questions of international understanding among the peoples of the world, so that petroleum, instead of being a possible source of conflicting ambitions among rival powers, may become a means of raising the standard of living of people everywhere and of promoting the dissemination throughout the world of the principles of human liberty.

THE NECESSITY FOR PETROLEUM

It is appropriate here to repeat that in time of peace a nation, to maintain a first-class rating in the trade and commerce of the modern world, must have access to an abundant supply of oil because mechanized industry and transportation depend upon it. Oil is also of basic importance for purposes other than the provision of energy. Petroleum lubricates the fleets, airplanes, and machines of the world. It is a raw material in the whole field of chemicals. It is used in the manufacture of pharmaceutical products, paints, solvents, plastics, and synthetic rubber. It is used as fuel for domestic comfort and for heating generally, on an ever-growing scale.

Furthermore, in time of war, as twice demonstrated on a large scale in the present century, a nation, to remain a first-class power, must have petroleum resources immediately and continuously available in virtually unlimited volume. Oil is the sine qua non of military victory.

Although future developments of atomic research may eventually result in supplanting some or many of the peacetime applications of petroleum, an industrialized nation cannot in the immediate nor perhaps in the distant future dispense with oil both for fuel and lubricating use. Moreover, despite the prospect that the military application of atomic fission may render future war briefer and still more catastrophic, a nation in relying solely on the atomic bomb, either for offense or defense, would court disaster.[27] If the use of atomic bombs by one or by both belligerents did not terminate the struggle, the supply of oil might again prove the decisive factor.

Therefore, as a basis for a sound national petroleum policy, the extent and location of our proved oil reserves, their productive capacity, and our domestic requirements must be considered.

PROVED RESERVES

However sanguine may be the hopes of geologists derived from historical trends of discovery, or however likely may be the presence of petroleum in untested areas,[28] it would be unwise to rest conclusions for present purposes upon any premise other than "proved" reserves as that adjective is understood by the American oil industry.[29] If present estimates of future productive possibilities are later demonstrated to have been conservative, our national oil policy could be readily adapted to the happy plenitude of supply. If the future proves less roseate, our policy will have run concurrently with the facts and the Nation's security will not have been adventured.

1. Proved reserves within continental United States: The latest (December 31, 1945) estimate by the American Petroleum Institute is 20,826,813,000 barrels of crude oil recoverable under existing operating conditions.[30] Although since 1936 the total estimated reserves have shown an annual increase (with the exception of 1943),[31] this has been owing chiefly to extensions to existing fields and revisions of former estimates, the reserves of new pools discovered each year having of late been far below annual production.[32] Of course, this trend may be reversed by the discovery of one or more great pools, but it is noteworthy that despite greater exploratory effort, increased and deeper drilling, and improved technology, the estimates of reserves found in new fields in 1945 are still less than the annual civilian consumption.[33] Some American authorities, however, are more optimistic in their estimates of the quantity of oil which may be discovered in the United States. They assert that this country should ultimately yield at least 100,000,000,000 barrels of oil, including the 44,000,000,000 barrels already discovered.[34]

2. American interest in foreign crude reserves: Although data comparable in accuracy to estimates of United States domestic reserves do not exist in respect of foreign areas, the total proved reserves outside the United States have been estimated at 43,319,000,000 barrels, of which about 40.1 percent, or 17,371,000,000 barrels, represents our posi-

[24] Hearings, Foreign Contracts Act, pp. 124 ff.; Wartime Petroleum Policy Under the Petroleum Administration for War, pp. 120–121.

[25] Hearings, American Petroleum Interests in Foreign Countries, p. 213.

[26] It was announced last month that the Standard Oil Co. (New Jersey) and the Socony-Vacuum Oil Co. had concluded "in principle" an agreement for the purchase of substantial quantities of crude from the Anglo-Iranian Oil Co. during a 20-year period. The agreement also involves the possibility of constructing a pipe line from the Persian Gulf to the Mediterranean. This contract, together with the acquisition of an interest by these two American companies in the Arabian American Oil Co. (supra, p. 11 n.), indicates a belief that Europe and the western Mediterranean area will constitute a great future market for petroleum products. (The Wall Street Journal, December 27, 1946.)

[27] Frederick S. Dunn et al., The Absolute Weapon: Atomic Power and World Order, pp. 21–107. (Bernard Brodie, Ed.; Institute of International Studies, Yale University. New York, 1946.)

[28] Much has been published recently as to potential oil reserves underlying the Continental Shelf. Although it is virtually certain that petroleum is present in the Continental Shelf off some parts of the coast, its recovery by known technical methods would involve prohibitive costs. The greatest underwater depth at which drilling has been thus far successful is about 15 fathoms, and this has been not in the open sea such as the Gulf of Mexico but in the protected waters of Lake Maracaibo in Venezuela. To be sure, research in the technique of underwater drilling should continue vigorously in the hope that recovery of oil in the Continental Shelf may become commercially possible. However, at the present time the United States should not base its petroleum policy upon the expectation that the development of such resources is imminent.

[29] The American Petroleum Institute's committee on petroleum reserves, under the chairmanship of the late J. Edgar Pew, in a report dated February 16, 1945, defined "proved" reserves in the following language: "Proved reserves are both drilled and undrilled. The proved drilled reserves, in any pool, include the oil estimated to be recoverable by the production systems now in operation (whether primary or secondary) and from the area actually drilled up on the spacing pattern in vogue in that pool. The proved undrilled reserves, in any pool, include reserves under undrilled spacing units which are so close, and so related, to the drilled units that there is every reasonable probability that they will produce when drilled." (Report printed in hearings, New Sources of Petroleum in the United States, pp. 38 et seq.) It is worthy of note that Soviet geologists take into account, in addition to reserves deemed "proved" under American standards, "supposed" reserves—estimated "on the basis of the geological structure of the field and of the region," and "possible" reserves—believed "possible for various geological reasons." According to Prof. Ivan M. Gubkin, prominent Russian expert, the assessment of "supposed" reserves is necessary for the planning of future oil production, that of "possible" reserves for "long-term general orientation." (Solomon M. Schwarz, How Much Oil Has Russia? Foreign Affairs, July 1946, vol. 24, pp. 736–741.)

[30] The Petroleum Almanac, op. cit., p. 42. Of course, more oil may become available by secondary recovery methods from fields where such methods have not yet been applied, and from extensions to existing pools, revisions of previous estimates, new discoveries, and improved technology.

[31] Hearings, New Sources of Petroleum in the United States, p. 40.

[32] This is true for the past 5 years whether one considers the token figures used by the American Petroleum Institute for new pools or the higher estimates therefor given by Mr. E. DeGolyer. (See testimony at hearing, New Sources of Petroleum in the United States, pp. 275–280.) It is of interest to note that discoveries aggregating from 80,000,000 to 100,000,000 barrels have been made on the public domain since the O'Mahoney Act of December 24, 1942 (56 Stat. 1080), and that exploration has been notably stimulated by the act of August 8, 1946 (Public Law 696), amending the Mineral Leasing Act of 1920 (41 Stat. 437).

[33] Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, pp. 84–85. It has been recently asserted that in the last 5 years the oil producer's effort has increased 41 percent, the results have shown a decrease of 58 percent, and his costs have meanwhile increased 256 percent. (H. J. Struth, Cost of Discovering New Petroleum Reserves Continued to Increase in 1945, The Petroleum Engineer, February 1946, vol. 17, pp. 51–58; see also James V. Brown, The Trends in Costs of Replacing Petroleum Reserves, the Independent Petroleum Association of America Monthly, March 1946, vol. XVI, pp. 17–26.)

[34] Wallace E. Pratt, Oil in the Earth, p. 68. (University of Kansas Press, 1943.) William R. Boyd, Jr., president of the American Petroleum Institute, also finds no reason to be unduly disturbed at the status of the reserves. "The view," he says, "that crude discoveries of importance are on the decline in this country has, in my opinion, little basis in fact." (Dallas News, December 15, 1946.)

tion as of January 1, 1945.[35] Of these reserves, about 5,596,000,000 barrels are located in the Caribbean region (Venezuela, Colombia, and Trinidad); about 11,136,000,000 in the Near and Middle East; and the remaining 639,000,000 are distributed in Oceania, Europe, and the Western Hemisphere outside the Caribbean.[36]

PRODUCTIVE CAPACITY

1. Fields within continental United States: Crude-oil production for the year 1929 reached a peak slightly in excess of 1,000,000,000 barrels.[37] This total was not attained again until 1936.[38] In 1940 the annual production was about 1,350,000,000 barrels.[39] During the war the total rose in 1945 to a figure in the neighborhood of 1,711,000,000 barrels.[40] At the time of the formal entrance of the United States into the war in 1941, this country had an efficient productive capacity of approximately 4,650,000 barrels daily.[41] The maximum efficient rate of production began to be exceeded in mid-1944; by mid-1945 the maximum efficient capacity was being exceeded by approximately 300,000 barrels per day.[42] During the war the proved reserves within the United States were produced at the average rate of nearly 7½ percent per year.[43] In 1946 the production is reported by the Bureau of Mines to have exceeded 1,730,000,000 barrels. The Bureau estimates a total production of 1,746,000,000 barrels for the current year.[44]

2. Foreign fields owned by or under concession to United States nationals: In 1939 the American share in foreign production totaled approximately 554,000 barrels daily, about 441,000 barrels thereof being produced in the Western Hemisphere, principally in the Caribbean area.[45] It is to be anticipated, however, that a rapidly increasing American production will flow from the extensive reserves in the Middle East.

During the recent war the known foreign reserves, American and other, on the average were drawn upon at the approximate rate of 2 percent per year.[46] In August 1945, total foreign crude production (excluding Axis and Russian areas) attained a peak of 1,900,000 barrels daily.[47]

DOMESTIC PETROLEUM REQUIREMENTS

In 1938, the last normal prewar year, domestic requirements, civilian and military, were 3,115,000 barrels per day; only 3 years later the 1941 domestic requirements were approximately 4,070,000 barrels daily.[48] During the war, even with civilian rationing, production from reserves within the United States was increased to a peak of 4,690,000 barrels per day for the month of July 1945.[49] In 1946 the demand exceeded even the wartime requirements.[50]

Forecasts presented to the committee in October 1945 indicate a domestic demand in 1950 of 4,955,000 barrels per day, gradually rising to 5,735,000 after 1960.[51] However, since these estimates were made, new forecasts indicate a peacetime demand as high as 5,400,000 barrels daily in 1950; 5,650,000 in 1955; and 5,850,000 in 1960.[52] All these forecasts are made on the assumption that the United States will not engage in war during the period.

NATIONAL POLICY IN THE PAST

For some time after the discovery of oil by Drake in 1859 the production and sale of oil were essentially local in scope. No problems immediately arose of a nature to concern the Congress. Under the stimulus of private initiative the industry expanded as the years went by and as the demand for oil increased. During this period, and even in more recent days, it could hardly be claimed that there was a conscious or comprehensive national petroleum policy. To be sure, in the twentieth century the principle of the decision of the Supreme Court in the Standard Oil Case,[53] applying the Antitrust Act to combinations in undue restraint of interstate trade in petroleum, has been generally accepted. The principle of the Mineral Leasing Act of 1920,[54] under which the Federal Government retains ownership of oil lands on the public domain, although leasing them for development and operation by private industry, has likewise been accepted, as has Federal legislation (a) prohibiting interstate shipment of petroleum produced in contravention of State law, and (b) consenting to compacts among the States to prevent wasteful production. Moreover, the Congress, recognizing that production costs were deterring the manufacture of synthetic liquid fuels, recently authorized the Department of the Interior for a limited time to construct and operate demonstration plants for the production of such fuels from coal, oil shale, and agricultural and forestry products.[55] Nor has the Nation been without a foreign-petroleum policy, sometimes more successful than at other times, based upon the principle of the "cpen door."

The following generalizations may perhaps be made in respect of the historical development of the American oil industry:

1. The industry has been owned and operated by private enterprise, with a minimum of regulation by Government, either Federal or State;

2. A competitive system with opportunity for small operators to establish themselves, to prosper, and to expand, has been regarded as the ideal;

3. Integration of the various branches of the business—production, refining, transportation, and marketing—has not been prohibited, with the result that some 21 efficient companies with strong financial resources have become capable of operating throughout the United States and 14 of the same companies also operate in many foreign areas;

4. No impediments have been created by the Federal Government to exploration and production abroad. The "open-door" policy has been recognized in principle, and although foreign development has been for the most part undertaken by the operators on their own initiative and at their own risk, they have, in increasing degree, sought the cooperation of the Department of State;

5. Under the Webb-Pomerene Act,[56] American companies have been permitted to operate freely abroad in accordance with the economic and legal conditions there confronting them, so long as the antitrust laws of this country have not been violated;

6. Foreign companies have been allowed to qualify to do business in the United States, and to lease public lands therein, provided American companies were granted reciprocal privileges;

7. Except in the case of public lands, the conservation and production of petroleum, including natural gas, within the United States have been left to the jurisdiction of the State governments, with supplementary Federal legislation to forbid the interstate shipment of petroleum produced in violation of State law, and to authorize interstate compacts for prevention of waste;

8. Because oil, like other minerals, is a diminishing resource, and because investments incident to exploration involve unique risks with danger of large financial loss, the Congress through income-tax provisions has allowed deductions for depletion and intangible drilling costs; and

9. The development of domestic resources by domestic companies has been regarded as worthy of protection against imported oil.

On the basis of the industrial practices and State and Federal law thus far evolved, the American oil industry has developed a technical know-how that is matchless. Proved reserves which in 1918 were only 6,200,000,000 barrels climbed to 20,826,813,000 barrels in 1945.[57] From a daily average production of crude in 1918—a war year—amounting to 975,000 barrels from 203,000 wells, the daily average rose by 1938 to 3,327,000 barrels from 369,000 wells.[58] At the same time the average price at the service station of a gallon of gasoline declined from 25.1 cents in 1918 to 12.75 cents, excluding tax, in 1940.[59]

Meanwhile the utility of oil for a wide variety of civilian uses became more and more apparent. The internal-combustion engine was improved. Road-building programs covered the continent with a network of good highways. The motor industry developed the mass production of automobiles.

---

[35] Hearings, American Petroleum Interests in Foreign Countries, p. 199. Total proved reserves in the Western Hemisphere (exclusive of the United States) are about 8,885,000,000 barrels. In the Near and Middle East the total proved reserves are estimated conservatively at 26,800,000,000 barrels; in Europe (including Russia) at 6,367,000,000 barrels; and in the Far East at 1,184,000,000 barrels. [50] An all-time high daily crude-oil production was reached for the week ended June 15, 1946, of 4,960,650 barrels. Two weeks later the daily production was only about 3,000 barrels below this record. (American Petroleum Institute reports.) Based on statistics of the Bureau of Mines through last October, the total domestic demand for petroleum products in 1946 averaged 4,812,000 barrels daily.

The oil industry met the challenge. Per capita consumption increased from 36 gallons a year in 1900 to 367 gallons a year in 1938.[60] In 1918 the refining capacity was 1,186,000 barrels daily of crude oil against about 5,000,000 barrels at the present time.[61] In 1918 the mileage of trunk and gathering crude-oil pipe lines totaled 55,000 in contrast to the present network of 141,000 miles.[62] The United States tank-ship fleet grew from 145 oceangoing vessels of 2,000 gross tons or over in 1918 to 382 in 1938, and to 907 on September 1, 1945.[63] In 1912 the share of American companies in all foreign crude-oil production was 8.4 percent; in 1938 it was 23.8 percent.[64] On January 1, 1945, the total foreign reserve (proved) of American companies was 17,371,000,000 barrels, or about 40.1 percent of all foreign reserves.[65] In 1938—the last normal year—United States production was 60.6 percent of world production, and during the war years—1941-44—nearly 65 percent of the world's estimated total production was supplied from wells in the United States.[66] With only 6 percent of the world's land surface, the United States, for the last 40 years, has produced annually more than one-half of the world's total supply of crude.[67]

A petroleum program that has yielded these magnificent results would seem to require no radical change. On the other hand, this country may not wisely conclude that the wells will never run dry, nor that the reserves which its explorers have discovered abroad will always be available. Considerations of national security demand everlasting vigilance. In this troubled world, which has not yet learned how to avoid war, the oil policy of this Nation while at peace must, nevertheless, be governed by the inexorable demands of self-preservation.

NATIONAL DEFENSE

If the United States should become engaged in a war waged wholly or partially outside its boundaries, the availability of oil from American reserves near the foreign theater of hostilities would be advantageous. To the extent that the war were waged within or near the continental United States, the reserves within this country would be of paramount importance.

It should not be assumed that all future warfare will occur beyond our boundaries. If invaded we would naturally rely first upon local oil reserves. If production from these were inadequate and if the United States controlled the sea, supplementary oil might be imported. However, it should not be assumed, particularly in the light of our experience with hostile submarines off the Atlantic coast in the last war, that the United States would at all times be in control of the routes between our ports and our petroleum reserve situate abroad. This is not to imply that American petroleum interests abroad should receive only lukewarm diplomatic protection, or that we should not emphasize exploration and development of our concessions in other lands. Quite the contrary should be our policy because those reserves will add to prosperity in time of peace and may under certain conditions of warfare be highly useful. But, in the final analysis, the reserves within our own borders are more likely than not to constitute the citadel of our defense.

It follows that nothing should be done to weaken the productive capacity of domestic reserves, and that every possible step should be taken both to increase these reserves and continuously to develop them to such a degree as would occasion no regret in the event of war.

If the Nation during wartime were called upon to supply all its military and essential civilian requirements from reserves located in the United States, and if the war were conducted on a large scale, the task could not be accomplished from the reserves now known. The presence of proved reserves in excess of 20,000,000,000 barrels does not mean that a mere turn of the valves will yield production in any desired amount. There is a limit at which a given supply can be made available. Thus, it is a physical impossibility, even disregarding maximum efficient rates, to produce say one-fourteenth of the reserve supply annually for 14 years. Many an old well, now giving up but small quantities each day, is expected to produce for 20 years to come. The oil will not flow out of the reservoir rock any sooner. Moreover, the Nation no longer enjoys the comfortable margin between production and productive capacity prevailing in 1941.[68]

To say that imports from the Caribbean area can be utilized in wartime by virtue of our control of the Caribbean is too hazardous a program. Our naval bases and tankers are subject to destruction, to say nothing as to the possibility of attack on the foreign petroleum fields themselves.

The answer is to be found in synthetic production. Synthetic gasoline can be produced from natural gas at costs similar to present costs of producing domestic gasoline from crude petroleum.[69] Oil shale and subbituminous coal and lignites also can be utilized to produce gasoline and other liquid fuels at a cost which research has already reduced from 14 to about 8 cents per gallon above that of producing gasoline from crude.[70] These sources of supply, it is estimated, are capable of meeting all domestic petroleum requirements for many centuries.[71] In view of these facts it is folly to be apprehensive that this Nation is facing a shortage of liquid fuel. But it behooves the Nation as soon as possible to take bold steps in the direction of synthetic production so that such production can become readily geared into the oil economy.

Until such time as synthetic production costs are not in excess of those of production from crude oil, there will be a natural temptation in peacetime to meet domestic deficiencies with imported petroleum. But to the extent that the volume of imports is permitted to grow during such period, the Nation-wide industrial plant necessary for synthetic production will fail to emerge through private investment. This is not to say that the manufacture of synthetic fuel should be fostered by a governmental policy designed to force prices up, thereby rendering such manufacture commercially profitable, but rather that the Bureau of Mines should continue to build and operate demonstration plants, and to conduct research, pursuant to the authority conferred by the act of April 5, 1944,[72] to the end that the transition may be made promptly at the appropriate time.[73]

Prior to the transition, it must ever be borne in mind that crude reserves in the ground, no matter how vast, are useless in an emergency unless they are producible to meet the emergency. It requires skilled manpower, expensive equipment, and a long period of time to drill an oil well. Moreover, daily yields are physically limited in volume. After the oil reaches the surface it must find transportation by pipe line, tanker, barge, tank car, or tank truck, or by

---

[60] Hearings, Wartime Petroleum Policy under the Petroleum Administration for War, p. 248. In 1938 the annual per capita consumption for the rest of the world was approximately 21 gallons. (Hearings, American Petroleum Interests in Foreign Countries, p. 406.)

[61] Hearings, Petroleum Requirements—Postwar, pp. 18, 113.

[62] Twentieth Century Petroleum Statistics, p. 34. (Prepared in the office of the Director, Naval Petroleum Reserves, November 15, 1945.) The latter of the above-named figures includes approximately 14,000 miles of products lines.

[63] The dead-weight tonnage of these vessels in 1918 totaled 1,221,897 tons; in 1938 the total was 4,364,459 tons; and on September 1, 1945, it was 13,379,143 tons. In terms of T2-SE-A1 equivalent, the United States possessed 38.8 percent of the world tank-ship fleet in 1938, and 59.8 percent thereof on September 1, 1945. (Hearings, War Emergency Pipe-Line Systems and Other Petroleum Facilities, p. 280.) As a result of the emergency of the late war, which required capital expenditure beyond even the resources of the oil industry, a huge fleet of Government-owned tankers came into being. On April 1, 1945, the flag of the United States was flying over 54 percent of all world tanker tonnage (d. w. t.) as contrasted with 26 percent on September 1, 1939. (Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, pp. 199-200, 210-211.) The Government of the United States thus became the owner of 74 percent (d. w. t.) of the present United States fleet. (Hearings, War Emergency Pipe-Line Systems and Other Petroleum Facilities, pp. 272, 317.)

[64] Hearings, American Petroleum Interests in Foreign Countries, pp. 189, 192.

[65] Supra, p. 19. The British-Dutch position on that date was also about 40 percent. The remaining 20 percent was owned by all other foreign interests, including the government-operated reserves in Argentina, Bolivia, Mexico, and Russia aggregating in those four countries nearly three-fourths of the said 20 percent. (Hearings, American Petroleum Interests in Foreign Countries, pp. 200-201.)

[66] Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, p. 115.

[67] Ibid., p. 115.

[68] "It was fortunate, indeed, that the United States was able to enter the war with a million barrels per day of reserve productive capacity. Probably the most important lesson learned from the war is the need to maintain an adequate reserve productive capacity, and hence the need to keep the petroleum industry in an environment which will permit it to regain and retain the position of readiness in which it entered World War II."—Philip H. Bohart, Director of Production Division, Petroleum Administration for War, in statement before the committee, November 28, 1945. (Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, p. 81.)

[69] Hearings, Petroleum Requirements—Postwar, p. 69. The present gas reserves are of the order of magnitude of two hundred trillion cubic feet. Such reserves may eventually be of even greater importance than our present proved oil reserves. (Hearings, New Sources of Petroleum in the United States, pp. 26, 54-58.) With natural gas costing about 4 cents per 1,000 cubic feet, it is claimed that gasoline can be produced therefrom at 5½ cents per gallon. The current cost of producing gasoline from crude is about 5½ cents per gallon. (Letter from R. R. Sayers, Director, Bureau of Mines, to the chairman of the committee, December 6, 1946.)

[70] Hearings, Petroleum Requirements—Postwar, pp. 69-71. Further, it should not be overlooked that the cost of oil production in the United States has been rising, owing to the increased expense for exploration and development. "As far as can be anticipated at present, there is good justification for the belief that oil from shale may soon be produced at a cost that will bring it within competitive range of the petroleum industry."—R. R. Sayers, letter cited supra, note 69.

[71] Hearings, New Sources of Petroleum in the United States, pp. 26-27; The Independent Petroleum Co., p. 399.

[73] Hearings, Petroleum Requirements—Postwar, p. 71.

a combination of these. Then it must be refined, and the various products thereafter distributed. To do these things upon arrival of emergency requires that certain conditions exist during the period prior to the emergency. Thus, laboratories of research must be maintained; geological and engineering expertise must uninterruptedly progress; wildcat drilling must flourish; patient exploration must take place; and an industrial esprit de corps unhampered by governmental or monopolistic encumbrances or restraints must illuminate the whole.

AMERICAN PETROLEUM INTERESTS IN FOREIGN COUNTRIES

Too little understood is the place in our modern economy occupied by the American oil companies operating abroad. They have achieved by their initiative a dominant position in foreign commerce, a position which is maintained, upon the one hand, by contracts, concessions, and understandings with various governments and, upon the other hand, by the routine functions of trade in the refining and distribution of their products. These companies have, therefore, an impact both in the political and in the economic spheres.

In the political sphere, they have relations not only with the governments of the countries where petroleum is produced, but with the governments of the countries where petroleum products are sold and where, not infrequently, the object of the foreign government is to establish some form of state monopoly or cartel by which the course of commerce in petroleum will be guided as the government may desire.[74] Then, too, these companies have relations with the Government of the United States, whereby they endeavor to keep the Department of State advised as to their current activities and programs to the end that the same will not be contrary to American foreign policy and that the companies will be in a position to request prompt diplomatic protection when necessary.[75]

In the economic sphere, the foreign operations of American oil companies constitute a major factor in world trade. These operations, moreover, are not a thing apart from the domestic oil industry—indeed, they are closely meshed with it. The companies which engage in foreign operations do so as a part of their over-all activity, either directly or through subsidiaries and affiliates. Hence, the financial position of the companies is strengthened by the profits of world trade, thereby benefiting directly hundreds of thousands of stockholders including over 42,000 banks, 700 insurance companies, and 3,700 charitable or educational institutions.[76]

Practically all oil imported into the United States is produced by American companies, and, of course, a goodly portion of the purchase price eventually finds its way to American stockholders. The United States Treasury also receives large sums in duties and income taxes arising from these foreign operations. The purchase in this country of drilling machines, pipe lines, and refinery equipment for foreign installation involves an annual expenditure of many millions of dollars. Moreover, it is urged frequently that the increased purchasing power of the foreign oil-producing countries, all of which benefit economically from the American pioneer who so often has been the first to tap the underground resources of distant regions, is reflected in increased exports from the United States in response to the stimulated demand for American-made goods.[77]

There is, however, another side of the picture. The American companies which possess the financial resources to enable them to operate abroad and to sit across the bargaining table from monarchs and foreign diplomats are few in number, but they heavily outweigh in the scope of their operations the hundreds of small companies which function independently in the domestic oil industry.[78] These "independent" companies look with considerable apprehension toward the threat of oil imports into the United States by the comparatively few American corporations operating abroad which control a vast productive potential.

In 1938, before the magnitude of the middle eastern oil resources was generally comprehended,[79] South American oil moved into Europe, to a large extent through the instrumentality of American companies, at the rate of 298,000 barrels daily. In addition, 188,000 barrels daily were exported from South America to the United States. At that time Europe imported oil from Iran and Iraq at the rate of only 171,000 barrels daily.[80] Now, in the year 1947 with increasing production in the Middle East, improved facilities for pipe-line transport to the Mediterranean from the Persian Gulf, and more efficient arrangements for European marketing,[81] a problem is posed for the producer in South America and for the producer in the United States. The question is being heard: "Will middle eastern oil displace South American oil in Europe and thereby turn the latter stream toward the United States?"

The Independent Petroleum Association of America, in a brief presented in December 1946 to the Committee for Reciprocity Information (Washington, D. C.), pointed to the increasing flow of petroleum imports which, during the first 9 months of 1946, reached an average of 378,000 barrels daily as compared with an average of 160,000 barrels daily imported by the United States during the 4 years 1936–39. Exports from the United States during the same 9 months of 1946 declined by 35,000 barrels daily from the average during the 4 years 1936–39.

It is not intended in this report to enter upon a discussion of reciprocal trade policies, and these facts in respect of increasing imports and decreasing exports of crude petroleum and its products are cited only to illustrate the impact on the domestic oil industry of the foreign operations of American companies. The facts are that a torrent of foreign oil could be released on our shores and that imports are already rising rapidly and net exports declining. An inundation by low-cost foreign oil could not help but injure the secondary recovery of domestic oil; it would stifle many an independent enterprise which, to exist, must make a profit under the high-cost conditions prevailing in the United States. The danger of this flood is what the independent domestic producer fears.

These facts, on the other hand, must be viewed against the background of the increasing use of petroleum and the slowing-up of important domestic discoveries. Since the turn of the century petroleum has been fast growing in importance as a source of industrial energy. In 1944 petroleum and natural gas furnished to the Nation seven-ninths as much energy as coal, whereas in 1900 they furnished only one-fourteenth as much as coal.[82] Since the termination of the recent hostilities a tremendous peacetime impetus has been given to the utilization of oil as a fuel. The Diesel engine is displacing the steam locomotive on American railroads; the bituminous coal-mining industry is losing a substantial portion of its market to oil; and it is obvious that, unless a national policy to the contrary be adopted, the time might well

[74] Hearings, Foreign Contracts Act, pp. 138–189, 256–258.

[75] Hearings, American Petroleum Interests in Foreign Countries, pp. 101, 121. For example, when the celebrated red line agreement affecting the Persian Gulf area was in the making, A. C. Bedford, the chairman of the board of directors of the Standard Oil Co. (New Jersey), called at the Department of State to ascertain the Government's attitude in relation to the progress of the negotiations undertaken privately with British interests for American participation in the development of the Mesopotamian oil fields. The Department took the position that participation by American companies in the Turkish Petroleum Co. would be unobjectionable under the American policy of the "open door," provided that all interested American oil companies had been accorded an opportunity to share in the arrangement, and that no attempt were made to establish a monopoly in favor of the Turkish Petroleum Co., or any other company. However, while Secretary Hughes in his letter of August 22, 1922, to the president of the Standard Oil Co. (New Jersey) made no objection to the proposal that the participants obligate themselves not to be interested in former Ottoman territory beyond the borders of Mesopotamia except through the medium of the Turkish Petroleum Co., he declared that the said proposal would not affect the attitude of the United States Government in the diplomatic protection of American interests in such areas. (Diplomatic Protection of American Petroleum Interests in Mesopotamia, Netherlands East Indies, and Mexico, op. cit., pp. 20–21. See also hearings, Foreign Contracts Act, pp. 158 ff.)

[76] Hearings, American Petroleum Interests in Foreign Countries, p. 290. The Socony-Vacuum Oil Co., Standard Oil Co. of California, Standard Oil Co. (N. J.), and the Texas Co.—the four participants in the projected venture by which Saudi-Arabian oil is to be made available for distribution under a single managerial policy (supra, p. 11 n.) had a total of 470,752 stockholders as of December 31, 1945. (Moody's Manual of Investments, American and Foreign, Industrial Securities, 1946, pp. 1907, 2286, 2522, 2689.) Of course, this total includes numerous duplications, but it still is correct to say that these four companies have a larger number of stockholders in the aggregate than all but a few municipalities in the United States have inhabitants; indeed, a greater number than the population of some of the States of the Union.

[77] Hearings, American Petroleum Interests in Foreign Countries, pp. 290–296.

[78] Thus, in respect of refining operations, while there are in the United States approximately 234 "independent" refining companies with 257 plants having a reported capacity, in terms of crude runs to stills, of about 750,000 barrels daily (hearings, The Independent Petroleum Co., pp. 189, 208), there are but five American companies with significant refining investments abroad namely, Standard Oil Co. (N. J.), Standard Oil Co. of California, The Texas Co., Socony-Vacuum Oil Co., and Sinclair Oil Corp. (hearings, American Petroleum Interests in Foreign Countries, pp. 205–208). There are 66 American-owned refineries in foreign countries, operated by 12 companies, with an estimated crude-distilling capacity in excess of 870,000 barrels daily. (Ibid., pp. 201–208.) In 1944, crude runs to stills in the United States by 21 major companies averaged about 3,800,000 barrels daily, which constituted 83½ percent of the runs for the entire United States (hearings, The Independent Petroleum Co., pp. 55, 188–189).

[79] The total new reserves to be discovered in the Persian Gulf area may ultimately exceed 150,000,000,000 barrels. Approximately one-third of the prospective part of this area lies within the Saudi-Arabian concession, owned by the Arabian American Oil Co. (James Terry Duce, Aramco Concession, The Texaco Star, Saudi-Arabian number, 1946, p. 16, citing Joseph E. Pogue's estimate.)

[80] Hearings, Foreign Contracts Act, p. 135, exhibit F.

[81] Supra, pp. 11 n., 13 n.

[82] Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, pp. 241–242, and see Chart No. 36 facing p. 252.

arrive, in view of diminishing discoveries at home, when the domestic petroleum operator would be at a severe disadvantage in competition with the American petroleum operator who was in a position to meet the demand with imported oil. However, the American investment in foreign oil operations could continue to yield a financial return, and at the same time the domestic oil producer remain in business, if the aims of world statesmen were diverted toward the ways of peace and the raising of the standard of living of the people everywhere.

In 1938 the United States and Canada, with less than 7 percent of the world's population, consumed 62 percent of all petroleum that was consumed in the world.[83] The per capita consumption in the United States and Canada for that year was 353 gallons. During the same 12 months the consumption in Australia and New Zealand was 122 gallons; in Russia, 41; in Latin America, 39; in Europe, 31; in Africa, 9; and in Asia, 4 gallons.[84] The great preponderance of consumption in North America is explained principally by the fact that the people of the United States and Canada have a standard of living and an industrial plant which create a far greater demand for petroleum than elsewhere in the world.

It would seem apparent that the danger of a world surplus of petroleum flowing into the United States to destroy the market of the independent oil operator could be readily averted by an increased industrialization in foreign countries and by an improvement of living standards whereby the use of motor vehicles would become more general throughout the world.[85] That such a possibility is not mere fancy is demonstrated by the fact that the gasoline demand in foreign countries during the period 1927–38 showed an average increase of approximately 19,000 barrels per day annually, or 4 percent per year, whereas in the United States the gasoline demand in the same period increased an average of about 24,000 barrels per day, or 2.1 percent per year. It should also be noted that for the same period the demand for all petroleum products abroad, excluding Russia, almost doubled, whereas in the United States the consumption increased about 50 percent.[86]

The prospect of improved living standards abroad is further enhanced by the manifold benefits to foreign countries through the very presence of the American oil investment therein. Likewise the social and educational benefits, resulting from the American investment and the policies of the companies, are manifold. Thus, in 1937, royalties and taxes paid in all foreign countries by American petroleum companies exceeded $687,000,000.[87] Thousands of the nationals of these countries find welcome employment, skilled and unskilled, by the oil companies, and other thousands find employment indirectly as the result of such large-scale operations.[88] Homes, hospitals, schools, highways, port works, power and light plants, telephone and telegraph lines, airports, water wells, facilities for drainage, irrigation, sanitation, etc., have been constructed in many parts of the world where they had been rarities.[89] It is of small moment that some of these improvements were motivated by a policy designed in the long run to profit the companies. The local benefits are no less real because business enterprise is sufficiently enlightened to cultivate good will.

It is obvious that operations in sparsely populated and remote areas, often in swamps, jungles, and deserts, are extremely costly. When, added to such costs, there is taken into consideration the gamble inevitable in all oil exploration, it is apparent that only companies with vast financial resources could undertake such enterprises. For example, a sum in excess of $60,000,000 was expended before the first oil was shipped from the Barco concession in Colombia, 23 years after the original acquisition of the concession by American interests. In Venezuela the Creole Petroleum Corp. spent $42,000,000 between the date of first investment (1920) and the date of first discovery (1928); and before the first oil was commercially marketed 2 years later, the company invested $6,000,000 more.[90]

Political risks also attend foreign oil operations, ranging from governmental competition, compulsory refinery installation, and trade and exchange control on the one hand, to revision or cancellation of contracts and outright expropriation on the other. In this hemisphere, Bolivia and Mexico took the initiative in nationalizing their petroleum deposits and in expropriating foreign oil properties.[91] In Europe, American oil interests which had made substantial investments in Rumania and Austria and had pioneered discoveries in Hungary now find their holdings after the war under control of Russia which previously expropriated American oil properties acquired under the Empire. Oil lands which have been prospected and developed in Saudi Arabia, Kuwait, Bahrein Island, and throughout the Iraq-Iranian areas are involved in the conflicting politico-economic ambitions of Russia, Britain, France, and the Netherlands, to say nothing of the United States and the inhabitants of Palestine. Across the Indian Ocean in Sumatra the native population is assuming power, and an independence movement has threatened to upset the traditional concepts under which oil concessions were granted and oil interests acquired in the Netherlands East Indies. The new Indonesian government is reexamining these contracts and apparently is demanding at the very least that the Republic be recognized, in lieu of the former Dutch administration, as the successor party to the contracts.

With the labor government in England pursuing a policy of nationalization at home in respect of the coal industry—although abroad striving to maintain the structure of empire—and with the Soviets pursuing a policy of communism, the rising native governments have example enough to cause them to assume that prewar standards of dealing with natural resources require modification.

Thus is posed a thorny question of foreign policy for the United States. A foreign policy, simple enough when it involved chiefly the exercise of the Government's persuasive diplomatic authority for the preservation of economic conditions under which Americans could operate abroad with a minimum of difficulty, becomes complex indeed when it concerns the activities of modern corporate giants, the ambitions of totalitarian states, declining empires, and revolutionary uprisings.

Prior to the war of 1914–18, American diplomatic policy was not different for oil from what it was for any other commodity in world trade. Our policy then was designed primarily to uphold the right of American nationals to export to foreign countries on equal terms with foreign exporters. But after 1918 the American oil companies enthusiastically applied their great technological skill and financial resources in a successful search abroad for new fields to develop, spurred by the vigorous support of the Department of State sustaining the principle of the open door,[92] and by a widespread fear of an impending oil shortage.[93] Now that the few American companies strong enough to operate abroad are dealing with some foreign governments almost as equals, and three-quarters of the world is worshipping at strange economic shrines, we find ourselves in a new chapter. Diplomatic policy now must be directed toward the establishment of a world economy free from the restraints of monopoly, whether practiced by government, by private cartel, or by a union of government and cartel.

An indispensable corollary of American oil activity in foreign countries, whether primarily producing or consuming countries, is the creation of an economic climate wherein world trade can breathe. To the degree that foreign governments, acting with an eye only to immediate economic advantage, impose severe restrictions, American oil operations abroad will suffer. To be sure, in the absence of a treaty to the contrary, a foreign government is at liberty under international law to legislate to the detriment of foreign business, provided the legislation is of general application and does not deprive foreigners of their lawfully acquired property without adequate compensation. However, it is to be earnestly hoped that all governments will take early steps to create a world economy fostering trade among the nations, and that by international agreement and education the markets of the world will be opened to the international merchant in a spirit of welcome for the goods he offers in exchange for the products of the importing country. Assuredly the inspiring growth of world trade from the days of the ancient Phoenicians and through the period of the Crusades to its modern burgeoning in the age of discovery and its rapid development after the industrial revolution ought not shrivel in the twentieth century. It will not shrivel if men recognize that the prosperity of trade is measured by the number of people who may with profit participate in it, and if the nations of the world will keep the door of opportunity open to all.

There can be no doubt that the American companies have achieved the position of leadership they now enjoy not by withdrawing in the face of artificial and discouraging conditions imposed by foreign governments but by adjusting themselves to the laws and practices of the countries where they found

[83] During the same year Europe (exclusive of Russia) consumed only 15 percent; Russia's proportion was 8 percent; Latin America's 6 percent; all Asia used only 5 percent; Australia and New Zealand consumed 1½ percent; and all other countries, the remaining 2½ percent. (Hearings, Wartime Petroleum Policy Under the Petroleum Administration for War, p. 248, and see chart No. 39 facing p. 252.)

[84] Ibid., pp. 248–249, and see chart No. 40 facing p. 252.

[85] For the year 1938 United States registrations totaled 31,568,000 private and commercial cars, or 68 percent of the world total. However, foreign registrations increased markedly in the interwar period. In 1919 foreign registrations were only 14 percent of the world total but they rose to 32 percent for 1938, or, expressed in number of vehicles (excluding motorcycles), the foreign total in 1919 was only 1,287,000 but in 1938 was 14,773,000. Foreign motorcycle registrations far exceed those in the United States, which had only about 110,000 out of a world total of 3,515,000 in 1938, or 3.1 percent. Over 3,000,000 motorcycle registrations were in Europe before the war, and over half of those were in Germany. (Hearings, American Petroleum Interests in Foreign Countries, pp. 405–410.)

[86] Ibid., p. 406.

[87] Ibid., p. 255. About one-third of the total revenue of the Venezuelan Government is contributed by the petroleum industry. American capital constitutes about 62½ percent of the total foreign oil investment in Venezuela. Ibid., p. 265.

themselves.[94] Originally an American company would have had nothing to fear from the antitrust laws in entering into many of these foreign arrangements,[95] but beginning with the Sisal case in 1927,[96] it became clear that acts, although performed outside the United States, would violate the antitrust laws if such acts related to and were in direct restraint of trade in the United States. Essentially, however, the Sisal case did not introduce novel doctrine, and American companies still had no cause to hestiate where the agreement did not relate to United States trade.

Of late, however, the question has presented itself to what extent an American company may safely go in complying with foreign regulations or indirect pressures, and still not offend the antitrust laws of the United States. Related to this question is the proper delimitation of the scope of the antitrust laws insofar as world trade is concerned.[97] An American company which ventures its capital abroad is entitled to know with a reasonable degree of certainty whether a prospective course of action is not unlawful under the statutes of the United States, if for no other reason than that a wrong choice may affect the extent of diplomatic protection. By the same token the Government is entitled to know at least in outline the principal programs and prospective foreign commitments of American petroleum companies. Although monopolistic practices may be unpopular and unsound, yet American oil interests abroad, if disqualified from participating in trade under the foreign rules and customs, may easily lose position to alien competitors.[98] This, then, is a dilemma of national petroleum policy which calls for decision.[99]

Size alone does not constitute monopoly. Indeed, bigness is frequently essential in modern industry for the greatest efficiency, and has other advantages of importance to society.[1] The attainment of a dominant position in the business world, acquired through honest effort, is not a violation of the law. It is only the unfair methods of trade, which seek to destroy or exclude competitors by means of intercorporate stockholdings, or by agreements between present or potential competitors, whereby control of commerce among the States or with foreign countries is secured, that are anathema to the people of the United States.[2] But how far shall we go in advancing beyond our borders the principles of the laws against restraint of trade?

It may be doubted whether we can abandon our defense of free competitive enterprise at the water's edge and still expect it to survive even within our own borders. At the same time the Nation can ill afford to hazard the position of our petroleum interests in foreign lands by a unilateral policy which might not yield corresponding benefit.

As one step toward the solution of this difficulty confronting American oil companies abroad, in common with other types of business, the Congress might consider the enactment of legislation requiring, with appropriate safeguards, American companies to register with some agency of the United States Government copies of such foreign contracts as by their terms involve the types of trade restraint defined in the statute.[3]

Any broad solution, however, will have to be undertaken on an international scale by international conference. Difficult though it is proving to be to make progress toward a peaceful society, nevertheless this Nation should press unremittingly and with all the peaceful processes at its command for general acceptance of the principle of fair and friendly trade among the nations of the world. When freedom of opportunity is preserved, free enterprise is preserved. The essential condition of such preservation in foreign oil operations is an international understanding that control of this natural and indispensable resource shall not be used for exploitation of the native peoples in the producing countries, or of the users of oil in the consuming countries.[4] In a world genuinely devoted to peace and genuinely interested in the promotion of international trade and the raising of living standards, Americans doing business abroad will seldom be there confronted with practical situations posing difficult questions of antitrust law.

PUBLIC LANDS

The public-domain lands potentially valuable for oil or gas production are concentrated mainly in California, Colorado, Montana, New Mexico, and Wyoming.[5] Although for the past several years the production from the public domain has averaged only a little more than 3 percent of the total production in the United States,[6] the unexplored potential oil areas within the public domain are relatively large, and it is not unreasonable to assume that the percentage of total production derived from the public domain will show an increase in the years to come.[7]

In general, public-domain land is interspersed with patented land and State-owned land, and, in view of this varied ownership in prospective oil or gas areas, the Federal-owned lands must necessarily be explored or developed simultaneously with lands under other ownership, and vice versa. It follows that unduly restrictive laws or regulations governing the lands of either type may preclude the testing of an area, and that to the extent practicable the leasing provisions for Federal lands should conform to those under which State and private lands are leased.

In December 1942 the Congress enacted a law which offered an inducement to the prospector by granting during the national emergency a flat 12½-percent royalty rate for new discoveries on Federal leases bearing a higher royalty rate.[8] The results were gratifying.[9] In August 1946 the Congress took still further steps toward conforming the mineral leasing laws more nearly to the practices in vogue by the States and by private lessors.[10] Among the principles embodied in the new legislation, which is expected to encourage oil exploration and development on the public domain, is the flat 12½-percent royalty rate for future noncompetitive leases and also for existing noncompetitive leases under certain conditions.

---

[94] "The one inescapable fact," testified Laurence B. Levi, executive in charge of foreign operations of the Socony-Vacuum Oil Co., "is that American companies, if they are to continue to carry on business abroad, must be in a position to meet, in each particular country, the conditions existing there. In other words, an American concern desiring to carry on business in those areas must 'do as the Romans do' or suffer the consequences." (Hearings, Foreign Contracts Act, pp. 165–166.)

[95] See *American Banana Co.* v. *United Fruit Co.* (213 U. S. 347 (1909)).

[96] *U. S.* v. *Sisal Sales Corp.* (274 U. S. 268 (1927)).

[97] The nebulous compass of the antitrust laws in their application to commerce with foreign nations is well illustrated in a colloquy on May 17, 1945, between former Attorney General Biddle and the committee's counsel. (See Hearings, "Foreign Contracts Act," pp. 20–22, 170–171.)

[98] Monopolies and closed economies are unsound, and we are opposed to them," Mr. Levi told the committee, but then he went on to add: "Nevertheless, the trade agreements in foreign countries regulating their domestic marketing, where conditions may differ from ours, are considered by many governments as meeting the needs of their national economies. There is no doubt several foreign-owned oil companies stand willing and able to take the place of any American company which does not participate in these agreements." (Hearings, "Foreign Contracts Act," p. 164.)

[99] In a thoughtful statement to the committee Alfred Jacobsen, president of the Amerada Petroleum Corp. and chairman of the national oil policy committee of the Petroleum Industry War Council, said: "The solution which the American companies would prefer would be to see such countries persuaded by our State Department to open up their oil markets to free competition." (Hearings, "The Independent Petroleum Co." p. 381.)

[1] Peter F. Drucker, Concept of the Corporation, pp. 209–229. (New York, 1946.)

[2] George W. Wickersham, the Changing Order, p. 141. (New York, 1914.) Perhaps no one has more eloquently expressed the basic meaning of the antitrust laws than President William Howard Taft in a special message to Congress on January 7, 1910, wherein he recommended a national incorporation law. Speaking of the methods of some large business enterprises, he said: "If they attempt by a use of their preponderating capital and by a sale of their goods temporarily at unduly low prices to drive out of business their competitors, or if they attempt, by exclusive contracts with their patrons and threats of nondealing except upon such contracts, or by other methods of a similar character, to use the largeness of their resources and the extent of their output compared with the total output as a means of compelling custom and frightening off competition, then they disclose a purpose to restrain trade and to establish a monopoly and violate the act." (James D. Richardson, editor, A Compilation of the Messages and Papers of the Presidents, vol. XVI, p. 7450. Edition published by Bureau of National Literature, Inc. New York.)

[3] The committee, sitting jointly with a subcommittee of the Committee on the Judiciary, held hearings on S. 11 (79th Cong., 1st sess.) embodying a proposal of this type. See hearings, "Foreign Contracts Act." Reference should also be made to the hearing on S. 1476 (78th Cong., 1st sess.), the predecessor of S. 11 aforesaid, by a subcommittee of the Committee on the Judiciary, on May 23, 1944, at which hearing Ralph W. Gallagher, president, and Orville Harden, vice president, of the Standard Oil Co. (N. J.), testified.

[4] It should be observed that the consumers in certain European countries, for example, are often required to pay extremely high prices for gasoline and other petroleum products because of local duties and taxes. Sometimes such duties and taxes constitute as much as 77 percent and even 84 percent of the retail price. (Hearings, American Petroleum Interests in Foreign Countries, pp. 411–417.)

[5] Hearings, New Sources of Petroleum in the United States, p. 454.

[6] Ibid., p. 456. In 1941, when the United States total was 1,400,000,000 barrels, the public-domain production was 46,000,000 barrels; in 1945 the total for the United States was 1,700,000,000 barrels, and the public domain produced 57,000,000. Ibid., pp. 456–457; The Petroleum Almanac, op. cit., pp. 39, 42.

[7] Hearings, New Sources of Petroleum in the United States, pp. 457–459.

[8] 56 Stat. 1080.

[9] For the period from January 1, 1943, to July 1, 1946, there were 55 new oil pools and fields, and 11 new gas pools and fields, discovered on public-domain lands. In 1944 there were drilled on the public domain in the five principal oil-producing public-land States a total of 123 wildcat wells, whereas in 1942 the total was 68, and in 1941 was only 58. (Data received by committee from Harold J. Duncan, Chief, Conservation Branch, Geological Survey, Department of the Interior. See also hearings, New Sources of Petroleum in the United States, p. 469.)

[10] Hatch-O'Mahoney Act of August 8, 1946.

In addition to the public-domain lands within the United States, the Federal Government also owns extensive areas commonly referred to as acquired lands. The extent of such holdings has never been accurately tabulated, but rough estimates place the total at 150,000,000 acres.[11] These lands are not subject to the mineral leasing laws covering the public-domain lands. Some of the acquired lands have been leased for oil or gas development, but it is clear from evidence presented to the committee that exploration of acquired lands has been retarded (a) by lack of statutory authority to lease, (2) by divided jurisdiction among various departments of government, and (c) by a want of uniformity in policy and leasing procedure.[12] The Senate should give early consideration to the various postwar problems arising from the large amount of recently acquired lands, both as to their disposal and as to their mineral deposits.

In addition to such legislation it is submitted that the Senate consider the advisability of discontinuing certain naval petroleum reserves and of assimilating them to other public lands under the jurisdiction of the Department of the Interior. The total estimated recoverable oil from the three naval petroleum reserves, other than Alaska, is only 376,000,000 barrels.[13] It is obvious that the amount of oil producible daily from these modest reserves would constitute but slight assistance in the event of war. As has been demonstrated, the huge supply requisite for war purposes can best be assured by the existence of a strong private industry which is already in full operation when the emergency occurs. Therefore, it is submitted that the naval petroleum reserves of Buena Vista Hills, Teapot Dome, and Elk Hills be discontinued as such, and that they be administered in the future by the Department of the Interior as other public lands. As to the naval reserve in Alaska it is too early to draw conclusions because exploration there has only started.

THE INDEPENDENT COMPANY

At home, as well as abroad, a national oil policy based upon the principle of free enterprise would not only safeguard the position of the independent against restraints of trade, but would recognize the handicaps imposed by inequitable tax laws and the preponderant weight of the financial resources of the integrated majors. Small producers, small refiners, small retailers, all find it difficult to compete with the majors which engage in all three branches and in transportation as well. If the big company desires a certain street corner for the retail sale of gasoline, it can usually get it. Lack of financial resources limits the ability of the independent to withstand pressure as well as competition and, in the case of the producer, tends to induce the sale of proven properties by the wildcatter to the major. The wildcatter must turn over his capital, but the major can hold the property in idleness until a favorable time for production.

The majors are corporations with thousands of stockholders of small average holdings, whereas the independents are frequently the ventures of comparatively few stockholders. Again, the major is less affected by the life expectancy of its managers or stockholders, because its executives are drawn from an ample reservoir of talent, and because its stockholders normally do not exercise executive functions. On the other hand, when the founder of a small independent dies, there is often no one among his heirs to succeed him, and the inheritance tax frequently deals such an enterprise a severe blow. These are considerations which emphasize the necessity of antitrust enforcement, and of revision of the tax laws to remove the apathy toward investment of private capital in independent enterprise.[14]

It may be assumed that none of the major companies would welcome an industrial theater where only large companies occupied the stage. In such a drama government itself would soon become the protagonist. Equally it may be assumed that the small companies would view with grave apprehension the disappearance of the major enterprises. The present ready market at the well afforded by the large companies, their transportation and distribution systems which make possible a wide consumer market, their research programs, and their function in the national defense would be lost or greatly minimized if the growth of enterprise were limited by law.

In brief, it is recognized that a big man is not necessarily a bad man. Nor is a small man necessarily a good man.[15] The primacy of the United States in the oil world prevails in large measure because of the spirit which animates those who have ventured their fortunes, and at times their lives, in the vast foreign enterprises that only the strongest companies can undertake. And in large measure is American primacy owing to the wildcatter in the United States who on a shoestring and a prayer doggedly drills his well, be it dry hole or east Texas. Probably two-thirds of the wildcat wells in this country are drilled by independent producers as distinguished from the 20 or so major companies.[16] Approximately one-sixth of the total crude oil refined here is processed by independent refiners.[17] Hence, it is obvious that the functioning of the independent companies is indispensable to a healthy industry The independent company must be permitted to prosper if for no other reason than to prevent a drift into monopolistic practices with resultant governmental intervention.

TWO ALTERNATIVES

Every American unites in the national commitment to dedicate our country's energies and its will, as well as its hopes and prayers, to the establishment of world peace. International understanding in both commercial and political fields is the aim of our people, but, until that understanding is achieved, the United States must under no circumstances abandon to chance its industrial and military capacity to uphold its ideals.

This Nation now faces two alternatives: Either—

1. To wait with hope the discovery of sufficient petroleum within our boundaries that the military requirements of the future will occasion no concern, and in the meantime to depend upon foreign oil and trust that war will not cut off our imports; Or—

2. To take steps to guarantee a domestic petroleum supply adequate for all eventualities by means of:

(a) Incentives to promote the search for new deposits of petroleum within the boundaries of the United States and in the continental shelf; and

(b) The continuation of the present program looking to the manufacture of synthetic liquid fuels to supplement our domestic crude supply.

RECOMMENDATIONS FOR NATIONAL PETROLEUM POLICY

All the facts before us impel the choice of the second alternative. Therefore, the first principle of American petroleum policy should be to sustain our domestic supply of petroleum and to maintain the American system of competitive free enterprise at home and abroad. The second principle is to make human freedom the cornerstone of our policy, liberty and opportunity for people without discrimination or restraint, both within and beyond our borders.

To these ends we should:

1. Enact those laws which are most conducive to stimulating additional exploration and development in the United States. Encourage conservation to prevent waste. Promote interstate compacts so that our reserves may be expanded and used in the public interest, but guard against any danger of misusing conservation laws to restrain unduly any operator. Administer the public lands, not primarily as a source of governmental revenue, but for the purpose of stimulating private initiative in discovering and developing oil on the public domain.

2. Utilize the facilities of Government to promote research in the manufacture of synthetic liquid fuels, but without permitting governmental competition with private industry. Enact such legislation as may be necessary and proper to encourage secondary recovery from old fields which otherwise would not be productive.

3. Encourage free competitive enterprise by tax reforms to provide incentives for the risk of private capital in new ventures. Maintain the atmosphere in which competition may survive by enforcement of the antitrust laws. Adhere to the Federal statute prohibiting interstate shipments of petroleum produced in violation of State law. Continue the provisions of the income-tax law permitting deductions for depletion and intangible drilling costs.

4. Require full disclosure to the appropriate agency of Government of the principal terms, conditions, and obligations by which American companies undertake to carry on the petroleum industry abroad.

5. Follow a foreign policy designed to promote full development of the petroleum resources of the whole world for the benefit of all peoples of the world; to secure adequate supplies of petroleum to all peoples; and to discourage artificial restraints and restrictions, both political and private, which deny full opportunity for the people of all lands to participate beneficially in the production and distribution of petroleum and petroleum products.

ADDITIONAL CONCURRING VIEWS

I concur in the general principles, objectives, and suggested policies set forth in the foregoing report of the Special Committee Investigating Petroleum Resources, with three

[11] Hearings, New Sources of Petroleum in the United States, pp. 196–198.

[12] Hearings, New Sources of Petroleum in the United States, pp. 197 ff.

[13] Ibid., p. 260.

[14] Hearings, The Independent Petroleum Co., pp. 193 ff., 368 ff., 403–424. In the course of a valuable statement to the committee by Fayette B. Dow, he pointed out that, "recognition should be given to the fact that what might be considered big business in one industry may be very small business in another. In the oil industry a typical independent refining company may have an investment of $2,000,000 or $4,000,000 or $6,000,000, or more than that, but it would still be a small enterprise, a hazardous and marginal enterprise, compared with its major competitors. Under the present tax law the Federal Government will take 38 percent of net taxable corporate incomes of $50,000 or more regardless of the size of the various enterprises, their need of new capital, or, if estimated in terms of assured continuous earning power, of their ability to pay. So it is suggested that consideration be given to increasing the level of net taxable incomes at which the maximum rate applies and of modifying the rates of taxation on corporate incomes below that level." Ibid., p. 202.

[15] But it is sometimes said, "A good little man is always out of his class when he meets a good big man."

[16] Hearings, The Independent Petroleum Co., p. 33.

[17] Ibid., pp. 188–189.

reservations which I deem it advisable to point out. It is also my desire to emphasize other general observations contained in the report.

The first matter in which I find myself in slight disagreement is the suggestion of the report that the Congress might consider the enactment of legislation requiring American oil companies operating abroad to register with some agency of the United States Government copies of their foreign contracts which, by their terms, involve the types of trade restraint defined in the statute. It is, of course, obvious that American nationals engaged in foreign operations must necessarily comply with the laws of the foreign countries in which they operate. It is likewise obvious that American nationals operating abroad raise questions of diplomatic relations between the United States and such countries. It is, therefore, proper that the basic concession agreements between such governments and American nationals with respect to the scope of operations to be conducted and the obligations assumed by such American nationals and the commitments of the foreign governments affected, should be made known to our Government. This is and has been the prevailing practice for many years. If legislation is necessary in this regard, the Congress should give consideration to the enactment of appropriate statutes. To require disclosures beyond such basic information, might well result in making public competitive trade secrets that would have serious repercussions upon the private enterprise of this Nation and work undue hardships upon the units of private industry.

The application of the antitrust laws to monopolistic practices in interstate commerce has been clearly interpreted by the courts. It is generally agreed that such laws may be employed to protect the freedom of trade in interstate commerce from activities of American citizens or corporations, whether the restraint emanates from a domestic or foreign source. Circumstances abroad, under which international trade is conducted exclusively beyond our borders, are such, however, as to distinguish that character of trade from purely interstate or partly interstate and partly foreign transactions as defined and covered by the antitrust laws. I would hesitate to urge a governmental policy that might destroy that distinction as to application of the antitrust laws.

The second proposal of the report on which I desire to comment is the suggestion for the enactment of legislation as may be necessary and proper to encourage secondary recovery from oil fields which otherwise would not be productive. In general, this objective is heartily approved and I concur in the proposal to the extent that the Federal Government may do so within its constitutional sphere of legislative authority and to the extent that such legislation is equally applicable to the encouragement of recovery of all oil from any source in the United States. The suggestion, however, raises the possibility of subsidy payments to those engaged in the secondary recovery of oil. On principle, it is my opinion that any philosophy of government tending to subsidize uneconomic peacetime operations of any character is unsound and leads to a destruction of the virility of our private enterprise. If private enterprise is to survive in the United States, it must do so by its ability to survive all legitimate competitive hazards. The maintenance of a healthy domestic economy that will result in adequate competitive prices is the best insurance we can have for the continued operation of secondary recovery projects and the preservation of stripper pools.

I raise the third question as a mere matter of clarification. The report suggests that the Federal Government take such steps as may be possible to encourage conservation to prevent waste. I strongly approve this objective. The Federal Government can do much to encourage conservation to prevent waste. The Congress has done so by ratifying the Interstate Oil Compact, the enactment of the Connally Hot Oil Act, and the enactment of more liberal and practical public-land laws. Much has also been accomplished through the United States Geological Survey and the Bureau of Mines, and other agencies of the Government acting within their proper sphere. It should be made clear, however, that the production of oil and gas is entirely a local matter, wholly within the jurisdiction of the respective States, and that the primary problem of enacting and enforcing conservation measures to prevent waste of these natural resources is exclusively a State matter. The Congress should refrain from any policy that would tend to invade the prerogatives of the States in this purely local field.

The committee report and the policies suggested are indeed a strong argument for the competitive enterprise system which we enjoy in America and which has been the philosophy upon which our private oil industry has succeeded. I, therefore, emphasize that any governmental policy which encourages any department or agency of Government to enter into competition with private enterprise, is contrary to this philosophy. As a corollary it follows that our national oil policy should be to discourage and, if necessary, to prohibit any department or agency of Government from engaging in petroleum activities that directly or indirectly compete with our private industry.

The report properly points out that freedom of markets in international trade and equal access to petroleum supplies for all nations are contributing factors to world peace. In this connection, however, we should not fail to recognize that the United States is the only remaining Nation in the world where the production of petroleum is not a governmental monopoly. With consciousness of this fact it should be made clear that our agreement to these principles does not mean that we open the door to any foreign nation for the exploration of our domestic oil resources in competition with our private industry. Reciprocity in this regard should be limited to the citizens and nationals of foreign countries. Likewise, the United States Government should respect such policy by refraining from engaging in the petroleum business abroad.

E. H. MOORE.

Mr. O'MAHONEY. Mr. President, I hope the Senate may act upon the bill.

Mr. BALDWIN. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside in order that the Senate may consider Senate bill 1557, Calendar No. 702, and Senate bill 1375, Calendar No. 704.

Mr. KNOWLAND. Mr. President, I call the attention of the Senator from Connecticut to the fact that the Senate has not yet acted on the bill of the Senator from Nebraska, which is now pending. The St. Lawrence seaway legislation was temporarily laid aside so action might be had on the other bill.

Mr. BALDWIN. I thank my distinguished friend from California. I thought we had acted on that bill. It seems to me we have acted and reacted and acted several times.

Mr. KNOWLAND. Unfortunately, the Senate has not as yet passed the bill.

Mr. BALDWIN. Very well. I will subside until action is taken.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 134) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the act of April 5, 1944 (58 Stat. 190), is amended by changing the words "five years", in the first sentence, to read "eight years", and by changing the numeral "$30,000,000" in section 6 to read "$60,000,000."

INVESTIGATION INTO ACCOUNTS OF THE OFFICE OF THE COLLECTOR OF INTERNAL REVENUE, WILMINGTON, DEL.

Mr. WILLIAMS. Mr. President, I should like to make a brief statement on another subject at this time. Recently an investigation has been conducted by my colleagues the senior Senator from Delaware [Mr. BUCK], Representative BOGGS of Delaware, and myself into the accounts of the office of the collector of internal revenue, Wilmington, Del. We have found many discrepancies in the accounts involving the embezzlement of some of the Government funds; and, what is worse, the record indicates that an effort is being made to conceal the true facts of this case from the citizens and taxpayers involved, and at the same time protect certain responsible Government employees from disciplinary action.

In a letter dated today, and signed by the senior Senator from Delaware [Mr. BUCK], Representative BOGGS of Delaware, and myself, and addressed to Mr. George J. Schoeneman, Commissioner of Internal Revenue, we have called this situation to his personal attention and insisted that he take immediate steps to clear up this unpleasant situation.

At this time I ask unanimous consent to have printed in the RECORD as part of my remarks a copy of this letter, dated February 4, 1948, addressed to Mr. George J. Schoeneman and signed by the senior Senator from Delaware [Mr. BUCK], Representative BOGGS of Delaware, and myself.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Mr. GEORGE J. SCHOENEMAN,
Commissioner, Bureau of Internal Revenue, Washington, D. C.

DEAR MR. SCHOENEMAN: During the latter part of December 1947, we discussed with you the fact that the accounts of several hundred taxpayers in Delaware had erroneously been marked delinquent by responsible officials in the Wilmington office and that as of that date, there was evidence that over $30,000 of these funds had been embezzled. Since that time the cashier of the Wilmington office has pleaded guilty to this embezzlement and has been sentenced in the Federal court.

During our discussions last December, we called to your attention the fact that an exceptionally large number of special agents had been assigned to that area to investigate the taxpayers. We are not asking that the taxpayers of our State be exempt from the routine audit by your Bureau, but we do think that it is very unfair that they be subjected to the tactics now being used by your agents and at the same time be denied the knowledge that the reason for this rigid examination is that their accounts have been manipulated and some of their payments embezzled by someone in the collector's office.

Since this situation developed in our State, we have been receiving numerous requests from various taxpayers, asking if their accounts were involved. Many of these taxpayers have been receiving bills for unpaid taxes for which they have receipts. It is our opinion that the most important contribution which can be made at this time to restore the confidence of the Delaware citizens in the Revenue Department is to convince them that this case has been fully exposed; therefore, we are today placing in the CONGRESSIONAL RECORD and asking the newspapers in our State to publish a complete list of those taxpayers whose accounts are known to have been tampered with as well as a copy of Mr. McNamee's report of November 13, 1947, addressed to your Department, in which he made the following statement:

"In this connection it is well to note that during the period November 1946, when the collector was first notified by the assistant cashier of an apparent discrepancy in the accounts, the cashier, Mr. Flynn, was left in complete control of his duties by the collector and no satisfactory explanation has been forthcoming from the collector as to why this situation was allowed to exist.

"The efforts of the collector and assistant collector to hide or hush up this affair has been, to my way of thinking, presumptuous, to say the least. The fact that the assistant collector spent several months as a supervisor of accounts and collections prior to his present appointment should have instilled in him a certain esprit de corps which, I am sorry to say, is entirely lacking. He failed to acquaint the supervisors or the Bureau with his knowledge of this irregularity for 6 months after he found it out, during which period the cashier carried on his defalcations. As indicated by the report, a total of $2,939.26 was embezzled during the period November 1946 to May 28, 1947.

"This amount, in my opinion, should be charged to the collector and his assistant, to be paid out of their personal funds."

Further proof that these two officials were making an effort to conceal these discrepancies in their office is borne out by evidence recently obtained by us, which shows that a written memorandum was delivered on November 15, 1946, to the assistant collector, Mr. Ainsworth, outlining certain manipulations by the cashier. We find that a routine audit was made of this agency during the month of December following this written notice, at which time both the collector and the assistant collector failed to call the written memorandum to the attention of the auditors.

An examination of various reports made by the chief investigator for that area discloses that serious criticism has been made on numerous occasions by the investigator, charging that the records and the bookkeeping system of the office in general were in a state of confusion. They also criticized the looseness of the Department's handling of cash items, and even insisted upon a new system being set up.

We have reviewed these critical reports by your own investigators, charging these men with an attempt to conceal and protect the guilty parties in addition to the many charges of inefficiency, and as representatives of the citizens and taxpayers of that State, we feel obligated to call on your department for an explanation as to why the investigation in the Wilmington office has suddenly been called off. In your reply we want you to explain to us not only why these officials were left in charge of the office but also why it was that you designated these same men for a special promotion and an increase in salary.

We realize that the total amount of this embezzlement cannot be established until such time as all of the accounts in that office prior to July 1947 have been audited, and we are wholly in accord with your thought that this audit should be made as soon as possible; but we do think that there are three essential points being overlooked in your effort to clear up this situation:

1. You should immediately suspend every employee in that office involved in any manner, either through participation in the embezzlement or through negligence in reporting the situation which they knew to exist to the proper authorities. This should be done immediately in order to restore in the minds of the taxpayers the confidence which they once had for your office.

2. We think that you should immediately notify each taxpayer in the State whose accounts have been tampered with in any manner, giving to that individual all the details and enlisting his support in assisting your office to obtain a true picture of the facts.

3. We think that a thorough audit should be made of the Wilmington Office, and if necessary to expedite this, we suggest that you utilize the services of some of the special agents now assigned to that area who have been devoting their time to auditing the taxpayers.

The evidence now on file in your office against both the collector and the assistant collector is of a rather serious nature and is something which we feel cannot be overlooked.

Yours sincerely,

C. DOUGLASS BUCK,
JOHN J. WILLIAMS,
J. CALEB BOGGS,
Congressmen.

Mr. WILLIAMS. Mr. President, in order that each taxpayer whose accounts are known to have been manipulated might be properly protected and notified, I ask unanimous consent to place in the RECORD a list of their names, with the suggestion that each individual write the Bureau of Internal Revenue, Wilmington, Del., and ask that office for a detailed account of all the manipulations of their funds which have taken place during the past 7 years. It is true that many of these taxpayers' accounts have since been adjusted, but we still feel that they have a right to know all the facts in order that they might check their own records for possible duplications in payments.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Lea River Lines, Inc.; Kathryn H. Lewis; George A. and Agnes Passwaters; Samuel McCormick; H. Z. Gabraeil; Edward Eisenhandler; S. Summer Bearman; Gre-Sin Gift Shop; Wilmington Dry Goods Co.; E. Clifton and Martha C. Sutton; George B. and Mary Rochelle; William D. and Natalie B. Bradford; Harold V. and Elizabeth Maull; George B. and Elizabeth Carroll; LaSalle Athletic Club; Wooleyhan Transport Co.; Leroy's; Henry Davis; Alfred E. Bissell; Sarah Lipstein; Philip E. Rust; Nelson J. Forney; William H. Peoples; Howard A. Gifford; Howard Tucker, trading as Chiek's Restaurant; Thomas and Leah C. Davis; John J. Williams; Anthony P. and Rose M. Columbo; F. A. Mr. WILLIAMS. Mr. President, at this time I also ask unanimous consent to have printed in the RECORD as part of my remarks copies of two letters, both dated November 13, 1947, addressed to Mr. Paul A. Hankins, Deputy Commissioner, Internal Revenue Bureau, Washington, D. C., and signed by Mr. J. E. McNamee, Supervisor of Accounts and Chief of the Staff of Auditors, who conducted this investigation for the Treasury Department.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PHILADELPHIA, PA., *November 13, 1947.*

Mr. PAUL A. HANKINS,
Deputy Commissioner,
Accounts and Collections Unit,
Internal Revenue Bureau,
Washington, D. C.

MY DEAR MR. HANKINS: Transmitted herewith is report of the examination of the Office of Collector of Internal Revenue, Wilmington, Del., for the period July 2, 1940, to June 3, 1947, inclusive.

In this connection it is well to note that during the period November 1946, when the collector was first notified by the assistant cashier of an apparent discrepancy in the accounts, the cashier, Mr. Flynn, was left in complete control of his duties by the collector, and no satisfactory explanation has been forthcoming from the collector as to why this situation was allowed to exist.

The efforts of the collector and assistant collector to hide or hush up this affair has been, to my way of thinking, presumptuous, to say the least. The fact that the assistant collector spent several months as a supervisor of accounts and collections prior to his present appointment should have instilled in him a certain "esprit de corps" which, I am sorry to say, is entirely lacking. He failed to acquaint the supervisors of the bureau with his knowledge of this irregularity for 6 months after he found it out, during which period the cashier carried on his defalcations. As indicated by the report, a total of $2,939.26 was embezzled during the period November 1946 to May 28, 1947.

This amount, in my opinion, should be charged to the collector and his assistant to be paid out of their personal funds.

Sincerely yours,

J. E. MCNAMEE,
Supervisor of Accounts and Collections in Charge.

PHILADELPHIA, PA., *November 13, 1947.*

Mr. PAUL A. HANKINS,
Deputy Commissioner,
Accounts and Collections Unit,
Internal Revenue Bureau,
Washington 25, D. C.

MY DEAR MR. HANKINS: The following is a report of the examination of the Office of Collector of Internal Revenue, Wilmington, Del., for the period July 2, 1940, to June 3, 1947, inclusive.

On May 28, 1947, Mr. Norman Collison, collector of internal revenue, Wilmington, Del., called me and asked if I would come to his office that day. I arrived at the Wilmington office about noon time and was informed by the collector and his assistant, Mr. Ainsworth, that there was an apparent shortage in the snuff stamps in the Wilmington office. I immediately made a count of the internal revenue stamps in the vault, which revealed a shortage in snuff stamps of $8,572.50, which shortage still exists.

The cashier was called in and admitted this shortage. The collector then stated that the cashier was over about $700 in the cash account and that he (the cashier) was prepared to make good this evident shortage of $7,800 and insisted that this was the total amount of the shortage. He further asked if I would accept this arrangement and forget the incident. I replied that my only reaction was to notify the Bureau immediately and ask for the suspension of the cashier. The collector demurred to this, pointing out that Mr. Flynn was married and has two sons. Upon my insistence that the Bureau be notified, the collector asked if he could accompany me to the Bureau. I acquiesced and, because of previous engagements, the trip was put off to June 3, 1947. Later that day I found other discrepancies totaling $22,500. The cashier was called to the collector's office and, when informed of these discrepancies, admitted same and said he could make full restitution if given 4 or 5 days. When asked why he did not admit these discrepancies during our first interview, he replied, "my bosses did not open their mouth, so why should I tell on myself."

Upon our visit to the Bureau on June 3, 1947, Mr. Flynn was suspended immediately.

On June 4, 1947, the supervisors instituted a day-by-day check of the cashier's records from June 3, 1947, back through January 1940, which revealed a gross shortage of $38,018.25. A duplicate credit in the amount of $7,500 to the 1944 estimated income tax account of Robert W. Rea under date of December 29, 1944 (which erroneous credit still stands) and various penalty and interest items totaling $84.27 credited to taxpayers on documents filed on time but journalized as delinquent, reduce the gross shortage to a net of $30,433.98.

The authorized destruction of various records, such as cashier's work sheets and cashier's journals, handicapped the supervisor's investigation as it progressed. The destruction of the various order forms for stamps for 1940 and prior years made it impossible to identify purchasers of documentary and/or stock transfer stamps. Orders for stamps, fermented malt liquor, were reconstructed from brewery records.

On July 2, 1940, orders for documentary stamps and stock transfer stamps in the amount of $1,297.90 were journalized covered by misapplied checks. Since this was the entire balance of the shortage yet to be identified (except one check for $8.44 deposited April 17, 1943) and neither the names of the purchasers of the stamps nor whether the original transactions were by cash or check could be ascertained, and since the comparison of remittance registers and document registers back through January 1940 revealed no discrepancies in which misapplication of funds was apparently involved, it was decided that further efforts to identify the balance of $1,297.90 would be useless.

The defalcations set up a fairly regular pattern as revealed by the schedule of discrepancies in deposits. Documents showing taxes originally paid in cash were journalized under cover of other taxpayers' checks. Sometimes the penciled cash was partially erased. On bills such as forms 17 or 19, an entirely new form was often prepared in pencil with no blue pencil notation and no received stamp. A general laxness in the use of the received stamp in the office, particularly on orders for stamps, contributed to the situation. The documents from which checks had been taken were subsequently put through with still other taxpayers' checks. However, several times taxpayers' checks were used as described above and the document journalized later as a cash transaction. Cash was also used many times to cover the difference between misapplied checks and documents being journalized. On 17 occasions Mr. Flynn used his personal checks for this purpose. These personal checks ranged in amounts from 32 cents to $153.16. These were verified by the records of the Farmers Bank & Trust Co., Wilmington, Del.

A study of received dates, when available, on cash documents, journalized under cover of checks, indicated that unidentified cash deposited in the operations described in the preceding paragraph came from such documents and not from the cashier's personal funds.

Prior to 1946, the only document not journalized for which the check was deposited was a miscellaneous tax return, Form 727, in the amount of $8.91 filed by Walter Holliger. A check for $17.08 was forwarded by mail with forms 727 for May and June 1944. The check was deposited August 11, 1944, but only the Form 727 for June in the amount of $8.17 was abstracted. This discrepancy, as well as several small excess collections which were not credited to taxpayers, apparently resulted from adding kited documents and checks to the document registers and remittance registers respectively without having first balanced the registers.

In six different cases documents were altered to bring the document register into balance with remittance registers, to bring the stamp control into balance with the stamp inventory, or to bring the kited documents into exact agreement with the kited checks. With one exception these were minor alterations. On June 26, 1942, however, the cash order of the Diamond State Brewery Co. for fermented malt-liquor stamps in the amount of $780 was not journalized and a fictitious order for fermented malt-liquor stamps in the amount of $180 was journalized in its stead. In addition, a fictitious order in the amount of $120 was journalized the same day. The two orders were in the same handwriting and neither the taxpayers' records nor bank statements reveal any such payments. The fictitious order of the Diamond State Brewery Co. differs from the taxpayer's copy only in that an order for four 25-barrel stamps at $150 each had been removed. The fictitious order in the name of the Delmarva Brewing Co. is for four 5-barrel stamps at $30 each. Apparently an inventory of fermented malt-liquor stamps revealed an average of four 25-barrel stamps and a shortage of four 5-barrel stamps and this device was utilized to bring the accounts into balance. It also apparently was used to embezzle $480. The Diamond State Brewery Co. was not aware that 5-barrel stamps had been delivered instead of 25-barrel stamps. The records of the Diamond State Brewery Co. indicated that a stamp order in the amount of $780 was paid by cash, on that date, while the Delmarva Brewing Co. had no records of $120 on that date. Inasmuch as all orders of the Delmarva Brewing Co. were paid by check and this order for $120 was covered by cash, it is clearly evident that this order was fictitious.

In addition to checks for $8,572.50, $5,000, $500, and $8.91, mentioned heretofore, the related documents for which were never journalized, checks in the amounts of $15,000 and $7,500 were submitted by John J. Williams to cover 1946 estimated income taxes of himself and his wife, respectively. These checks were deposited June 4, 1946, to cover the 1946 estimated income tax of Anthony P. Columbo and Rose M., in the amount of $2,500, and F. A. Wardenberg in the amount of $20,000. The documents with which Mr. Williams' checks were related have never been journalized.

On May 13, 1947, a check in the amount of $605.20 drawn by the Wilmington Country Club in payment of tax on admissions for April 1947, was deposited to cover orders on documentary stamps that are marked "cash." A duplicate return was filed by the taxpayer at the request of the collector's office and was assessed on the October 1947 Spl. No. 1 list, account No. 53160, and is outstanding.

Six cash payments, the documents for which were never journalized, have been definitely established. More may come to light eventually. Howard A. Gifford holds a cash receipt, Form 1, dated April 9, 1946, in the amount of $185.20 covering the balance of his 1945 income tax. There is no record of this payment in the collector's office. Four taxpayers have submitted affidavits of filing forms 11 with cash payments for various special tax stamps in total value of $159.50. The exact amount of the items claimed appear on the teller's cash sheet of the assistant cashier as payments for stamps and are included in the daily recapitulation of cash tallied as on hand at the close of business May 27, 1947, by the cashier. A comparison of the teller's stamp sheets with Forms 11 and other stamp records, leaves these items unreconciled.

It had not been the custom of the cashier's office to give a receipt for cash payments for stamps which could not be issued immediately. Now, a Form 1 receipt marked "in lieu of stamp to be issued" is given to taxpayers in all such cases.

In the schedule of discrepancies, under the heading, "Net cash," there appears 91 items which represent payments by the cashier from his cash reserves. Seventeen of these items marked "*" are his personal checks; the balance are cash payments. These payments total $10,329.47. It was necessary for the cashier to deposit these amounts to balance the various days' work. It is entirely possible that part of these payments represent cash payments by taxpayers whose returns were destroyed and owing to the volume of unfinished work of checking the unmatched documents received from the Processing Division and the migration of many war workers, it will be impossible to complete this part of the investigation. It is also possible that additional discrepancies will be uncovered when the revenue agents check the 1945 and 1946 income tax returns (Bureau) and make comparison with the credit documents attached to the return with the amount of credit taken by the taxpayer on his return.

Sincerely yours,

J. E. McNAMEE,
Supervisor of Accounts and Collections in Charge.

Mr. WILLIAMS. Mr. President, I also ask unanimous consent to have printed in the RECORD as part of my remarks a copy of a letter dated November 7, 1947, addressed to Hon. John J. Morris, Jr., United States district attorney, Wilmington, Del., and signed by Mr. Eugene C. Miller, senior investigator, General Accounting Office; which further explains the method used in juggling these taxpayer accounts.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GENERAL ACCOUNTING OFFICE,
Washington, D. C., November 7, 1947.

Hon. JOHN J. MORRIS, Jr.,
United States District Attorney,
Post Office Building,
Wilmington, Del.,

MY DEAR MR. MORRIS: There is submitted for your consideration the following items resulting from the use of cash received by Maurice A. Flynn, Jr., as cashier in the office of the Collector of Internal Revenue at Wilmington, District of Delaware, and the substitution of checks prior to giving credit to the drawers of said checks.

George W. Helme Co. gave their check for $8,572.50 in purchasing snuff stamps. The check was deposited with the Federal Reserve Bank of Philadelphia on March 21, 1947, without giving credit to the snuff-stamp account and there is no credit as yet given and it has resulted in a shortage in the snuff-stamp account.

The credit of the above remittance was applied as follows:

Delaware-New Jersey Ferry Co.: Form 727 for December 1946	$2,860.26
Frank M. Carpenter: Form 727 for December 1946	73.99
Reese Theater: Form 729 for December 1946	1,125.47
Ball Theater: Form 729 for December 1946	568.78
Harris & Groll, Inc.: Form 729 for December 1946	3,186.01
Shortage in cash deposit for documentary stamps on Mar. 21, 1947	413.27
Shortage in cash deposit for miscellaneous taxes in addition to cash paid by Fred Knecht shown below	324.76
Fred Knecht: Form 728A for February 1946 (paid in cash)	19.96
Total	8,572.50

The document "Order for stamps—Snuff" dated March 20, 1947, factory No. 4, George W. Helme Co., Yorklyn, Del., totaling $8,572.50 was placed in the hands of Thomas Ainsworth, assistant to the Collector of Internal Revenue, in the presence of Hon. Norman Collison, collector, on May 27, 1947, thus indicating a shortage in the snuff-stamp account by Mr. Maurice A. Flynn, Jr., then cashier of the collector's office.

John J. Williams sent two checks to the Collector of Internal Revenue, Wilmington, district of Delaware, in the amounts of $15,000 and $7,500 respectively. The checks were deposited in the Federal Reserve Bank, Philadelphia, on June 4, 1946, but credit has been withheld leaving the accounts due and unpaid and the checks applied to the credit of the following accounts:

Anthony P. Columbo and Rose M., for estimated income tax for 1946 in the amount of $2,500.

F. A. Wardenburg, for estimated income tax for 1946 in the amount of $20,000.

The checks from Anthony P. Columbo and Rose M., and F. A. Wardenburg having been applied to credit the accounts of other persons on March 8, 1946.

Henry Davis paid his estimated income tax for 1946 by a check in the amount of $5,000 which was deposited on March 28, 1946, in the

Wilmington Trust Co., Wilmington, Del. Credit has been withheld leaving the account due and unpaid.

The check was used to credit the account of Alfred E. Bissel for estimated income tax for 1945 in the amount of $5,000, Alfred E. Bissel's check for $5,000 having been deposited on November 9, 1945, and credit applied to accounts of other persons.

Senior Investigator,
General Accounting Office.

ORDER OF BUSINESS

Mr. BALDWIN. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside in order that the Senate may proceed to the consideration of Senate bill 1557, Calendar 702, a bill to incorporate the Catholic War Veterans of the United States of America, and Senate bill 1375, Calendar 704, a bill to incorporate the Jewish War Veterans of the United States of America.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut?

Mr. LUCAS. Mr. President, this is a controversial question, and in view of the understanding which we have had with respect to taking up measures which are controversial while a number of Senators are out of the city and will be absent for some time, I am constrained to object to the unanimous-consent request.

Mr. BALDWIN. Mr. President, I understand that there is an agreement, in which both parties have joined, that no matters of a controversial nature shall be considered during the remainder of this week and next week. I shall not attempt to break that agreement by making a motion that these bills be considered.

I hesitate to make a motion for the further reason that we should dispose of the St. Lawrence waterway measure. However, I should like to have an understanding that when the St. Lawrence waterway is disposed of, we can make these bills the order of business, so that they can be disposed of. They have been on the calendar for a long time.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BALDWIN. I yield.

Mr. MORSE. Mr. President, I share the views expressed by the Senator from Connecticut, with this reservation: I hope that no understanding has been entered into that we are not to transact any business of a controversial nature in the United States Senate between now and February 27, because I think there is some legislation which we certainly ought to take care of between now and that date. There are a great many so-called minor bills on the calendar, very important bills, which are unanimously reported from committee. I think we should dispose of them if no Senator wishes to speak on the St. Lawrence waterway.

I think it would be an unfortunate state of affairs, merely because some of our colleagues are to be out of the city between now and February 27, if we were to drag our feet and take a sort of slow-down vacation until February 27.

I serve notice now that so far as House bill 3484, Calendar 365, is concerned, I shall move to take up that bill. It is a bill to transfer the Remount Service from the War Department to the Department of Agriculture. I commented on the bill the other day when the calendar was called. The bill has been unanimously reported from the Armed Services Committee. It involves reaching some decision as to how we are to handle the Remount Service. We cannot go ahead with the so-called emergency grant which we were able to get through in the closing days of the last session.

I, for one, will protest any attempt to reach an understanding that legislation of that type is not to be considered before February 27 merely because some Senators are absent or intend to be absent.

I serve notice now that at the first opportunity after today I shall move to take up House bill 3484.

Mr. LODGE. Mr. President, will the Senator from Connecticut yield?

Mr. BALDWIN. I yield.

Mr. LODGE. I was momentarily out of the Chamber. I should like to know whether Calendar No. 696, Senate bill 1356, a bill providing for the incorporation of the Franco-American War Veterans, has been called.

The PRESIDING OFFICER. It has not.

Mr. LODGE. I should like to know if there is any objection to bringing up that bill at this time.

Mr. KNOWLAND. Mr. President, will the Senator from Connecticut yield?

Mr. BALDWIN. I yield.

Mr. KNOWLAND. Let me suggest to the able Senator from Massachusetts that we try to settle the question which the Senator from Connecticut [Mr. BALDWIN] has raised. He has asked unanimous consent for the present consideration of Senate bill 1557, Calendar 702, and Senate bill 1375, Calendar 704. I understood that there was objection from the Senator from Illinois [Mr. LUCAS] to taking up those bills in the absence of a number of Senators.

Mr. LODGE. Does the Senator from Illinois also object to the consideration of Calendar 696, Senate bill 1356, providing for the incorporation of the Franco-American War Veterans?

Mr. LUCAS. Mr. President, I regret that the Senator from Massachusetts was not present when I made my statement a moment ago. The two bills referred to by the Senator from Connecticut and the third bill, which was mentioned by the Senator from Massachusetts, are controversial measures, and in my judgment they will require considerable discussion and debate. I therefore cannot agree to a unanimous-consent agreement at this time, because a number of Senators who are interested in those bills are out of the city.

Mr. President, I am not responsible for Senators being out of the city. There has been a tentative understanding that while those Senators were absent making speeches in behalf of the Republicans, and while Democratic Senators are absent during the following week, no really controversial matter should be brought before the Senate for decision. I presume that that agreement can be overturned at any time, but I understood that that was the gentlemen's agreement, from all I have listened to in the past few days, and from the statements of the distinguished acting majority leader, Mr. WHERRY, and other Senators with whom I have talked. I have nothing to do with the policy of the Senate at the present time. It is a matter for Senators on the other side of the aisle to decide what they wish to do.

Mr. LODGE. Mr. President, is the Senator personally opposed to these bills?

Mr. LUCAS. The Senator from Massachusetts cannot get the Senator from Illinois into a debate about those bills.

Mr. LODGE. I am not trying to debate them. I am merely seeking information.

Mr. LUCAS. The Senator will not get that information at this time.

Mr. LODGE. Mr. President, I express my regret that the Senator sees fit to block these bills. I thought that all the opposition to them had been removed. The bill to which I refer in particular is sponsored by the Senator from Rhode Island [Mr. MCGRATH]. I had hoped that that might have a little weight with the Senator.

Mr. LUCAS. Mr. President, the Senator from Massachusetts regrets that I have blocked these bills. On an occasion of this kind, I have some responsibility on this side of the aisle, as acting minority leader. There are other Senators on this side of the aisle besides the Senator from Illinois, whom he must consider in this connection, or in connection with any other measure with respect to which there is controversy.

All I am saying to the Senator from Massachusetts is that there is a controversy with respect to these bills. Whether or not the Senator from Rhode Island or any other Senator on this side of the aisle happens to be for a certain bill might or might not make any difference to the Senator from Illinois from the personal angle. There are some Republicans who are for the St. Lawrence seaway, but that makes no difference to the Senator from Massachusetts in his opposition to it. The Senator from Wisconsin [Mr. WILEY] has no influence on the Senator from Massachusetts with respect to such an important measure; yet the Senator from Massachusetts seeks to catechise the Senator from Illinois because he objects to the consideration of a certain bill.

Mr. LODGE. Mr. President, I am not seeking to catechise the Senator at all. I am simply asking the question whether or not he is personally against the bill.

Mr. LUCAS. The Senator will find out in due time whether I am for it or against it.

Mr. BALDWIN. Mr. President, I should like to make my position clear. I made the request which I submitted because some time ago I spoke with the acting majority leader [Mr. WHERRY], who told me that he thought there might be an opportunity at this time to consider these bills. I had no idea that there would be so much controversy about them. Twice they have been called during the call of the calendar, and each time there has been objection. In each instance I explained the bill to the Senator who objected, and afterward the objection was withdrawn.

Mr. President, I am aware of the parliamentary situation. I agree with the distinguished Senator from Oregon [Mr. MORSE]. I do not believe that we ought to drag our feet. However, since there is an indication that these bills may be of a controversial nature and require some debate, I do not wish to interfere with the debate on the St. Lawrence waterway, which is a very important matter, and which has priority, by making a motion the effect of which would be to divert the attention of the Senate to these two bills. They are important bills, but they can be considered after the St. Lawrence waterway measure is disposed of. I merely ask my distinguished friend from Illinois and other Senators who may feel that consideration of those bills ought to be postponed at this time to join with me after the St. Lawrence waterway question is disposed of, when I make the motion that those bills be made the pending business so that they may be disposed of. I wonder if that suggestion meets with the approval of the distinguished Senator from Illinois.

Mr. LUCAS. I will say candidly to my friend that I have nothing to do with the program which will be in operation from now on. It is a matter for the policy committee of the majority as to what they wish to do in connection with these matters. I shall not be in position either to cooperate or not to cooperate with the able Senator. When the proper time comes I shall be glad to give the Senator my decision.

Mr. BALDWIN. My reason for addressing the distinguished Senator from Illinois is that he is the one who is making objection, and I thought he might be in position to give me some assurance, because he is the acting minority leader.

Mr. LUCAS. I suggest that we let the matter ride along. That is all we can do until the St. Lawrence seaway joint resolution is out of the way.

Mr. BALDWIN. The suggestion has been made, and I serve notice at this time that after the vote on the St. Lawrence seaway is had, I shall make a motion that these bills be considered.

Mr. LODGE. I shall join with the Senator from Connecticut in making that motion.

Mr. BALDWIN. And I shall join with the Senator from Massachusetts.

Mr. TAFT. Mr. President, while the St. Lawrence seaway project is under debate, these actions can be taken only by unanimous consent. I assume that the debate on the St. Lawrence seaway will soon come to a close. After that, any motion may be made to take up any measure. I assume the floor leader of the majority will move to take up certain bills. He has already suggested taking up on the 17th the budget resolution, and on the 18th the rent-control bill. I think that if the distinguished Senator from Connecticut will apply to the majority leader he will no doubt add to the list the bills in which the Senator is interested.

AUTHORITY OF MARITIME COMMISSION TO DISPOSE OF VESSELS

Mr. TAFT. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside and that the Senate proceed to the consideration of Calendar No. 902, Senate Joint Resolution 173, dealing with the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes.

The PRESIDING OFFICER. The clerk will report the joint resolution by title.

The CHIEF CLERK. A joint resolution (S. J. Res. 173) to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes.

Mr. TAFT. I may state that the urgency in this matter arises from the fact that the present legislation will expire on the 29th of February. So far as I have been able to discover, the resolution has the approval of Senators on each side of the Chamber.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

Mr. SPARKMAN. Mr. President, it is not my purpose to object to taking up the joint resolution at this time. When it was called on Monday I asked that it go over because the Waterman Steamship Corp., having its home office in the State of Alabama, had indicated an interest in the resolution, and a desire to offer certain amendments. I asked for time in order to present those amendments. I submitted them on Tuesday, and they are now on the table. Following that, I discussed the matter with the Senator from Washington [Mr. MAGNUSON], who has been very much interested in the measure. The Senator from Washington had told me that there was merit in the amendments proposed by the Waterman Steamship Corp., but that, unfortunately, it was a matter that should be discussed in committee, that of course it was impossible to take the matter back to the committee for further consideration, but that there would be ample opportunity for the presentation of amendments and discussion of them in the hearings to be held in the House committee.

Because of the urgency of this matter, Mr. President, I shall not press my amendments further, since the Senator from Washington has told me he did not feel it would be possible to accept the amendments here without having had some consideration of them in the committee. I believe there is merit in the amendments, and that very careful consideration ought to be given to the objective sought to be reached. As I understand the situation, it would be the intent of Congress to work out a merchant marine which might become a real and permanent part of the shipping industry, and every encouragement was sought to be given to people to buy ships in order that they might enter into that industry. As it is, a great many people are simply chartering ships and are not making headway as fast as it should be made in the purchase of ships and the setting up of a permanent and regular business. The purpose of the amendments was to lend an incentive for the purchase of ships, rather than have the business carried on merely under a temporary charter arrangement. I wish that the amendments might have been considered, but, due to the urgency of getting the law extended, I shall not insist on my amendments.

I ask, Mr. President, for unanimous consent to insert in the RECORD at this point a statement which I requested the Waterman Steamship Corp. to prepare for me in explanation of the amendments, and why they should be incorporated into the legislation.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MEMORANDUM WITH REFERENCE TO PROPOSED AMENDMENTS TO SENATE JOINT RESOLUTION 173, PARTICULARLY WITH REFERENCE TO THE EXTENSION OF THE AUTHORITY OF THE MARITIME COMMISSION TO CHARTER DRY-CARGO WAR-BUILT VESSELS

The proposed amendents to Senate Joint Resolution 173 may be considered qualifications and/or limitations to the authority of the United States Maritime Commission to charter dry-cargo war-built vessels, so that the resolution will conform more nearly with the spirit and intent of the Merchant Ship Sales Act of 1946. The "spirit and intent" of the act was in effect to dispose of Government-owned war-built vessels to American shipping companies in order to reestablish a privately owned and operated American merchant marine. The intent was not to have the Government remain in the shipping business through continuing to charter vessels to operators who did not demonstrate their intent to purchase the ships.

Section 14 of said act stipulates that no contract of sale or charter shall be made thereunder after December 31, 1947; however, the Congress subsequently and generously extended the dead line date until February 29, 1948. The proposal to further extend the Commission's chartering authority until July 1, 1949, is not within the scope of the intent of the Merchant Ship Sales Act and, if the Congress feels that the authority should be extended in view of international conditions, certain limitations and qualifications should be attached thereto in order to bring it more in line with the intent of the act. The amendments suggested propose to meet this problem.

We heartily endorse the proposal outlined in Senate Joint Resolution 173 that would deny the Maritime Commission the authority to charter or sell war-built vessels to any person not a citizen of the United States. It is felt that recent proposals to charter vessels to foreign nations would be extremely detrimental to national interests and to the American merchant marine.

We take no position with reference to section 2 of the joint resolution which would waive compliance with the navigation and vessel-inspection laws, submitted by the Coast Guard, inasmuch as our interest lies primarily in dry-cargo merchant vessels.

Senate Joint Resolution 173 provides in section 1, subsection (a), that the temporary authority of the Maritime Commission to charter war-built dry cargo vessels shall be extended from March 1, 1948, to July 1, 1949. We suggest that this latter date be changed to May 1, 1949, with the provision that all charters entered into shall terminate not later than 60 days thereafter. Without this 60-day provision, the original intent of the committee, as expressed in Senate Joint Resolution 173, would be partially nullified inasmuch as many vessels on uncompleted voyages could not possibly be returned to the Maritime Commission in less than 60 days. Therefore, the changing of this date to May 1, and the 60-day provision, will permit compliance, in fact, with the intent of Senate Joint Resolution 173, i. e., the limitation of the chartering authority to July 1, 1949.

The second suggested amendment is noted on the attached as subsection (b) of section 1

(of S. J. Res. 173). It provides that, after February 29, 1948 (the deadline set by the last Congress), vessels shall be chartered for operation in the foreign trade only to citizens who actually own and operate American-flag vessels and/or those who have made unqualified commitments on or before that date to purchase dry cargo war-built vessels from the Maritime Commission. It proposes further that the number of vessels which any citizen may charter for operation in said foreign trades shall not exceed the ratio of two chartered vessels for each vessel the charterer actually owns or had made unqualified commitments to purchase.

Since March 8, 1946, all American citizens who seriously intended to acquire modern dry cargo war-built vessels from the Government have been afforded every reasonable opportunity during this 2-year period to demonstrate their alleged sincerity of purpose by assuming the inherent risks by investing their own private funds in the purchase of such vessels as might have been required to enable them to restore their prewar services and such postwar services as they intended to operate. Every inducement was made in the Merchant Ship Sales Act of 1946 to have these war-built vessels purchased by private industry for the purpose of reestablishing the privately owned merchant marine. Some elements of the industry, recognizing the intent and purpose of the Ship Sales Act, have invested their own funds and have reestablished their prewar American-flag fleet. Other elements of the shipping industry have not felt that it would be necessary to invest their private capital in war-built vessels as long as the Maritime Commission continued to charter the vessels to them without requirements as to the necessity to purchase vessels.

Obviously, therefore, the continuation of this chartering program, without the qualifications and limitations as suggested in these amendments, is a distinct discrimination against those American-flag ship operators who have purchased vessels and have thereby attempted to abide by the word and the intent of the act to reestablish a privately owned and operated American merchant fleet.

The suggested ratio of chartering two vessels for each one owned should actually result in the enlargement of the present American-flag dry-cargo fleet now being operated in the foreign trade of the United States. This fleet presently is made up of roughly 1,650 vessels. Approximately 550 are privately owned, and about 1,100 are chartered Government-owned vessels. Therefore, on the suggested basis of "two for one," the actual number of vessels in operation will not diminish inasmuch as it can very well be assumed that all owners of private fleets will take advantage of these suggested terms.

In addition, however, there can be no question but that many of the shipping companies who have not felt it necessary to purchase vessels will invest the profits they have accumulated through the operation of chartered Government-owned vessels, through the purchase of ships from the Commission. Therefore, this amendment will without doubt assist in the carrying out of the original intent of the Merchant Ship Sales Act of 1946 and, at the same time, should actually increase, rather than decrease, the present number of American-flag dry-cargo vessels in operation.

In the domestic shipping trade, i. e., the coastal and intercoastal trade, there are no national or international problems that necessitate the continuation of the operation of Government-owned vessels via charter arrangements with the Maritime Commission. The recent increase of 20 percent in rail rates has made it possible to increase domestic shipping rates to the extent that the reasons stated in the report (No. 856) on Senate Joint Resolution 173 for the continuation of the chartering authority in the coastal and intercoastal trades are not warranted. This rate increase has now placed the domestic shipping industry in a competitive position whereby it can rehabilitate itself by the use of privately owned vessels and without the necessity of confining its operations in such trade to the use of vessels chartered from the Government at nominal or reduced rates.

Under these circumstances, an amendment has been suggested (subsection (c) of section 1) which would extend the authority of the Commission to charter vessels in the domestic trade to not later than 60 days after September 30, 1948.

Mr. SPARKMAN. Mr. President, I also ask unanimous consent to insert at this point in the RECORD a letter addressed to me by the Waterman Steamship Corp. relating to the same matter.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WATERMAN STEAMSHIP CORP.,
Mobile, Ala., February 4, 1948.

Hon. JOHN SPARKMAN,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR SPARKMAN: Confirming our conversation of yesterday morning, I am attaching hereto a brief memorandum in support of the two proposed amendments to Senate Joint Resolution 173. Further confirming our conversation, we feel that these suggested amendments, which in fact are limitations to the authority of the Maritime Commission to charter or sell war-built dry-cargo vessels, are vital if the American merchant marine is to be conducted as a private enterprise financed by private capital.

As you no doubt are well aware, the Waterman Steamship Corp. is an Alabama corporation with main offices in Mobile. We now own 55 dry-cargo war-built vessels which we have purchased from the Maritime Commission since the enactment of the Merchant Ship Sales Act of 1946, exclusively with our private funds, and in accordance with the terms of the said act. Eleven of these vessels have just recently been purchased from the Maritime Commission and will be part of our active fleet as soon as reconversion work, which we hope will be done in our yards in Mobile, has been completed.

With the addition of these 11 ships, the total dead-weight capacity of the American-flag fleet owned and operated by Waterman in domestic and foreign trades will be approximately 577,000 dead-weight tons. I am confident that Maritime Commission records will indicate that this is the largest privately owned and operated fleet under the American flag.

In addition to these privately owned vessels, we operate under charter arrangement with the Maritime Commission some 67 vessels, making a total fleet of 122 vessels, all with their home port in Mobile.

I bring these facts to your attention only to indicate to you our qualifications to speak in reference to the matters involving the American merchant marine and to indicate to you that the management of Waterman has made a concrete demonstration of their desire to comply with both the letter and the spirit of the Ship Sales Act of 1946.

Due to circumstances beyond our control, which I explained to you, we were unable to study Senate Joint Resolution 173 and to make known our views on this proposed resolution in time for proper consideration of our suggestions by the Senate Interstate and Foreign Commerce Committee. Therefore, your cooperation and interest in bringing our views to their attention and to the attention of the United States Senate before final action is obtained on Senate Joint Resolution 173, as reported by the Interstate and Foreign Commerce Committee, is deeply appreciated.

Trusting you will call on me if I can be of further service, I am,

Most cordially yours,

MARSHALL F. BANNELL,
Director, Public Relations.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

There being no objection, the Senate proceeded to consider the joint resolution (S. J. Res. 173) to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes, which had been reported from the Committee on Interstate and Foreign Commerce, with amendments.

Mr. TAFT. Mr. President, I ask that at this point in the RECORD there be inserted the report of the committee, without the accompanying letters, which I think states clearly the purpose of the proposed legislation, and to which I think there will be no objection.

There being no objection, the report of the Committee on Interstate and Foreign Commerce was ordered to be printed in the RECORD, as follows:

The Committee on Interstate and Foreign Commerce, to whom was referred the joint resolution (S. J. Res. 173) which continues until July 1, 1949, the authority of the United States Maritime Commission to sell, charter, and operate vessels and also continues the present waiver against compliance with certain navigation and vessel-inspection laws, having considered the same, report favorably thereon with amendments and recommend that it do pass, as amended.

PURPOSE OF LEGISLATION

The joint resolution would accomplish three objectives: (1) Extend until July 1, 1949, the temporary authority heretofore granted the Maritime Commission under the act of June 28, 1947 (Public Law 127, 80th Cong.), to continue to sell, charter, and operate vessels; (2) write into law the policy now followed by the Maritime Commission of not selling or chartering vessels to foreigners; (3) extend until July 1, 1949, the authority granted the United States Coast Guard under the act of March 31, 1947 (Public Law 27, 80th Cong.), to waive compliance with vessel-inspection and navigation laws for vessels under American registry. The recommended resolution has the approval of the United States Maritime Commission, the Department of State, the United States Coast Guard, labor organizations directly involved in maritime matters, and the National Federation of American Shipping. However, only the latter organization submitted its views on the committee amendment.

NEED FOR LEGISLATION

The legislation herewith reported by the committee was formally recommended by the President in a message to Congress on December 2, 1947 (H. Doc. 468, 80th Cong.). Calling attention to the fact that the authority of the Maritime Commission to sell, operate, or charter Government-owned vessels built during the war will expire on February 29, 1948, the President declared that—

"It is now clearly apparent that this authority must be continued beyond that date in order to prevent a break-down in vital shipping services."

And concluded with the statement that—

"Our most immediate need, however, is to assure the maintenance of essential shipping services by continuing in effect the present provisions of law which make possible the use of Government-owned ships."

The Department of State, in even more urgent terms, advised this committee in a letter dated January 27, 1948, that the extension was of paramount importance in carrying

out this Government repatriation program and called attention to a report of a special subcommittee of the House Foreign Affairs Committee recommending that the repatriation program not be allowed to lapse. The State Department also points out that any failure in the International Refugee Organization's basic mission to liquidate the displaced-persons problem would throw a large additional burden of maintenance cost upon United States taxpayers, estimated by the State Department as $130,000,000 annually. The text of the President's message and the State Department's letter are made a part of this report.

While the basic purpose of the resolution here recommended is contained in section 1 (a), which continues authority to carry on ship-operating functions and the sale and charter authority of the Ship Sales Act of 1946, the committee desires to call particular attention to its amendment contained in section 1 (b). The amendment, in specific terms, forbids after March 1, 1948, the sale or charter by the Maritime Commission of any United States war-built vessel to a noncitizen of the United States. The committee desires to point out that the United States Maritime Commission has followed the policy for several months of making no more sales to noncitizens, and it never has, of course, chartered any vessels to noncitizens. The committee believes the Maritime Commission is to be commended for this policy. In adopting the amendment the committee is making explicit in law what is presently implicit in administration and thereby definitely precluding shifts or changes in policy which might vitiate what it conceives to be a sound policy based on the facts available to it.

The committee believes there is no justification for the sale of war-built vessels to noncitizens after March 1, 1948. More than 950 such vessels have been sold to foreign buyers under the Merchant Ship Sales Act of 1946. These sales, coupled with the construction programs of the 16 so-called Marshall-plan nations, including vessels under construction and those for which contracts have been let, will result in merchant-fleet tonnages for these nations substantially in excess of their prewar levels. The merchant fleets of the friendly Allied Nations also will be larger than their prewar levels upon completion of their construction programs. Thus, the further sale to foreigners of American vessels would, in the committee's opinion, result in a competitive disadvantage to American-flag operators.

Data available to the committee would indicate that the total merchant-ship tonnage of the European nations which this country is aiding will in 1951 represent about 8 percent more of the world tonnage on that date than they had in 1938. Moreover, there are authoritative reports that some European nations which buy or would charter American vessels are presently busily engaged in ship-construction programs for the sole purpose of trading such new construction for other commodities necessary to their economies, meanwhile expecting to use the purchased or chartered American vessels to build up their own fleets. In effect, this is a program of using American war-built vessels to trade with nations with which we ourselves do not trade for the mutual advantage of the two participating nations but to the detriment of the United States, whose own merchant-fleet tonnage, both active and reserve might be lowered beyond safe, economic, and national-defense standards.

And while there is no authority in the Merchant Ship Sales Act to charter vessels to noncitizens and the Maritime Commission has not chartered American vessels to foreigners, the committee believes that it is desirable to make affirmatively certain that the law forbids such chartering of American vessels. It has been suggested that chartering will insure American ownership of the vessels and prevent reduction of the American merchant marine below safe limits. The committee, however, is impressed with testimony offered which indicates that chartered vessels are not always returned; for example, this country is still awaiting the return of 95 ships lend-leased to Soviet Russia when she was our ally. Moreover, American experience with chartering foreign demonstrates that the vessels returned are far from being in satisfactory condition. The cost of repairs to put them into operating condition is frequently more than the vessel is worth.

Beyond all this is the basic question of what tonnage should be retained in the American active and reserve fleets from a standpoint of national defense. The importance of a large merchant fleet to render vitally necessary auxiliary and logistical support to our military forces has been sharply demonstrated in two world wars. The report of the President's Advisory Committee on the Merchant Marine (Keller report) shows that the Navy deems as a minimum requirement a merchant fleet of 11,400,000 tons. The present privately owned American merchant marine is less than this total. This same report declares that when all Government vessels, including those now engaged in transporting relief and recovery cargoes, are returned to the reserve fleet, they will total about 2,000 vessels. Whether this number of vessels, which will have to be drawn upon from time to time to replace casualties and transport essential civilian requirements and strategic materials, is ample for the Nation's defense requirements is yet to be established. But, in the opinion of the committee, this is not the time to gamble with the future, or take a chance that we will not require a large, quickly available merchant fleet.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. SPARKMAN. I wonder if the Senator would also insert in the RECORD the very brief statement he showed me earlier in the day. I should appreciate it if he would.

Mr. TAFT. Yes. Mr. President, I ask that there be inserted in the RECORD at this point a statement, which I understand is a statement of the Maritime Commission regarding the amendments offered by the distinguished Senator from Alabama, and which merely states that while the amendments have merit they raise a controversial point, one on which hearings should be held.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Senate Joint Resolution 173, introduced by Senator TOBEY, provides for the extension of the Merchant Ship Sales Act of 1946, and the operating authority of the Maritime Commission until July 1, 1949.

The extension of such authorities is deemed essential, whether to July 1, 1949, or to such earlier date as may be deemed appropriate.

The amendment (in the nature of a substitute) proposed by Senator SPARKMAN modifies Senate Joint Resolution 173 in several material aspects. Although these proposed modifications are supported by substantial merit, they may be subject to considerable controversy. It is believed, therefore, that they should be considered separately so as not to prejudice the immediate passage of the extension of the authorities provided for in Senate Joint Resolution 173, as introduced.

Separate consideration of the proposed modifications will permit the holding of hearings and the making of unhurried conclusions which the amendments deserve. It will also make possible the opportunity to better correlate the proposals and will result in amendments which will most effectively accomplish the intended purposes to the greatest ultimate benefit of the American-owned and American-operated merchant marine.

The PRESIDING OFFICER. The clerk will report the first amendment of the Committee on Interstate and Foreign Commerce.

The CHIEF CLERK. It is proposed to insert on page 1, line 3, after the word "that", the letter "a" in parentheses.

The amendment was agreed to.

The next amendment was, on page 1, to insert a new subparagraph (b), as follows:

(b) Notwithstanding the provisions of subsection (a), no contract of sale under section 6 of the Merchant Ship Sales Act of 1946 shall be made after March 1, 1948; and nothing contained in this or any other act shall be deemed to authorize the United States Maritime Commission to charter any war-built vessel (as defined in the Merchant Ship Sales Act of 1946) to any person who is not a citizen of the United States (as defined in the Merchant Ship Sales Act of 1946).

Mr. McMAHON. Mr. President, as I understand, the committee amendment prohibits any more foreign sales after the end of the present month. Is that correct?

Mr. TAFT. It merely writes into the law the practice which has already been adopted by the Maritime Commission itself. It makes it a matter of statutory policy instead of merely a policy of the Commission.

Mr. McMAHON. Of course, the Senator is aware that in the so-called Marshall plan there is a provision for the transfer of approximately 400 vessels. I am not sure of the number, but I believe there is a provision in the plan for the transfer of such vessels. Is the Senator informed as to that?

Mr. TAFT. I am not fully informed, but of course if it were desired to make that prohibition it would supersede the present practice.

Mr. McMAHON. If the Senator is correct, the Maritime Commission has, as a matter of Commission policy, stopped some months ago foreign sales, at least to any great extent.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution (S. J. Res. 173) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That (a) section 1 of the act entitled "An act to continue temporary authority of the Maritime Commission until March 1, 1948," approved June 28, 1947 (Public Law No. 127, 80th Cong.), is amended by striking out the date "March 1, 1948" and inserting in lieu thereof the date "July 1, 1949."

(b) Notwithstanding the provisions of subsection (a), no contract of sale under section 6 of the Merchant Ship Sales Act of 1946 shall be made after March 1, 1948; and nothing contained in this or any other act shall be deemed to authorize the United States Maritime Commission to charter any war-built vessel (as defined in the Merchant Ship

Sales Act of 1946) to any person who is not a citizen of the United States (as defined in the Merchant Ship Sales Act of 1946).

SEC. 2. Section 2 of the joint resolution entitled "Joint resolution authorizing the Commandant of the United States Coast Guard to waive compliance with the navigation and vessel-inspection laws administered by the Coast Guard," approved March 31, 1947 (Public Law No. 27, 80th Cong.), as amended, is amended by striking out the date "April 1, 1948" and inserting in lieu thereof the date "July 1, 1949."

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. TAFT. Mr. President, I should like to make a 2-minute statement on the St. Lawrence seaway, if I may.

Mr. President, after full consideration of the issues involved in the St. Lawrence seaway, I have decided to vote against it at this time. So long as this country is involved in the expenditure of billions of dollars for armed forces, more likely to increase than decrease, so long as it is involved in costly aid to other countries to check the growth of communism in the world, so long as we have the tremendous obligations to our veterans of two world wars, I do not think the Federal Government should undertake any large increase in its public-works projects, unless the case in favor of proceeding is clear beyond question. Already the effort to do too many things at one time is causing hardship and inflation.

While I think the power development of the St. Lawrence is important and desirable, the greater part of the expense relates to navigation. The navigation project seems to me of questionable economic value at this time.

I also believe it is of questionable defense value. I believe our steel companies should be forced to develop the low-grade iron ores of Minnesota and not become entirely dependent on iron ore imported from other countries. I find this is the prevalent view also in northern Ohio, where so much of the steel industry is located.

Therefore, I am not willing to vote to authorize the navigation project at this time.

Mr. MORSE. Mr. President, I wish to make a brief statement in regard to one or two matters.

Before doing so, I wish to propound a parliamentary inquiry, because I am not sure that I correctly understood the Senator from Ohio, and I should like to have him give me his attention for a moment in regard to a point he made a few moments ago concerning the procedure which has to be followed under the unanimous-consent agreement in regard to the St. Lawrence seaway joint resolution.

I propound the parliamentary inquiry whether a Member of the Senate has a right to make a motion at any time to have the Senate lay aside the unfinished business, the St. Lawrence seaway joint resolution, which is now before the Senate, and take up any other measure on the calendar.

The PRESIDING OFFICER. A motion to take up any other measure is in order at any time.

Mr. MORSE. Then, if I correctly understand the ruling——

Mr. TAFT. Mr. President, as I understand the distinction, a motion is now in order to have the Senate take up any measure; but the effect of the adoption of such a motion would be to do away with the status of the St. Lawrence seaway joint resolution as the unfinished business. I suppose that under the unanimous-consent agreement that joint resolution would automatically recur as the business before the Senate on February 27.

However, until we have completed action on the St. Lawrence seaway joint resolution, I do not think we should entertain a motion which would remove the St. Lawrence seaway joint resolution from the status of the unfinished business.

So the only other recourse is a unanimous-consent agreement to set aside temporarily the unfinished business. It seems to me that a motion to set it aside is not in order.

The PRESIDING OFFICER. The Senator from Ohio has correctly stated the situation.

Mr. MORSE. That was my impression. I simply wished to make sure, because as I understood the Senator's previous remarks, it seemed to me they left the impression that such a procedure would not be in order.

I wish to say that until the debate on the St. Lawrence seaway joint resolution has in fact ended, it would certainly not be out of order, although not cricket, for any Senator to make such a motion. I have no intention of making such a motion; but when I am satisfied that every Senator has said all he wishes to say in regard to the St. Lawrence seaway measure, I intend to press for action on Calendar No. 365, House bill 3484, for reasons which I stated earlier today, for I think all of us understand that the real reason why the date February 27 was fixed under the unanimous-consent agreement, insofar as the St. Lawrence seaway joint resolution is concerned, was the fact that all of us knew there would be a considerable amount of absenteeism in the Senate between now and February 27, and both the proponents and the opponents of the St. Lawrence seaway wished to be sure of selecting a date when the maximum number of Senators would be in the Chamber when the Senate came to vote on that measure. That is one reason why I went along with the unanimous-consent proposal, quite contrary to my usual custom in regard to such matters, plus the other reasons I stated in the RECORD yesterday—the fact that the agreement gives ample time for all Members of the Senate to debate the issue, and also ample time for the country to be heard from in regard to it.

But I wish to point out this afternoon, Mr. President, that as soon as the Senator from Wisconsin [Mr. WILEY], who is the leader for the proponents, and the Senator from Massachusetts [Mr. LODGE], who is the leader for the opponents, can make clear to us that they think debate on the St. Lawrence seaway joint resolution has in fact stopped, then I think the Senate should proceed with some of these minor but controversial measures, and should do the business of the Senate which should be done between now and February 27.

That is why at a later time, when I have such a notification from the Senator from Wisconsin and the Senator from Massachusetts, I shall at least urge that some action be taken by the Senate on some minor but nevertheless controversial bills.

DR. FRANK P. GRAHAM

Mr. MORSE. Mr. President, the next thing I wish to comment on in these brief remarks is the speech made earlier this afternoon by the Senator from Texas [Mr. O'DANIEL]. I wish to refer particularly to that part of the speech in which he commented upon a man who I think is one of the greatest of living Americans.

I am sure that those who read the speech of the Senator from Texas may at least infer that Dr. Frank Graham, president of the University of North Carolina, was the subject of criticism in that speech. I do not need to say anything in defense of Dr. Graham; and the remarks I now make, Mr. President, are not in defense of him, but, rather, are in fairness to him, because I think on the same day when the CONGRESSIONAL RECORD carries the type of remarks about Dr. Graham that were included in the speech of the Senator from Texas, a statement in support of Dr. Graham's great Americanism should also appear in the CONGRESSIONAL RECORD.

I served with Dr. Graham for 2 years on the National War Labor Board, during the war. He is the personification, let me say, Mr. President, of the idealism of Americanism. I know of no living man who is more Christlike in character than the great president of the University of North Carolina, Dr. Frank Graham. He is the son of a Confederate officer, one of the great sons of the South, a man who I think must be included in any list of the 25 greatest living Americans, a man who is a great inspiration to the youth of the South—not only to the youth of the South, Mr. President, but to the entire South and to the Nation as a whole. He is a man who recognizes the liberalism of the Constitution of the United States, and who fully appreciates the significance of the freedoms of its Bill of Rights, a man who recognizes that we do not answer opposition by trying to drive it underground, a man who has appeared on the platforms of America before all types of organizations in defense of constitutional government.

Mr. President, I hope we have not reached such a point in America that when one accepts an invitation to speak before any organization, he thereby becomes an endorser of the platforms or policies or principles of that organization. The fact that Dr. Graham, as was pointed out this afternoon by the Senator from Texas, has appeared on the programs of some organizations that we know to be leftist organizations, is no reflection upon his Americanism. Mr.

President, as an American liberal I am perfectly willing to appear, at my convenience, before any leftist organization in America and defend the principles of Americanism for which I stand. I have done so on many occasions. I have done so, making perfectly clear my opposition to the principles for which those organizations stand.

Let me say, Mr. President, that in my opinion the way to meet the Communist menace is to keep that menace right out in the open, beard the Communists in their dens, so to speak, go before them and their constituencies and point out to them wherein they stand for principles that cannot be reconciled with the freedoms of our Constitution. Point out to them that the principles for which they stand constitute, in the last analysis, police-state methods, and cannot be reconciled with the individual liberty guaranties of our form of government.

Frank Graham is such a liberal fighter for American principles. I wish to say that the test is not before what audiences a man speaks, but what he says before those audiences. That is the test. I am perfectly willing to let Dr. Graham's record, as set forth in his speeches, speak for itself.

I make these remarks because I think there is a danger that from the remarks made this afternoon by the Senator from Texas about Dr. Graham, president of the University of North Carolina, some persons might draw an implication reflecting upon the patriotism of Dr. Graham. I make them with this concluding statement, Mr. President, that it is my honest opinion that a more patriotic American does not live in our country than the distinguished president of the University of North Carolina, Dr. Frank Graham.

Mr. WILEY subsequently said: Mr. President, I was greatly moved by the statement of the Senator from Oregon. I agree 100 percent with the sentiment he expressed. I do not know the doctor to whom the Senator referred, but I do know that in these fast-moving days the thing to do is not to indulge in personalities, but to argue principles, and not so to act that nefarious forces must go underground, but if we can, argue the merits. As I have said so many times on the floor of the Senate, and as I have said in relation to Europe, we Americans have a good bill of goods to sell. The question is whether we are salesmen. The thing to do is to sell the bill of goods, and the way to counteract or to provide an antidote to communism is to expose its irrationality and lack of common sense and to expose further what communism breeds and what citizens under that form of government get. The way to do that is to show the facts, and to sell our bill of goods. So I join with the Senator in what he so ably said, only wishing that I could get on my feet and express as forcefully, as dynamically, and as clearly as he did, what I think is one of the great needs of the day, that when we disagree with a person's philosophy we present our reasons for our beliefs. It was only four or five hundred years ago that the Catholics and Protestants burned each other at the stake, thinking they were doing God's will. Each group thought they were doing God's will. We in America today know that that is not God's will; it is man's blindness. So today, we must not be so cocksure that we have arrived. America is a growing nation, and that is why we are asking for the St. Lawrence seaway.

BREAKING NEW GROUND, BY GIFFORD PINCHOT—ARTICLE FROM THE INTERNATIONAL WOODWORKER

Mr. MORSE. Mr. President, I ask to have printed in the body of the RECORD, at this point, as part of my remarks, a very excellent review of Gifford Pinchot's book, Breaking New Ground, dealing with one of the great domestic problems of America, namely, the conservation problem. I ask to have the review printed in the body of the RECORD because I wish to associate my views with those expressed in the review.

There being no objection, the review was ordered to be printed in the RECORD, as follows:

[From the International Woodworker of January 21, 1948]

A BOOK TO SHOUT ABOUT

(Breaking New Ground, by Gifford Pinchot)

Here is a book to shout about. It's so worth while anyone's time reading that when you finish the last page you will want to tell the whole world about it.

The book starts with forestry, which itself is a pretty big thing, especially to woodworkers. But Pinchot's story broadens and deepens mightily as it goes along, until it becomes the best book we know on what the whole twentieth century in America is all about.

It is an especially timely book for this crucial political year of 1948, but it will remain timely for many years to come. Here is why:

The twentieth century is the century of American revolt against plutocracy, the century of struggle for the general welfare against the evils of concentrated wealth. Breaking New Ground tells what that fight is all about. It tells the story, not by theorizing, nor from library research, but by actually reporting the first-hand experiences of a man who was in the thick of the first big round of that battle, early in the century. That round, of course, was Theodore Roosevelt's Square Deal, which was to be followed, between reactionary lapses, by Woodrow Wilson's New Freedom, Franklin Roosevelt's New Deal, and—well, the people have yet to decide what and when the fourth and succeeding rounds will be. If we give Truman a good Congress to back him up in November, maybe it will be soon.

CONSERVATION IS ANTIMONOPOLY

Pinchot shows how the whole pattern and direction of the twentieth-century struggle in America was set during the Square Deal years. The crux of the whole progressive movement against concentrated wealth, Pinchot points out, is the conservation policy that was formulated and popularized, and partly put into effect, during the administration of "TR."

Pinchot makes it clear that the conservation policy was not and is not the obscure, technical, rather negative thing which some people evidently regard it to be. Instead it is a dynamic policy for the development and use of the world's resources for all the people, against the restrictive, exploitive schemes of monopoly. As such it is the most basic material problem of all.

The "TR" conservation policy laid the foundations and started many of the works of the twentieth century which have done most to provide opportunity to the common man and to raise his standard of living and better his conditions. Those works now include the Nation's great electric-power projects like Bonneville and Grand Coulee, the unified development of river basins, as in the Tennessee Valley, the mighty irrigation projects on the western deserts, rural electrification, the soil-conservation program, and the conservation and wise use of oil, coal, and mineral lands, as well as the fight to conserve and develop the forests for the public welfare against the greed and ignorance of a scheming few.

Pinchot shows clearly how the fight against monopoly is a part of the conservation policy. As he puts it, "the rights of the people to govern themselves shall not be controlled by great monopolies through their power over natural resources." That he presents as one of the three great purposes of the conservation policy. The others are (1) wise use and development; and (2) control of such use in the common interest (p. 506).

CONSERVATION SPLITS REPUBLICAN PARTY

How the fight of special privilege against the conservation policy split the Republican Party from stem to stern (leading to Woodrow Wilson's election in 1912) is part of the story. Since that split the number of progressives left in the Republican Party can very nearly be counted on the fingers of one hand, although Pinchot does not go into that. Except for world conservation policy, Pinchot's story ends right after the bumbling, reactionary President Taft (father of the present Senator) fired Pinchot for continuing to fight for the conservation policy when Taft's friend, Ballinger, as Interior Secretary, was scuttling it.

KEY TO WORLD PEACE

As regards world affairs, Pinchot shows that the conservation policy is the key to peace. And he brings that part of the story down to 1946 and the plans for a world-conservation conference to start the ball rolling. Such a conference, the book says, has been placed on the UN agenda for this year.

Pinchot comments, also, how President after President since TR has "discovered" conservation. But he makes clear that the Presidents who count are those who do something about it, rather than giving mere lip service. By that measure, of course, Franklin Roosevelt counted high. Indeed, Pinchot reports that FDR was the first President since TR who immediately grasped the significance of the conservation policy in relation to world peace. Plans for the coming UN world-conservation conference were started by Pinchot and FDR.

The first part of the book is especially interesting to a forester, but it is good reading and helpful for anyone who wants to understand what the twentieth century is all about. That is because it shows, in rewarding detail, how the conservation policy got its start in the fight for the forests. And it tells much that a woodworker as well as a forester, will be glad to know about forestry.

THE PEOPLE VERSUS PRIVILEGE

The latter part of the book tells what the conservation policy is, and the kind of opposition it met, and has met ever since. This part of the book, except for names and dates, reads just like today's news: On one hand, the same kind of clear, constructive proposals, the same honest courage on the part of men who put the public welfare first; on the other hand, the same kind of demagogery, dishonesty, evasion, and stupidity which has always characterized the spokesmen and stooges of monopoly and special privilege.

Replete with actual quotations from both sides of the controversies of the TR days,

the book does something mighty helpful for the reader: It enables him to see that there is a consistent steady direction to the drive for democratic progress in the twentieth century. If you are on the democratic side of the struggle, you will get from the book not only insight on what to do, but also a warm feeling of kinship and fellowship with some really great souls who pioneered in the same fight that woodworkers and all decent-minded people are waging today.

If you are on the reactionary side, the book should make you feel like a heel, which, of course, is the first step in reforming a reactionary.

So it is a useful and timely book. It's also good, entertaining reading. The action moves along well, except in a few spots. It is livened with many a pungent phrase, for GP was a master phrase maker.

MONOPOLY ON THE LOOSE

The whole book is worth reading, but for those who don't read whole books, at least the concluding section, What It All Means, is a must. Among other things it has pungent, honest things like these to say:

"Monopoly on the loose is a source of many of the economic, political, and social evils which affect the sons of men. Its abolition or regulation is an inseparable part of the conservation policy" (page 507).

"Concentrated wealth attributes to the prosperity and progress of the United States to what it calls free enterprise. To it free enterprise means freedom to take, keep, and control all the resources * * * and charge for them the last possible cent. * * *

"The monopolists must accustom the people to their tyranny by a constant stream of praise for great corporations and of free enterprise according to their own interpretation, as well as discrediting of liberal movements and leaders—all of which is facilitated by their ever-increasing control of the press, the radio, and other news outlets" (page 508).

"It is time for America and the world to move on from a social order in which unregulated profit is the driving force. * * * When it comes, I want it to come by development and not by revolution" (page 509).

ELLERY FOSTER,
Research Director.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. WILEY. Mr. President, we were ready to go forward today. The Senator from Illinois [Mr. LUCAS] was to have carried on. He yielded to other Senators having business to come before the Senate. I do not want the impression to go out that we are trying to delay the consummation of the argument. I have been informed by the acting majority leader that it is proposed to recess until Monday. We would be ready to carry on tomorrow; we shall be ready to carry on on Monday. I do not know what the program for Monday is, whether the St. Lawrence seaway matter has gone over until Wednesday or not. We should like to conclude the arguments on the St. Lawrence waterway, but for reasons that have been stated many, many times, we are in a sort of hiatus, with Lincoln's Birthday coming next week. I do not want it to appear for one moment that we are trying to be dilatory or following any delaying tactics.

RECESS TO MONDAY

Mr. KNOWLAND. Mr. President, I now move that the Senate recess until Monday next at noon.

The motion was agreed to; and (at 5 o'clock and 9 minutes p. m.) the Senate took a recess until Monday, February 9, 1948, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 5, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father in Heaven, as we pause in this sacred quietness, hear our supplication for divine help, that we may approach the pattern and similitude of our Redeemer's character. As each day sets its task, steady us with concentration and perseverance and hold us to the conviction that triumph or failure rests with us.

Open the fountain of Thy wisdom that we may be most seriously concerned with the welfare of our Nation, which must rest forever upon the mental, moral, and spiritual nature of our people. Give us humility, without which faith becomes presumption and hope a delusion. As we ponder the tangled problems of today, O keep us out of the easy paths of acquiescence and vouchsafe unto us the profound insight of true statesmen. Make us wise by our mistakes and stronger by every temptation overcome. Thou who art our ruler and our guide, without whom nothing is strong or enduring, hear our prayer and give us peace. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

PERMISSION TO COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS TO SIT DURING SESSION TODAY

Mr. RICH. Mr. Speaker, I ask unanimous consent that the Committee on Expenditures in the Executive Departments may sit during the session of the House today.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

THE WRIGHT BROTHERS

Mr. BURKE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BURKE. Mr. Speaker, citizens the world over in recent days have been paying tribute to the genius of the late Orville Wright, who, through the invention of the airplane with his brother, Wilbur, made the name of Wright one of international fame.

On the North Carolina coast nearly 45 years ago, the Wright brothers negotiated the first successful flight with a heavier-than-air machine. No one, even today, can truly evaluate and estimate the importance of this achievement. Nevertheless, as coinventor of the airplane, Orville Wright did have the opportunity, unlike his brother, to witness and harvest some of the fruits of the combined efforts of their revolutionary development.

The story of the development of modern-day aviation started from a mere toy which was brought home to the Wright brothers by their father, Bishop Martin Wright. Fired by the enthusiasm of this toy helicopter, their imagination and capabilities took on such tangible form that today great distances have largely been nullified. As a result of this inventive skill, we find it necessary to adjust our thinking and actions to meet the resulting changes.

I should like to insert into the RECORD a copy of an editorial which appeared in the Dayton (Ohio) Herald on Saturday, January 31. It takes note not only of his international fame, but also of his value to the community.

ORVILLE WRIGHT

The world knew and honored Orville Wright as the coinventor of the airplane, as the man who with his brother brought to realization the age-old dream of mankind to conquer the air.

But Dayton knew, honored, and loved Orville Wright because he was Orville Wright, because he was the son of his reverend father, and the brother of his equally famed, honored, and beloved brother.

Dayton knew, honored, and loved Orville Wright because he was such a good citizen, all round. Great fame, we are convinced, never rested so lightly upon anyone. He was such a modest man, so unassuming, so friendly.

He has been an institution here in Dayton for so long that it is hard to believe that he is gone, hard to believe that no more shall we see him at public gatherings sitting quietly well out of the limelight. He shunned all personal prominence as if it were positively painful, yet that trait never prevented him from putting his shoulder to the wheel whenever community or country called.

The tale of his achievements is told elsewhere in the Herald. There is no need of reciting it again here. That story in its broader outlines is well known to every Daytonian as, indeed, it is to almost everyone in the civilized world.

It is an inspiring story, a story of the surmounting of difficulties which seemed really unsurmountable, until the Wrights, Wilbur and Orville, came along. No more illuminating commentary can be made on their accomplishment than to point out that, when at last they succeeded and made their machine actually fly, people generally simply wouldn't believe.

The thing was too astounding! Why, here in Dayton, their home, people wouldn't believe. And the Dayton newspapers, this Dayton newspaper is sorry to have to admit, didn't even cover the story—certainly in its wonder and in its consequences one of the greatest stories ever to break.

Orville Wright is no more, but his memory will endure while civilization survives.

ADJOURNMENT TO MONDAY NEXT

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next at noon.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ADJOURNMENT FROM MONDAY UNTIL THURSDAY

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday next it adjourn to meet on Thursday following at noon.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

EXTENSION OF REMARKS

Mr. MUHLENBERG and Mr. DAVIS of Wisconsin asked and were given permission to extend their remarks in the RECORD and include an article.

Mr. DAGUE asked and was given permission to extend his remarks in the RECORD and include a letter in support of the fine record of Dr. S. H. Scott, a resident of his district.

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD in two instances and in each to include an article.

DOES RUSSIA REALLY OPPOSE MARSHALL PLAN?

Mr. ELLIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. ELLIS. Mr. Speaker, does Russia really oppose the Marshall plan is a question that is causing much speculation today.

It is refreshing to find a Member of the other body courageous enough to challenge the administration's position that Russia, in her fight on democracy, is opposing the Marshall plan. The facts, I am sure, will sustain the distinguished Senator from Indiana when he says, as quoted in the press:

Reds fight Marshall plan in ruse to aid it. Russia thus can continue to take reparation out of Europe.

And he continues:

Stalin is cagily pretending to oppose the Marshall plan—just to make sure the United States approves it.

And, to quote again, he said:

We are playing the sucker to Stalin's devious oriental mind. This is a colossal game of put and take; Russia can continue to take reparation out of Europe only so long as we continue to put it in.

The Senator is correct.

You will recall, during the debate on the European interim aid bill last December, the communistic strikes were in progress in Italy and in France. As the day of voting in the Congress approached, the strikes developed into riots and general disorder. This was perfect timing on the part of Stalin, and no doubt its effect was reflected in the support the measure received.

Yes, the Senator is correct when he says: "Stalin is aiding in the Marshall plan by opposing it, which he well knows will provide a basis for the desired propaganda."

The objective of the cold war has been evident for weeks. Russia has demanded $10,000,000,000 reparation from Germany, knowing full well that Germany cannot pay one dime. His plan is to receive the reparation in American dollars and the prospects appear to be good, if the administration has its way.

Yes, truly, the communistic bear is feeding on American dollars and is playing Uncle Sam for a sucker.

Another interesting bit of news is that 29 students just in from Europe touring America express surprise at the prevalence of war talk in the United States. Is the administration becoming trigger-happy in its mad fight for European aid?

DON'T QUIT

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, as I was coming over here to attend the session of the House today I was asked, "Where are you going to get the money?" I do not want to make America weak by assuming the burdens of the world and I do ask the question, "Where are you going to get the money?" to finance all Europe and the world.

Mr. Speaker, I hold in my hand a little poem that was given me this morning entitled "Don't Quit," which I think is rather pertinent at this time. It reads:

DON'T QUIT

When things go wrong, as they sometimes will,
When the road you're trudging seems all uphill,
When funds are low and debts are high,
And you want to smile, but you have to sigh,
When care is pressing you down a bit,
Rest if you must, but don't you quit.
Life is queer with its twists and turns,
As everyone of us sometimes learns,
And many a failure turns about,
When he might have won had he stuck it out;
Don't give up, though the pace seems slow—
You may succeed with another blow.
Often the goal is nearer than
It seems to a faint and faltering man.
Often the struggler has given up
When he might have captured the victor's cup.
And learned too late, when the night slipped down
How close he was to the golden crown.
Success is failure turned inside out—
The silver tint of the clouds of doubt.
And you can never tell how close you are,
It may be near when it seems afar;
So stick to the fight when you're hardest hit—
It's when things seem worst that you mustn't quit.

—*Selected.*

Mr. Speaker, I do not want to make America weak by financing the other nations of the world.

Do not give up the ship. Let us not make America weak by trying to remedy the troubles of the peoples of all the world.

Do not quit.

EXTENSION OF REMARKS

Mr. LARCADE asked and was given permission to extend his remarks in the RECORD in two instances and include in each newspaper articles.

Mr. BOGGS of Louisiana asked and was given permission to extend his remarks in the RECORD and include an address he delivered before the Mississippi Valley Association in St. Louis.

Mr. DONDERO asked and was given permission to extend his remarks in the RECORD and include cryptic endorsements that Lincoln made on the backs of some of the letters he received while President of the United States.

SKILLED STENOGRAPHER AVAILABLE

Mr. BUCK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BUCK. Mr. Speaker, skilled stenographers who attend to business and use their heads are rare jewels. Such a young woman is now at work in my office but is surplus solely by reason of the return of a former employee. I will be glad to furnish the full particulars to any Member interested.

SOCIAL-SECURITY COVERAGE

Mr. ALLEN of Illinois, from the Committee on Rules, reported the following privileged resolution (H. Res. 458, Rept. No. 1343), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H. J. Res. 296) to maintain the status quo in respect of certain employment taxes and social-security benefits pending action by Congress on extended social-security coverage, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the joint resolution, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the joint resolution shall be considered as having been read for amendment. No amendment shall be in order to said joint resolution except amendments offered by direction of the Committee on Ways and Means, and said amendments shall be in order, any rule of the House to the contrary notwithstanding. Amendments offered by direction of the Committee on Ways and Means may be offered to any section of the joint resolution at the conclusion of the general debate, but said amendments shall not be subject to amendment. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion, except one motion to recommit.

REGIONAL AGRICULTURAL CREDIT CORPORATION

Mr. ALLEN of Illinois, from the Committee on Rules, reported the following privileged resolution (H. Res. 459, Rept. No. 1344), which was referred to the

House Calendar and ordered to be printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of House Joint Resolution 275, to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to fur farmers, and for other purposes, and all points of order against said joint resolution are hereby waived. That after general debate, which shall be confined to the joint resolution and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the joint resolution shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

COMMEMORATION OF THE FIFTIETH ANNIVERSARY OF THE VICTORY OVER SPAIN

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent for the immediate consideration of House Concurrent Resolution 140.

The Clerk read the title of the concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. RANKIN. Mr. Speaker, reserving the right to object, will the gentleman please explain what this measure is?

Mr. VAN ZANDT. Under House Concurrent Resolution 108 there was created a joint congressional committee for the purpose of perfecting arrangements to observe the fiftieth anniversary of the American and Cuban victories in the war with Spain. The joint congressional committee has submitted its report to the Congress, recommending a program of observance, and we now ask that the authority of the committee be continued for a period 30 days after April 19, the date of a joint session of the Congress of the United States to observe the victory over Spain. For the information of the Members of the House I am inserting at this point the report of the Joint Committee on the Observance and Celebration in Cuba of the Fiftieth Anniversary of American and Cuban Victories in the War With Spain, created by House Concurrent Resolution 108:

REPORT OF THE JOINT COMMITTEE ON THE OBSERVANCE AND CELEBRATION IN CUBA OF THE FIFTIETH ANNIVERSARY OF AMERICAN AND CUBAN VICTORIES IN THE WAR WITH SPAIN

To the Congress of the United States:

The Joint Committee on the Observance and Celebration in Cuba of the Fiftieth Anniversary of American and Cuban Victories in the War with Spain, created by House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, submits the following report pursuant to section 2 (b) of said resolution:

In the discharge of its duties under House Concurrent Resolution 108, your committee has considered various plans for the observance contemplated by the resolution, and has had the active cooperation of representatives of the Cuban Embassy in Washington. After discussion of all plans your committee has unanimously agreed upon the following recommendations:

(a) In connection with the observance of the fiftieth anniversary of the sinking of the United States battleship *Maine* in Habana Harbor, it is recommended that a delegation be appointed to be composed of two Members of the Senate to be appointed by the President of the Senate, two Members of the House to be appointed by the Speaker, and two representatives of the United Spanish War Veterans, consisting of the commander in chief and one other member of that organization to attend the ceremony that will be held in Habana, Cuba, on Sunday, February 15, 1948. This action was approved after it was indicated by a spokesman for the Cuban Embassy that the Cuban Government would formally invite the delegation, through diplomatic channels, within the next few days. Expenses in connection with the visit of the delegation to Cuba are to be paid from the moneys authorized by House Concurrent Resolution 108.

(b) It is recommended that a joint session of the Congress of the United States be called for Monday, April 19, 1948, at which time the President of the United States will address the joint session. The President has already agreed to such action. In Habana, Cuba, on the same date, a joint session of the Cuban Legislature will be held, with the President of Cuba addressing the joint session. National and international broadcasting companies have indicated their willingness to cover these two joint sessions.

(c) While your committee is submitting this report not later than February 2, 1948, as provided in House Concurrent Resolution 108, it is recommended that the committee, together with its authority and authorized moneys, should be continued for a period of 30 days after April 19, 1948.

The necessary resolutions to carry out the foregoing recommendations will be submitted contemporaneously with this report.

Mr. RANKIN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There being no objection, the Clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by striking out the last sentence of section 2 (b) and inserting in lieu thereof the following: "The committee shall cease to exist upon the expiration of 30 days after April 19, 1948."

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMEMORATION OF THE FIFTIETH ANNIVERSARY OF THE VICTORY OVER SPAIN

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent for the immediate consideration of House Concurrent Resolution 139.

The Clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That in commemoration of the fiftieth anniversary of the victory over Spain, resulting in the liberation of Cuba, the two Houses of Congress shall assemble in the Hall of the House of Representatives at 1 o'clock in the afternoon, on Monday, April 19, 1948.

That the joint committee created by House Concurrent Resolution 108, Eightieth Congress, is empowered to make suitable arrangements for fitting and proper exercises for the joint session of Congress herein authorized.

That invitations to attend the exercises be extended to the President of the United States and the members of his Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, the diplomatic corps (through the Secretary of State), the General of the Armies, the Chief of Staff to the Commander in Chief, the Chief of Staff, United States Army, the Chief of Naval Operations, the Chief of Staff, United States Air Force, the Commandant of the Marine Corps, and the Commandant of the Coast Guard, and such other persons as the joint committee shall deem proper.

That the President of the United States is hereby invited to address the American people at the joint session of the Congress in commemoration of the fiftieth anniversary of the victory over Spain.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VAN ZANDT:

Page 1, line 3, strike out "the victory over Spain, resulting in."

Page 2, line 13, strike out "victory over Spain" and insert "liberation of Cuba."

The amendment was agreed to.

The concurrent resolution was agreed to.

The title was amended so as to read: "Providing for a joint session of the two Houses on Monday, April 19, 1948, in commemoration of the fiftieth anniversary of the liberation of Cuba."

A motion to reconsider was laid on the table.

PALESTINE

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include a portion of a Kiplinger letter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, it has been brought to my attention that a portion of the Kiplinger letter of January 31 reads as follows:

PALESTINE

The partition endangers oil. Army and Navy are worried. They fear Arabs may cut pipe lines, or Jews may do it and blame Arabs. So, United States has sent into the Middle East 200 specially trained officers to woo the Arabs, and to try to keep Russia from getting the Arab oil.

By summer, 40,000 United States troops in Palestine; that is the prospect. Also same number of Russian troops, to enforce partition at UN request. Arabs do not like the United States, for this country forced partition through UN.

Palestine will become increasingly a danger spot.

Mr. Speaker, I think that such statements as this in a letter which has as wide a distribution as the Kiplinger letter are inflammatory and absolutely not based upon the facts of the case. They stem either from the standpoint of creating propaganda or from a lack of knowledge of the provisions of the United Nations Charter.

COMMITTEE ON THE JUDICIARY

Mr. MICHENER. Mr. Speaker, the bill (H. R. 2948) to regulate and control the operation of foreign agencies acting within the United States or its Territories or dependencies was referred to the Committee on the Judiciary. Bills dealing with the same subject matter have been referred to the Committee on Un-American Activities. I have conferred with the author of H. R. 2948 and with the acting chairman of the Committee on Un-American Activities, and it is agreeable to them that I submit this request. I therefore ask unanimous consent that the bill, H. R. 2948 be rereferred to the Committee on Un-American Activities, and that the Committee on the Judiciary be discharged from the further consideration of this bill.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MILK SHORTAGE

Mr. POAGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, this morning's paper carries a front-page article quoting the Department of Agriculture to the effect that there will be an increasing shortage of milk during the coming year. In fact, it is now stated that the shortage of milk will be more serious than the expected shortage of meat.

The milk we do have can go either into bottles or into butter. Fresh milk in bottles brings a better return to the farmer and brings far more food to consumers than milk which is diverted into butter. The less butter we produce the more fluid milk we will have.

Coffee and cokes make a poor substitute for fresh milk for our babies, but most grown-ups could get along very well with less butter and more margarine. If we sincerely want to make our food supplies go further, if we want our dairy farmers to enjoy a higher income, and if, at the same time, we want to reduce the cost of living, let us hasten to repeal the discriminatory laws against the production of pure, healthful margarine.

BYPRODUCTS OF MILK

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, we have been listening to this kind of counsel for long years. As I told you the day before yesterday, the more oleo you buy the less milk your babies will have to drink. The reason we are having a reduction in milk products is due to the practices of the present administration. Any time they want to support the byproducts according to the Steagall amendment butter prices will come down.

If the administration will not even announce the support price for milk and will not support the price of dairy byproducts, they must assume the responsibility for prices, whether high or low. The administration has the power, authority, and money to control prices any time it wishes to assume the responsibility of doing something about them. You can take 10 cents off the price of butter tomorrow if this administration will give Steagall support on the byproducts. When the gentleman from Texas or anyone else tells you what is in a hundred pounds of milk, I will just say to you, and ask any scientist to refute it, that there is nothing in a hundred pounds of milk that is not in five pounds of butter and the 8 ounces of dried skimmed milk that is obtained from that hundred pounds of milk.

The more we talk about oleo the less cattle we will have and the less milk we will have. The more oleo we have the less cattle in the United States and less meat will be available to the consumers. We are on the road to lower milk production now. The reign of Luckman will cost the consumers of this Nation millions of dollars.

More oleo, less milk; more oleo, less beef and veal; more oleo, less fertile soil. Remember you cannot make oleo without dairy products.

OLEOMARGARINE VERSUS BUTTER

Mr. RIVERS. Mr. Speaker, I ask unanimous censent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, my friend, the foster mother of the American people neglected to tell you that while he embraces the philosophy of cutting down on the taxes of the people of this Nation, he favors keeping a duty and tribute imposed on the housewives of this Nation.

I want to call to his attention the fact that oleomargarine does not give you tuberculosis; it does not give you brucellosis; it does not give you Bang's disease, or undulant fever, and what not. When you take my cottonseed meal and take it up yonder to your country; when you take my soybean meal up to your country, and take my peanut oil away from my people to sell it back to them in the form of Bang's disease, we are not for it—we are against it. You cannot get away from it. Republican housewives of this Nation eat oleomargarine, too. All the people who consume oleo are not Democrats only; you are going to repeal this tax, whether you like it or not. We are going to make you repeal it. Whether you sign my discharge petition No. 12, you are going to repeal it. You cannot get away from it. You can sit down here for the rest of your lives and shed crocodile tears about the butter industry, but this tax must go. It will disappear before the Eightieth Congress is history.

EXTENSION OF REMARKS

Mr. MACKINNON asked and was given permission to extend his remarks in the RECORD and include extraneous material.

OLEOMARGARINE VERSUS BUTTER

Mr. HILL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, I am surprised at some of the gentlemen on the Committee on Agriculture who do not know what is the matter with milk. I will tell you frankly, on my desk in my office yesterday there was a letter from some farm folks that I know quite well. They tell us that the farmers all around them are disposing of their dairy cows. they cannot afford to buy this high priced dairy feed and sell their milk at present prices. I might also add to the gentleman from South Carolina, who throws the burden on us for the repeal of the oleo tax, that his party had control of the House up to the 1st of January 1946, if my memory serves me correctly. Why did he not do something about it under the Democratic administration?

Mr. POAGE. Mr. Speaker, will the gentleman yield?

Mr. HILL. I am glad to yield at any time to the gentleman from Texas.

Mr. POAGE. Does not the farmer get more for milk that he sells as fluid milk than for milk that he sells in the form of butter?

Mr. HILL. May I say to the gentleman from Texas that he could not make a pound of oleo unless he used milk with it. It is a part of it despite all that he says.

Mr. POAGE. Will the gentleman answer my question?

THE LATE MOHANDAS K. GANDHI

Mr. MORRIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MORRIS. Mr. Speaker, immediately upon learning of the death by assassination of Mohandas K. Gandhi, I wrote down my reaction, which I would like to suggest to the House at this time. My judgment is that Gandhi will go down in history as the man of the century. Why? Because of all the public leaders of this day, he was the best and nearest prototype of Christ of any man who has lived on earth ir. this century. He not only committed the Golden Rule to memory, but committed it to life as suggested by the poet. He actually gave his life in behalf of peace. I wish we had more leaders in the world today like the fallen hero of mankind, Gandhi, the little Indian.

THE FUEL OIL SITUATION

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, let me say to the gentleman from Massachusetts [Mr. HESELTON] and all the other representatives of the people who are shivering with cold in that section of the country that I have found the solution of your problem.

You secede from the Union and get in under the Marshall plan. Then, you can get all the fuel you need and will not have to pay for it, nor will you have to pay the taxes to raise the money which the Government would lose on it.

I promise you now that if you decide to take such a step we Confederates will not whip you back into the Union again—at least until the weather warms up.

Mr. MILLER of Nebraska. Mr. Speaker, will the gentleman yield?

The SPEAKER. The time of the gentleman from Mississippi has expired.

NAILING A LIE ON PALESTINE

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. CELLER]?

There was no objection.

Mr. CELLER. Mr. Speaker, I listened with interest to the statement of the gentleman from California [Mr. HOLIFIELD] countering to the sly propaganda that appears in the Kiplinger letter wherein Kiplinger says "by summer 40,000 United States troops in Palestine. That is the prospect. Also the same number of Russian troops."

There is no desire by responsible people, Jews or non-Jews, to place United States troops or Russian troops into Palestine. The Jews in Palestine, if properly armed, can take care of their own. They need no outside assistance, if properly supplied with arms. They can adequately handle the situation with arms assured them and if Moslems from neighboring lands are kept out. The United Nations Palestine Commission has recommended an international constabulary. They do not mention Russian troops; they do not mention United States troops. There are plenty of historical precedents for the sending of contingents of volunteers from the smaller nations, and the smaller nations have already indicated their wish and their desire to send contingents of volunteer troops to Palestine to form an international constabulary if that be necessary.

This man, Kiplinger, has no right to grasp will-o'-the-wisp opinions from irresponsible sources. His statement is a sly, mean, and contemptible canard.

The SPEAKER. The time of the gentleman from New York has expired.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that, after the other business on the Speaker's desk and any other special orders today, I may address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. HESELTON]?

There was no objection.

THE FUEL OIL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I can assure you, speaking individually, that I am deeply grateful for the suggestions that are made, but I am more grateful for the interest that is obviously taken in the difficulties we are having in our section of the country, in the Northeast, by our friends from the Southern States. I tried to express that gratitude in the RECORD yesterday to all of you, particularly to the former Speaker, who used his influence in trying to help us on one phase of this problem.

I am not prepared to accept the suggestion of secession at the moment, but I am afraid some of our people may be prepared to take drastic action if something constructive is not done soon.

I suggested yesterday that whenever and wherever there has been a tragedy in another part of the country the people of the Northeast have been quick to respond. If, as the result of a tornado, an explosion, or a flood, people were without food, clothing, medicine, or shelter, every instinct of the people of the North prompted immediate remedial action. I am sure you will understand why they are becoming a bit more than impatient when, having been without necessary fuel, their health and comfort have been endangered, and their work has been threatened, and it seems to take such a long time to obtain any effective response. Please understand that there is no disposition to blame the people of other sections of the country. We do not need and do not ask for charity. We do ask for better judgment and the exercise of common sense on the part of those having the power to see that the situation is relieved in the Northeast.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. RANKIN. The point I was bringing out was that the oil that ought to go to New England was being shipped abroad.

Mr. HESELTON. I may say to the gentleman from Mississippi that again this morning the Committee on Interstate and Foreign Commerce addressed itself to that very vital problem. As a result of this hearing I am hopeful that a resolution will be brought to the floor.

I want to say also that I am having prepared three additional different kinds of embargo resolutions. There are two pending already, which I submitted for consideration. The other three will set various periods of time, one 15 days, one 30 days, and one 60 days. It is my hope that we can present to the House a considered, reasoned, and a sound method of trying to retain in this country for the period of time which the Interstate and Foreign Commerce Committee recommends, sufficient of our domestic fuel to get us over this particular crisis.

You will recall that that committee has expressed repeated concern as to the effect of continued exports of petroleum and petroleum products without the guarantee of the most careful kind of screening and that in its report filed only a week ago, it stated that—

> The existing and threatened situation is now so grave that exports should be stopped completely until it can be determined whether further exports are damaging to the economy of this country.

I have been seriously concerned as to the effectiveness of the procedure under which the requests made for exports are examined. I think the fact that the export allocation to Japan and the Ryukus is reported to have been cut back from 2,470,000 barrels of petroleum products to 100,000 barrels is convincing evidence that the original allocation could not have been based upon anything remotely resembling a careful examination of the request. Rather, it seems to me to be the best possible illustration of the unfortunate fact that in certain responsible quarters the admitted needs of our domestic economy has carried little, if any, weight in arriving at these determinations.

You will note that I have chosen three relatively short periods during which such an embargo would be effective. Personally, I think much can be said for the selection of the 60-day period. While it may be argued that it is too long, I think we must recognize that this will be the most critical period for most of the northern sections of the country and that if we can somehow manage to divert these amounts of heating and fuel oils to those areas, it is just possible that we can avoid more serious consequences. It also seems to me to be self-evident that no one is prepared to tell any of us what the stock piles are in any of these countries. Consequently, I do not see how it can be stated with any assurance by anyone that such an admittedly drastic step, which certainly will help to relieve conditions here, would necessarily make conditions elsewhere any worse than they are within the borders of this country.

Since I understand it is not possible to file the resolutions until Monday and because I want the text before the committee during these hearings, as well as available to all of the Members of the House, I am including the text of the first resolution. The only change in the other two resolutions will be the substitution of the periods—of 30 and 60 days, respectively.

Joint resolution to temporarily prohibit the exportation of petroleum and petroleum products

Whereas there are current and anticipated shortages in the United States of petroleum and petroleum products essential to satisfy fuel needs; and

Whereas while such shortages continue, the health, safety, and welfare of the American people are threatened and industry is severely handicapped in the effort to attain production of commodities necessary (1) to the economic welfare of the United States, and (2) to insure the success of such program as may be adopted for aiding in the economic recovery of Europe; and

Whereas the Committee on Interstate and Foreign Commerce of the House has been conducting a study of this problem, and, in its preliminary report to the House on January 26, 1948, stated that the existing and

threatened situation "is now so grave that exports should be stopped completely until it can be determined whether further exports are damaging to the economy of this country": Therefore be it

Resolved, etc., That during the period of 15 days beginning with the day after the date of the enactment of this joint resolution, and notwithstanding commitments heretofore made, it shall be unlawful to export petroleum or petroleum products from the United States to any foreign country.

SEC. 2. Whoever violates the provisions of the first section of this joint resolution shall, upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both such fine and imprisonment.

SEC. 3. As used in this joint resolution the term "United States" includes the Territories and possessions of the United States.

EXTENSION OF REMARKS

Mr. JAVITS asked and was given permission to extend his own remarks in the Appendix of the RECORD and include two resolutions.

Mr. LODGE (at the request of Mr. JAVITS) was given permission to extend his remarks in the RECORD by including an article.

Mr. POULSON asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. COLE of New York asked and was given permission to extend his own remarks in the Appendix of the RECORD and include a letter.

Mr. COLE of New York. Mr. Speaker, last Monday I received permission to have inserted in the RECORD an address by David E. Lilienthal on the subject of atomic energy. I am advised by the Public Printer that this matter exceeds the limit established by the Joint Committee on Printing and will cost $213. I renew my request.

The SPEAKER. Notwithstanding the cost, without objection, the extension may be made.

There was no objection.

Mrs. NORTON asked and was given permission to extend her remarks in the Appendix of the RECORD and include an article by Marquis Childs.

Mr. DAVIS of Georgia asked and was given permission to extend his remarks in the RECORD and include a speech delivered in New York City on January 30 by the national commander of the American Legion.

Mr. MILLER of California asked and was given permission to extend his remarks in the Appendix of the RECORD and to include the proceedings honoring General Marshall, Chief Justice Gibson, and Dr. Robert Gordon Sproul.

FOREIGN-HELD ASSETS IN THE UNITED STATES

Mr. KEATING. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEATING. Mr. Speaker, the National Advisory Council, the administration's spokesman on international financial problems, whose president is the Secretary of the Treasury, and whose members include the Secretaries of State, Treasury, and Commerce, and the chairman of the Federal Reserve Board, and the Export-Import Bank has disclosed to the country that the assets held by foreign nationals in this country amount to $4,300,000,000.

Admittedly, the Council cannot vouchsafe the accuracy of this figure. This disclosure, however, long rumored to be a fact, makes it clear that assets in considerable quantity are now held in this country belonging to nationals of those nations which seek our financial and material assistance.

Insofar as the Council fosters a plan to assist the European nations to locate assets of their nationals in this country, it deserves our endorsement. It is all right so far as it goes. The first step is, as I pointed out during the debate on the interim-aid bill, to insist that the foreign nations request information from this country and that we furnish them the data as to the identity of each of their nationals holding assets in the United States, together with the character, location, and value, if determinable, of such assets.

The Washington Post, an ardent supporter of the European-recovery program, states in an editorial this morning:

> American taxpayers are being asked to make large contributions to European recovery. Consequently, it seems only fair to assist the efforts of foreign governments to obtain control of dollars concealed by their own people in defiance of the laws of their several countries—dollars that can, to a limited extent, relieve the burden imposed on the American people.

Certainly there can be no possible quarrel with this step. It is one which should have been taken long since.

But we must, in my judgment, go further. Negotiations must be entered into between the United States and the governments concerned to establish satisfactory conditions, guaranteeing that these assets either may be held by the United States as security against Export-Import Bank loans or any governmental credits from the United States to such countries, or may be made available as security against loans from the International Bank for Reconstruction and Development under conditions agreed to by our Government. Nothing less than this, Mr. Speaker, will be the discharge of our obligation to the people of our own country, upon whose pay envelopes we must levy a deduction to implement any relief and reconstruction program.

Secretary Snyder and the Council oppose the forced liquidation of these foreign-held assets as a condition to receiving aid on the ground that this would further aggravate the monetary difficulties of the foreign countries and would deprive them of dollars and dollar earnings at the very time when we are being asked to grant dollars and dollar credits to them. There may be some merit to this contention.

It does not, however, answer the argument which I made on the floor of this House on December 11 that these extensive assets of foreign nationals, who seek to benefit under a program of aid from this country, should be pledged as security for our advances. If it becomes necessary over a period of time to liquidate those assets in a systematic fashion and apply the proceeds to the advances we have made, that action need not disrupt the monetary systems of the foreign countries or have any other adverse effect, except upon those foreign nationals who have left their own countries, to which they owe first allegiance, and have brought with them to this country their extensive assets, which should be the first source of aid to their own countries before American taxpayers are called upon to make their contribution.

From the chairman and members of the Committee on Foreign Affairs in their detailed study of this great problem with its complex ramifications I beseech a sympathetic consideration for the inclusion of protective provisions which will insure that the burden of foreign aid be not shifted from the banks and brokerage accounts of the foreign wealthy to the pocketbooks of the American poor—a result which will surely follow unless some such plan as I have advocated is adopted.

POSTAGE ON FOREIGN RELIEF PACKAGES

Mr. BLATNIK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. BLATNIK. Mr. Speaker, I rise to take issue with the report of the special subcommittee of the House Committee on Foreign Affairs relating to voluntary foreign aid, and to question its conclusion pertaining to Federal subsidies for individual parcel-post packages mailed overseas.

In this report, the subcommittee has asserted that it is actually less expensive for the Government to purchase and transport foreign aid than it would be to subsidize postal rates on relief packages which have been purchased by individual citizens. It is difficult to understand why transportation on private relief is more costly than the purchase price plus transportation costs on Government relief.

On Tuesday of this week, the distinguished gentleman from New York [Mr. KEATING] answered this criticism of voluntary foreign aid very ably, and I most certainly concur in everything he has said.

Last December 15, 1947, I introduced H. R. 4740, which would substantially reduce the postage for overseas shipment of private relief packages. The gentleman from New York [Mr. KEATING], the gentleman from Michigan [Mr. SADOWSKI], and several other colleagues have introduced bills providing for some such assistance.

It seems to me that it is the responsibility of the Committee on Post Office and Civil Service to study this question, and render a report, instead of the subcommittee on Foreign Affairs, and I am happy to have learned just a short time ago that the Committee on Post Office and Civil Service will consider these bills and is holding hearings beginning tomorrow morning, Friday, February 6. I hope that a favorable report on voluntary foreign aid will soon be forthcoming.

EXTENSION OF REMARKS

Mr. WALTER asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial from the Washington Star.

Mr. MANSFIELD asked and was given permission to extend his remarks in the Appendix of the RECORD and include a speech by Franklin D. Roosevelt, Jr.

Mr. MASON asked and was given permission to extend his remarks in the RECORD and include an article by David Lawrence.

ARMED SERVICES PROCUREMENT ACT OF 1947

Mr. ANDERSON of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 1366) to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes, with Senate amendment thereto and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert "That this act may be cited as the 'Armed Services Procurement Act of 1947.'

"SEC. 2. (a) The provisions of this act shall be applicable to all purchases and contracts for supplies or services made by the Department of the Army, the Department of the Navy, the Department of the Air Force, the United States Coast Guard, and the National Advisory Committee for Aeronautics (each being hereinafter called the agency), for the use of any such agency or otherwise, and to be paid for from appropriated funds.

"(b) It is the declared policy of the Congress that a fair proportion of the total purchases and contracts for supplies and services for the Government shall be placed with small business concerns. Whenever it is proposed to make a contract or purchase in excess of $10,000 by negotiation and without advertising, pursuant to the authority of paragraph (7) or (8) of section 2 (c) of this act, suitable advance publicity, as determined by the agency head with due regard to the type of supplies involved and other relevant considerations, shall be given for a period of at least 15 days, wherever practicable, as determined by the agency head.

"(c) All purchases and contracts for supplies and services shall be made by advertising, as provided in section 3, except that such purchases and contracts may be negotiated by the agency head without advertising if—

"(1) determined to be necessary in the public interest during the period of a national emergency declared by the President or by the Congress;

"(2) the public exigency will not admit of the delay incident to advertising;

"(3) the aggregate amount involved does not exceed $1,000;

"(4) for personal or professional services;

"(5) for any service to be rendered by any university, college, or other educational institution;

"(6) the supplies or services are to be procured and used outside the limits of the United States and its possessions;

"(7) for medicines or medical supplies;

"(8) for supplies purchased for authorized resale;

"(9) for perishable subsistence supplies;

"(10) for supplies or services for which it is impracticable to secure competition;

"(11) the agency head determines that the purchase or contract is for experimental, developmental, or research work, or for the manufacture or furnishing of supplies for experimentation, development, research, or test: *Provided*, That beginning 6 months after the effective date of this act and at the end of each 6-month period thereafter, there shall be furnished to the Congress a report setting forth the name of each contractor with whom a contract has been entered into pursuant to this subsection (11) since the date of the last such report, the amount of the contract, and, with due consideration given to the national security, a description of the work required to be performed thereunder;

"(12) for supplies or services as to which the agency head determines that the character, ingredients, or components thereof are such that the purchase or contract should not be publicly disclosed;

"(13) for equipment which the agency head determines to be technical equipment, and as to which he determines that the procurement thereof without advertising is necessary in order to assure standardization of equipment and interchangeability of parts and that such standardization and interchangeability is necessary in the public interest;

"(14) for supplies of a technical or specialized nature requiring a substantial initial investment or an extended period of preparation for manufacture, as determined by the agency head, when he determines that advertising and competitive bidding may require duplication of investment or preparation already made, or will unduly delay procurement of such supplies;

"(15) for supplies or services as to which the agency head determines that the bid prices after advertising therefor are not reasonable or have not been independently arrived at in open competition: *Provided*, That no negotiated purchase or contract may be entered into under this paragraph after the rejection of all bids received unless (A) notification of the intention to negotiate and reasonable opportunity to negotiate shall have been given by the agency head to each responsible bidder, (B) the negotiated price is lower than the lowest rejected bid price of a responsible bidder, as determined by the agency head, and (C) such negotiated price is the lowest negotiated price offered by any responsible supplier;

"(16) the agency head determines that it is in the interest of the national defense that any plant, mine, or facility or any producer, manufacturer, or other supplier be made or kept available for furnishing supplies or services in the event of a national emergency, or that the interest either of industrial mobilization in case of such an emergency, or of the national defense in maintaining active engineering, research and development, are otherwise subserved: *Provided*, That beginning 6 months after the effective date of this act and at the end of each 6-month period thereafter, there shall be furnished to the Congress a report setting forth the name of each contractor with whom a contract has been entered into pursuant to this subsection (16) since the date of the last such report, the amount of the contract, and, with due consideration given to the national security, a description of the work required to be performed thereunder; or

"(17) otherwise authorized by law.

"(d) If in the opinion of the agency head bids received after advertising evidence any violation of the antitrust laws he shall refer such bids to the Attorney General for appropriate action.

"(e) This section shall not be construed to (A) Authorize the erection, repair, or furnishing of any public building or public improvement, but such authorization shall be required in the same manner as heretofore, or (B) permit any contract for the construction or repair of buildings, roads, sidewalks, sewers, mains, or similar items to be negotiated without advertising as required by section 3, unless such contract is to be performed outside the continental United States or unless negotiation of such contract is authorized by the provisions of paragraph (1), (2), (3), (10), (11), (12), or (15) of subsection (c) of this section.

"SEC. 3. Whenever advertising is required—

"(a) The advertisement for bids shall be a sufficient time previous to the purchase or contract, and specifications and invitations for bids shall permit such full and free competition as is consistent with the procurement of types of supplies and services necessary to meet the requirements of the agency concerned.

"(b) All bids shall be publicly opened at the time and place stated in the advertisement. Award shall be made with reasonable promptness by written notice to that responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Government, price and other factors considered: *Provided*, That all bids may be rejected when the agency head determines that it is in the public interest so to do.

"SEC. 4. (a) Except as provided in subsection (b) of this section, contracts negotiated pursuant to section 2 (c) may be of any type which in the opinion of the agency head will promote the best interests of the Government. Every contract negotiated pursuant to section 2 (c) shall contain a suitable warranty, as determined by the agency head, by the contractor that no person or selling agency has been employed or retained to solicit or secure such contract upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business, for the breach or violation of which warranty the Government shall have the right to annul such contract without liability or in its discretion to deduct from the contract price or consideration the full amount of such commission, percentage, brokerage, or contingent fee.

"(b) The cost-plus-a-percentage-of-cost system of contracting shall not be used, and in the case of a cost-plus-a-fixed-fee contract the fee shall not exceed 10 percent of the estimated cost of the contract, exclusive of the fee, as determined by the agency head at the time of entering into such contract (except that a fee not in excess of 15 percent of such estimated cost is authorized in any such contract for experimental, developmental, or research work and that a fee inclusive of the contractor's costs and not in excess of 6 percent of the estimated cost, exclusive of fees, as determined by the agency head at the time of entering into the contract, of the project to which such fee is applicable is authorized in contracts for architectural or engineering services relating to any public works or utility project). Neither a cost nor a cost-plus-a-fixed-fee contract nor an incentive-type contract shall be used unless the agency head determines that such method of contracting is likely to be less costly than other methods or that it is impracticable to secure supplies or services of the kind or quality required without the use of a cost or cost-plus-a-fixed-fee contract or an incentive-type contract. All cost and cost-plus-a-fixed-fee contracts shall provide for advance notification by the contractor to the procuring agency of any subcontract thereunder on a cost-plus-a-fixed-fee basis and of any fixed-price subcontract or purchase order which exceeds in dollar amount either $25,000 or 5 percent of the total estimated cost of the prime contract; and a procuring agency, through any authorized representative thereof, shall have the right to inspect the plants and to audit the books and records of any prime contractor or subcontractor engaged in the performance of a cost or cost-plus-a-fixed-fee contract.

"SEC. 5. (a) The agency head may make advance payments under negotiated contracts heretofore or hereafter executed in any amount not exceeding the contract price

upon such terms as the parties shall agree: *Provided,* That advance payments shall be made only upon adequate security and if the agency head determines that provision for such advance payments is in the public interest or in the interest of the national defense and is necessary and appropriate in order to procure required supplies or services under the contract.

"(b) The terms governing advance payments may include as security provision for, and upon inclusion of such provision there shall thereby be created, a lien in favor of the Government, paramount to all other liens, upon the supplies contracted for, upon the credit balance in any special account in which such payments may be deposited, and upon such of the material and other property acquired for performance of the contract as the parties shall agree.

"SEC. 6. Whenever any contract made on behalf of the Government by the agency head or by officers authorized by him so to do includes a provision for liquidated damages for delay, the Comptroller General, on the recommendation of the agency head, is authorized and empowered to remit the whole or any part of such damages as in his discretion may be just and equitable.

"SEC. 7. (a) The determinations and decisions provided in this act to be made by the agency head may be made with respect to individual purchases and contracts or with respect to classes of purchases or contracts, and shall be final. Except as provided in subsection (b) of this section, the agency head is authorized to delegate his powers provided by this act, including the making of such determinations and decisions, in his discretion and subject to his direction, to any other officer or officers or officials of the agency.

"(b) The power of the agency head to make the determinations or decisions specified in paragraphs (12), (13), (14), (15), and (16) of section 2 (c) and in section 5 (a) shall not be delegable, and the power to make the determinations or decisions specified in paragraph (11) of section 2 (c) shall be delegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000.

"(c) Each determination or decision required by paragraphs (11), (12), (13), (14), (15), or (16) of section 2 (c), by section 4 or by section 5 (a) shall be based upon written findings made by the official making sucn determination, which findings shall be final and shall be available within the agency for a period of at least 6 years following the date of the determination. A copy of the findings shall be submitted to the General Accounting Office with the contract.

"(d) In any case where any purchase or contract is negotiated pursuant to the provisions of section 2 (c), except in a case covered by paragraphs (2), (3), (4), (5), or (6) thereof, the data with respect to the negotiation shall be preserved in the files of the agency for a period of 6 years following final payment on such contract.

"SEC. 8. No purchase or contract shall be exempt from the act of June 30, 1936, as amended (49 Stat. 2036, as amended by the act of June 28, 1940, 54 Stat. 681, and by the act of May 13, 1942, 56 Stat. 277; U. S. C., title 41, secs. 35 to 45) or from the act of March 3, 1931, as amended (46 Stat. 1494, as amended by the act of August 30, 1935, 49 Stat. 1011, and by the act of June 15, 1940, 54 Stat 399; U. S. C., title 40, secs. 276a to 276a–6), solely by reason of having been entered into pursuant to section 2 (c) hereof without advertising, and the provisions of said acts and of the act of June 19, 1912, as amended (37 Stat. 137, as amended by the act of September 9, 1940, 54 Stat. 884; U. S. C., title 40, secs. 324 and 325a), if otherwise applicable, shall apply to such purchases and contracts.

"SEC. 9. As used herein—

"(a) The term 'agency head' shall mean the Secretary, Under Secretary (if any), or any Assistant Secretary of the Army, of the Navy, or of the Air Force; the Commandant, United States Coast Guard, Treasury Department; and the executive secretary, National Advisory Committee for Aeronautics, respectively.

"(b) The term 'supplies' shall mean all property except land, and shall include, by way of description and without limitation, public works, buildings, facilities, ships, floating equipment, and vessels of every character, type, and description, aircraft, parts, accessories, equipment, machine tools, and alteration or installation thereof.

"SEC. 10. In order to facilitate the procurement of supplies and services by each agency for others and the joint procurement of supplies and services required by such agencies, subject to the limitations contained in section 7 of this act, each agency head may make such assignments and delegations of procurement responsibilities within his agency as he may deem necessary or desirable, and the agency heads or any of them by mutual agreement may make such assignments and delegations of procurement responsibilities from one agency to any other or to officers or civilian employees of any such agency, and may create such joint or combined offices to exercise such procurement responsibilities, as they may deem necessary or desirable. Appropriations available to any such agency shall be available for obligation for procurement as provided for in such appropriations by any other agency through administrative allotments in such amount as may be authorized by the head of the allotting agency without transfer of funds on the books of the Treasury Department. Disbursing officers of the allotting agency may make disbursements chargeable to such allotments upon vouchers certified by officers or civilian employees of the procuring agency.

"SEC. 11. (a) The following acts are hereby repealed:

"Revised Statutes, section 3716 (U. S. C., title 10, sec. 1202);

"Revised Statutes, section 3717 (U. S. C., title 41, sec. 9);

"Revised Statutes, section 3718 (U. S. C., title 34, sec. 561);

"Revised Statutes, section 3719 (U. S. C., title 34, sec. 562);

"Revised Statutes, section 3720 (U. S. C., title 34, sec. 563);

"Revised Statutes, section 3721, as amended (U. S. C., title 34, secs. 569–570);

"Revised Statutes, section 3722 (U. S. C., title 34, sec. 572);

"Revised Statutes, section 3723 (U. S. C., title 34, sec. 573);

"Revised Statutes, section 3724 (U. S. C., title 34, sec. 574);

"Revised Statutes, section 3726 (U. S. C., title 34, sec. 577);

"Revised Statutes, section 3727 (U. S. C., title 34, sec. 578);

"Revised Statutes, section 3729 (U. S. C., title 34, sec. 579);

"Act of June 14, 1878, No. 30 (20 Stat. 253; U. S. C., title 34, sec. 565);

"Act of March 3, 1893 (ch. 212, sec. 1, 27 Stat. 732; U. S. C., title 34, sec. 566);

"Act of March 2, 1907 (ch. 2512, 34 Stat. 1193; U. S. C., title 34, sec. 571);

"Act of March 4, 1913 (ch. 148, 37 Stat. 904; U. S. C., title 34, sec. 575);

"Act of June 30, 1914 (ch. 130, 38 Stat. 398; U. S. C., title 34, sec. 567);

"Act of May 15, 1936 (ch. 400, 49 Stat. 1277; U. S. C., title 10, sec. 1199 (a));

"Act of July 13, 1939 (ch. 265, 53 Stat. 1000; U. S. C., title 10, sec. 313);

"(b) The following acts shall not apply to the procurement of supplies or services by the Department of the Army, the Department of the Navy, the Department of the Air Force, the United States Coast Guard, Treasury Department, or the National Advisory Committee for Aeronautics:

"Revised Statutes, section 3709, as amended (U. S. C., title 41, sec. 5);

"Revised Statutes, section 3735 (U. S. C., title 41, sec. 13);

"Act of October 10, 1940, ch. 851, sec. 1, 54 Stat. 1109, as amended (U. S. C., title 41, secs. 6 and 6a).

"(c) The following parts of acts are hereby repealed:

"(1) That portion of the act making appropriations for fortifications, approved February 24, 1891 (26 Stat. 769), relating to 'Armament of fortifications', which reads as follows: *'Provided,* That no contract for the expenditure of any portion of the money herein provided, or that may be hereafter provided, for the purchase of steel shall be made until the same shall have been submitted to public competition by the Department by advertisement.'

"(2) Those portions of the Army Appropriation Acts approved March 2, 1901 (ch. 803, 31 Stat. 905; U. S. C., title 10, sec. 1201); and June 30, 1902 (32 Stat. 514), relating to 'Quartermaster's Department, Regular Supplies,' which read as follows: *'Provided further,* That hereafter, except in cases of emergency or where it is impracticable to secure competition, the purchase of all supplies for the use of the various departments and posts of the Army and of the branches of the Army service shall only be made after advertisement, and shall be purchased where the same can be purchased the cheapest, quality and cost of transportation and the interests of the Government considered.'

"(3) That portion of the Army Appropriation Act approved June 12, 1906 (ch. 3078, 34 Stat. 258; U. S. C., title 10, sec. 1205), relating to 'Ordnance Department', which reads as follows: 'Hereafter the purchase of supplies and the procurement of services for all branches of the Army service may be made in open market, in the manner common among businessmen, when the aggregate of the amount required does not exceed $500; but every such purchase exceeding $100 shall be promptly reported to the Secretary of War for approval, under such regulations as he may prescribe.'

"(4) That portion of the Army Appropriation Act, approved May 11, 1908 (ch. 163, 35 Stat. 125; U. S. C., title 10, sec. 1199), relating to 'Ordnance Department,' which reads as follows: 'Whenever proposals are invited for the furnishing of articles of ordnance property, the character of which or the ingredients thereof are of such a nature that the interests of the public service would be injured by publicly divulging them, the Chief of Ordnance is authorized to purchase such articles in such manner as he may deem most economical and efficient.'

"(5) That portion of the War Department Appropriation Act, approved May 15, 1936 (49 Stat. 1299), relating to 'Arms, uniforms, equipment, and so forth, for field service, National Guard', which reads as follows: *'Provided,* That specifications for motor vehicles, which shall be so drawn as to admit of competition, shall to the extent otherwise practicable conform with the requirements of the National Guard.'

"(d) All other laws and parts of laws to the extent that they are inconsistent with this act are hereby repealed.

"SEC. 12. The Secretary of the Navy shall have the same authority with respect to contracts of the Department of the Navy as the Secretary of the Army has with respect to contracts of the Department of the Army under the act of April 10, 1878, as amended (20 Stat. 36, as amended by the act of March 3, 1883, 22 Stat. 487; U. S. C., title 5, sec. 218). The Secretary of the Army and the

Secretary of the Air Force shall have the same authority with respect to emergency purchases of war material abroad as the Secretary of the Navy has with respect to such purchases under the act of June 30, 1914 (38 Stat. 399; U. S. C., title 34, sec. 568).

"SEC. 13. This act shall become effective 90 days after the date of enactment."

Amend the title so as to read: "An act to facilitate procurement of supplies and services by the Departments of the Army, the Navy, and the Air Force, the Coast Guard, and the National Advisory Committee for Aeronautics, and for other purposes."

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

Mr. ANDERSON of California. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ANDERSON of California. Mr. Speaker, the majority of the amendments adopted, including both those which the Senate committee adopted last year and those which were added by the Senate on January 12, represent merely changes in language or technical amendments necessary to provide for the inclusion of the Air Force within the provisions of the bill. Only a few of the amendments relate to matters of substance and I will briefly discuss the more important of these as follows:

First. The bill has been extended to include the Coast Guard and the National Advisory Committee for Aeronautics. Inclusion of the Coast Guard was recommended by the Secretary of the Treasury and is felt to be logical in view of the fact that that service is faced with the same procurement problems as the Army, Navy, and Air Force; furthermore, it becomes a part of the Navy in wartime and therefore it is desirable to have its equipment interchangeable with that of the Navy. The inclusion of the National Advisory Committee for Aeronautics is desirable in view of the large number of contracts which that agency must enter into covering research and development in the field of aeronautics.

Second. As you recall, the essence of H. R. 1366 is that it permits the services to enter into contracts on the basis of negotiation rather than requiring them to advertise in certain specified cases, namely, in the event of a national emergency, where public disclosure would not be in the public interest, for research and development, and so forth. One more exception has been added to this list which would permit the negotiation of contracts for services to be rendered by any university, college, or other educational institutions. This provision is designed to supplement Public Law 729 of the Seventy-ninth Congress which relates to the payment of tuition, procurement of books, and so forth, for Naval Reserve officers. This exception is believed to be essential in view of the impossibility of entering into such contracts by the method of advertisement and competitive bid.

Third. The Senate has reinstated the provision which would permit agency heads to let contracts be negotiated in any case where he determines that the bid prices after advertising are not reasonable or have not been arrived at in open competition. This provision was contained in the bill as it was originally introduced in the House, but was deleted as the result of objections raised by members of this committee on the ground that it might be susceptible of administrative abuse. The Senate has added to the original language of the House bill certain specific safeguards which are felt to be adequate to insure against the possible abuses which were feared by members of our committee. These safeguards are as follows:

(a) Before any such contract may be awarded by negotiation, advance notification and a reasonable opportunity to negotiate must be given to each responsible bidder.

(b) The negotiated price must be lower than the lowest rejected bid price of a responsible bidder as determined by the agency head.

(c) The negotiated price must be the lowest negotiated price offered by any responsible supplier.

It is believed that the inclusion of this provision to permit the negotiation of contracts in those instances where there is apparent collusion is extremely desirable. Contracts were negotiated repeatedly during the war by various Government agencies under a similar authority contained in the War Powers Acts with great savings to the Government. The Federal Bureau of Supply has furnished a number of significant examples where such savings were effected pursuant to authority of this kind. A few of these examples are cited in the report of the Senate Armed Services Committee to the Senate. It is expected that a provision of this sort in the bill before us now will be most useful in breaking the following practices:

Collusive bidding, follow-the-leader pricing, rotated low bids, identical bids requiring drawing of lots, uniform estimating systems, refusal to classify the Government as other than a retail buyer regardless of the quantity purchased. The Government should have the power to inquire into the reasons why it is not securing competition—to call for facts and figures and to negotiate to eliminate unwarranted charges, excessive reserves for contingencies, unwarranted profits, and so forth.

Fourth. Paralleling the provision which would permit the negotiation of contracts where collusion is suspected, the Senate has added a new section which requires agency heads, in cases where they believe that bids received after advertising evidence any violation of the antitrust laws, to refer these bids to the Attorney General for appropriate action. It is certainly logical that if the agency head is allowed to reject bids and to negotiate contracts he should likewise be required to undertake the responsibility of reporting the circumstances to the appropriate law-enforcement authorities of the Government.

Fifth. The Senate has added to section 4 (b) of the bill, which sets forth the requirements as to the types of contracts which may be entered into under its provisions, a new provision, which will require:

(a) That all cost and cost-plus-a-fixed-fee contracts must contain a provision requiring that the contractor give advance notification to the procuring agency of any subcontract exceeding $25,000, or 5 percent of the total estimated cost of the prime contract.

(b) That the procuring agency shall have the right to inspect the plants and audit the books of any prime or subcontractor under a cost or cost-plus-a-fixed-fee contract.

To quote the observation made by Senator BYRD on the floor of the Senate, these provisions are "designed to remedy the situation created by General Meyers in connection with the fraud he perpetrated on the Government."

Sixth. The Senate has amended section 7 (b) by limiting the authority of the agency head to delegate the power to make determinations. Under the bill as it passed the House the authority to make the determinations and decisions required before contracts for research and development can be awarded on the basis of negotiation could be delegated to a chief officer responsible for procurement and his first assistant. The Senate has restricted this provision to permit the delegation only to the chief officer and further limiting such delegations to contracts which will not require the expenditure of more than $25,000.

Seventh. A very important change which should have far-reaching effects in facilitating the efficient procurement of supplies for all of the armed services is contained in section 10 of the bill. Originally this section, as it appeared in the bill when it passed the House, provided merely that the provisions of H. R. 1366 would apply to purchases made by an agency for its own use or otherwise. The intent of the language "or otherwise" was to permit cross procurement and joint procurement. The Senate has expanded this section in such a manner as to spell out in detail effective means by which these objectives may be achieved in actual practice. Section 10 now permits agency heads to enter into mutual agreements whereby, to take a specific example, the Secretary of the Army can assign or delegate the procurement responsibility of his agency to a procurement officer of the Navy charged with the procurement of a particular item which the Army desires to obtain. In such a case the appropriations available to the Army for the purchase of that particular item can be made available for obligation by the Navy procurement officer. This may be accomplished under section 10 by means of administrative allotments between the agencies, in such amounts as may be authorized by the head of the alloting agency, without transfer of funds on the

books of the Treasury Department. In actual practice, in the hypothetical example which we assumed a moment ago, the Army then will requisition of the Navy the item which they desire. The Army's bookkeepers then set up an administrative allotment to the Navy of the necessary funds to cover the purchases in question. There will be no necessity for a transfer of funds between the departments. Payment will be made by an Army disbursing officer who is authorized under this section to make disbursements chargeable to such administrative allotments upon vouchers certified by the Navy procuring officer.

I have discussed all of the important amendments which relate to matters of substance. All of the other amendments adopted by the Senate are purely technical in character. I might say in passing, however, that a number of these technical amendments have resulted in substantially improving the bill. I have in mind particularly a number which were adopted by the Senate after informal consultation with the General Accounting Office as a result of which it was determined that that agency would interpret a number of sections in the bill much more strictly than had been anticipated by the departments or by our committee during its consideration of the bill. Accordingly, corrective amendments were adopted as safeguards against the undesirable results which might follow from a restrictive interpretation of some of the provisions. These amendments have the full approval of the Comptroller General and the General Accounting Office. Thus, for example, in the section which permits the negotiation of contracts for equipment where standardization is necessary, the Senate has rewritten the language to permit the agency head to determine what is or is not such technical equipment. During the hearings before our committee the witnesses cited the purchase of trucks as an example. Informal advice was received from the General Accounting Office that trucks would not be construed to fall within the terms of this authority. The amendment, by permitting the agency head in an appropriate case to determine that trucks do constitute technical equipment of a kind where standardization is necessary, will obviate the possible danger of his being second-guessed by the General Accounting Office. Similarly, in this same provision, the Senate has deleted the requirement that a showing be made that standardization is necessary, because the General Accounting Office advised that under that language a notation would have to be made on each individual voucher to the effect that such a showing had been made. I will not attempt to cite any further examples as it is sufficient to say merely that they all fall within the same category of changes which are highly desirable to avoid restrictive interpretations which indeed were never contemplated by this committee under the language of the bill as it passed the House.

PRESERVATION OF THE FRIGATE "CONSTELLATION"

Mr. ANDREWS of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain parts of such vessel as souvenirs, and for other purposes, with House amendments thereto, insist on its amendments and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from New York? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. ANDREWS of New York, COLE of New York, and VINSON.

AUTHORIZING COMMITTEE ON ARMED SERVICES TO CONTINUE ITS INVESTIGATION

Mr. BROWN of Ohio. Mr. Speaker, by direction of the Committee on Rules I call up House Resolution 447.

The Clerk read the resolution, as follows:

Resolved, That, effective from December 19, 1947, the Committee on Armed Services, acting as a whole or by subcommittee, is authorized to continue the investigation begun under authority of House Resolution 141 of the Eightieth Congress, and for such purposes shall have the same power and authority as that conferred by such House Resolution 141. The committee shall report to the House of Representatives during the present Congress the results of its studies and investigations with such recommendations for legislation or otherwise as the committee deems desirable. Any report submitted when the House is not in session shall be filed with the Clerk of the House.

Mr. BROWN of Ohio. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. SABATH] and at this time I yield myself such time as I may use.

Mr. Speaker, I can assure the House that we will not use all of the time granted on this resolution because it is a very simple measure. House Resolution 447 simply corrects a typographical error which was made in House Resolution 141 wherein the words "present session of Congress" was included instead of the words "present Congress."

House Resolution 141, the original resolution, authorized House Committee on Armed Services, acting as a whole or by subcommittee, to conduct investigations on matters coming under the jurisdiction of that committee. The Armed Services Committee has conducted a number of investigations under the original resolution which, of course, expired on December 19, when Congress adjourned sine die. So, House Resolution 447 simply corrects the typographical error which limited the committee's authority to that particular session and continues this investigative power for the duration of this Congress. It is hoped that the resolution will be given the unanimous vote of the House.

INVESTIGATIONS FOR POLITICAL PUBLICITY

Mr. SABATH. Mr. Speaker, it is to be regretted that other committees, unlike the Committee on Armed Services, instead of devoting themselves to real investigations for which they were created, should devote their efforts to purely political publicity.

In the first session of this Congress when you appointed a multiplicity of these committees to investigate the war frauds—as you have made the country believe—I stated on this floor that as soon as you started to penetrate into the war frauds and found that 98 percent of all the war profiteers were Republicans, the investigations would cease. With a few exceptions, these investigations have lent themselves to a great deal of publicity, such as the Garssons, who were thrown into bankruptcy; the Howard Hughes fiasco, and the so-called communistic Hollywood probe.

INVESTIGATION OF REAL WAR PROFITEERS SHOULD BE MADE

Although I have urged the investigation of many of the real war profiteers who have made millions out of the war, after a year and a half, as I charged, you have stopped short. But I repeat, the Committee on Armed Services has actually performed its duties, and the time for continuing investigations should be extended.

However, I feel that if the membership of many of these investigating committees had devoted their time to legislation it might not have been necessary for the House to adjourn until Monday—from Monday until Thursday—and from next Thursday until next Monday, because during those 10 days we could have at least acted on some of the legislation urged by the President. I do not know, but the question is in my mind, whether these recesses are for the purpose of preventing the passage of the rent-control bill which will expire in about 3 weeks; namely, on February 29.

NEED FOR LEGISLATION TO REDUCE COST OF LIVING, EXTENSION OF RENT CONTROL, LOW-COST HOUSING FOR VETERANS AND CITIZENS

Today many speeches were made on the floor by many of my colleagues, but unfortunately no one has urged the need of legislation that would bring about the reduction in the high cost of living, or urged action on the Wagner-Ellender-Taft housing bill that aims to bring about the construction of low-cost housing for the veterans and thousands of American citizens.

Personally, I feel that it is our duty to the veterans and those in the low-income brackets to attempt to relieve them of the deplorable conditions under which they are obliged to live. Instead of acting upon the President's recommendations to bring about price control and rationing, you, in the last special session, passed a ridiculous bill to reduce the high cost of living by a so-called voluntary action on the part of the various industries and businesses, who are the very ones responsible for the ever-increasing cost of living. But instead of industry doing as it promised and what you claimed it would do to bring about a reduction in the high cost of living, industry continuously increased their

prices, notwithstanding its tremendous profits.

UNFAIR OLEOMARGARINE TAX

Yesterday and today we heard several gentlemen who made speeches for the removal of the tax on margarines, which was forced through by the Republican farm bloc years ago. I have urged the repeal of this tax many times because it is a tax on the poor people who cannot afford to buy high-priced butter. In that connection may I say that not only are the people of lower incomes unable to buy butter, but are unable to buy milk which is 22 cents a quart today, as well as meats and many imitations of cheeses which are 300 to 400 percent higher than formerly.

With respect to these products, not only a real investigation is needed to place the responsibility for the manipulations which have brought about these outrageous prices, but legislation should be forthcoming without delay or procrastination to check any further increases and to bring them down to their legitimate price levels.

SECRET AGREEMENTS AND CONSPIRACIES TO INCREASE PRICES

The National Association of Manufacturers, known as the NAM, with their affiliates and various institutes have continuously through secret agreements conspired to increase the prices of all products.

To prevent the passage of price and rent control and rationing in order to continue their mulcting of the American people they are again trying to mislead and scare the American people that the return of controls and rationing would bring on black marketeering. But, Mr. Speaker, we have no price control now and there is black marketeering to a greater degree than ever before.

GRAY MARKETEERING IN STEEL

As to gray marketeering in steel, today only through the insiders can a few favored manufacturers obtain steel, for which product the small manufacturer, in many instances, is obliged to pay from $200 to $300 per ton. This also applies to lumber, insulation, hardware, and other materials going into home construction. These industrial czars are responsible for the high cost of living and for the delay of constructing lower-priced homes because an honest contractor cannot pay the black-market prices for materials needed for home construction.

Mr. Speaker, it seems to me that the majority do not realize the unfortunate existing conditions, but I hope that these three recesses for 10 days will give the Republican Members an opportunity to familiarize themselves as to the situation and that they will come back and begin to adopt some of the legislation recommended by the President to relieve these deplorable existing conditions and at the same time pass other legislation to arrest dangerous inflation.

Regardless of what I and the members of the minority, who have the interest of the common people at heart, may say or try to do, I am satisfied that no legislation will be enacted to relieve present conditions, and unless you will come to the conclusion that something must be done, you will be done.

In that connection I just received a letter bearing on rent control which expresses the sentiments of the vast majority of the American people, which I insert as part of my remarks.

The letter is as follows:

CHICAGO, ILL., *February 3, 1948.*

Subject: Federal rent control.

Hon. ADOLPH J. SABATH,
House of Representatives,
House Office Building,
Washington, D. C.

SIR: I believe that Federal rent-control regulations should receive the immediate attention of Congress and I urge that you support the enactment of this legislation at the earliest moment possible.

Without the prompt extension of Federal rent regulations there are millions of people daily becoming more alarmed in the full knowledge that unless regulations are enacted before February 29, 1948, there will be a wave of unjustified and exorbitant rental advances. I do not need to tell you what this will mean to millions in the lower and middle income bracket, who are, at today's general living conditions and costs, barely able to keep their heads above water and there are many, many thousands, who are not, under today's present economic conditions, even able to do this.

May I offer that almost all residential rental property today was constructed, financed, and amortized before the war or during the first years thereof; rental property was, at those times, amortized on a basis of rents in existence at the time and based on from 10 to 15 percent vacancies. We all know that property has been 100 percent occupied—there have been no vacancies, consequently the 10 to 15 percent basis on which the property was amortized, under the lower building and materials costs of that time, makes them at today's rentals, in a great majority of cases very profitable investments for the owners.

May I again urge that you support the speeding and enactment of regulations extending Federal rent controls to at least December 31, 1949.

Respectfully yours,

FRED P. GREEN.

Mr. BROWN of Ohio. Mr. Speaker, this measure has been approved unanimously by the Committee on Rules. It is simply to correct a typographical error.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. VURSELL. Mr. Speaker, I have a special order for 30 minutes for next Tuesday, but since I am informed that the House will not be in session on that day, I ask unanimous consent that on Monday next, following any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 15 minutes.

FUEL SHORTAGE

Mr. HESELTON. Mr. Speaker, on yesterday I placed in the RECORD, on page 1097, a tabulation showing the revised export quota for petroleum products for the first quarter of 1948. I have now completed a computation of the differences between that quota and the quota announced in January, which I shall insert at this point in the RECORD for the information of the Members of the House.

Revised first quarter, 1948, country quotas of petroleum products in barrels:

Kerosene

	Announced Jan. 16	Announced Feb. 4	Reduction
Australia	70,000	50,000	20,000
Belgium	8,000	8,000	None
British Honduras	2,000	2,000	None
China	110,000	85,000	25,000
Costa Rica	3,500	3,500	None
Denmark	5,000	0	5,000
El Salvador	1,500	1,500	None
Eire	5,000	0	5,000
Guatemala	2,000	2,000	None
Honduras	2,000	2,000	None
New Zealand	20,000	20,000	None
Norway	7,000	7,000	None
Panama, Republic of	7,000	7,000	None
Philippines	70,000	60,000	10,000
Portugal	40,000	30,000	10,000
Sweden	50,000	50,000	None
United Kingdom	130,000	80,000	50,000
British West Africa	25,000	25,000	None
Switzerland	10,000	10,000	None
French West Africa	10,000	10,000	None
Total	578,000	453,000	125,000
Reserve	322,000	149,000	173,000
Grand total	900,000	602,000	298,000

Result: Reduction in varying percentages in exports to 7 countries; no reduction in exports to 13 countries. Over-all reduction accomplished by drawing from reserve an amount which is 58 percent of total purported reduction of exports.

Gas oil and distillate fuel oil

	Announced Jan. 16	Announced Feb. 4	Reduction
Australia	100,000	100,000	None
Belgium	175,000	175,000	None
British Honduras	3,000	3,000	None
China	100,000	100,000	None

Sweden	250,000	250,000	None
United Kingdom	1,200,000	1,000,000	200,000
Netherlands	60,000	60,000	None
Iceland	40,000	0	40,000
British West Africa	20,000	20,000	None
Switzerland	50,000	50,000	None
Total	2,746,000	2,446,500	300,000
Reserve	453,500	353,500	100,000
Grand total	3,200,000	2,800,000	500,000

Result: Reduction in varying percentages in exports to 5 countries; no reduction in exports to 14 countries. Over-all reduction accomplished by drawing from

reserve item an amount which is 20 percent of total purported reduction of exports.

Residual fuel oil

	Announced Jan. 16	Announced Feb. 4	Reduction
Australia	50,000	25,000	25,000
Belgium	100,000	70,000	30,000
Costa Rica	20,000	20,000	None
Cuba	200,000	200,000	None
Denmark	70,000	60,000	10,000
El Salvador	40,000	40,000	None
Guatemala	55,000	55,000	None
Mexico	400,000	250,000	150,000
New Zealand	70,000	----------	70,000
Panama Republic	25,000	25,000	None
Portugal	19,000	19,000	None
Sweden	100,000	60,000	40,000
United Kingdom	300,000	----------	300,000
British West Africa	10,000	10,000	None
French West Africa	15,000	15,000	None
Total	1,474,000	849,000	625,000
Reserve	326,000	151,000	175,000
Grand total	1,800,000	1,000,000	800,000

Result: Reduction in varying percentages in exports to seven countries; no reduction in exports to eight countries. Over-all reduction accomplished by drawing from reserve item an amount which is 24 percent of total purported reduction of exports.

I submit that several conclusions are clear:

First. This action is not in compliance with the unanimous recommendations of the House Committee on Interstate and Foreign Commerce (a) of December 19, 1947, that "the export control authority granted by section 6 of Public Law 703, Seventy-sixth Congress, as amended, should be exercised to place such prohibitions or curtailments on the exportation of fuel oil and other petroleum products for such period of time as may be necessary to alleviate such shortages," or (b) of January 26, 1948, when the committee recommended "the immediate cessation of the exportation of all petroleum products," stating:

It appears that the situation is now so grave that exports should be stopped completely until it can be determined whether further exports are damaging to the economy of this country.

Second. The announcement of the Department of Commerce of the revision on the afternoon of January 30, 1948, emphasized that it was a reduction of 18.5 percent. In terms of the withdrawal from reserves and the limited number of countries affected, I submit that this is an unfortunate statement. It certainly appears that the effort to reduce exports was a scattered, piecemeal one.

Third. It is difficult, and I find it impossible to reconcile the position of the Department of Commerce through its authorized representatives in a period so short as between Monday and Friday of last week. On Monday Hon. William C. Foster, Under Secretary of Commerce, testified before the House Interstate and Foreign Commerce Committee in opposition to any form of embargo on the export of petroleum and petroleum products. He said:

The reason I have taken here the attitude that I have is that I am still fearful that the action contemplated is that proposed legislation will lead to more trouble than a solution of the problem.

Yet on Friday afternoon the Department of Commerce announced the revision, which I have analyzed, and you will note several startling facts. First, the export program to Japan and the Ryukyu Islands was cut back from 2,470,000 barrels to 100,000 barrels; second, as to kerosene, exports to China are cut back 25,000 barrels, or 22 percent; to Portugal, 10,000 barrels, or 25 percent; to the United Kingdom, 50,000 barrels, or 38 percent; and to Denmark and Eire, 5,000 barrels, respectively, or 100 percent. Third, as to gas oil and distillate fuel oil, exports to Mexico are cut back 25,000 barrels, or 25 percent; to the Philippines, 25,000 barrels, or 15 percent; to the United Kingdom, 200,000 barrels, or 16 percent; and to Panama and Iceland, 10,000 and 40,000 barrels, respectively, or 100 percent. Fourth, as to residual fuel oil, exports to Australia are cut back 25,000 barrels, or 50 percent; to Belgium, 30,000 barrels, or 30 percent; to Denmark, 10,000 barrels, or 14 percent; Mexico, 150,000 barrels, or 37 percent; Sweden, 40,000 barrels, or 40 percent; and New Zealand and the United Kingdom, 70,000 and 300,000 barrels, respectively, or 100 percent.

What possible result can be drawn from those conclusions but that the argument that we must not restrict these exports in any way is absurd? Surely the allocations which have not been touched should be reviewed immediately. Personally I am forced to the conclusion that the record as to the use of these control powers since the first of the year demonstrates beyond any reasonable doubt that Congress has the grave responsibility of legislating at once in this field. I am convinced that it can and will give proper weight to all the evidence as to possible effects elsewhere against known effects in this country. Someone must act—and before it is too late. I urge that we accept that responsibility now.

PROGRAM FOR NEXT WEEK

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, I have taken this time to announce the program for next week.

Next Monday is District of Columbia Day. Following the disposition of District of Columbia business, the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190), the so-called Case oil bill, will be considered.

Consent has already been granted for the House to adjourn from Monday to Thursday of next week. On Monday further information will be divulged as to the program for Thursday and Friday of next week.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 48 minutes p. m.), under its previous order, the House adjourned until Monday, February 9, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

1290. Under clause 2 of rule XXIV, a letter from the Under Secretary of the Interior, transmitting the Sixth Annual Financial Statement and Report of Operations, was taken from the Speaker's table and referred to the Committee on Public Lands.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ALLEN of Illinois: Committee on Rules, House Resolution 458. Resolution providing for consideration of House Joint Resolution 296, a joint resolution to maintain the status quo in respect of certain employment taxes and social-security benefits pending action by Congress on extended social-security coverage; without amendment (Rept. No. 1343). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 459. Resolution providing for consideration of House Joint Resolution 275, a joint resolution to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to fur farmers, and for other purposes; without amendment (Rept. No. 1344). Referred to the House Calendar.

Mr. SHAFER: Committee on Armed Services. S. 1252. An act making certain changes in the organization of the Navy Department, and for other purposes; without amendment (Rept. No. 1345). Referred to the Committee of the Whole House on the State of the Union.

Mr. BLACKNEY: Committee on Armed Services. H. R. 1275. A bill to authorize the payment of certain claims for medical treatment of persons in the naval service; to repeal section 1586 of the Revised Statutes; and for other purposes; with an amendment (Rept. No. 1347). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 3344. A bill to amend the fourth paragraph of section 4, chapter 1, title I, of the act entitled "An act making further provision for a civil government for Alaska, and for other purposes," approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended; without amendment (Rept. No. 1348). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4272. A bill to provide for the procurement and supply of Government headstones or markers for unmarked graves of members of the armed forces dying in the service or after honorable discharge therefrom, and other persons, and for other purposes; with an amendment (Rept. No. 1349). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4549. A bill to authorize the enactment by the Legislature of the Territory of Alaska of a code of laws for Alaska; with an amendment (Rept. No. 1350). Referred to the Committee of the Whole House on the State of the Union.

Mr. ANDREWS of New York: Committee on Armed Services. H. R. 5035. A bill to authorize the attendance of the United States Marine Band at the eighty-second national encampment of the Grand Army of the Republic to be held in Grand Rapids, Mich., September 26–30, 1948; without amendment (Rept. No. 1351). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CRAVENS: Committee on the Judiciary. H. R. 2803. A bill for the relief of Miriam Barkle; without amendment (Rept. No. 1342). Referred to the Committee of the Whole House.

Mr. ARENDS: Committee on Armed Services. S. 1673. An act to authorize the promotion of James Y. Parker, Army serial No. O20712, as major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes; without amendment (Rept. No. 1346). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 3 of rule XXII, the Committee on the Judiciary was discharged from the consideration of the bill (H. R. 2948) to regulate and control the operation of foreign agencies acting within the United States or its Territories and dependencies, and the same was referred to the Committee on Un-American Activities.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CORBETT:

H. R. 5292. A bill to amend the Internal Revenue Code so as to reduce the taxes on yellow oleomargarine made from domestic fats and oils and on dealers in such oleomargarine; to the Committee on Agriculture.

By Mr. BRADLEY:

H. R. 5293. A bill to change the method of computing Federal grants-in-aid to States for aid to dependent children, to authorize such grants-in-aid for aid to needy relatives who provide homes for such children, and for other purposes; to the Committee on Ways and Means.

By Mr. FORAND:

H. R. 5294. A bill to provide free postage for hospitalized members and veterans of the armed forces and to make available for such purpose to certain Government hospitals machines for the impressing and cancellation of postage stamps; to the Committee on Post Office and Civil Service.

H. R. 5295. A bill to provide free postage fo. veterans and members of the armed forces of the United States receiving care or treatment in certain hospitals; to the Committee on Post Office and Civil Service.

By Mr. GOSSETT:

H. R. 5296. A bill to repeal section 325 of the Nationality Act of 1940, as amended; to the Committee on the Judiciary.

H. R. 5297. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H. R. 5298. A bill to establish Civil Air Patrol as a civilian auxiliary of the United States Air Force and to authorize the Secretary of the Air Force to extend aid to Civil Air Patrol in the fulfillment of its objectives, and for other purposes; to the Committee on Armed Services.

By Mr. MACKINNON:

H. R. 5299. A bill to extend the benefits of title II of the Social Security Act to certain employees of hospitals, and for other purposes; to the Committee on Ways and Means.

By Mr. MURRAY of Wisconsin:

H. R. 5300. A bill to provide for the conservation and preservation of fish, wildlife, and game on the Menominee Reservation, Wis., including the enforcement and prosecution of violators, and for other purposes; to the Committee on Public Lands.

By Mr. RAMEY:

H. R. 5301. A bill to extend the educational and training benefits of the Servicemen's Readjustment Act of 1944, as amended, to certain widows and children of deceased veterans; to the Committee on Veterans' Affairs.

By Mr. CELLER:

H. Res. 460. Resolution to erect a monument to the memory of Mohandas K. Gandhi; to the Committee on House Administration.

By Mr. RIZLEY:

H. Res. 461. Resolution creating a special committee to investigate the election of Members of the House of Representatives; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States to enact a sound and effective European recovery program; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. JOHNSON of California:

H. R. 5302. A bill for the relief of the estate of R. C. Randolph, deceased; to the Committee on the Judiciary.

By Mr. KEEFE:

H. R. 5303. A bill for the relief of Goettmann Printing Co.; to the Committee on the Judiciary.

By Mr. WHITTEN:

H. R. 5304. A bill for the relief of C. Y. Andrews; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1311. By Mr. FORAND: Resolution of the General Assembly of the State of Rhode Island and Providence Plantations, memorializing Congress to have included in the forthcoming rivers and harbors bill the project of dredging Bullock's Cove in the town of East Providence; to the Committee on Public Works.

1312. By Mr. BUCK: Petition of United States Marine Hospital Post, No. 1364, American Legion, containing the signatures of 48 residents of Staten Island, N. Y., urging the enactment of legislation establishing a system of universal military training; to the Committee on Armed Services.

SENATE

MONDAY, FEBRUARY 9, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Most merciful Father, strengthen our faith, we pray, and save us from discouragement. Let not our hearts fail us when, after a war to set peoples free, there is less freedom in the world than there was before. Setting up standards of right and justice, we have seen them betrayed for money and mocked by selfishness. We have tried to forgive our enemies, we have humbled ourselves before haughty and cruel men, but we have not changed their hearts. Only Thou canst do that. But it takes faith to wait.

So we are tempted to despair of our world. Remind us, O Lord, that Thou hast been facing the same thing in all the world since time began.

But let not our hearts become hard or our spirits bitter. Keep our souls in faith and in hope. Through Jesus Christ our Lord. Amen.

THE JOURNAL

On request of Mr. IVES, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, February 5, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that the President had approved and signed the following acts:

On February 5, 1948:

S. 99. An act for the relief of John T. Hollandsworth, Jr.

On February 6, 1948:

S. 1005. An act to amend the act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con. Res. 139. Concurrent resolution providing for a joint session of the two Houses on Monday, April 19, 1948, in commemoration of the fiftieth anniversary of the liberation of Cuba; and

H. Con. Res. 140. Concurrent resolution extending the life of the Joint Committee on the Observance and Celebration of the Victory Over Spain.

LEAVES OF ABSENCE

Mr. IVES asked and obtained consent that Mr. DONNELL be excused from

attendance on sessions of the Senate on Monday, Wednesday, and Friday of this week.

Mr. BUTLER asked and obtained consent to be absent from sessions of the Senate from today to February 19.

Mr. FLANDERS asked and obtained consent to be absent from sessions of the Senate until Monday next.

Mr. AIKEN asked and obtained consent to be excused from attendance upon the Senate for the remainder of this week.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

CONSERVATION OF CERTAIN RESOURCES IN SUBMERGED COASTAL LANDS

A joint letter from the Secretary of Defense, the Attorney General, and the Secretary of the Interior, transmitting a draft of proposed legislation to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores of the United States (with accompanying papers); to the Committee on Interior and Insular Affairs.

LANDS WITHIN INDIAN RESERVATIONS

A letter from the Secretary of the Interior, reporting, pursuant to law, that no reservations from all appropriations of lands within Indian reservations valuable for power or reservoir sites or necessary for use in connection with irrigation projects were made during the calendar year 1947; to the Committee on Interior and Insular Affairs.

PENALTY MAIL MATTER

A letter from the Postmaster General, transmitting, pursuant to law, a report showing the quantity of penalty inscribed material on hand and on order on June 30, 1947, the number of pieces procured, estimated mailings, and the estimated cost of handling for the period July 1 to September 30, 1947 (with an accompanying paper); to the Committee on Post Office and Civil Service.

PETITIONS AND MEMORIAL

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

The petition of the Lake Worth Townsend Club, No. 1, Lake Worth, Fla., praying for the enactment of legislation providing for a uniform national pension system; to the Committee on Finance.

A letter in the nature of a petition from Ross C. Patton, Philadelphia, Pa., relating to his patent application No. 230,760, filed September 20, 1938, for which he has been denied compensation in petition to the United State Court of Claims case No. 47661, February 2, 1948 (with accompanying papers); to the Committee on the Judiciary.

Letters in the nature of petitions from Edward Gorecki, of Cleveland, Ohio, and Mrs. Mary Prichota, of East Chicago, Ind., praying for the enactment of Senate bill 1813, to reduce postage rates on parcels containing food, clothing, or medicines mailed to certain foreign countries so as to include Poland; to the Committee on Foreign Relations.

By the PRESIDENT pro tempore:

A concurrent resolution of the Legislature of the State of Mississippi; to the Committee on the Judiciary.

"House Concurrent Resolution 22

"Concurrent resolution of the Senate and House of Representatives of the State of Mississippi memorializing the Congress of the United States of the grave apprehension and vigorous opposition of the people of this State to the recommendations of President Truman's Committee on Civil Rights, and urging opposition to any congressional enactment of said recommendations

"Whereas President Harry S. Truman, by Executive order on December 5, 1946, did establish the President's Committee on Civil Rights; and

"Whereas this committee did function and submit its report to the Nation in the form of a public document; and

"Whereas the report did recommend, among other things, the enactment by the Congress of an Antilynching Act, an Anti-Poll-Tax Act, a Fair Employment Practices Act, an act forbidding segregation, and other acts of this same character and devious purpose, which acts are obviously directed against certain geographical sections of the Nation, more particularly the Southern States, and which acts are aimed at nothing less than the subjugation of the sovereignty of the 48 States of this Union in favor of a gigantic and compelling Federal system of appointive boards with powers equal to those of the State or the judiciary; the subjugation of the majority to the demands of various minority groups, and not least among these recommendations, certain ones whose effect would be to deprive the States of their rights with regard to suffrage and election laws, and passing this power to the Federal Government for their dictates; and

"Whereas the recommendations of this committee constitute an assault on the fundamental principles of division of powers between the Federal and State governments; and

"Whereas the recommendations of this committee constitute an attempt by a group of persons not qualified by training or experience to recommend basic changes in a social and economic system arrived at after centuries of adjustments and changes accompanied by progress and enlightenment; and

"Whereas the recommendations of this committee constitute nothing less than an attempt to inflict on the States by Federal legislation a social, economic, and political framework totally in derogation of the sovereignty of States guaranteed by the Constitution of the United States: Therefore be it

"*Resolved by the house of representatives (the senate concurring therein)*, That the Congress of the United States be and is hereby memorialized of the grave apprehension with which the people of this State view these proposals, and be further memorialized of the vigorous, indignant, justifiable, and considered condemnation of and opposition to these said recommendations, and that the Congress be urged to defeat any and all of these recommendations; be it further

"*Resolved*, That a copy of these joint resolutions be transmitted to the President of the United States, the President of the Senate, the Speaker of the House of Representatives, and to the Mississippi delegation in Congress with the request that said delegation continue their steadfast, determined and courageous defense of the traditions, customs, and ideals of the State of Mississippi and the South."

USE OF TOBACCO AS INCENTIVE COMMODITY IN EUROPEAN RECOVERY PROGRAM

Mr. COOPER. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a concurrent resolution adopted by the General Assembly of the Commonwealth of Kentucky, concerning the use of tobacco as an incentive commodity in the European recovery program, which has been addressed to the President of the United States, the Secretary of State, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of the Interior, and to the Members of Congress from the Commonwealth of Kentucky. I am sending a copy of the resolution to the Senate Committee on Foreign Relations for its consideration.

There being no objection, the concurrent resolution was received, referred to the Committee on Foreign Relations, and, under the rule, ordered to be printed in the RECORD, as follows:

Whereas the Congress of the United States is now considering legislation in regard to a European recovery program; and

Whereas certain commodities will be supplied as grants to participating countries in the carrying out of this program: Now, therefore, be it

Resolved by the Senate of the Commonwealth of Kentucky (the house of representatives concurring therein), That in connection with the supply of United States tobacco to recipient countries under the European recovery program, it appears that in the interest of all producers several points should be considered.

1. REVENUES

The United States Government derives annually more than $1,200,000,000 in revenue from tobacco. This is almost equal to $1,000 per acre for the amount used in the manufacture of products by domestic manufacturers. It should be noted in this connection that revenue from tobacco is more than double the cost of the tobacco to be shipped to recipient countries under the European recovery program. This does not apply to any other commodities or products to be supplied. Its use in providing revenue in foreign countries should be considered, in connection with the supply of commodities to recipient countries. For example the revenue accruing to the Government of the United Kingdom for the year 1947–48 is estimated at more than $2,000,000,000. In Italy, tobacco supplies about 30 percent of the total revenue received by the Italian Government.

2. INCENTIVES

Testimony before congressional committees has established the value of tobacco as an incentive product to stimulate production on farms, in factories and in the mines and as a factor in improving the morale of the people in countries where tobacco products are in short supply. The European recovery program is designed to encourage and to increase production in European countries and to improve the morale of the population, and for this reason tobacco is included as one of the commodities to be supplied European countries under the recovery program.

3. DEVELOPMENT OF FUTURE MARKETS

Since tobacco is to be supplied to participating countries as grants, the tobacco shipped should be such that trade between the United States and recipient countries will be perpetuated. This can best be achieved by its supply to recipient countries through established trade channels.

4. TOBACCO IN SURPLUS SUPPLY IN THE UNITED STATES

Tobacco is in surplus supply in the United States and its shipment, in the amounts

scheduled, will not create a shortage in the domestic market and will therefore have no inflationary effect on our economy. Supplies of tobacco from this country to recipient countries, as a whole, should be on a basis that will remove United States surplus supplies of each type of tobacco. Surplus supplies would include leaf tobacco held by dealers as well as that held by any agency of the Government under a price-support program.

5. ALL AREAS BE GIVEN EQUAL CONSIDERATION

Since funds for aid to participating countries will come from all areas, through taxes, it would appear equitable that, in order to protect the respective producers, all tobacco-producing areas must be given equal consideration. This is especially important to tobacco growers who produce types now in surplus supply.

Equal consideration for each tobacco-producing area could probably be achieved through instruction to the administrator of the European recovery program, in the act or in the conference report, that in the distribution of United States agricultural commodities as grants to participating countries, the amounts of each class or type supplied must, in order to protect respective producers, be in proportion to the United States available supply of each class or type of each commodity; be it further

Resolved, That a copy of this resolution be mailed by the clerk of the Senate of Kentucky to the Honorable Harry S. Truman, President of the United States, and the Honorable George C. Marshall, Secretary of State, and the Honorable Clinton P. Anderson, Secretary of Agriculture, and the Honorable Averill Harriman, Secretary of Commerce, and the Honorable Julius Krug, Secretary of the Interior, and a copy sent to the Honorable Alben W. Barkley, United States Senator from Kentucky, and the Honorable John Sherman Cooper, United States Senator from Kentucky, and the Honorable Noble J. Gregory, the Honorable Thurston Ballard Morton, the Honorable Frank Leslie Chelf, the Honorable Brent Spence, the Honorable Virgil Chapman, the Honorable W. Howes Meade, the Honorable Joe B. Bates, and the Honorable John M. Robsion, Representatives from Kentucky.

ERVINE TURNER,
Chief Clerk, Senate.
LOUIS COX,
President pro tempore,
President of the Senate.
BYRON ROYSTER,
Chief Clerk, House.
HOBART RAYBURN,
Speaker of the House.

Approved:

EARLE C. CLEMENTS,
Governor of the Commonwealth of Kentucky.

Attest:

MARY LOU HUBBARD,
Assistant Clerk of the Senate.

ST. LAWRENCE SEAWAY—RESOLUTION BY MILWAUKEE COUNTY (WIS.) BOARD OF SUPERVISORS

Mr. WILEY. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the Milwaukee County (Wis.) Board of Supervisors, endorsing the St. Lawrence seaway.

There being no objection, the resolution was received, ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas there is presently pending before Congress Senate Joint Resolution 111 authorizing necessary governmental action to establish the St. Lawrence waterway; and

Whereas, the best interest of the city and county of Milwaukee and the entire State of Wisconsin will be greatly served by the early establishment of this great project: Therefore be it

Resolved by the County Board of Supervisors of Milwaukee County, Wis., this 27th day of January 1948, That the Representatives in Congress from Milwaukee County and the United States Senators from Wisconsin be, and they are hereby, requested to do all in their power to secure the passage of Senate Joint Resolution 111; and be it further

Resolved, That the county clerk is directed to transmit forthwith certified copies of this resolution to the United States Senators from Wisconsin and the Representatives in Congress from Milwaukee.

ST. LAWRENCE SEAWAY—RESOLUTION BY THE MASSACHUSETTS STATE CIO

Mr. AIKEN. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the Massachusetts State CIO, Industrial Union Council, which has been certified to by J. W. Belanger, secretary-treasurer, relating to the St. Lawrence seaway and power project.

There being no objection, the resolution was received, ordered to lie on the table, and to be printed in the RECORD, as follows:

MASSACHUSETTS STATE CIO INDUSTRIAL UNION COUNCIL RESOLUTION ON ST. LAWRENCE SEAWAY AND POWER PROJECT

"Whereas we, as rank and file citizens of New England, cannot and will not sit idly by and see the region in which we work and have our homes lose ground economically to other sections of the country; and

"Whereas at one time it was true in large measure that many of New England's industries migrated to other sections of the country where lower wages prevailed, this condition no longer prevails to any extent, and it is now painfully evident that other causes are responsible for the contraction of employment opportunities in this section of the country; and

"Whereas the fact stands out that costs of electric power, both for industrial and domestic use, are higher in New England than anywhere else in the United States; the cost of purchased electric energy per kilowatt-hour was 1.03 for the country as a whole but 1.35 for New England; the cost of power in certain Southern States, which are in direct competition with New England, is roughly about half of what it is here; and

"Whereas all other types of essential fuel are more expensive in New England than elsewhere; the average cost per B. t. u. of fuel used in manufacturing industry in the United States is 15.8 but costs 20.8 cents in New England. These differentials are now proving to be important, and often controlling, factors in causing the relocation or contraction of various types of industrial establishments in this region; and

"Whereas New England must have cheap and adequate transportation, especially with the Midwest, because as a manufacturing region we buy both raw materials and foodstuffs from distant points and then reship finished products; and

"Whereas the St. Lawrence seaway and power project would bring into use the largest single undeveloped block of hydroelectric power in North America, which will yield more power than all the TVA dams put together and at a lower cost than TVA; and

"Whereas the use of the waterway would eliminate bottlenecks and gradually reduce transportation costs in the region; and

"Whereas electricity developed by the St. Lawrence power project could be delivered economically within a 300-mile radius (which means pretty well all of New England), and would save electric consumers in the region somewhere between $110,000,000 and $150,000,000 per year; and

"Whereas expert analysis of the objections which have been raised against the St. Lawrence project prove to be merely selfish or short-sighted special pleadings by the very same vested interests which are mainly responsible for the present deterioration of our region; and

"Whereas fears expressed by some labor unions that the use of the seaway might mean some loss of employment are also found to be without reasonable foundation: Therefore be it

"*Resolved,* That we hereby endorse the St. Lawrence seaway and power project and urge immediate passage by the Congress of the United States Senate Joint Resolution 111, which would enable this long-deferred and urgently needed undertaking to go forward at once; and be it further

"*Resolved,* That we publicize this action as widely as possible and that copies of this resolution be sent to all Senators and Congressmen from New England, to the President of the United States, and to all others specially interested or concerned."

The above is a true copy of the resolution passed at the convention of the Massachusetts State CIO Industrial Union Council at the Hotel Statler in Boston, December 13–14, 1947.

[SEAL] J. WILLIAM BELANGER,
Secretary-Treasurer.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. CAPPER, from the Committee on Agriculture and Forestry:

S. 2038. A bill to enable the Secretary of Agriculture to conduct research on foot-and-mouth disease and other diseases of animals and to amend the act of May 29, 1884 (23 Stat. 31), as amended, by adding another section; with an amendment (Rept. No. 886).

REPORT OF JOINT COMMITTEE ON LEGISLATIVE BUDGET (REPT. NO. 887)

Mr. GURNEY. Mr. President, on behalf of the senior Senator from New Hampshire [Mr. BRIDGES] from the Joint Committee on the Legislative Budget, I ask unanimous consent to submit a report and minority views, together with a Senate concurrent resolution which was recommended by the Joint Committee on the Legislative Budget. I presume that goes to the calendar.

The PRESIDENT pro tempore. Without objection, the report and minority views will be received and the concurrent resolution will be placed on the calendar.

The concurrent resolution (S. Con. Res. 42) was ordered to be placed on the calendar, as follows:

Resolved by the Senate (the House of Representatives concurring), That it is the judgment of the Congress, based upon presently available information, that revenues during the period of the fiscal year 1949 will approximate $47,300,000,000 and that expenditures during such fiscal year should not exceed $37,200,000,000, of which latter amount not more than $26,600,000,000 would be in consequence of appropriations hereafter made available for obligation in such fiscal year.

LONG-RANGE AGRICULTURAL POLICY AND PROGRAM (REPT. NO. 885)

Mr. AIKEN. Mr. President, from the Committee on Agriculture and Forestry, I ask unanimous consent to submit a report on the long-range agricultural policy and program which was prepared by the subcommittee of the Committee on Agriculture and Forestry, pursuant to Senate Resolution 147. The subcommittee worked many months on the report, it was finally unanimously agreed to, and now I wish to submit it to the Senate. The committee finds itself in a predicament. We find we can get only about 220 copies of the report printed, whereas, up to this morning, the clerk advises me that we have over 3,500 requests for copies. It would be impossible to fill the demand with but 220 copies. I prepared a resolution to authorize the printing of 7,000 additional copies, which I had intended to offer today, in the hope that it could be acted upon this week. We now find that a majority of the Subcommittee on Printing of the Committee on Rules and Administration are out of town, and it will be impossible for some days to hold a hearing to approve the resolution. In the meantime requests for the report are continuing to pile up almost every minute. I know that it was formerly the custom to ask unanimous consent to have copies printed. We have not done that, at least very often, at this session of the Congress. I should like to have the advice of the majority and minority leaders who are present here today, as to just what to do in this predicament. We shall have more requests every day, I am sure, than the number of copies available under the present circumstances. I should like to ask the advice of the Senator from Ohio.

Mr. TAFT. Mr. President, I ask unanimous consent that the resolution may have immediate consideration by the Senate.

Mr. AIKEN. I submit the resolution, and request that it be read.

The PRESIDENT pro tempore. The Chair understands the difficulty involved. The resolution will be read for the information of the Senate.

The resolution (S. Res. 197) was read, as follows:

Resolved, That 7,000 additional copies of the report by the Committee on Agriculture and Forestry on long-range agricultural policy and program be printed for the use of said committee.

The PRESIDENT pro tempore. The Chair is informed that the estimate of cost is about $500. The Chair will assume that it is under $500, which is necessary for the publication through the present action. On that assumption, is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

Mr. TAFT. Mr. President, I understand that the Senator from Arizona [Mr. HAYDEN] has approved the resolution—the only member of the minority on the Committee on Printing—and I think we can speak for the Senator from Illinois [Mr. BROOKS] and the Senator from Indiana [Mr. JENNER] of the majority.

Mr. LUCAS. Mr. President, I certainly am not going to raise any objection, now that the resolution has been adopted, but I do say that the precedent is not a very good one to follow. Naturally, I know something about the report that is being filed. It is a very illuminating document on the long-range policy, and the fact that so many are already inquiring for it indicates the tremendous interest in the report. I certainly shall not object to it.

Mr. AIKEN. Mr. President, I am advised that the cost of printing 7,000 copies will be less than $500, so it is within the rule.

METLAKAHTLANS ON ANNETTE ISLANDS, ALASKA

Mr. BUTLER. Mr. President, I present a report, dated May 3, 1947, made to the Secretary of the Interior by a committee previously appointed by him to consider questions concerning the Metlakahtlans on Annette Islands, Alaska, which I ask may be referred to the Committee on Rules and Administration, with a view to its being printed as a Senate document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. IVES:

S. 2137. A bill to provide for the protection of potato and tomato production from the golden nematode, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. IVES (for Mr. Baldwin):

S. 2138. A bill for the relief of Magdalena Maria Neznik; to the Committee on the Judiciary.

By Mr. GURNEY:

S. 2139. A bill to prevent retroactive checkage of retired pay in the cases of certain enlisted men and warrant officers appointed or advanced to commissioned rank or grade under the act of July 24, 1941 (55 Stat. 603), as amended, and for other purposes; and

S. 2140. A bill to amend section 8 of the Pay Adjustment Act of 1942, as amended, so as to allow certain commissioned warrant officers of the Armed Forces to count other active commissioned service in the computation of service for advancement to certain pay periods; to the Committee on Armed Services.

S. 2141. A bill to amend the act approved August 24, 1935, as amended May 23, 1938, entitled "An act to authorize the erection of a suitable memorial to Maj. Gen. George W. Goethals within the Canal Zone"; to the Committee on Rules and Administration.

By Mr. CAPPER:

S. 2142. A bill to make the Government-owned alcohol plant at Muscatine, Iowa, available for processing agricultural commodities in the furtherance of authorized programs of the Department of Agriculture, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. WATKINS:

S. 2143. A bill to authorize the construction, operation, and maintenance of the Weber Basin reclamation project, Utah; to the Committee on Interior and Insular Affairs.

By Mr. THOMAS of Oklahoma:

S. 2144. A bill for the relief of Ebbie Kirschke; to the Committee on the Judiciary.

S. 2145. A bill to authorize payment to certain heirs of enrolled members of the Seminole Tribe of Indians under act of July 2, 1942 (Public, No. 645, 77th Cong.);

S. 2146. A bill to authorize the Secretary of the Army and to convey by quitclaim deed certain mineral rights in certain lands situated in the State of Oklahoma to Alfred A. Drummond and Addie G. Drummond; and

S. 2147. A bill to amend section 2 of the act of January 29, 1942 (56 Stat. 21), relating to the refund of taxes illegally paid by Indian citizens; to the Committee on Interior and Insular Affairs.

By Mr. BUTLER:

S. 2148. A bill to authorize the transfer to the Attorney General of a portion of the Vigo Plant, formerly the Vigo Ordnance Plant, near Terre Haute, Indiana, to supplement the farmlands required for the United States Prison System; to the Committee on Interior and Insular Affairs.

By Mr. LANGER:

S. 2149. A bill to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the postwar construction of highways, and for other purposes; and

S. 2150. A bill to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the postwar construction of highways, and for other purposes; to the Committee on Public Works.

S. 2151. A bill to increase the pay of postoffice employees in the unincorporated territory of Puerto Rico; to the Committee on Post Office and Civil Service.

By Mr. LANGER (for himself and Mr. BALDWIN):

S. 2152. A bill to increase the maximum travel allowance for railway postal clerks and substitute railway postal clerks; to the Committee on Post Office and Civil Service.

By Mr. GEORGE:

S. 2153. A bill to amend section 406 (b) of the Civil Aeronautics Act of 1938, as amended; to the Committee on Interstate and Foreign Commerce.

(Mr. ROBERTSON of Virginia (for himself and Mr. BYRD) introduced Senate Joint Resolution 181, authorizing the President to proclaim the week in which June 6, 1949, occurs as Patrick Henry week in commemoration of the sesquicentennial anniversary of the death of Patrick Henry, which was referred to the Committee on the Judiciary, and appears under a separate heading.)

By Mr. BUTLER (for himself, Mr. BRIDGES, and Mr. BYRD):

S. J. Res. 182. Joint resolution to amend section 138 of the Legislation Reorganization Act of 1946, relating to the legislative budget; to the Committee on Rules and Administration.

PATRICK HENRY WEEK

Mr. ROBERTSON of Virginia. Mr. President, on behalf of the senior Senator from Virginia [Mr. BYRD] and myself, I ask unanimous consent to introduce for appropriate reference a Senate joint resolution authorizing the President to proclaim the week in which June 6, 1949, occurs as Patrick Henry Week, in commemoration of the sesquicentennial of the death of Patrick Henry. The joint resolution is being presented pursuant to a joint Senate resolution of the General Assembly of Virginia. I request that the joint resolution may be printed in the RECORD, accompanied by the letter I wrote to the President of the United States on February 3, and his reply of February 5, indicating that if the proposal were effected it should be by congressional action.

I wish to say, Mr. President, that this is not a move to set aside a week to promote the sale or consumption of any product this country produces, nor is it an effort merely to do honor to a distinguished Virginian. The fame of Patrick Henry is secure in the history of America, but the principles for which Patrick Henry stood are not secure. I have been gratified to observe from the press that communities all over our Nation are having what they are calling Christian mission weeks, in which distinguished preachers are coming into the various communities and asking the people to reappraise their conception of God and the part He plays in human destiny. I think that is a fine thing, and it should be followed up by a reappraisal of representative democracy, which rests upon the ethical teachings of the Bible. We have become the most powerful Nation in the world, but the Senate has just heard our chaplain pray "Let not our hearts become hard." The Chaplain recalls, of course, that it is said of Nebuchadnezzar in the Book of Daniel—

But when his heart was lifted up, and his mind hardened in pride, he was deposed from his kingly throne, and they took his glory from him.

The principles of democracy are now being challenged, and many people in this country do not realize the difference between war, in which we win the right to have freedom, and the necessity of living in peace. All wars must sooner or later end, but peace must be lived, and a peace between nations is no different from peace between individuals. We have free choice between hostility and friendly actions between individuals, and we have it between nations. Our democracy is based upon the principles of friendly action, of neighborly action, of Christian action, and if we are to preserve the greatness which is now ours and the leadership which is awaiting us in a troubled world, we should welcome an opportunity to renew our allegiance to the faith of the fathers, which we can do in no better way than by honoring the memory of the man who was the spark plug of the American Revolution. It was a courageous thing to say in 1775, "Give me liberty or give me death," because at that time it was "touch and go" as to which one the speaker would get.

We got our liberty after 7 years of revolutionary war. We preserved it through the intervening years, but I remind Senators again of the prayer offered in the Senate this morning by the Chaplain, "Let not our hearts become hard."

The PRESIDENT pro tempore. Without objection, the joint resolution will be received and appropriately referred, and without objection the joint resolution and letters will be printed in the RECORD.

There being no objection, the joint resolution (S. J. Res. 181) authorizing the President to proclaim the week in which June 6, 1949, occurs as Patrick Henry Week in commemoration of the sesquicentennial anniversary of the death of Patrick Henry, introduced by Mr. ROBERTSON of Virginia (for himself and Mr. BYRD), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved, etc., That the President is authorized and requested to issue a proclamation designating the week in which June 6, 1949, occurs as Patrick Henry Week, inviting the people of the United States to observe such week, and particularly the day June 6, 1949, as the one hundred fiftieth anniversary of the death of Patrick Henry, in accordance with their religious faith, with appropriate ceremonies which will serve to recall his great contribution to the cause of our national independence and to the establishment of the liberties of the people of the United States.

The letters presented by Mr. ROBERTSON of Virginia were ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON BANKING AND CURRENCY,
February 3, 1948.

The PRESIDENT OF THE UNITED STATES,
The White House, Washington, D. C.

DEAR MR. PRESIDENT: It gives me pleasure to transmit for your consideration Senate Joint Resolution No. 8 of the General Assembly of Virginia, in which our State legislature petitions you to set aside a week in the month of June 1949, to be known as Patrick Henry Week, to the end that appropriate exercises may be held in recognition of his part in laying the foundations of our national freedom.

Last year I introduced a bill to authorize the minting of a Patrick Henry memorial coin as a means of raising funds for the preservation of his home in Charlotte County. However, the Congress yielded to your request to discontinue the authorization of commemorative coins.

I hope that you will share our view that eternal vigilance is the price of liberty; that our future liberty is now being threatened by a totalitarian power and that we can best gird our loins for that conflict by renewing our allegiance to the faith of the founding fathers, among whom in the earliest days of the struggle Patrick Henry was the recognized leader.

Faithfully yours,

A. WILLIS ROBERTSON.

THE WHITE HOUSE,
Washington, February 5, 1948.

Hon. A. WILLIS ROBERTSON,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: The President has asked me to thank you for transmitting to him Senate Joint Resolution No. 8, of the General Assembly of Virginia, requesting that a week in the month of June 1949 be set aside to be known as Patrick Henry Week in recognition of the sesquicentennial of the death of that famous statesman.

May I explain to you that during the last few years the number of requests for the President to designate special days and weeks has increased to a very great extent. Besides this request from you there are at the present time three other requests, each asking that the President by proclamation set aside a particular day or week for general observance. In order to treat all organizations asking for these special proclamations on a basis of exact equality, the President, except in cases of national emergency, follows for the most part a course of limiting his proclamations to those which are authorized by the Congress. Even so, the number of such authorizations, as you know, is very great.

I note that the concluding paragraph of the Senate joint resolution which you forwarded to this office provides for forwarding copies of the resolution to Senators and Members of Congress with the request that they take appropriate action. If the Congress should take this highly appropriate action, I am sure the President would be very happy to comply with any directive thus authorized.

With all good wishes.

Very sincerely yours,

MATTHEW J. CONNELLY,
Secretary to the President.

STATEHOOD FOR HAWAII—AMENDMENTS

Mr. BUTLER (by request) submitted amendments intended to be proposed by him to the bill (H. R. 49) to enable the people of Hawaii to form a constitution and State government and to be admitted into the Union on an equal footing with the Original States, which were referred to the Committee on Interior and Insular Affairs and ordered to be printed.

PRICE OF MILK—CHANGE OF REFERENCE

Mr. TOBEY. Mr. President, I ask unanimous consent that the Committee on Banking and Currency be discharged from the further consideration of the bill (H. R. 3370) to direct the Secretary of Agriculture to support the price of milk at not less than 90 percent of parity, and that it be referred to the Committee on Agriculture and Forestry. This request is made with the concurrence of the chairman of the Committee on Agriculture and Forestry, the senior Senator from Kansas [Mr. CAPPER].

The PRESIDENT pro tempore. Without objection, it is so ordered.

TEMPORARY EXTENSION OF EXPORT CONTROL AND SECOND WAR POWERS ACT—CHANGE OF REFERENCE

Mr. WILEY. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate bill 1807, to provide for the temporary extension of the Export Control Act and title III of the Second War Powers Act, and that the bill be referred to the Committee on Banking and Currency. The request is made after consideration and with the concurrence of the chairman of the Committee on Banking and Currency, which committee is already holding hearings on the matters contained in the bill. My staff has consulted with the staff of the Committee on Banking and Currency, and it is agreeable that that committee take over the hearings on the matter. In fact, such hearings are already being held.

The PRESIDENT pro tempore. Without objection, the Committee on the Judiciary will be discharged from the further consideration of the bill and it will be referred to the Committee on Banking and Currency.

ANASTASIOS P. IONNETOS—INDEFINITE POSTPONEMENT OF BILL

Mr. WILEY. Mr. President, I ask unanimous consent to have Calendar No. 906, Senate bill 129, for the relief of Anastasios P. Ionnetos, indefinitely postponed. The reason for the request is that it has since been discovered that a bill of similar content has already been received from the House and that bill, of course, will be reported by the committee at its next meeting.

The PRESIDENT pro tempore. Without objection, the bill will be indefinitely postponed.

STATE SOVEREIGNTY OVER MINERALS BENEATH WATERS—ADDRESS BY SENATOR McCARRAN

[Mr. KNOWLAND asked and obtained leave to have printed in the RECORD an address entitled "Minerals Beneath the Waters—State Sovereignty—A Vital Question," delivered by Senator McCARRAN at a luncheon meeting of the Colorado Mining Association, at Denver, Colo., on February 7, 1948, which appears in the Appendix.]

THE AMERICAN FARMER—STATEMENT BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD a statement on the American farmer, prepared by him, which appears in the Appendix.]

ADVANTAGES OF EXPORT TO THE MIDDLESEX COUNTY MANUFACTURER—ADDRESS BY ALEXANDER S. KELLER

[Mr. McMAHON asked and obtained leave to have printed in the RECORD an address delivered by Alexander S. Keller at the annual meeting of the Middlesex County Manufacturers' Association, which appears in the Appendix.]

THE PRESIDENT'S CIVIL RIGHTS PROGRAM—SERMON BY DR. E. H. PRUDEN

[Mr. CHAVEZ asked and obtained leave to have printed in the RECORD an article entitled "Truman Hears Praise From Pastor for His Civil Rights Stand," containing the report of a sermon by Dr. E. H. Pruden, pastor, First Baptist Church, Washington, D. C., which appears in the Appendix.]

KANSAS STATE BOARD OF AGRICULTURE RESOLUTIONS ON AGRICULTURAL PROBLEMS

[Mr. CAPPER asked and obtained leave to have printed in the RECORD resolutions adopted at the seventy-seventh annual meeting of the Kansas State Board of Agriculture on January 16, 1948, which appear in the Appendix.]

UNITED STATES INFORMATION SERVICES IN AUSTRIA—LETTER FROM JOHN G. ERHARDT

[Mr. SMITH asked and obtained leave to have printed in the RECORD a letter on the subject of United States Information Services in Austria, addressed to Senator SMITH, which appears in the Appendix.]

REDUCED NUMBER OF STRIKES SINCE ENACTMENT OF TAFT-HARTLEY ACT—EDITORIAL FROM THE ASHEVILLE CITIZEN

[Mr. HOEY asked and obtained leave to have printed in the RECORD an editorial relating to the reduced number of strikes since the adoption of the Taft-Hartley Act, from the Asheville (N. C.) Citizen, which appears in the Appendix.]

JEWISH REFUGEES EN ROUTE TO PALESTINE—ARTICLE FROM PM

[Mr. TAYLOR asked and obtained leave to have printed in the RECORD an article regarding Jewish refugees attempting to enter Palestine, by I. F. Stone, from the newspaper PM of February 2, 1948, which appears in the Appendix.]

STAND BY MR. TRUMAN—ARTICLE BY RICHARD L. NEUBERGER

[Mr. HATCH asked and obtained leave to have printed in the RECORD an article entitled "Stand by Mr. Truman," by Richard L. Neuberger, published in the Oregon Democrat, which appears in the Appendix.]

THE TENNESSEE VALLEY AUTHORITY

Mr. McKELLAR. Mr. President, I send to the desk an article published in the Chattanooga Times of February 2, 1948, quoting Representative KEFAUVER, which article I ask to be printed in full at the end of my remarks. Before it is inserted in full in the RECORD, I am taking the liberty of quoting several statements therefrom. Mr. KEFAUVER is quoted as saying:

> Charges that the "private electric lobby" has adopted a bill being sponsored by Senator KENNETH D. McKELLAR and one of his opponents in the current senatorial race in Tennessee—Senator TOM STEWART—and will use it to make an "all-out effort to sabotage the Tennessee Valley Authority at this session of the Congress," came last night from Representative ESTES KEFAUVER.

This statement is a willful, deliberate, and apparently malicious falsehood. I am sorry we have a man in Congress from Tennessee who would make such a false statement.

Again Congressman KEFAUVER is quoted as saying:

> The "hostile Public Works Committee" of the Senate, KEFAUVER asserted, "will spearhead the assault" upon the TVA.
>
> "The bill to be used for this purpose," KEFAUVER continued, "is the anti-TVA bill sponsored by Senators McKELLAR and STEWART."

Mr. President, I never sponsored an anti-TVA bill in my life. Both of these statements are absolutely false. Again I say I am sorry we have a man in Congress from Tennessee who would make such a false statement.

And again:

> Those forces unfriendly to TVA hope to gain strength by getting behind the continuing attack of Tennessee's senior Senator.

This is an absolutely false statement. Again I say I am sorry we have a man in Congress from Tennessee who would make such a false statement.

Again:

> The idea is to do away with TVA's right to use its receipts in the operation of its power business. As matters stand, TVA makes a yearly report to the Congress and returns a substantial sum to the Treasury annually.

This statement is false, and again I say I am sorry we have a man in Congress from Tennessee who would make such a false statement.

While Lilienthal was the Chairman of the Tennessee Valley Authority, and even before, when he was a member of the board of directors, he managed its affairs without regard to the laws of Congress. During the last war and before it the said Lilienthal sneaked up here from time to time and got amendments to the law passed, some of them secretly and without my knowledge, by which amendments the TVA was taken out of the hands of the United States Government, which owns it, and put in the care and keeping and complete dictatorial control of himself first, and then of his successor, Gordon Clapp. The TVA does make some kind of report to the Government, but during this time of high prices the TVA has made money, and it is being used without regard to the Government's ownership. And Congressman KEFAUVER defends this way of managing it.

Here is the way he speaks of the Government's interest in the TVA:

> TVA's accounts are audited by the General Accounting Office and by private firms, and not 1 penny has been misused.

Is it not remarkable how much information and knowledge a man acquires when he serves in Congress a little while and becomes a candidate for United States Senator? KEFAUVER knows no more about how this money has been used than he knows about the duties of Senator or Representative, and certainly his knowledge of the duties of the services in both these places is infinitesimal.

The Treasury Department is doing a valuable work for the Government, but it comes to Congress to get its appropriations. So does the State Department. So does the Department of the Army and the Department of Navy. So does every other department of Government. The TVA is unique in not paying its money over to the Government and not making a request of the Government for money for the next coming year. Why should it be excepted? All the other departments of Government which collect money pay it into the Treasury of the United States and get their money through Congress to run their departments thereafter. Why should the TVA be left out? It was left out because of the slick, secret machinations of a man who has dishonored the honor and tradition of our American way of doing things during all the time he has been in control as the head of the TVA. Of course, I am speaking of Lilienthal.

The Post Office Department collects an enormous sum from the people and pays it all into the Treasury of the United States. Has it been a failure? It has been one of the Federal Government's greatest successes. Why should the TVA be put on a different basis from all the other departments of Government? The truth is, we have the best Government in the world; so why change it?

The all-wise Congressman next says:

> No electric power system could be operated successfully on that basis. The effect would be to take the control of the TVA from the region it serves and make it a political football for the Appropriations Committees in the Congress. This would seriously blight the future value of this great agency. It would mean the end of the economical and efficient operation which it has carried out in the past.

To show how ignorant the Congressman is, I requote:

> The effect would be to take the control of the TVA from the region it serves and make it a political football for the Appropriations Committees in the Congress.

Dr. A. E. Morgan, the first Chairman of the TVA, was a native of Indiana, I believe. Mr. Lilienthal was born in Morton, Ill. Dr. Harcourt A. Morgan came from Canada, and the present Chairman, Mr. Clapp, was born in Wisconsin. I do not see how that "control" can be considered "local control." But the Government owns the TVA, furnished all the money that went into its building, and the Government, which owns it, ought to have something to say about how it should be run.

I first began my fight to build dams on the Tennessee River in 1916, I believe it was. I made a fight for appropriations for building the dam at Muscle Shoals first. It took us several years, but we finally got Muscle Shoals built. Strange to say, all the time I was in the House and a part of the time I was in the Senate, the late Senator Norris was greatly opposed to the building of the dams on

the Tennessee River. Mr. KEFAUVER was 14 or 15 years old at the time, and I suppose he was up here working for the dams, though I must admit to the people of my State that I do not recall seeing him at that time. If he took any part in what was done during all the weary days we spent working for the improvement of the Tennessee Valley I just cannot remember it to save my life. I believe that in his efforts to get into the Senate he is letting his imagination run away with him.

I think possibly the greatest piece of individual work I have done since I have been in the Congress of the United States, now 37 years, was the creation of the Tennessee Valley Authority and the obtention of the money to build the dams on the Tennessee River and its tributaries. Every dollar of the money has come through the Appropriations Committee of the Senate, of which I am a member, except the money for the original Muscle Shoals Dam, and I believe I had a more active part in getting that money than any other Representative or Senator.

There being no objection, the article referred to by Mr. MCKELLAR was ordered to be printed in the RECORD, as follows:

STEWART'S STAND ON TVA ATTACKED—KEFAUVER SAYS SENATOR WILL AID MCKELLAR IN EFFORT TO "SABOTAGE" AGENCY

Charges that the "private electric lobby" has adopted a bill being sponsored by Senator KENNETH D. MCKELLAR and one of his opponents in the current senatorial race in Tennessee—Senator TOM STEWART—and will use it to make an "all-out effort to sabotage the Tennessee Valley Authority at this session of the Congress" came last night from Representative ESTES KEFAUVER.

The senatorial candidate and Third District Congressman stopped over en route from a campaign tour through middle Tennessee to Washington. He will leave for Washington early this morning.

The Kefauver statement last night is the first time he has taken Senator STEWART to task on TVA legislation since they jumped into Tennessee's red-hot senatorial campaign. He charged the junior Senator with supporting legislation sponsored by Senator MCKELLAR that would have been injurious to the Tennessee Valley had not supporters of the Federal agency, of which he is one, headed it off in the House of Representatives.

MAY OPEN BATTLE

The Kefauver statement here last night is a prelude, perhaps, to a bitter fight that probably will develop in the Tennessee senatorial campaign over the TVA.

The "hostile Public Works Committee," of the Senate, KEFAUVER asserted, "will spearhead the assault" upon the TVA.

"The bill to be used for this purpose," KEFAUVER continued, "is the anti-TVA bill sponsored by Senators MCKELLAR and STEWART.

"Those forces unfriendly to TVA hope to gain strength by getting behind the continuing attack of Tennessee's senior Senator. This measure is basically the same as the one passed several times in the Senate with the support of Senators MCKELLAR and STEWART. The bill never passed the House. It has always been vigorously fought by every Representative in the valley area.

"The idea is to do away with TVA's right to use its receipts in the operation of its power business. As matters stand, TVA makes a yearly report to the Congress and returns a substantial sum to the Treasury annually. TVA's accounts are audited by the General Accounting Office and by private firms, and not one penny has been misused.

"The McKellar anti-TVA bill would require the TVA to come to Congress each year and secure an appropriation for the operation of its power business. Since budget estimates for an appropriation are passed many months before the beginning of a fiscal year, this would mean that TVA would have to estimate a year ahead as to the transmission lines it would have to build; how much coal it would have to buy; whether there would be a drought in the valley; whether tornadoes would blow down transmission lines, and such other imponderables.

"No electric-power system could be operated successfully on that basis. The effect would be to take the control of the TVA from the region it serves and make it a political football for the Appropriations Committees in the Congress. This would seriously blight the future value of this great agency. It would mean the end of the economical and efficient operation which it has carried out in the past."

DIFFICULT TO EXPLAIN

KEFAUVER said, "It'll be difficult to explain" the support of the "amendments to impede TVA by both of Tennessee's Senators and that their opposition places the agency at a disadvantage." But he said that "all previous efforts to hamstring TVA" have failed and that the "grass-roots opposition" cleared the way for TVA forces to win.

"The people will come to TVA's defense again," KEFAUVER continued, "and will win because their cause is right."

The third district Congressman said the Senate Public Works Committee "is planning an investigation of TVA" and that "the investigation is welcome." There have been a number of investigations made of TVA since it started functioning, and all of them have proven that it is "managed excellently and is performing a great service to the Nation and to the area where it is located," he declared.

KEFAUVER said he had been in Montgomery, Dickson, and Rutherford Counties in the past few days and added that "I was very much elated by what I found there—my campaign is progressing very favorably."

It was intimated last night that former State Senator Knox Hutchinson, of Murfreesboro, who has held important offices in the Tennessee Farm Bureau Federation, the Grange, the Rural Electric Cooperative, and the Midsouth Cotton Growers Association, will take over the Kefauver campaign in middle Tennessee. Hutchinson has been a stanch supporter of TVA in all of its fights and became acquainted with KEFAUVER through that activity.

APPROPRIATIONS FOR THE TENNESSEE VALLEY AUTHORITY

Mr. MCKELLAR. Mr. President, on February 2, 1948, I presented to the Senate to be reprinted in the RECORD, as a part of my remarks, a compilation of the history of appropriations made by the Congress of the United States for the Tennessee Valley Authority.

I now present to the Senate and ask that there be printed in the RECORD, as a part of my remarks, a brief statement of the appropriations made since the previous document was printed, as well as a summary of the amounts appropriated, in order to bring up to date the history of appropriations on TVA.

Incidentally, Mr. President, these appropriations show how busy I have been getting appropriations for the Watauga and South Holston Dams in an effort to continue the building of the TVA dams, and there is nothing to show that this money has been used for the building of said dams. Mr. Lilienthal seems to have been opposed to the building of these dams, and his successor, Mr. Clapp, also seems to be opposed to building them, and has not used the appropriations I have secured from the Congress to continue the building of these dams and yet they are giving countenance to the false publications that I am opposed to the building of the Tennessee Valley dams. I am tremendously in favor of the building of the Tennessee Valley dams, but I am tremendously opposed to the two men who have controlled the Tennessee Valley Authority for some time, to wit, Lilienthal and Clapp. They pay no attention to the laws that we pass and are constantly lobbying in their own interest, and do not object to falsifying whenever they think it serves their purposes.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

APPROPRIATIONS FOR FISCAL YEAR 1946

Nine million six hundred and forty-eight thousand dollars, together with the unexpended balance in the Tennessee Valley Authority fund, was the provision for the Tennessee Valley Authority in the Independent Offices Appropriation Act, 1946, approved May 3, 1945 (Public, No. 49, 79th Cong.).

The act states as to construction of the dams: "including the continued construction of Kentucky Dam at Gilbertsville, Ky.; and construction of South Holston Dam and Watauga Dam."

APPROPRIATIONS FOR FISCAL YEAR 1947

Thirty-nine million nine hundred and six thousand dollars, together with the unexpended balance of funds heretofore appropriated, was the provision for the Tennessee Valley Authority in the Government Corporations Appropriation Act, 1947, approved July 20, 1946 (Public, No. 519, 79th Cong.).

The act states as to construction of the dams: "including the construction of South Holston Dam and Watauga Dam," and also includes the following specific proviso: "*Provided*, That of the $39,906,000 appropriated herein, $14,000,000 shall be available for the immediate resumption of work on the Watauga and South Holston Dams."

APPROPRIATIONS FOR FISCAL YEAR 1948

Eighteen million seven hundred thousand dollars, together with the unexpended balance of funds heretofore appropriated, was the provision for the Tennessee Valley Authority in the Government Corporations Appropriation Act, 1948, approved July 30, 1947 (Public, No. 268, 80th Cong.).

The act states as to construction: "including not to exceed $3,253,979 for the construction of South Holston Dam and Watauga Dam and not to exceed $5,000,000 for chemical plant," and also includes the following specific proviso: "*Provided*, That of said unexpended balance, not less than $12,000,000 is to be available for the construction of the Watauga and South Holston Dams."

Under title II of the act, which generally authorizes the corporations to make expenditures within the limits of funds and borrowing authority available and to make contracts and commitments without fiscal year limitations as necessary to carry out their programs, the following exception is stated as to Tennessee Valley Authority:

"Not later than June 30, 1948, and not later than June 30 of each calendar year thereafter, until a total of $348,239,240 has been paid as herein provided, the board of directors of the Tennessee Valley Authority shall pay from net income derived the immediately preceding fiscal year from power operations (such net income to be determined by deducting power operating expenses, allocated common expense, and interest on funded debt from total power operating revenues) not less than $2,500,000 of its outstanding bonded indebtedness to the Treasury of the United States exclusive

of interest, and such a portion of the remainder of such net income into the Treasury of the United States as miscellaneous receipts as will, in the 10-year period ending June 30, 1958, and in each succeeding 10-year period until the aforesaid total of $348,239,240 shall have been paid, equal not less than a total of $87,059,810, including payment of bonded indebtedness exclusive of interest on such bonded indebtedness. Total payments of not less than $10,500,000 shall be made not later than June 30, 1948.

"Amounts equal to the total of all appropriations herein and hereafter made to the Tennessee Valley Authority for power facilities shall be paid by the board of directors thereof, in addition to the total of $348,239,240 specified in the foregoing paragraph, to the Treasury of the United States as miscellaneous receipts, such payments to be amortized over a period of not to exceed 40 years after the year in which such facilities go into operation.

"None of the power revenues of the Tennessee Valley Authority shall be used for the construction of new power-producing projects (except for replacement purposes) unless and until approved by act of Congress."

PAYMENT OF EXCESS PROCEEDS INTO THE UNITED STATES TREASURY

Previous to the provision of the Government Corporations Appropriation Act of 1948 above quoted, Tennessee Valley Authority was empowered by section 26 of the TVA Act to utilize the proceeds derived from power sales and other sources in the conduct of its power business, in the operation of dams and reservoirs, and in the production and disposition of fertilizers.

The preceeds for each fiscal year in excess of the amount considered necessary by Tennessee Valley Authority's Board of directors for section 26 purposes and for expenditures under Public Law 301, Seventy-seventh Congress (alterations or replacements of bridges or other highway or railroad structures) were to be paid into the general fund of the United State Treasury by the end of the calendar year; a continuing fund of $1,000,000 for emergency purposes being excepted.

Prior to July 1, 1944, the total proceeds to Tennessee Valley Authority were so required.

For fiscal year 1945, the proceeds exceeded their requirements for the purposes stated by $12,597,744, and in December 1945 that amount was paid into the Treasury by the Authority.

For fiscal year 1946, the proceeds exceeded their requirements for the purposes stated by $18,836,264. In January 1947 the Authority paid into the Treasury the amount of $10,336,264.

Summary of amounts appropriated for Tennessee Valley Authority

Public Law No.	Name of act	Congress	Amount
77	Fourth deficiency	73d	$50,000,000
412	Emergency	73d	25,000,000
260	Second deficiency	74th	36,000,000
739	First deficiency	74th	39,900,000
121	Second deficiency	75th	40,166,270
534	Independent offices	75th	40,000,000
8	do	76th	39,003,000
459	do	76th	40,000,000
[1] 95	Resolutions (S. J. Res. 285–H. J. Res. 583).	76th	25,000,000
28	Independent offices	77th	79,800,000
179	Resolution (H. J. Res. 194)	77th	40,000,000
353	Third supplemental	77th	47,000,000
422	Fourth supplemental	77th	30,000,000
630	Independent offices	77th	136,100,000
90	do	78th	[2]
358	do	78th	[2]
49	do	79th	9,648,000
519	Government corporations	79th	39,906,000
268	do	80th	18,700,000
	Total amount appropriated		746,223,270

[1] Public resolution.
[2] Unexpended balance only.

A system of 22 dams, 20 hydroelectric generating stations, 10 navigation locks, 5 steam-electric generating stations, and a power-transmission network of more than 6,000 circuit-miles constitute the major elements in the total Tennessee Valley Authority plant investment of $755,935,373 serving these purposes as of June 30, 1946.

The allocation of this investment in accordance with section 14 of the Tennessee Valley Authority Act was $149,116,375 to navigation, $152,817,804 to flood control, $454,001,194 to power.

Scheduled additions to this investment include the following major projects:

Watauga Dam and Reservoir	$29,500,000
South Holston Dam and Reservoir	31,500,000
Hales Bar, raising of dam, lock, and gates	5,200,000
Wheeler, generating units 5 and 6	5,200,000
Fort Loudoun, generating units 3 and 4	4,200,000
Douglas, generating unit 3	2,100,000

DR. FRANK P. GRAHAM

Mr. HOEY. Mr. President, I was temporarily out of the Chamber last Thursday when the distinguished junior Senator from Texas [Mr. O'DANIEL] discussed the President's Civil Rights Committee, and in the course of his discussion he made some comment about Dr. Frank P. Graham, president of the University of North Carolina. The Senator acquitted Dr. Graham of being a Communist, but listed a number of organizations of which he was either a member or with which he had had some connection, which organizations are either Communist-controlled or affiliated with the Communist Party.

In this connection I wish to express my high appreciation to the able junior Senator from Oregon [Mr. MORSE] for his very splendid statement following the statement of the Senator from Texas, in which he paid tribute to the outstanding service of Dr. Graham to his State and Nation, and referred to the fine contribution which he has made to democracy in America.

I thoroughly approve the words of commendation of the Senator from Oregon as to the part which Dr. Graham has played in the life of North Carolina and the Nation. In justice to Dr. Graham, I think it should be said that when the Civil Rights Committee, of which he is a member, submitted its report, the statement was made that several members of the Committee did not agree to many of the recommendations made in that report. Dr. Graham's friends know that he was among those who dissented from the extreme statements and recommendations by the Committee. All who are acquainted with him would know that he does not approve, and would not support, the broadside assault contained in this report on the practices and customs of the South with reference to segregation. Certainly, the Committee, in making its report, should have indicated the names of the members who dissented from the extremely prejudicial and unwise statements and recommendations contained in the report.

Dr. Graham is not only not a Communist but he is a democrat of democrats, and a thoroughly patriotic and devoted American citizen.

DEVELOPMENT OF THE MISSISSIPPI VALLEY—ADDRESS BY GOV. VAL PETERSON

Mr. BUTLER. Mr. President, on January 26 last there was held in the city of St. Louis, Mo., the twenty-ninth annual convention of the Mississippi Valley Association.

One of the principal speakers on that occasion was the Honorable Val Peterson, Governor of Nebraska.

Mr. President, I know this man Peterson. He was the publisher and editor of a small country paper back in 1940 when I was a candidate for the Senate. I invited him to join my staff, and he accepted, foolish as that might have seemed at the time.

Since then it has been my privilege to recommend him to former Governor Dwight Griswold for a responsible place in the Nebraska government, and later for a commission in the Army Air Corps, where he performed with great credit the tasks assigned him, with such efficiency that he returned with the rank of lieutenant colonel. Four of his brothers joined him in volunteering for service abroad in the recent war. One was lost in the landing at Normandy. Another was badly shattered. I know their dear old mother, a widow in a small Nebraska village.

Mr. President, I recite these details for a reason, namely, I wish to present for the record the address made by Governor Peterson at St. Louis, and I call it to the attention my dear friend, the senior Senator from Wisconsin [Mr. WILEY]. Governor Peterson in his speech at St. Louis urging support for the development of the Missouri River Basin, including irrigation and soil conservation, river navigation, and hydroelectric plants, never once mentions the St. Lawrence seaway project.

Governor Peterson, like the rest of us, realizes that we will have a great financial load in completing projects like the Pick-Sloan plan, without taking on projects located in some foreign country, even in Canada, whose people we love. Governor Peterson thinks, as do the rest of us, that we had better get a little further toward completion of pending domestic projects before we take in the whole world.

The Governor's statement, which I ask to be made a part of the record immediately following my remarks, like the statement made a few days ago by the Senator from Ohio [Mr. TAFT] with reference to the St. Lawrence seaway, is along practical lines. The people of Nebraska, and of the West in general, are keenly interested in the development of electric power in connection with our water resources, but we want to be practical, and we would like to see the electric-power possibilities of the Missouri River in actual operation before we start spending hundreds of millions of our money in Canada or elsewhere in the world. I am certain that Members of Congress will be interested in reading the speech of Governor Peterson.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

It is a rare privilege to be here today and to visit with many pioneers in the development of our great Mississippi Basin, men who have rendered outstanding service to this area and to the Nation.

This is my first opportunity to participate in an annual convention of the Mississippi Valley Association. It is a particularly welcome privilege at this time because the people of my State are deeply concerned with soil and water resources development for which this organization stands.

The Mississippi Valley Association has advocated development of river navigation, over a long period. Nebraska has a vital stake in Missouri River navigation.

You have an energetic program dedicated to soil conservation. No State in the valley is more interested and has more to gain than Nebraska in the broadening and intensified national effort to save the soil.

By the way, I wish I could be here for the entire program to hear some of the other addresses that are to follow on particular phases of this great soil-conservation movement, but in my State in some 70 to 80 years, some farmers who have handled the soil poorly have completely ruined it on some farms, and if we continue to neglect the soil in the Middle West for another 80 to 100 years in the manner in which we have neglected it in the past 80 or 90 years, the Middle West, or great portions of the Middle West, are going to look like great portions of China which are eroded beyond all hope of repair, so I would like to hear the distinguished speakers who will speak particularly on that subject.

Control of floods and development of water resources is another high priority interest of the Mississippi Valley Association, as I understand it. The citizens of my State have fought floods and struggled for enough water to survive in an area which often has insufficient rainfall to insure crops.

So we of Nebraska have a community of interests in the work of this organization. Because of climatic conditions our problems differ in some respects from other sections of the Mississippi Valley in which you function, but many of them are mutual.

From the broad viewpoint, we are all working toward a common goal in this vast agricultural belt of the Middle West. It is a good thing we can assemble periodically to examine the progress being made, to solve our problems, and rededicate our efforts toward sure and speedy accomplishment of these objectives.

I have made the statement repeatedly to citizens of Nebraska, and I repeat it here, that the future of Nebraska and the Midwest depends upon the success or failure of the Pick-Sloan plan. We must eliminate the appalling destruction of Missouri Basin floods. We must act to save the topsoil on which we live. We must fully utilize our water resources to minimize drought and maintain maximum farm production.

I am convinced that the Pick-Sloan plan offers a solution to these problems. It is a program which has met the test of public opinion. It is under construction and it is in the most able hands.

What I am saying is not based upon hearsay or wishful thinking, but upon personal experience and association with those who are directing the great Missouri River development program. It has been my pleasure during the last year to be a member of the Missouri Basin Inter-Agency Committee, in my capacity as Governor of Nebraska. This is the coordinating committee which serves to maintain cooperative and coordinated action among the Federal agencies and States directly concerned with the Missouri Basin project.

I have attended many of the monthly meetings since I became a member a year ago. I have seen how the committee performs its job, and I say to you that the Inter-Agency Committee is performing a real coordinating job in an earnest and capable fashion.

I have been impressed over and over again with the fact that it is performing a service of inestimable value to the people and to their Government. It provides a clearing house for the discussion and review of all problems relating to the successful correlation of the work of the Corps of Engineers, the Bureau of Reclamation, the Department of Agriculture, and other interested Federal agencies.

Now it has only been a year or so ago that some people said that it would be impossible for the five Federal agencies involved in the development of the Missouri River basin to cooperate, and I may speak particularly for the five governors that sit upon that committee, 5 out of the 10 who are governors in the States involved, it has only been a year ago that people said that it would be absolutely impossible for them to cooperate.

May I say to you, departing from my script, that Democrats and Republicans alike, we have never differed on anything of importance. We have had our differences, of course, but after we have thoroughly threshed out a problem, we have been able to reach an accord and we have been able to be harmonious and unified in our actions as they are directed toward Washington and toward the other portions of the United States.

Equally important from my standpoint as a State executive is the fact that it gives assurance that the interests of the States and local communities are taken into full consideration in every phase of the basin-wide project. I know that the people of my State are well satisfied—more than that—well pleased, with the progress being made and the unified action of the agencies directly responsible for the work. I believe the same spirit prevails in other basin States. I don't believe it—I know that it prevails in other basin States.

Less than a week ago the Inter-Agency Committee met in the capital of my State, at Lincoln. I witnessed there an impressive example of the type of leadership and coordination which the committee is exercising in the Missouri Valley program. There the committee adopted a coordinated 6-year basin construction program, based upon extensive studies not only by the five participating Federal agencies, but by the States as well.

This program not only presents the work schedule of the Federal agencies, but combines the related development programs of the various basin States. It evidences the fact that the States are ready to make their contribution both in expenditure of funds and in engineering and administrative planning in order to insure the widest possible benefits of the entire basin program in the public interest.

When I say that the future of my State and other basin States depends upon the success or failure of the Pick-Sloan plan, I am deadly earnest. We took a tremendous beating out there in the drought period of the 1930's. The records contain some cold statistics that bear out my declaration that we are fighting for our economic existence.

Look at the Federal census figures and you will find that our State lost 70,000 population in that decade. As a matter of fact, we are still losing population. Our neighbors were also hard hit. When people watch their crops shrivel and their cattle die for lack of water and food, they become discouraged. When this happens year after discouraging year, they are starved out. The State suffers and the Nation loses economically.

It happened in Nebraska, Kansas, the Dakotas, and other Midwest States. Why? Because nature did not provide the necessary rainfall. Because the Government, the States, and the people had not put their ingenuity and engineering skills to work to cope with nature's deficiencies.

We learned some bitter lessons in that experience. We learned that in good years it is wise to prepare for the bad ones. We learned the need to summer fallow, to terrace and contour plow in order to hold the precious moisture where it falls. We learned that where nature provides too little rainfall it is necessary to take the water from our streams and rivers and put it on the land to grow crops.

And there is the reverse side of the picture, too—too much water at times in the form of floods. Our droughts usually come at intervals of several years, sometimes longer. But destructive floods hit us in Nebraska and other Missouri Basin States almost every year. Flood losses in my State last year ran into millions of dollars. Much of the damage was to growing crops. Thirteen Nebraska citizens lost their lives in the floods of 1947. The damage to highways and bridges was enormous and whole communities were cut off from all communication with the outside. Only through widespread civic cooperation and the splendid assistance of the Red Cross were many families, who had lost everything, rehabilitated.

It was my privilege—I don't know that you could call it a privilege—my duties during the time of the flood last June required that I fly over all of Nebraska. They also took me down the entire Missouri River to St. Louis, up the Mississippi to Dubuque, and then up from the confluence of the Des Moines and Mississippi to the capital city of Iowa, Des Moines, and this whole country looked a little bit like country that we were familiar with over in India, General Wheeler, up in the rice area of India, where little mounds of earth stick up, little mounds of earth that divide the rice paddies stick up, and everything else is just one great lake. That is the way western Iowa, the way portions of northern Missouri, parts of Kansas, and the eastern third of Nebraska looked during the height of that flood.

After we had flown down to Washington early in July and appeared there in behalf of the civil functions of the War Department before the subcommittees of the Senate, I flew back over this same area. The flood had subsided and the picture that was to be seen after the flood subsided was much worse than the picture that existed when the flood was in its upper reaches. The picture was much worse because as you flew across Missouri and Iowa you saw great gashes across this beautiful farmland, great gashes that were composed of wide-open cuts of sand and clay and debris, existing over a vast portion of the Midwest and the United States, and this area just can't survive if we permit the destructiveness of that flood to go on year after year after year.

As we strive for greater agricultural and industrial growth in Nebraska we must conquer floods, minimize drought, and conserve the soil through control and development of our land and water resources.

It is a struggle that cuts across State lines. The problem is too great for one State to solve single-handedly. There must be interstate cooperation and help from the Federal Government.

We are, indeed, fortunate in the Missouri Basin today to have all these essentials embodied in the Pick-Sloan basin-development program. We have gone a long way on that program in the last few years because we have a sound plan approved by Congress. We have a high degree of unity among the basin States and between the Federal agencies, and Congress has provided substantial appropriations to carry on the work, and I would like to suggest in that connection, as I told the Senate Subcommittee on Appropriations, I don't believe the United States can afford not to develop the Pick-Sloan plan for the Missouri River Basin. If this great area is to make its contribution to the United

States and to the world, the program must be developed.

The oldest irrigation district in my State is up in the North Platte Valley at Scottsbluff, and is now many years old. That has repaid to the Federal Government and the people of the United States several hundred times—not once, not a dozen, not a hundred—several hundred times the cost of the development of that irrigation project.

I suggested to the Congress that in my judgment the plan should be completed in 10 years because when you don't have a definite objective in terms of years, there is a tendency to fritter away time and money as you diddle along over a long period of years, if I can use that rather improper term.

You might suggest to me, "How can the United States afford the tremendous cost of the plan spread over a 10-year period?" I would like to suggest to you—it doesn't reflect but don't be misled by this statement—I would like to suggest to you that if we can afford to spend $17,000,000,000 all over the world—everywhere for anything any time—we can't afford not to spend $4,000,000,000 developing this great plan for the development of the 10 Middle Western States concerned. [Applause.]

Don't misunderstand. That is not an isolation pronouncement. If I had the time, I would go ahead and give the other part of the speech, and you would understand what I am talking about. The money spent on river development is an investment in a more prosperous Midwest and a more prosperous United States—one in which we will find it more convenient and pleasant to live.

Today we have three important reservoir projects under construction in my State. They are the key units of the Pick-Sloan plan for Nebraska. They are the forerunners of other units which ultimately will give Nebraska more than 1,000,000 acres of new irrigated lands. They will provide widespread flood protection and soil conservation.

Nebraska needs more electric power. It needs the benefits of river navigation, fish and wildlife conservation, and recreational development. We confidently expect to realize all these objectives in the Pick-Sloan plan.

River transportation is an integral part of the Pick-Sloan development program for the Missouri Basin. River navigation will bring increased business and prosperity to the entire basin—a prosperity in which all present common carriers will share.

I am not one who favors government entry or continuation in business fields where private enterprise can operate successfully. At this time, however, I am deeply concerned, and many, many of our people are concerned over the proposal to dispose of the Federal barge lines. Missouri River navigation interests should be on their guard against endorsing any action which would hamstring the development of navigation on the Missouri River. Our primary interest in this regard is to make certain that we are not deprived at this crucial time of pioneering work designed to establish navigation on the Missouri River.

The city of Omaha has earmarked a half a million dollars for building river terminal facilities at that city in anticipation of the development and expansion of river navigation. Other Nebraska cities along the river are preparing to make similar investments. Sioux City, Iowa, has plans for wharf and harbor facilities, as has St. Joseph, and Kansas City already has two municipal river terminals.

Last spring the Federal Barge Lines established regular monthly barge service up to Omaha. When the first barge tied up at the temporary wharf, hundreds of citizens lined the river bank. Businessmen and civic leaders joined in a welcoming ceremony. It was an event long awaited in Nebraska, and our people want to see the service extended and increased.

Business and agricultural interests all along the Missouri from the mouth to the present head of navigation at Sioux City are shaping their plans to encourage and develop river transportation in the interest of cheaper rates on bulk commodity shipments, including grain and other agricultural products.

By the way, last summer, it was my duty along with other governors in this area, to go down to Kansas City to fight to try to get boxcars to move our wheat crop. We didn't get them, and we will be down there next June fighting again for boxcars, and we won't move the wheat market. Here is an opportunity to move that wheat harvest in an economical manner down the river to New Orleans and from there to the steamers.

The point I want to make: where were your boxcars? They were being used to ship grain to your eastern shipyards and other places, tying up cars for weeks at a time and taking them out of the Midwest so we lost them as far as effective transportation was concerned throughout the entire harvest period. That is a problem that this association in a mild way should be interested in, too, because it affects everyone in the 23 States in the Mississippi Basin—I guess, nearly all the 23 States. I better qualify that a little bit.

Nebraska has a broad interest in this whole valley program. We want to see the full benefits of land and water management extended to our sister States in the valley, not alone in the Missouri Valley, but in the Mississippi Valley. Their future growth and prosperity is important and necessary to our own. The rivers belong to all of us. The soil, too, is a national heritage which we must seek to preserve.

What we do with these basic resources will determine in a large measure the future of our inland empire along the Missouri. There is no doubt about the attitude of the valley people. They are determined to see the Pick-Sloan plan carried through to a speedy and successful conclusion.

Thank you.

[Applause.]

Mr. WILEY subsequently said: Mr. President, this morning, when I came into the Chamber, my dear friend the Senator from Nebraska [Mr. BUTLER] was making a few remarks and introducing into the RECORD a speech by the Governor of his State. He asked me to read that speech. I have gone over it. It confirms my position heretofore indicated, that people are looking after their own babies, of course. The speech relates to the Pick-Sloan plan for the development of the Missouri River Basin. I just want to read two paragraphs from that speech, which are very confirmatory of the position I have taken on the tremendous need for the St. Lawrence waterway. This is what was said by the Governor:

> By the way, last summer, it was my duty along with other Governors in this area, to go down to Kansas City to fight to try to get boxcars to move our wheat crop. We didn't get them, and we will be down there next June fighting again for boxcars, and we won't move the wheat market. Here is an opportunity to move that wheat harvest in an economical manner down the river to New Orleans and from there to the steamers.
>
> The point I want to make: Where were your boxcars? They were being used to ship grain to your eastern shipyards and others places, tying up cars for weeks at a time and taking them out of the Midwest so we lost them as far as effective transportation was concerned throughout the entire harvest period. That is a problem that this association in a mild way should be interested in, too, because it affects everyone in the 23 States in the Mississippi Basin—I guess nearly all the 23 States. I better qualify that a little bit.

Just at this point I want to say that we, too, of the Mississippi Basin, in the great inland empire of this country, never expected that those dear friends of ours, who have a deep interest in serving the farmers—and every great farm organization of America is back of the St. Lawrence seaway—would go back on us in this respect.

Mr. BUTLER. It was not really necessary for the distinguished Senator from Wisconsin to read any portion of the speech, because it is already in the RECORD. I hope all Senators will read all the speech. But I am delighted that the Senator read the part that he did, because it expresses what to us, at the moment, is of most importance. We are taking no position against the construction of the seaway, "if, as, and when," but we do want to go ahead with the development of the Missouri Valley and the Mississippi Valley waterways, that will move the bulk of our grain and surplus crops to the sea by way of New Orleans.

Mr. WILEY. Mr. President, I am glad to hear that, but I shall see whether or not the Senator's vote squares with his statement. The proposition now before the Senate is not for the construction of the seaway, in the sense that it appropriates money. What the resolution does is to put in motion the necessary machinery so that we may build up a reservoir of projects, including the St. Lawrence waterway, to have them on hand, as the Senator expresses it, "if, as, and when" the depression or recession comes. In other words, Mr. President, I call the Senator's attention to the fact that not a dollar is asked for here. There is an authorization—to do what? First, to direct the President to create a commission to go into the matter; second, to see what arrangements can be made as to tolls; and third, which is the big thing, to enter into an arrangement with Canada that will make perpetual the utilization of the St. Lawrence waterway by the two nations, and that will not be subject to 1 year's cancellation as it is at the present time. So, Mr. President, I plead with the Senator, I ask him to see that all this measure does is to set up the project, contrary to the position taken by the distinguished Senator from Ohio; whom I am glad to see here, and who says it is not timely. I agree that it is not timely to go into these great national projects from the standpoint of expenditures, but I say it is timely to set them up and to have them ready for an emergency when it comes. So I am glad to have the assurance of my distinguished friend from Nebraska. I shall watch with interest, after he has had time to study the resolution to see what it does, to note the direction his vote takes.

EXEMPTION OF CERTAIN ARMY OFFICERS FROM RETIREMENT PROVISIONS BECAUSE OF AGE

Mr. GURNEY. Mr. President, on February 3 I introduced a bill, now known as Senate bill 2123, to exempt certain officers of the Regular Army and Regular Air Force from the provisions of statutes requiring retirement by reason of age, and for other purposes. I ask unanimous consent that the contents of that bill be printed in the RECORD at this point, together with an explanation of the bill.

There being no objection, the contents of the bill, together with an explanation of the bill, were ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the laws requiring retirement of Regular Army and Regular Air Force officers because of age shall not apply to officers of the Regular Army or Regular Air Force appointed in the grade of General of the Army pursuant to the act of March 23, 1946 (60 Stat. 59). The President may, in his discretion, upon the request of the officer concerned, restore to the active list of the Regular Army or Regular Air Force any officer of the Regular Army or Regular Air Force on the retired list who was appointed in the grade of General of the Army pursuant to the act of March 23, 1946 (60 Stat. 59).

SEC. 2. Officers appointed in the grade of General of the Army pursuant to the act of March 23, 1946 (60 Stat. 59), shall not be counted within the limited number of officers authorized to be serving on active duty in grades above lieutenant general as provided in section 504 of the Officer Personnel Act of 1947 (Public Law 381, 80th Cong.), unless they be serving as Chief of Staff or in command of any territorial or tactical subdivision of the Army or the Air Force.

EXPLANATION OF A LEGISLATIVE PROPOSAL UNDER STUDY

Mr. GURNEY. Mr. President, I am today introducing a bill to exempt our great Generals of the Army from the provisions of law requiring the retirement of Army officers because of age.

An act of this Congress, approved December 14, 1944 (58 Stat. 802), established in the Army the grade of General of the Army, and established in the Navy the grade of Fleet Admiral of the United States Navy. That act limited the number of officers to be appointed in such grades to four Generals of the Army and four Fleet Admirals of the Navy. The act was a wartime measure effective only until 6 months after the termination of the war.

Pursuant thereto, the President of the United States, by and with the advice and consent of the Senate, appointed to such grades the following great military leaders of this war with rank in the order listed: Admiral Leahy, General Marshall, Admiral King, General MacArthur, Admiral Nimitz, General Eisenhower, General Arnold, and Admiral Halsey.

By an act of this Congress approved March 23, 1946 (60 Stat. 59), the President was authorized to appoint to the permanent grade of General of the Army and Fleet Admiral of the United States Navy the officers who had served in these grades under the authority of the 1944 act, and pursuant thereto, the President of the United States appointed our Generals of the Army and Fleet Admirals of the Navy in these permanent grades. This 1946 act further provided that these officers would continue to receive the same pay and allowances authorized for these grades whether or not they were on active duty and whether or not they were on the active list or on the retired list.

The Congress has demonstrated its intent to provide equal treatment and the same rights, privileges, and benefits for the great Army and Navy officers appointed to these five-star grades. It develops, however, that there exists a difference in the laws applicable to generals of the Army and Fleet Admirals of the Navy with respect to mandatory retirement because of age. In the Army, the act of June 30, 1882 (10 U. S. C. 945), requires that all officers of the Army must be retired upon attaining the age of 64 years. On the other hand, in the Navy, the law required the retirement at age 64 of Navy officers "below the rank of vice admiral" and there was no law requiring retirement for age of Fleet Admirals of the Navy. This difference in the retirement laws applicable to the Army and the Navy insofar as they apply to five-star grades was not changed by the revision of Navy retirement laws contained in the act of February 21, 1946 (60 Stat. 26), which specified mandatory retirement for age of officers of the Regular Navy "serving in a rank below that of fleet admiral."

Fleet Admiral King and Fleet Admiral Nimitz have not applied for voluntary retirement. They remain on the active list, available for such special assignments as the President and the Secretary of the Navy may care to give them. Under the provisions of the acts that I have referred to, Admiral Leahy, who was then on the retired list, was appointed a Fleet Admiral of the United States Navy on the active list of the line of the Regular Navy. He has not subsequently requested retirement, and he also continues to hold the status of an officer on the active list of the Navy. Admiral Halsey, however, is on the retired list, having been retired for physical disability.

In the Army, General MacArthur was an officer of the retired list of the Army, serving on active duty at the time of his appointment to the grade of General of the Army. The acts referred to above did not specify that he would be reappointed in that grade on the active list, and he continues to be an officer of the retired list of the Army serving on active duty. General Marshall was retired upon his application, shortly before his appointment as Secretary of State. General Arnold has been retired for physical disability. General Eisenhower is, of course, serving as Chief of Staff, but will shortly leave that position to serve as president of Columbia University.

It is the purpose of the bill which I am today introducing to provide comparable provisions of law with respect to our great military leaders of this war who hold permanent five-star rank. The bill would exempt generals of the Army now on the active list from provisions of law requiring mandatory retirement for age, and, in order to afford equal treatment to generals of the Army heretofore retired, would authorize the President, at the request of such officers, to have their names restored to the active list of the Army.

Since under the law fleet admirals of the Navy are not counted among the limited number authorized to be serving in grades above vice admiral, except when serving in the position of Chief of Naval Operations, this bill would also provide that generals of the Army shall not be counted among the limited number authorized to be serving in grades above lieutenant general unless serving as Chief of Staff of the Army or Air Force, or in command of a tactical or territorial subdivision of the Army or Air Force.

CELEBRATION OF FIFTIETH ANNIVERSARY OF FREEDOM OF CUBA

Mr. IVES. Mr. President, on Thursday last, February 5, on the request of the Senator from Pennsylvania [Mr. MARTIN], the Senate agreed to two concurrent resolutions. The first was Senate Concurrent Resolution 39, providing for a joint session of the Senate and the House of Representatives on Monday, April 19, 1948, in commemoration of the fiftieth anniversary of the victory over Spain. The second was Senate Concurrent Resolution 40, extending the life of the Joint Committee on the Observance and Celebration of the Victory Over Spain.

On the same day on which the Senate acted the House agreed to two concurrent resolutions identical in purpose, being, respectively, House Concurrent Resolution 139 and House Concurrent Resolution 140, which have just been transmitted to the Senate.

Neither House has agreed to the concurrent resolution originating in the other House, and it being necessary that the two Houses must act on the same measures in order for them to become effective, I ask unanimous consent for the present consideration of House Concurrent Resolution 139.

The PRESIDENT pro tempore laid before the Senate House Concurrent Resolution 139, which was read by the Chief Clerk, as follows:

Resolved by the House of Representatives (the Senate concurring), That in commemoration of the fiftieth anniversary of the liberation of Cuba, the two Houses of Congress shall assemble in the Hall of the House of Representatives at 1 o'clock in the afternoon, on Monday, April 19, 1948.

That the joint committee created by House Concurrent Resolution 108, Eightieth Congress, is empowered to make suitable arrangements for fitting and proper exercises for the joint session of Congress herein authorized.

That invitations to attend the exercises be extended to the President of the United States and the members of his Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, the diplomatic corps (through the Secretary of State), the General of the Armies, the Chief of Staff to the Commander in Chief, the Chief of Staff, United States Army, the Chief of Naval Operations, the Chief of Staff, United States Air Force, the Commandant of the Marine Corps, and the Commandant of the Coast Guard, and such other persons as the joint committee shall deem proper.

That the President of the United States is hereby invited to address the American people at the joint session of the Congress in commemoration of the fiftieth anniversary of the liberation of Cuba.

The PRESIDENT pro tempore. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

The PRESIDENT pro tempore laid before the Senate House Concurrent Resolution 140, which was read by the Chief Clerk, as follows:

Resolved by the House of Representatives (the Senate concurring), That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by striking out the last sentence of section 2 (b) and inserting in lieu thereof the following: "The committee shall cease to exist upon the expiration of 30 days after April 19, 1948."

Mr. IVES. Mr. President, I now ask for the present consideration of House Concurrent Resolution 140.

The PRESIDENT pro tempore. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the votes by which Senate Concurrent Resolutions 39 and 40 were agreed to? The Chair hears none, the votes are reconsidered, and the concurrent resolutions will be indefinitely postponed.

SECOND DECONTROL ACT OF 1947—MESSAGE FROM THE PRESIDENT—(H. DOC. NO. 526)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read by the Chief Clerk and referred to the Committee on Banking and Currency.

(For President's message, see today's proceedings of the House of Representatives on p. 1227.)

REPORT OF AIR COORDINATING COMMITTEE (H. DOC. NO. 524)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read by the Chief Clerk, and, with the accompanying report, referred to the Committee on Interstate and Foreign Commerce.

(For President's message, see today's proceedings of the House of Representatives on p. 1227.)

FEDERAL AID TO HIGHWAYS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 525)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read by the Chief Clerk, and referred to the Committee on Public Works.

(For President's message, see today's proceedings of the House of Representatives on p. 1227.)

LEGISLATIVE PROGRAM

Mr. LODGE. Mr. President, I should like to ask the distinguished acting floor leader whether it is correct that there is an understanding that there will be no voting today.

Mr. IVES. That is the understanding of the floor leader, as to measures to which there are objections. The floor leader will ask for the consideration of the calendar very shortly, for action on bills to which there is no objection. If there is any objection there will be no voting.

Mr. LODGE. Then what will be the program after the calendar has been called?

Mr. IVES. The Senate is in recess, and it will presumably continue its consideration of the unfinished business, which is the measure relating to the St. Lawrence seaway.

Mr. LODGE. The Senate will then recess until Thursday. Is that correct?

Mr. IVES. The floor leader is unable to answer that question. The floor leader understands, however, that the Senate is expected to recess until Thursday at the end of today's session.

Mr. WILEY. Mr. President, I have not been consulted with respect to the days on which the Senate shall sit. I think it would be better if the Senate should recess from today until Wednesday, and then from Wednesday until Friday, so as to give time to clean up the discussion of the subject which is before us. Thursday will be Lincoln's birthday. A number of Senators will be away from the Senate on that day making Lincoln Day speeches.

Mr. IVES. Mr. President, in order to clear up the matter, the acting floor leader would point out that it is his understanding that the recess over until Thursday will be purely a perfunctory matter, and since that day is Lincoln's birthday, the Senate will simply meet and recess.

The PRESIDENT pro tempore. Until the following Monday, as the Chair understands.

Mr. IVES. Until the following Monday.

Mr. FLANDERS. Mr. President, will the Senator from New York yield to me?

Mr. IVES. I yield.

Mr. FLANDERS. A most important point is involved in the matter of the days on which the Senate shall meet. A statutory requirement exists that a report from the Joint Committee on the Economic Report, dealing with the subject of grain allocation, must be made to the Senate not later than this coming Friday. I take it the report could be formally presented at the short session on Thursday.

Mr. IVES. Yes.

Mr. FLANDERS. But it must be made on or before Friday.

The PRESIDENT pro tempore. The Senator from Vermont is correct; the report could be made on Thursday.

Mr. LUCAS. Mr. President, will the Senator from New York yield?

Mr. IVES. I yield.

Mr. LUCAS. This is the first moment I have heard that it is proposed that a call of the calendar be had today. Is it the intention of the majority to call the calendar from the beginning?

Mr. IVES. The intention is to request unanimous consent that the calendar be called from the point at which we left off at the last call of the calendar, and consider only those bills to which there is no objection.

Mr. LUCAS. I have no objection to that.

Mr. TAFT. Mr. President, at the request of the senior Senator from Wisconsin [Mr. WILEY], I am proposing that a change be made in the schedule of meetings of the Senate for this week and next. This change, if made, will depart from the program which previously has been announced.

If there is no serious objection, we would plan to meet on Wednesday and on Friday of this week, and then on Tuesday of next week. No business will be done this week, under the general agreement, except for further consideration of the St. Lawrence seaway joint resolution; but apparently Senators who wish to speak will find it more convenient to speak on Wednesday than on Thursday, as I understand from the senior Senator from Wisconsin. So unless there is some substantial objection the Senate will meet on Wednesday and on Friday of this week, and then will go over until Tuesday of next week.

With regard to next week, it was announced that we would take up the Budget resolution and the rent-control bill; but I understand that the distinguished Senator from Nebraska has made some agreement with the minority leader that those measures will not be taken up until the minority members have returned from their pilgrimages throughout the country. I hope we may still be able to start some of that business next week; but we shall keep whatever agreement has been made in that regard.

Mr. LUCAS subsequently said: Mr. President, early in today's session it was announced that the Senate would meet on Thursday and then go over until Monday. I understand now that a change has been made, and that the Senate is to sit on Wednesday and Friday, and next Tuesday.

Mr. TAFT. It is to sit next Tuesday.

Mr. LUCAS. May I count on this as being final?

Mr. TAFT. I understand it is final. The change is made at the earnest request of the Senator in charge of the measure before the Senate. We always like to comply with such requests, if possible.

Mr. LUCAS. I do hope the Senator from Ohio and other leaders on the majority side will remember that we on this side have been very lenient during the past week with the Republicans as they made their pilgrimages out over the country, and of course it is customary for the Democrats to follow. We hope no advantage will be taken of us while we are away, doing our duty as we see it.

Mr. TAFT. The Senator may be sure we shall not do anything against his wishes.

THE CALENDAR

Mr. IVES. Mr. President, sometime ago the acting majority leader [Mr. WHERRY] announced that it would be the policy of the Senate to consider each week on Monday at least that portion of the calendar which had not previously been considered. With that in mind, I ask unanimous consent that the calendar be called, beginning with order number 903, on page 9 of the calendar, where the previous call of the calendar, on February 2, left off, and that only bills to which there is no objection be considered.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will proceed to state the measures on the calendar, beginning with order number 903.

ANTONE G. PINA

The bill (H. R. 3168) for the relief of Antone G. Pina was considered, ordered to a third reading, read the third time, and passed.

DONAT AND LAURA LAROCHE

The Senate proceeded to consider the bill (S. 111) for the relief of Donat and Laura Laroche, which had been reported from the Committee on the Judiciary, with an amendment, on page 1, line 6,

after the words "the sum of," to strike out "$10,000" and insert in lieu thereof "$2,500", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Donat and Laura Laroche, Lawrence, Mass., the sum of $2,500. Such sum represents compensation for the death of their minor child, Clement Laroche, who was fatally injured on July 30, 1940, at Berlin, N. H., when said child was struck by a National Youth Administration motor vehicle, while crossing Upper Main Street in said town of Berlin, N. H.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AUGUST W. DIETZ

The bill (H. R. 1408) for the relief of August W. Dietz was considered, ordered to a third reading, read the third time, and passed.

MRS. ELFREIDA SAKOWSKY PASSANT

The bill (H. R. 648) for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue was considered, ordered to a third reading, read the third time, and passed.

MRS. DAISY PARK FARROW

The bill (H. R. 2350) for the relief of Mrs. Daisy Park Farrow was considered, ordered to a third reading, read the third time, and passed.

RUSTON JAMSETJI PATELL

The bill (H. R. 650) for the relief of Ruston Jamsetji Patell, was considered, ordered to a third reading, read the third time, and passed.

RIYOKO PATELL

The bill (H. R. 928) for the relief of Riyoko Patell, was considered, ordered to a third reading, read the third time, and passed.

FRANCESCO AND NATALIA PICCHI

The bill (H. R. 422) for the relief of Francesco and Natalia Picchi was considered, ordered to a third reading, read the third time, and passed.

FRANCISCO GAMBOA GIOCOECHEA

The bill (S. 511) for the relief of Francisco Gamboa Giocoechea, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Attorney General is authorized and directed to cancel the outstanding warrant and order of deportation, and bond, if any, issued pursuant to sections 13 and 14, of the Immigration Act of May 24, 1924 (U. S. C., title 8, secs. 213 and 214), in the case of Francisco Gamboa Giocoechea of Cascade, Idaho, any provision of existing law to the contrary notwithstanding. From and after the date of enactment of this Act, the said Francisco Gamboa Giocoechea shall not again be subject to deportation by reason of the same facts upon which such warrant and order have issued.

SEC. 2. In the administration of the immigration and naturalization laws, Francisco Gamboa Giocoechea, of Cascade, Idaho, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of March 6, 1927, upon the payment by him of the visa fee of $10 and the head tax of $8. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

MARIA HEDWIG FERESZ

The bill (H. R. 1650) for the relief of Maria Hedwig Feresz was considered, ordered to a third reading, read the third time, and passed.

WILLIAM DUDLEY WARD-SMITH—BILL INDEFINITELY POSTPONED

The bill (H. R. 3088) for the relief of William Dudley Ward-Smith was announced as next in order.

Mr. IVES. Mr. President, I understand that this matter has been taken care of by other processes, and therefore I request that the bill be indefinitely postponed.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MRS. AUDREY ELLEN GOOCH

The bill (H. R. 1078) for the relief of Mrs. Audrey Ellen Gooch was considered, ordered to a third reading, read the third time, and passed.

RECORDS OF MEMBERS OF THE HOUSE OF REPRESENTATIVES

The bill (H. R. 3778) to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25) was considered, ordered to a third reading, read the third time, and passed.

JOSE MARIA GERARDO DE AMUSATEGUI AND RAMON DE AMUSATEGUI

The Senate proceeded to consider the bill (S. 1395) for the relief of Jose Maria Gerardo de Amusategui and Ramon de Amusategui, which had been reported from the Committee on the Judiciary with an amendment, to strike out all after the enacting clause and insert the following:

That notwithstanding the provisions of section 6 of the Immigration Act of 1924, as amended, the Secretary of State is authorized and directed to cause to be issued immigration visas to Jose Maria Gerardo de Amusategui and Ramon de Amusategui, at the earliest date on which numbers are available in the preference category of the immigration quota for nationals of the Philippine Islands; and the Attorney General is authorized and directed to permit the said Jose Maria de Amusategui and Ramon de Amusategui to be admitted to the United States as preference-quota immigrants upon compliance with the applicable laws, not inconsistent with this act, relating to the admission of immigrants to the United States.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXEMPTION OF RICHARD K. PHELPS, SPECIAL ASSISTANT TO THE ATTORNEY GENERAL, FROM THE OPERATION OF CERTAIN STATUTES

The bill (S. 1706) to limit the operation of sections 109 and 113 of the Criminal Code and section 190 of the Revised Statutes of the United States with respect to counsel in certain cases was announced as next in order.

Mr. CONNALLY. Mr. President, may we have an explanation of the bill?

Mr. WILEY. Let the bill be temporarily passed over until I can have an opportunity to look at it.

The PRESIDENT pro tempore. The bill will be temporarily passed over.

Subsequently, at the conclusion of the call of the calendar,

The PRESIDENT pro tempore. Without objection, the Senate will recur to Order No. 919, Senate bill 1706, which was temporarily passed over at the request of the Senator from Wisconsin [Mr. WILEY].

Mr. WILEY. Mr. President, the explanation of this bill is a very simple one. Richard K. Phelps, special assistant to the Attorney General at Kansas City, has been appointed the prosecutor in connection with the so-called fraud cases, and is very well qualified for the position. He has had previous experience. All this bill does is to follow the provisions of other statutes which provide that any public official in the prosecutor's office may not practice his own profession outside his job, the customary provision made. That is the explanation of this particular bill.

The PRESIDENT pro tempore. Is there objection to the consideration of the bill?

Mr. LUCAS. Does this apply only to one individual?

Mr. WILEY. That is correct.

There being no objection, the bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the employment of Richard K. Phelps as an attorney or counselor specially employed, retained, or appointed by the Attorney General or under authority of the Department of Justice, at a compensation not to exceed the rate of $10,000 per annum, to conduct in the western district of Missouri, and in any other judicial district or districts where the jurisdiction thereof lies, any kind of legal proceeding, civil or criminal, including grand-jury proceedings and proceedings before committing magistrates, which district attorneys are authorized by law to conduct, in connection with alleged irregularities in the primary election in the Fourth and Fifth Congressional Districts of Missouri on August 6, 1946, shall not be construed to be employment within the meaning of sections 109 and 113 of the Criminal Code of the United States, as amended (U. S. C., title 18, secs. 198 and 203), or section 190 of the Revised Statutes of the United States (U. S. C., title 5, sec. 99).

BURNETT A. PYLE

The bill (S. 936) for the relief of Burnett A. Pyle was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to

pay, out of any money in the Treasury not otherwise appropriated, to Burnett A. Pyle, of Bradford, Ark., the sum of $6,000, in full satisfaction of his claim against the United States for compensation for personal injuries sustained by him on June 29, 1945, as a result of being knocked to the ground and trampled by a team of mules which he was harnessing and which became frightened when three United States Army planes passed overhead at a very low altitude: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

ESTATE OF JOHN F. HOPPERTON

The bill (H. R. 1788) for the relief of the estate of John F. Hopperton, a minor, deceased, was considered, ordered to a third reading, read the third time, and passed.

CARL W. SUNDSTROM

The bill (S. 981) for the relief of Carl W. Sundstrom was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $92 to Carl W. Sundstrom, on account of money taken from his person and destroyed by prisoners on or about the 2d day of May 1946, during a riot at the United States penitentiary, Alcatraz, Calif.: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a midemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

ISSUANCE OF UNRESTRICTED DEEDS TO ALASKA NATIVES

The Senate proceeded to consider the bill (H. R. 3503) to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs, with amendments.

Mr. SMITH. Mr. President, may we have an explanation of the bill?

Mr. BUTLER. Mr. President, the bill is designed to speed up the process of granting full equality to Indians who are capable of shouldering their responsibility. It provides for granting unrestricted deeds to town-site properties now held by Alaska natives under restricted deeds in the case of any natives who are competent to manage their own affairs. As a safeguard against granting such deeds to incompetent individuals, the Secretary of the Interior is authorized to determine the competency of all applicants.

As passed by the House, the bill would have required the Secretary to issue such deeds to any Alaskan natives who waived in writing any claim to future services from the Federal Government. The Senate committee believed that granting deeds on such a broad unrestricted basis might result in placing deeds in the hands of many incompetent individuals who would promptly sell their holdings and then become public charges. The proposed waiver of all claims to additional services would be of little value in the judgment of the committee, since such services chiefly along the lines of education and health must be given by some public agency anyway to those unable to pay.

There is no money involved. The bill is a further implementation of our general policy of advancing Indians and other natives to a status of full equality as rapidly as possible.

Mr. SMITH. I thank the Senator.

The PRESIDENT pro tempore. The clerk will state the first committee amendment.

The first amendment of the Committee on Interior and Insular Affairs was, on page 1, line 8, after the word "representative", to strike out "(a)."

The amendment was agreed to.

The next amendment was, on page 2, line 1, after the word "or", to strike out "(b) that any such native has renounced, in such written form as the Secretary shall prescribe, any claim to membership in any native tribe, band, or community and any claim to special services from the Federal Government by reason of his being an Alaska native."

The amendment was agreed to.

The next amendment was, on page 2, after line 11, to strike out:

SEC. 2. For the purposes of all Federal laws, treaties, orders, and regulations pertaining to Indian affairs, or to the natives of Alaska as such, any Alaska native who has filed a relinquishment as provided in the preceding section shall, thereafter, be considered a non-Indian and a nonnative, and shall be treated as removed from the operation of any restrictive provisions, special services, or other disabilities or privileges peculiarly applicable to Indians or natives of Alaska; and any person whose status as an Alaska native or Indian under Federal law has been so terminated shall not be eligible to reestablish such status for purposes of Federal surveillance or subsidy as an Alaska native or Indian, by reason of native blood, subsequent inheritance of restricted native lands, subsequent admission to membership in any native tribe, band, or community, or for any other reason.

The amendment was agreed to.

Mr. LUCAS. Mr. President, may I inquire of the Senator from Nebraska whether or not the bill was unanimously reported from the committee?

Mr. BUTLER. It was.

Mr. LUCAS. Is the Secretary of the Interior favorable to the bill?

Mr. BUTLER. Yes.

The PRESIDENT pro tempore. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

TITLE TO CERTAIN LAND IN CHEVERLY, MD.

The bill (H. R. 4115) to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md., was considered, ordered to a third reading, read the third time, and passed.

SELECTION OF SUPERINTENDENTS OF NATIONAL CEMETERIES

The Senate proceeded to consider the bill (S. 1782) to provide for selection of superintendents of national cemeteries from meritorious and trustworthy male members of the armed forces who have been disabled in line of duty for active field service, which had been reported from the Committee on Interior and Insular Affairs with an amendment on page 1, line 4, after the word "trustworthy" to strike out "male", so as to make the bill read:

Be it enacted, etc., That superintendents of national cemeteries shall be selected from meritorious and trustworthy members of the armed forces who have been honorably separated from the service of the United States, and who have been disabled in line of duty for active field service.

SEC. 2. Section 4874, Revised Statutes (U. S. C., title 24, sec. 275), is hereby repealed.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for selection of superintendents of national cemeteries from meritorious and trustworthy members of the armed forces who have been disabled in line of duty for active field service."

BILL PASSED OVER

The bill (S. 1990) to provide a means for the orderly continuation and completion of the Deer Creek and aqueduct divisions of the Provo River project, Utah, was announced as next in order.

Mr. LUCAS. Mr. President, I ask that the bill be passed over.

The PRESIDENT pro tempore. The bill will be passed over.

REVISION OF BOUNDARIES OF THE CARIBOU NATIONAL FOREST IN THE STATE OF IDAHO

The Senate proceeded to consider the bill (S. 1037) to authorize the revision of the boundaries of the Caribou National Forest in the State of Idaho, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 1, line 3, after "That", to insert "the boundaries of the Caribou National Forest are hereby extended to include the following-described lands and,"; on page 3, line 7, to strike out "7" and insert "17"; on page 7, line 22, to strike out the semicolon after the word "quarter", and insert a comma; on page 8, line 5, to strike out the semicolon after the figure "25" and insert a comma; on page 8, line 12, to strike out the semicolon after the figure "18" and insert a comma; and on the same page, line 22, to strike out the semicolon after the word "quarter" and insert a comma, so as to make the bill read:

Be it enacted, etc., That the boundaries of the Caribou National Forest are hereby extended to include the following-described lands and, subject to any valid existing claim or entry, all lands of the United States within the areas hereafter described are hereby added to and made part of the Caribou National Forest, State of Idaho, to be hereafter administered under the laws and regulations

relating to the national forests, and the provisions of the act approved March 20, 1922 (42 Stat. 465), as amended, are hereby extended and made applicable to all other lands within said described areas:

Township 16 south, range 36 east, section 2, lots 1, 2, south half northeast quarter, and southeast quarter; section 12; section 13; section 24, east half; and section 25, east half;

Township 16 south, range 37 east, section 2 section 11; section 14; section 15, south half northeast quarter, southeast quarter northwest quarter, southeast quarter, and east half southwest quarter; section 22, east half, east half northwest quarter, and east half southwest quarter; section 23; section 26, lots 1, 2, 3, 4, north half, north half southwest quarter, and north half southeast quarter; and section 27, lots 1, 2, 3, northeast quarter, east half northwest quarter, northeast quarter southwest quarter, north half southeast quarter.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONVEYANCE OF LAND FOR THE USE OF THE UNIVERSITY OF MARYLAND

The bill (S. 1583) to provide for the conveyance to the State of Maryland, for the use of the University of Maryland, of the northern portion of a parcel of land previously constituting a part of the campus of the university and previously conveyed by the State of Maryland to the United States for the use of the Bureau of Mines, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to convey by quitclaim deed to the State of Maryland, for the use of the University of Maryland, a tract of land in Prince Georges County, Md., described as follows: Beginning at the stone monument that marks the corner formed by the intersection of boundary lines of the lands now or formerly owned by John and Rachel Kelley (liber S. D. H. 332,

folio 113); Sam and —— Buckley (liber 47, folio 325); Charles E., Harry W., James E. and Mary E. McNamee; and the University of Maryland (Maryland Agricultural College, liber C. S. M. 2, folio 294); near College Park, Prince Georges County, Md., and running thence with the line formerly owned by McNamee on the one side and the Bureau of Mines on the other side, south forty degrees forty-seven minutes, four seconds west nine hundred and thirty-nine and forty-six one-hundredths feet to an iron pipe marking what was formerly the Engle-McNamee corner (being part of the north forty-four degrees east two hundred and sixty-two and twenty twenty-fifths perches line of Maryland Agricultural College, liber C. S. M. 2, folio 294); thence north eighty-nine degrees thirty minutes no seconds east until it intersects the east line of the Bureau of Mines property seven hundred and one and eighty-eight one-hundredths feet; thence north no degrees thirty minutes west six hundred and sixty-six and thirty-nine one-hundredths feet to an iron pipe marking the northeast corner of the Bureau of Mines property; thence north sixty-four degrees forty-five minutes twenty-four seconds west ninety-one and seven one-hundredths feet along the University of Maryland (formerly Keiley) line to the point of beginning and containing six and three thousand one hundred and forty-eight ten-one-thousandths acres.

CIVILIAN ATTENDANCE AT SCHOOLS CONDUCTED BY THE ARMY, NAVY, AND AIR FORCE

The Senate proceeded to consider the bill (S. 1801) to authorize attendance of civilians at schools conducted by the Departments of the Army, Navy, and Air Force, and joint service schools, and for other purposes, which had been reported by the Committee on Armed Services, with amendments.

Mr. GURNEY. Mr. President, this bill has to do with allowing civilians to attend service schools. Since the approval of the bill by our committee the Secretary of the Treasury has requested that the Coast Guard come in under the bill. I therefore present an amendment to the bill which I should like to have considered at this time.

The PRESIDENT pro tempore. Is there objection to the present consideration of the amendment offered by the Senator from South Dakota? The Chair hears none. The clerk will first report the committee amendments.

The first amendment was, on page 1, line 4, to insert, after the word "civilians", the words "who are citizens of the United States."

The amendment was agreed to.

The next amendment was, on page 2, line 6, after the parenthesis, to insert ": *Provided*, That not to exceed $50,000 per annum may be expended under the direction of the Secretary of Defense for such purposes under the authority of this act."

The PRESIDENT pro tempore. The Senator from South Dakota offers an amendment to the amendment, which the clerk will report.

The CHIEF CLERK. On page 2, line 8, after the words "Secretary of Defense", it is proposed to insert ", and not to exceed $1,000 per annum may be expended under the direction of the Secretary of the Treasury."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDENT pro tempore. The Senator from South Dakota offers two amendments to the bill, which will be stated.

The CHIEF CLERK. It is proposed, on page 1, at the end of the first sentence, in line 8, to insert a new sentence, as follows: "The Secretary of the Treasury, under such regulations as he may prescribe, is authorized to permit civilians, who are citizens of the United States, including civilian employees of the Federal Government, to attend all schools operated by the Coast Guard"; and on page 2, line 13, after the word "Establishment", it is proposed to insert the words "or to the Coast Guard."

Mr. CONNALLY. Mr. President, may I inquire of the Senator from South Dakota as to the purpose of the bill?

Mr. GURNEY. It is to provide a means whereby outstanding civilian leaders in civic, business, and professional fields may attend service schools of the armed services, and, as a result, be able to render valuable service in the event of another emergency.

Mr. CONNALLY. It includes the Army, Navy, and Air Force?

Mr. GURNEY. Yes; and, with this amendment, the Coast Guard.

Mr. CONNALLY. Is there any compensation to be paid?

Mr. GURNEY. The attendants will receive travel expenses plus the per diem allowed government employees at the time of attendance. The total expenditure is limited to $50,000.

Mr. CONNALLY. Per annum?

Mr. GURNEY. The committee fixed a limitation of $50,000 per annum.

Mr. CONNALLY. That is, for the first year?

Mr. GURNEY. That continues per annum.

Mr. CONNALLY. The second year will it be $100,000?

Mr. GURNEY. Not without further authorization.

Mr. CONNALLY. Is there a limitation on persons who can attend the schools?

Mr. GURNEY. The number is limited by the amount of money. It is $24,500 per annum for 100 civilian students whom the Army may select. The cost to the Air Force would be $16,450. The Navy Department has another limitation which I do not have before me at the moment.

The PRESIDENT pro tempore. The question is on agreeing to the amendments offered by the Senator from South Dakota.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of Defense, under such regulations as he may prescribe, is authorized to permit civilians, who are citizens of the United States, including civilian employees of the Federal Government, to attend all schools operated by the Departments of the Army, Navy, and Air Force, including Joint-Service schools. The Secretary of the Treasury, under such regulations as he may prescribe, is authorized to permit civilians, who are citizens of the United States, including civilian employees of the Federal Government, to attend all schools operated by the Coast Guard. Civilians authorized to attend such schools shall be entitled to receive traveling expenses and per diem in lieu of subsistence, including per diem in lieu of subsistence while in attendance at such schools, in accordance with Standardized Government Travel Regulations, the Subsistence Expense Act of 1926, as amended (5 U. S. C. 821-833), and the act of February 14, 1931, as amended (5 U. S. C. 73a): *Provided*, That not to exceed $50,000 per annum may be expended under the direction of the Secretary of Defense and not to exceed $1,000 per annum may be expended under the direction of the Secretary of the Treasury, for such purposes under the authority of this act. The schools' equipment, billets, and messing facilities may be used for training of, and providing housing and subsistence for, such civilians while attending such schools. Appropriations available to the National Military Establishment or to the Coast Guard may be used for carrying into effect the purposes of this act.

REGULATIONS GOVERNING INQUIRIES IN CONNECTION WITH DISBURSEMENTS BY OFFICERS OF THE ARMY

The bill (S. 1795) to repeal section 1 of the act of April 20, 1874, prescribing regulations governing inquiries to be made in connection with disbursements made by disbursing officers of the Army, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 1 of the act of April 20, 1874 (18 Stat. 33; 10 U. S. C. 174), is hereby repealed.

The PRESIDENT pro tempore. That concludes the calendar.

THE PROVO RIVER PROJECT, UTAH

The PRESIDENT pro tempore. The Senator from Vermont [Mr. AIKEN] is recognized.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from Nebraska.

Mr. BUTLER. Mr. President, I ask unanimous consent for the consideration of Calendar 926, Senate bill 1990, to which the acting minority leader objected a while ago. I do not have the figures here at the moment, but I expect to have them shortly. I can explain the bill.

Mr. LUCAS. The author of the bill, the Senator from Utah [Mr. WATKINS] is here.

Mr. BUTLER. I do not know whether he has the figures in mind.

Mr. LUCAS. Does either of the Senators know what the figures are?

Mr. BUTLER. I know what they are, but I should much prefer to have the Senator from Utah explain the bill.

The PRESIDENT pro tempore. Does the Senator from Vermont yield for that purpose?

Mr. AIKEN. I have no objection, if it will not take long.

Mr. BUTLER. I am sure it will not take over 5 minutes.

Mr. AIKEN. I will yield for that purpose.

The PRESIDENT pro tempore. To whom does the Senator yield?

Mr. AIKEN. I yield to the Senator from Utah for the purpose of explaining the bill.

Mr. WATKINS. I have in mind the general purpose of the bill, but I did not know I would be asked a lot of questions involving figures.

Mr. LUCAS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. LUCAS. What is pending before the Senate?

The PRESIDENT pro tempore. The question before the Senate is the committee amendment to Senate Joint Resolution 111, the St. Lawrence Seaway joint resolution. The Senator from Vermont has the floor and has yielded to the Senator from Utah.

Mr. AIKEN. I yield to permit the Senator from Utah [Mr. WATKINS] to explain the bill with a 5-minute limitation. However, if his explanation is not sufficient to satisfy the Senators who are present today, I should prefer not to yield.

The PRESIDENT pro tempore. The Senator is in control of his own destiny.

Mr. AIKEN. I yield to the Senator for the 5-minute period to which he would have been entitled.

Mr. WATKINS. Mr. President, I cannot state in advance whether my explanation will be satisfactory. The bill is to authorize, in effect, an extension of contracts relating to the Deer Creek and aqueduct divisions of the Provo River project so that construction can be completed in accordance with the general principles of our reclamation laws. The project was started in 1936. It is partially completed. It will furnish a supplemental water supply for a large section in central Utah.

The Bureau of Reclamation has contracts with the Metropolitan Water District of Salt Lake City and other cities in connection with this storage project. A little over a year ago the people who are to repay the cost of the construction of the project signed supplemental contracts increasing by 50 percent their guaranty and their liability. At that time it was felt by the Bureau that costs had advanced about 50 percent, and the project could be finished within that guaranty. But since that time prices have gone up tremendously, to the point that now the contemplated cost has been far exceeded. But the legal liability, under the laws of Utah, of the various entities which have signed the contracts, cannot be expanded any further.

The present proposal is to permit the United States, through the Bureau of Reclamation, to rent water to these subscribers for a period of time, at a rate sufficient to take care of the additional cost. After the additional cost has been paid, the subscribers—the water users—will immediately begin the repayment of the construction cost, under their contracts, and will go right on with the payments under the repayment contracts. The project is about two-thirds completed; but the situation which has developed, due to advancing prices, makes it necessary to proceed in the way now proposed.

The proposal has the unanimous approval of all who are connected with it—the Bureau of Reclamation, the Provo River Water Users' Association, the Metropolitan Water District of Salt Lake City, and the Senate committees which heard the testimony as to the details.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WATKINS. I yield.

Mr. LUCAS. How much will this proposal cost the Department of the Interior?

Mr. WATKINS. It will not cost the Interior Department anything. The cost will come to the people who are to pay for it, and all of it will be repaid. All the water users are able to repay. They are not asking for any deductions.

Mr. LUCAS. I understand it is a self-liquidating project. But are they not requesting money at this time?

Mr. WATKINS. No money is requested in this bill. It may be necessary to have additional appropriations in order to finish the project so that the repayments can begin.

I may say to the Senator that under the contract between the Bureau of Reclamation and these water users, the project is not turned over to them until it is finished. The repayments start when the project is finished and is turned over to the people who have signed the repayment contracts. Of course, if the Bureau cannot finish the project, it cannot be turned over to the users, and they cannot in good conscience be asked to begin to repay until the time when the project is turned over to them.

Mr. LUCAS. Mr. President, will the Senator further yield?

Mr. WATKINS. I yield.

Mr. LUCAS. On page 2 of the report, the second paragraph states, in part:

> At current price levels, which, unfortunately, have continued to rise above the 1946 price levels, it is estimated that the total cost of constructing the Deer Creek division of the project will be $12,300,000. This is $900,000 in excess of the repayment contract obligation of the Provo River Water Users' Association.

I raise the point, who is going to pay the $900,000?

Mr WATKINS. The money will be advanced by the United States, as is done in the case of all these reclamation projects; but it will be repaid by the water users, the Provo River Water Users' Association and the Metropolitan Water District of Salt Lake City.

Mr. LUCAS. If this bill shall be passed, the $900,000 will be advanced at the present time by the Interior Department, under the theory that as soon as the water users begin to pay the money into the Treasury from that district, the $900,000 will be repaid to the Interior Department in Washington; is that correct?

Mr. WATKINS. That is correct. It will be paid in annual rentals. The Interior Department will have the right to negotiate contracts with those who are to rent.

Mr. LUCAS. I take it that the $900,000 is not included in the President's budget.

Mr. WATKINS. No; it is not.

Mr. AIKEN. Mr. President, is the Senator from Utah applying to this project the same principle that is applied to the St. Lawrence seaway project; namely, to have the users pay for it?

Mr. WATKINS. That is done in the case of all these projects; but this is one of the few projects in the United States where, when prices advance, the users are willing to undertake additional liability—in this case increasing by 50 percent their guarantee of liability—in order to take care of the 50-percent increase in prices. Of course the project is not yet finished; but in order to get it finished and supply water to a State where there can be severe droughts, with terrific consequences to the people, we found it necessary to make this provision. The rental contracts will take care of the increased costs.

Mr. AIKEN. Is the Senator from Utah sure that the project will be self-liquidating? I have been asked that question so many times with regard to the St. Lawrence seaway project that I wonder whether we should ask particularly about the self-liquidating feature in regard to other projects.

Mr. WATKINS. This project has back of it the Provo River Water Users' Association, the Metropolitan Water District of Salt Lake City, and the water users of the large district involved.

Mr. AIKEN. I am not questioning it myself, but I should like to have the self-liquidation provisions pointed out. I think studies should be made in the reclamation field, so as to make sure about the self-liquidation features. However, I shall not object to this project.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. WATKINS. I yield.

Mr. CONNALLY. I should like to ask the Senator about the financial condition of the district. Is it now in default?

Mr. WATKINS. No; it is not in default. It has credit on the books, although the payments have not yet started.

Mr. CONNALLY. I congratulate the Senator.

Mr. WATKINS. And they will not be in default. This is one project which will pay out.

The PRESIDENT pro tempore. If there are no amendments to be offered, the question is on the engrossment and third reading of the bill.

The bill (S. 1990) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

> *Be it enacted, etc.*, That in order to provide a means for the orderly continuation and completion of the Deer Creek and aqueduct divisions of the Provo River project, Utah, and for the recovery by the United States of the actual construction cost thereof, the Secretary of the Interior in proceeding with the construction, completion, and administration of said divisions heretofore authorized, subject to the execution of such contracts as the Secretary may deem necessary to maintain existing repayment contracts between the United States, the Provo River Water Users Association and the Metropolitan Water District of Salt Lake City consistent with the interim construction cost recovery plan herein provided, is authorized (a) to deliver water or make project works available therefor, as the case may

be, on terms and at annual rates or other annual charges to be fixed by the Secretary from year to year, calculated to return to the United States (in addition to the cost of operation and maintenance) the actual cost in excess of existing repayment contract liability that may be incurred by the United States in completing said divisions of the Provo River project; and (b) to postpone the commencement of annual construction charge installments under existing repayment contracts: *Provided*, That any such postponement of annual construction charge installments shall in no event operate to delay the commencement of construction charges, as provided by existing repayment contracts, beyond the time when costs that may be incurred by the United States in excess of existing contract liability have been returned to the United States.

MESSAGE FROM THE HOUSE

A message from the House of Representative, by Mr. Chaffee, one of its reading clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 41) relative to the expenses of a delegation to attend the ceremonies in Habana, Cuba, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin, with the exception of certain provisions thereof.

Mr. AIKEN. Mr. President, I shall now discuss the St. Lawrence seaway.

Probably it would be superfluous to state the great, impelling reasons why the project should be completed without delay. Nevertheless, I should like to refresh the memory of my colleagues who are present, while they are present, in one respect.

I think it is a well-known fact that there is a great shortage of power in the United States today, not only in the Northeast, where the St. Lawrence power would be generally used, but also on the Pacific coast we hear of brown-outs; we read of plants closing down in the Mississippi Valley because of shortage of power, and this shortage is growing more acute almost by the hour.

At the end of the war, at the height of the use of power for war purposes, as a nation we were using at the rate of 240,000,000,000 kilowatt-hours annually. On the first of this year we were using at the rate of 300,000,000,000 kilowatt-hours annually, showing an increase of 25 percent in the use of power since VJ-day.

St. Lawrence power is the largest single block of undeveloped power available in North America today. As has been stated, the total development would amount to 2,200,000 horsepower, which is so firm that it would produce 13,200,000,000 kilowatt-hours annually, according to our engineers. Half of this power would belong to Canada; half to the United States. The half that would belong to the United States would be turned over to the State of New York when an agreement has been reached between the Federal Government and the State of New York relating to the distribution of the St. Lawrence power. Such agreement, under the pending joint resolution, would have to protect the rights of the United States and of the several States within economic transmission distances of the proposed power station at Massena, N. Y.

I should now like to show the desperate need of the northeastern part of our country for power. I have already cited instances of how in Vermont plants have had to close during the day and could operate only at night; how we were asked not to use colored lights on the Christmas trees for the children; how a private power company had shut off over 2,000 members of the Washington REA in Vermont, forcing them to rely for power on inadequate Diesel equipment at high cost. I have learned recently that the REA has been able to carry the load. At first the power company asked them to take over the load under a penalty clause in the contract which was signed with them, from 8 a. m. to 4 p. m. The REA had no difficulty in carrying the load during those hours of the day. Then the power company told them that under the terms of the contract they would have to assume the load from 3 p. m. until 11 p. m., which is the time of day when the peak of farm use is highest and when the use for industry usually starts to taper off. The REA has been able to carry this load up to the present time, as I stated. It is costing the REA 3 cents or possibly as high as 4 cents per kilowatt-hour to generate that power for those 2,000 farms up there. I cannot help but feel that the power company is taking advantage of the present situation to discredit the REA as an organization.

I am advised by the REA locally that it is not only shortage of power that is bothering them today but it is shortage of materials needed for line construction.

Until recently it was thought that steel was the bottleneck. Now it develops that aluminum for making conductors is the bottleneck. The reason for this is that the aluminum manufacturers are short of power. Last summer the aluminum manufacturers in the TVA area released some TVA power and relied on their own power. Now the aluminum company is so short of power that it cannot maintain its production schedule. So the evidence continues to pile up to show that private industry cannot supply the power that is needed in these United States of ours, and, moreover, has been shortsighted in this power program.

One might think that the power shortage would be alleviated by the large number of storms which we have had this winter, by the large amount of snow which has fallen. Snow melts and produces water even in the coldest weather, because it melts near the ground. We expect that when the spring floods come we will have power enough in the Northeast for 3 or 4 months. But let me again remind the Senate of what the situation is today in my own State of Vermont. I have before me clippings from newspapers which I received last Saturday. The newspapers were printed on different days last week, but I received them all on Saturday. I should like to read some headings for the record. I read a heading from the St. Johnsbury Caledonian-Record:

New power crisis puts water plants back on night work.

They cannot operate days because there is not power enough.

I read from the St. Albans Messenger of February 5, 1948:

Area power crisis closes six industries. Grain, carbon plants, Rubberoid, Fonda, C. V. Shops, Missisquoi hit.

The article says:

Six industries in St. Albans and all sawmills in the county have been forced to curtail operations or shut down completely because of the critical power shortage, A. W. Peterson, superintendent of the Public Electric Light Co., has announced.

Sawmills that would be getting out building materials with which to build more homes for people in the United States are having to shut down. The article continues:

The industries of the city most affected by the curtailment or the order were St. Albans Grain Co., shut down yesterday—

That is owned by the Corn Products Corp.—

National Carbon and Fonda Container, shut down today; Rubberoid, Saturday and Sunday; Central Vermont Railroad Shops, Friday; and Missisquoi Corp., Monday.

In addition to not receiving any power on these days the six industries will not receive any power over the week end, Saturday and Sunday. Two sawmills and the talc mine at Johnson served by Public Electric suspended operations this morning and no date was given when operations would be resumed.

These six large plants, and all those sawmills that are shut down are located not so far from the site of the proposed development on the St. Lawrence River.

I read from the St. Johnsbury Caledonian of January 31, 1948. The heading is as follows:

Generators may lose oil for power making.

The people up there, in an effort to keep their small industries in operation, have acquired very small, antiquated and obsolete Diesel plants wherever they can find them in the United States, some of them being shipped in from distances up to 1,000 miles or more. They produce high-cost power at best. And the worst of it is that they cannot get oil with which to operate. Some 800,000 gallons of oil have been borrowed from the Navy. It must be returned this spring.

I read from the Newport Express of January 30, 1948. The heading is as follows:

Power situation reported blacker. Burlington plant faces complete shut-down because of lack of oil. Connecting utilities are unable to supply power for Newport lines.

I have here the Montpelier Evening Argus:

Electric generation in northern Vermont down.

That is all the article says. They represent the voice of the power companies and usually go easy on them.

Mr. President, that is the situation we are in today. I cannot understand how people in other parts of this country of ours whom we have helped to obtain

power for their own industries, for their own homes and their own farms, can take the position which some of them do in opposing the development of power for us up in the Northeast. The power companies are making a very unwise, desperate, and costly effort partially to meet the need. They are seeking to put dams across our rivers, flooding the best class I land we have in New England. In one case they propose to destroy over 5,000 acres of class I land to generate 14 million kilowatt-hours of power annually.

We have reached the point, Mr. President, where we cannot afford to destroy some of the highest rated land in the United States and make high-cost power, and let billions of kilowatt-hours run down the St. Lawrence River idly and be wasted.

The reason for this tremendous increase in the use of power is probably known to every Member of the Senate. We have become a Nation of electrified industries. We have built up great chemical industries which use enormous amounts of power. We have built up steel and magnesium and aluminum industries. Aluminum and magnesium must have huge amounts of power—I believe 7 kilowatt-hours to every pound of aluminum. The steel industry has become so electrified that it is the second largest user in the United States today.

Further than that, our factories which wish to continue doing business in a competitive world have to electrify. During the war they could continue on an inefficient basis, but that time is over. They will have to become efficient or go out of business.

Our homes have become electrified. It is true that if the housewife were to do away with her washing machine, her refrigerator, her electric sewing machine, electric fans, and all those things which make life worth living, a huge amount of power could be saved.

Our farms need more and more power to run the ensilage cutters, to saw the wood, to operate the milkers and the milk coolers. We are obliged to cool our milk before 9 o'clock in the morning now, under the board of health rules of Boston and New York. The milk cannot be cooled with ice. It is necessary to use electric coolers.

The many freezers installed on the farms and in communities use a great amount of electricity, and save huge amounts of food for our country and for the world.

I could go on and on enumerating the things that electricity is used for now that it was not used for a few years ago. It has become a vital necessity in our agricultural, domestic, industrial, and professional life.

We need the St. Lawrence seaway for purposes of navigation. I have sat in this Chamber during the debate on this subject and have heard opponents of the seaway argue against it because the project called for only a 27-foot depth in the channel. Why do they argue for huge amounts to be spent on the lower Mississippi on a 12-foot channel? I cannot understand it.

I am for navigation in all parts of the country; but the opponents are not consistent when they say that a 27-foot channel on the St. Lawrence will not be adequate, and at the same time say that we must finish a 12-foot channel in the Mississippi so that grain may be moved down the river. I am for Mississippi River navigation, with two reservations: First, that the Mississippi-Missouri system must not be developed and controlled so as to yield profit to only a few individuals. It should be developed for all the people. Secondly, I believe that the great agricultural regions of Montana, the Dakotas, Wyoming, Colorado, Nebraska, and other States should have first call on the water for their crops. What is left may well be used for power and for navigation.

I am afraid—in fact, I know—that the opposition centered in the immensely wealthy city of New York and vicinity is attempting the old tactics of divide and conquer, when they spread the news all over the Missouri Basin that that system cannot be developed if the St. Lawrence seaway goes through, that we cannot afford to develop both projects. They know better than that. They know that the St. Lawrence development is a self-liquidating development, that it will pay for itself, and is required to pay for itself, whereas we must make direct appropriations—and up to this time have been glad to do so—for the construction of dams in the Mississippi-Missouri Valley Basin.

I should like to say to my friends in the Missouri Valley Basin that those people in New York are simply trying to divide us and put us in the Northeast in the position where we will vote against developments for the Northwest. It is the old divide-and-conquer tactics. The New York opposition is just as much against developing the Missouri Valley Basin for the benefit of the people as it is against developing the St. Lawrence River for the benefit of the people. The fight we are having on the St. Lawrence is not merely a fight for the people of Minnesota, Wisconsin, Michigan, New England, and New York. It is a fight which concerns every part of the country. It is a fight which particularly concerns the Tennessee Valley Authority, the Southwest Power Authority, and the people of the Northwest, because just as sure as the opposition can get the St. Lawrence development down where it wants it, the opposition will proceed with the same tactics against the Tennessee Valley Authority, the REA, and public power wherever it may be found.

We need the St. Lawrence seaway for national security reasons. That has been told us by those who are in the best position to know—General Marshall, General Eisenhower, Admiral Nimitz, and Admiral Leahy, the Joint Chiefs of Staff of a year ago. They know better than do retired generals and admirals what this country needs in the way of security today. Speaking of security, we need a strong Canada. Why is it that those who voted to spend half a billion dollars in Greece and Turkey, a long way from home, oppose spending that amount or less to develop the St. Lawrence? They are not consistent.

I have sat in this Chamber during the past 2 weeks and have heard several Senators give what they seemed to think were adequate reasons for not authorizing the construction of the Great Lakes-St. Lawrence seaway. In my opinion, none of the arguments which have been advanced by the opposition is valid in the slightest degree.

The arguments have all closely followed the minority views of certain members of the Committee on Foreign Relations. Nine members of the Committee on Foreign Relations voted last summer to report the joint resolution favorably. They had heard, over the past 2 years, the proponents and opponents of this development present their cases; and after they had listened to the presentations for and against the seaway, they voted 9 to 4 to recommend its approval.

The committee agreed then not to report it officially to the Senate, however, until the beginning of the second session of the Eightieth Congress, in compliance with the request of the opposing members of the committee, so that they would have time—more than 5 months, in fact—to prepare a minority report.

I may say at the outset that this minority report is a masterful writing job; it shows a high degree of literary skill, and I would say that the members of the Foreign Relations Committee who are opposed to the pending legislation have presented the most favorable views they possibly could have presented for their side of the case.

But, Mr. President, for all of the skill in phraseology, for all the masterful technique employed, for all the new-look this material may, in the eyes of the layman, appear to have, it is still by and large the same old story which we have heard for 20 years.

There is one common theme that runs through this report, just as this theme has permeated the other reports in opposition to the St. Lawrence project. The underlying dominant theme still is delay—and more delay.

In all modesty, I may say that I have been intimately associated with the St. Lawrence project during the entire time I have been in Washington. In the course of these years I have had an opportunity to observe rather carefully the techniques, the methods, and procedures of those who have been and are the real opponents of the project. Without exception, they have all stressed this same theme of delay. For 20 years now, as soon as one study has been made the opposition has suggested that additional studies were needed.

Let them present on the floor of the Senate some project in which the opponents of the seaway are interested. When asked about the details of the project, the chances are 100 to 1 that all of them will not know what they are. Additional study is just what the opposition members of the Senate Foreign Relations Commitee have recommended in the present case.

I am convinced, Mr. President, that this is part and parcel of the philosophy of the railroads and the power companies—the recognized leaders of the opposition to this project.

DIVINE-RIGHT PHILOSOPHY OF RAILROADS

Since the early days of the railroads, from the time they were given grants of

land for the development of our transportation system, they have pursued a divine-right philosophy—that railroads should be the lords and high priests of transportation.

They have waged ceaseless warfare against all competition on land, water, and in the air. They oppose the development of our airports. They oppose appropriating money even for our trunkline highways; and they oppose all waterways, or any form of transportation which they cannot control. Moreover, Mr. President, they have been slow—even criminally slow—in keeping abreast of modern developments in the transportation field. A quarter of a century after radio became available, trains are still plowing into each other and killing people because they do not have ample signal facilities.

For a long time livestock got better service in transcontinental transportation than did human beings. They still get it on some roads.

Finally, when one railroad executive—not under the thumb of the railroad financial barons of Wall Street—tried to bring about equality of opportunity for people it took a major advertising campaign, comparing hogs with humans, to stir the other railroads out of their deep-seated lethargy.

Basically, Mr. President, the railroads are opposed to the St. Lawrence project for the simple reason that this seaway will provide a measure, and only a measure, of competition for the eastern railroads.

UTILITIES FEAR LOW-COST POWER

As for the power companies, their opposition—however veiled or camouflaged it may be—also stems from the fear of competition, and even more basically from the fear of low-cost power.

Ever since this project has been under consideration the power companies have said that the project was not needed because the power companies could meet the needs for electricity.

This point was repeatedly emphasized in 1941, when hearings were held before the House Rivers and Harbors Committee, and yet we all know that there were shortages of energy during the war. In the northeastern part of the United States, within almost a stone's throw of the St. Lawrence seaway, it was impossible adequately to expand war production because of shortage of power.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I do not wish to interrupt the Senator from Vermont, but I desire to ask him if he has had any communication showing if there is anything in the record indicating that the power companies are opposed to the power project.

Mr. AIKEN. Yes. The Rochester Gas & Electric Co. has issued material opposing it. I have received a letter from the president of one of the prominent power companies of New England stating that if we would agree to let them have all the power at the bus bar, not giving any of it to the REA or the municipal plants, the president would withdraw his opposition to it and get behind it and push it.

Mr. IVES. My reason for raising the question is that I have received no objection from any such source.

Mr. AIKEN. The power companies are very clever. As the Senator knows, they have interlocking directorates with the railroads and other interests, and they use those interests as a front. The Rochester Gas & Electric Co., however, has come out into the open. It has issued a pamphlet.

Mr. IVES. I did not receive it.

Mr. AIKEN. Probably too many of them were placed in circulation, and the distribution was stopped. The power companies do not want to take the lead in this opposition, but their representatives are actively opposing the project. I know them by name.

Mr. IVES. I merely wish to point out that I have been given to understand that the power companies are very much in favor of the power development. The Senator's statement was rather surprising to me. I did not quite comprehend it.

Mr. AIKEN. I think they are on record as opposing it.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I should like to say that they are opposed to having it developed as public power. In accordance with a letter which I received from the president of one of the largest New England power companies, they would support it if they could be assured that the power would all be turned over to them, to which I, for one, cannot agree. I think the power belongs to the people. I realize that 90 percent of it would be distributed to existing power lines, but I realize, too, that development of the St. Lawrence seaway would result in a general reduction of rates throughout the Northeast, which is the highest-rate area in the country today.

I now yield to the Senator from Wisconsin.

Mr. WILEY. If I may be permitted to do so, I should like to express a few thoughts in relation to two subjects upon which the Senator has commented.

Several years ago, according to my recollection, there was a great concerted effort by the power companies built upon fear. We had the same problem on the Pacific coast. Since then four of the greatest power companies on the Pacific coast have come into line and have recognized that no matter how we look at the problem, it is national suicide to waste energy. On the Pacific coast it was found that development in a national way did not deprive the power companies of their economic investment.

I am one who has always taken the position that it is not the business of government to sabotage the private investor. As I read the record which developed in the hearings it is plain that there was no intention that if this power be developed on the St. Lawrence River it will or can ultimate in a loss to the private investor. But that does not mean that the private investor can expect to get his uppings, so to speak, from public investment. It means that at long last there is common sense in the picture and that creating wealth does not necessitate destruction of wealth. The private investor who has built up his fortune, put his money into private stocks, and had to pay a large amount of money for flowage rights and taxes, of course, cannot compete with the public, as in the case of the TVA, where they are paying nothing for public money. But the Government did very well by the private investor. He got his money back and received a good return. The result has been that that whole section of the country has been made economically healthy because of that kind of cooperation.

Mr. President, I am for that. I am not for taking away from private industries, most of whom are widows and institutions, that which by saving they have built up, but at the same time I cannot justify the economic waste of great resources, especially when New England, New York, and other sections of the country are hungering for electric power, the great Middle West is looking for an outlet to the sea, and the world is looking for our wheat. There is a chance for men of vision and judgment to get together and build our strength and our wealth.

I should like to comment on one other matter. I agree fully with the distinguished Senator from Vermont [Mr. AIKEN] that the defendants, as I would call the opposition in this case, have been very clever. They have followed the old doctrine that Hitler and others followed—divide and conquer. It will be remembered, Mr. President, that there was placed in the RECORD this morning a speech made by the Governor of Nebraska who wants the Missouri River project developed. The distinguished Senator has brought out how nicely they are dividing those who want to see this country develop its resources. I should like to put into the RECORD the facts as to what it will cost, as compared with the cost of the St. Lawrence seaway. The total estimate is $1,400,000,000.

Mr. AIKEN. That was the early estimate, however. According to the increases in cost, there will probably be a 60-percent increase.

Mr. WILEY. There probably will be. It is expected that only $814,000,000 of that estimate will be repaid by water power. To date there has been $350,000,000 authorized to the Army engineers and $350,000,000 authorized to the Department of the Interior. The estimated expenditures to date are $54,880,000. That is for the fiscal year. That would leave $586,000,000, with no reimbursement on that plan, yet that amount has been authorized, Mr. President. We are asking for authorization in a case in which we are demonstrating beyond any question that the power will pay itself out because there is a market for it. The project will develop 2,200,000 horsepower. The record shows that the so-called opposition—the defendants—admit a minimum return of $15,000,000 on the other project, and that, of course, is short of what is necessary to pay out. But I say again, as I have said many times, admitting that there is a possibility of $15,000,000 yearly income—and we claim there is at least $17,000,000 to $21,000,000

income—we have a shortage of electricity in the East. By the construction of this project we shall have put into the 40,000 or 50,000 farmers of New England an incentive to continue farming. We shall have opened up this great river and built a fourth seacoast for America. We shall have given encouragement to 50,000,000 people who live in that valley. There is a difference of between $4,000,000 and $5,000,000 estimated income in the return from this project when and if it is constructed.

I want to say, Mr. President, that I am not willing to sell America short. If we have a tonnage on the Great Lakes that is three-fourths as large as the total tonnage of the Atlantic and the Pacific combined, what will it be when we have opened up this artery and generated liquid coal for New England?

Mr. IVES. Mr. President will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I am a little curious as to whether the plan of this power development is to bypass New York State.

Mr. WILEY. I did not get the Senator's question.

Mr. IVES. Is New York to get any of the power about which the Senator has been speaking? He has been speaking about New England.

Mr. AIKEN. If there is any plan to bypass New York State I am not aware of it.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. WILEY. I heard the distinguished Senator a few days ago tell us about the income which New York paid and what tremendous wealth it has. I do not think there is any chance in the world of ever bypassing any New Yorker, so far as I have seen.

Mr. IVES. I think not.

Mr. President, will the Senator yield further?

Mr. AIKEN. I yield.

Mr. IVES. In line with the statement of the distinguished Senator from Vermont I gather that what he is planning is not to use existing transmission lines. Or is he planning to use them? Which is it?

Mr. AIKEN. I believe existing transmission lines should be used as far as possible. In fact, I have always thought that high-tension lines should be declared common carriers.

Mr. IVES. The Senator expects to have this done under the Federal Government or the State of New York without having anything to do with existing utility companies which own the present lines of transmission almost entirely.

Mr. AIKEN. If the power is developed in huge quantity, some way will be adequately worked out to distribute it. I understand that between 80 and 90 percent will probably be sold and distributed through existing utilities, and that the balance will be sold to municipal and cooperative lines. But there has been no difficulty in finding means of distributing power in other regions where huge blocks of power have become available.

I say to the Senator from New York that with a great development of this kind, even if no power were ever to leave the State of New York, I would still be in favor of the project because it would be contributing immensely to the wealth of the country. Of course, I think it would be much better, and I want to see other States get some of the power. And the joint resolution before us requires that the rights of the United States and the other States be protected, inasmuch as the project is being constructed with Federal funds. The other day it was agreed that the State of New York will save at least $100,000,000 as a result of the construction of the seaway along with the power project.

Mr. IVES. Mr. President, I think the Senator from Vermont will recall the statement I made on this matter the other day. At that time I pointed out that based on the primary power which will be developed from this source, which will amount to approximately 764,000 horsepower, New York will very likely need all of it or could use all of it. Of course we would not wish to be selfish about it, although I think it very likely that all that power would be needed in New York State, because, as I pointed out, that much power represents about two years of the load growth in the State.

In that connection I did a little checking in regard to the matter of transmission, because I myself realize the force of the point the Senator from Vermont is raising now. I discovered that the cost of transmission of this power, to get it very widely circulated, would be approximately $300,000,000 or $400,000,000 for transmission lines, if current were to be supplied to many of the places which now are expecting to receive it. Of course, if all the current were used locally in northern New York, there would not be such large transmission costs; but obviously it will be desired to supply the power to other locations.

I should like to ask the Senator from Vermont whether he has done any checking along that line.

Mr. AIKEN. Mr. President, it is clear that if other States are to receive any advantage from the St. Lawrence seaway power, they will have to put themselves in a position to take advantage of it.

Mr. IVES. In what way?

Mr. AIKEN. By means of the creation of State power authorities of their own, which will make arrangements to acquire or take over the power at the State border. As I have previously stated, there has been no difficulty along those lines in other regions of the United States, in connection with projects for the generation of electric power. We have the Southwest Power Authority, operating across State lines, the Pacific Power Authority, operating across State lines, and the Tennessee Valley Authority, operating across States lines. I do not know the details, but that is one matter that will have to be worked out and agreed to by the Congress before it can be done. Senate Joint Resolution 111 provides for that procedure.

Mr. IVES. Mr. President, while we are considering this matter, I wish to point out that if this project is to be constructed and if the electric power is to be transmitted to other areas—for instance, to northern Vermont——

Mr. AIKEN. Yes; and, as a matter of fact, northern Vermont is nearer the St. Lawrence project than most of New York State is.

Mr. IVES. Yes. If this power is also to be transmitted to southern New York State, and if new transmission lines are required, the cost of this undertaking, including the transmission lines, in all probability will be at least 50 percent greater, from the standpoint of power costs, than is now contemplated. Therefore, it would be wise to use existing transmission lines, wherever that would be possible.

Mr. AIKEN. Mr. President, does the Senator from New York think the existing transmission lines would refuse to transmit the power at a reasonable cost to the consumers?

Mr. IVES. I have no doubt that they would agree to transmit the power. But I wonder whether plans are being made to have the cooperation of the existing power lines.

Mr. AIKEN. I have no doubt that much of the distribution will be made through the existing transmission lines.

Mr. IVES. Then do I correctly understand that it is planned to cooperate with them?

Mr. AIKEN. Certainly. I have no plans for the building of competing lines and to put the existing lines out of business, if that is what is bothering the Senator from New York or any other Senator.

Mr. IVES. Of course, I am interested in that matter, because the transmission lines will constitute a considerable part of the cost.

Mr. AIKEN. But I do not think the private lines which will transmit the power from the St. Lawrence project should be permitted to charge exorbitant rates for the St. Lawrence project power.

Mr. IVES. I do not know about the situation in Vermont, but I know that the State of New York has a public service commission, and I suppose the State of Vermont has one, too. I point out that our public service commission is rather particular about such things, and I doubt very much whether anyone would be able to get away with anything insofar as keeping the price too high is concerned.

Mr. AIKEN. I hope not.

Mr. IVES. Mr. President, I thank the Senator from Vermont for yielding to me.

Mr. AIKEN. Certainly.

Mr. President, let me say that I have no fear that all the power will not be used to good advantage. As I recall the law, the Federal Power Commission is required to set up regional authorities and to make plans for supplying the power to the residents of those areas. However, it would be only logical for northern New York to use this power, for northern New York is very close to the site of the proposed power plants.

Mr. IVES. Mr. President, I understand that in southern Vermont there already is a surplus of power. Is that correct?

Mr. AIKEN. I think it is correct that there is a surplus of power storage.

Mr. IVES. I do not know that to be so, but that is my understanding.

Mr. AIKEN. That is correct.

Mr. IVES. And I understand that Vermont expects to offset its lack of power in the northern part of the State by using power from the St. Lawrence project, rather than transmitting power from southern Vermont, where there is a surplus.

Mr. AIKEN. No; there is no surplus.

Mr. IVES. Would it be cheaper to transmit the power to northern Vermont from the St. Lawrence project, across northern New York, rather than to transmit it from southern Vermont?

Mr. AIKEN. I think it would be. The power generated in southern Vermont is chiefly used in Boston, Lowell, and Providence, I believe.

Mr. IVES. Mr. President, I am interested in the matter of transmission of the power. It occurs to me that southern Vermont is about as close to northern Vermont as this St. Lawrence power project is to northern Vermont.

Mr. AIKEN. No; southern Vermont is much farther away.

Mr. IVES. How far is it?

Mr. AIKEN. About 150 miles.

Mr. IVES. If the Senator from Vermont will examine the map, I think he will find that it is about that far from Massena, N. Y., to northern Vermont.

Mr. AIKEN. Mr. President, I have no doubt that this project will be worked out in such a way as to be beneficial to New England and also to New York.

Mr. IVES. I do not wish to be selfish about it, Mr. President. I just wonder why Vermont does not use all its own power.

Mr. AIKEN. That is because in the early days Vermont was short-sighted and let a group of Boston people get the power away from Vermont. I hesitate to say that, but that is the truth. The result is that today over half the power generated in my State is exported. At certain times of the year we import power. However, the power we export is sold to southern New England at low rates, whereas the power we import is charged back to us at high rates.

Mr. President, reverting to what the Senator from Wisconsin said about the letter from the Governor of Nebraska and the remarks of the senior Senator from Nebraska, let me say that I am sure the attitude of the senior Senator from Nebraska, toward the St. Lawrence seaway is not shared by the farmers of his State, because every national farm organization which has a membership in Nebraska is on record in favor of the St. Lawrence seaway project. That means the Farm Bureau, the Grange, the Farmers' Union, the National Federation of Milk Producers Cooperatives, and the Council of Farmer Cooperatives. The council is on record only as favoring the development of all river systems, and not any particular one. So I am sure that the farmers of Nebraska and the Dakotas, who today have been unable to ship their wheat, and now find that the price has gone down 50 cents a bushel, are more strongly than ever in favor of the St. Lawrence seaway project, because if it had been in existence they could have loaded their wheat into ships at Duluth or Chicago last fall, and by now could have sold a large part of the wheat they are holding today. In other words, I understand there is an embargo on the shipment of grain from Chicago to the East at this time. It was put on a few days ago, I believe; and certainly there are similar embargoes on the shipment of grain to other parts of the country.

Mr. President, as I said a while ago, much of the opposition to the St. Lawrence seaway stems from the power companies' fear of competition and, even more basically, their fear of low-cost power.

I have said that ever since this project has been under consideration, the power companies have repeatedly said that it is not needed because they can meet the needs for electricity. This point was repeatedly emphasized in 1941, when hearings were held before the House Rivers and Harbors Committee. Yet we all know that during the war there were acute shortages of power. So it was that industries had to migrate to the areas where public-power developments made larger quantities of power available.

During the 1941 hearings, after Frank S. Davis, official representative of the Boston Chamber of Commerce, had said that the St. Lawrence project would hurt New England, he was asked this question: "You mean that giving the people of New England electricity at reasonable rates and taking this overcharge of $97,000,000 a year off of them, would ruin New England?"

Mr. Davis replied: "Yes, I do. I think it would ruin and disrupt the whole area."

Mr. President, it is hard to believe that anybody would make such a statement.

But the real reason for the opposition of the power companies, the real reason why they are opposed to the development of low-cost power in the Northeast is because it would force a general rate reduction in that entire country. I should like to give some comparisons of rates which the people in different parts of the country pay. We find in the economic area which would be served by the St. Lawrence development for instance, the domestic consumers of the Consolidated Edison Co. of New York use 854 kilowatts annually, at a cost of 4.78 cents per kilowatt hour. These figures are all furnished by the Federal Power Commission, and they in return received them from the power companies themselves, as I understand it. The customers of the New Hampshire Public Service Co., use a litle over a thousand kilowatt hours a year per capita, at a cost of 4.02 cents per kilowatt hour. The Central Vermont Public Service Co. customers pay 3.74 cents. The customers of the Narragansett Electric Co. of Rhode Island, pay 4.64 cents per kilowatt-hour, and the customers of the Boston Edison Co. pay 4.58 cents per kilowatt-hour, on an average. The average composite of classes A and B utilities in the six New England States of the St. Lawrence economic area, which does not include Maine, average a payment of 4.25 cents, and use only 979 kilowatt-hours annually.

Compare that with the Tennessee Valley Authority area, and we find that the average customer in the seven TVA States uses 1,562 kilowatt-hours annually at a cost of 2.69 cents, compared with an average of 4.25 cents for New England and New York, while those in the Tennessee Valley Authority itself use 1,831 kilowatt- hours annually at a cost of 1.82 cents per kilowatt-hour.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I feel that in all fairness it should be pointed out that a very substantial part of that differential by which the TVA set-up can produce power so much cheaper for its customers than can these other set-ups and other concerns to which the Senators refer, is due to the fact that TVA has no local tax problem on its hands. From the standpoint of amortization, also, there is a serious question as to how the liquidation of the project has been divided and distributed. There are various and sundry costs involved which apparently are not being included. I am for cheap power. Do not get me wrong on that. I am very strongly in favor of cheap power.

Mr. AIKEN. I am coming to that very soon.

Mr. IVES. But I say to the distinguished Senator from Vermont that in making the comparisons, they should be complete.

Mr. AIKEN. I intend to make them so.

Mr. IVES. It should be shown what the costs would be if all the items of cost were included.

Mr. AIKEN. Mr. President, in regard to the local tax, I would say that the Tennessee Valley Authority pays a percentage of its total income to the communities and States in lieu of taxes. This amounts to more than the power companies ever paid when they were running the country down there, and it does not take into consideration the taxes which the communities receive from increases in industry, so it is true they do not pay taxes; they pay I think 4 percent of the gross income. They started out paying 7 percent, and that has been reduced each year until I think it is 4 percent of the gross income in lieu of taxes. The Hoover Dam development pays very substantial sums to the States out there; I do not know just what the arrangements on Bonneville and Grand Coulee are, but they make a payment in lieu of taxes.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from New York.

Mr. IVES. I thank the Senator from Vermont for yielding. I do not like to keep on interrupting him, but I am trying to get this matter so that it will be on a fairly even keel. The point is not what the previous companies paid in the way of taxes; it is what those companies would have paid in the way of taxes if there had been this development. It is the potential loss in taxes which must be considered.

Mr. AIKEN. I am coming to that, so far as New York State is concerned.

Mr. IVES. I am not thinking about New York, I am thinking about TVA.

Mr. AIKEN. But the fact remains that public power was developed to serve those areas which the private utilities absolutely were not interested in serving at any cost at any time.

Mr. IVES. Mr. President, I apologize again, but I wish to point out that insofar as the New York picture he has painted is concerned, I again say that I have received no communication in any way, shape, or manner in opposition to this power development from any utilities concerns in the State of New York. Possibly it is there; I do not know.

Mr. AIKEN. Yes.

Mr. IVES. But the fact remains, when the Senator is talking about the 4 cents as compared to what it would be at the bus bar up in the St. Lawrence, there is no difficulty in the way of competition insofar as that is concerned. All the power that could be developed by the St. Lawrence power project could be used and would be used in addition to the power now being used there. Furthermore, the public service commission of the State of New York is very strict in denying to public-utility companies of that State permission to earn above and beyond a certain percentage of their investment.

Mr. AIKEN. The Senator from New York was probably right when he said that he had not heard of the power companies opposing the St. Lawrence project, and probably none of us would have heard of it if the Rochester Gas & Electric Co. had not let the cat out of the bag in a pamphlet.

Mr. IVES. I did not know about that.

Mr. AIKEN. I assume that the distribution of that pamphlet was rather restricted. I have a copy of it somewhere.

Mr. IVES. I should like to see it.

Mr. AIKEN. They are definitely opposing it. I should like to say something about the total costs of power in the States within the St. Lawrence economic area as compared with other parts of the country. Of course New York State uses the most power of any State in the Union; for the year 1946, 17,986,000,000 kilowatt-hours, which cost the State users $386,053,800. Connecticut used 2,619,600,000 kilowatt-hours; Maine used something over a billion. I should like to have these figures for all the New England States and the State of New York printed in the RECORD.

The PRESIDING OFFICER (Mr. STENNIS in the chair). Is there objection?

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Estimated sales data, 1946

State	Total kilowatt-hours (thousands)	Total revenues
New York	17,986,088	$386,053,800
Connecticut	2,619,600	61,082,700
Maine	1,002,843	19,986,200
Massachusetts	4,779,314	125,970,600
New Hampshire	538,640	13,472,300
Rhode Island	846,905	22,141,400
Vermont	377,529	9,454,800
Total		638,161,800

Mr. AIKEN. Mr. President, the consumers in the State of Massachusetts used 4,779,000,000 kilowatt-hours at a cost of $125,970,600. Vermont used that year 377,529,000 kilowatt-hours at a cost of $9,454,800. That, I know, has increased tremendously in the last 2 years. Altogether, New York and the six New England States paid for power $638,161,800. The TVA costs would have been $365,920,646 less than what these 7 States paid for power.

The Senator from New York mentioned the fact that the power companies pay taxes. With that I agree. The power companies paid in 1946 all kinds of taxes in these 7 States, and in New York. Out of the $386,000,000 they received for power, they paid $102,987,000 for taxes. In Maine they paid $4,000,000 plus; in New Hampshire, $4,000,000 plus; in Vermont, $1,500,000 plus; in Massachusetts, $31,000,000 plus; in Rhode Island, $4,000,000 plus; in Connecticut $12,000,000 plus, or a total of $161,764,000 in the 7 States.

Deducting the $161,764,000 which they paid in taxes, from the overcharge as compared with the TVA costs of $365,920,646, leaves a difference of $204,156,646, over and above what it would have cost those 7 States at TVA rates, less the amount which the power companies paid in taxes. Two hundred million dollars, Mr. President, is worth fighting for in any corporation's board room.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. The distinguished Senator and myself have no fundamental difference in this argument. We are both in favor of power development. It is simply the question of the approach on which we apparently differ. But I want to point out now that I should like to examine very carefully that $200,000,000 differential, to find what constitutes it, of what it is made up. I think it would be disclosed, if that were done, that perhaps there is a lack of items there in favor of TVA—let us put it that way—which, if they were added to the TVA charge, would cause quite an increase in their costs, in their rates, and in the total amount which the Senator has given.

Another point is this. I do not know anything about the secondary development of TVA. I do not know anything about the steam development there. I do not know whether TVA has any. I suppose it must have some. I am not too well acquainted with that subject. But I do know that insofar as power developments in the northeastern part of country are concerned, even those on the St. Lawrence, they require quite a substantial amount of steam operation in order to keep up the total amount of power necessary to meet the peak load. Some steam operation will be necessary if dependence is to be had on the potential of 1,098,000 horsepower which presumably at peak is to be derived from the St. Lawrence. Unless some of the charges I am talking about are added to the cost I think it will be found that the 1,098,000 potential will not be achieved.

Mr. AIKEN. Mr. President, I think we cannot measure in terms of dollars and cents the immeasurable good which the TVA has done to the seven States in which it is located.

Mr. IVES. I am not criticizing the TVA. I am calling attention to what the differences may be.

Mr. AIKEN. Furthermore, I think if it were put on a dollars-and-cents basis the TVA could pay all the expenses which are now paid by any private utility company in the North, and still sell its power at the same rate at which it sells it now. It is true the TVA up to date has not paid interest. It should pay interest, I believe.

Mr. IVES. Surely.

Mr. AIKEN. At whatever the cost to the Government is.

Mr. IVES. Mr President, I do not think there has been any amortization.

Mr. AIKEN. Yes; there has been a substantial amount of profit made, but it has been turned back into the business for purposes of capital investment. However, we will find, Mr. President, if we examine the records of the private utility companies, that they do not amortize as they ought to either. I think they ought to be made to do so, or the time will come, not a generation hence, when the stockholders of the power companies will find themselves in the same position that the stockholders of many railroads found themselves in a few years ago. In other words, they received good dividends. The companies were really not amortizing their investments, but were paying good dividends.

Mr. IVES. Mr. President, in order to keep the record straight I should like to point out that in the State of New York I do not think there need be too much worry about the point the Senator is just raising. The Public Service Commission of the State of New York is very strict along all those lines.

Mr. AIKEN. I hope the Senator is correct. I wish that every State of the Union had a public service commission that was strict and adequately protected the rights of the public and the investors also. I know that one power company in Vermont was given a hearing a few years ago, and it was brought out that if they were to amortize they would be paying on the amortization for 200 years. Things like that ought not to be permitted to go on.

Mr. IVES. I agree.

Mr. AIKEN. The Tennessee Valley Authority in its operation does not have to pay the service charges which the many small subsidiary companies of holding companies are obliged to pay to them. There is not that item of service charge present in connection with the operations of the TVA. The service charge is the method which the holding companies use in so many cases to skim the milk off the income of their operating companies.

Now, Mr. President, getting back to my remarks, it is a well-recognized fact that if we had gone into the late war without the availability of public power, the war would have lasted much longer and the toll of human life would have been much greater.

Before the war ended we heard much talk about the huge surplus of power this country would have after the end of the war. Again the power companies have been proved wrong. There is a general

and growing shortage of power over the country right now.

I am making these introductory remarks, Mr. President, to show how shortsighted the railroads and power companies have been in the past; to show how wrong they have been on more than one occasion, and to raise the valid question as to whether there is not ample reason to believe that they might be wrong in their opposition to the St. Lawrence seaway and power project.

The Senator from New York [Mr. IVES] referred to the fact that the power companies were not against the project. I have been told by officials of smaller distributing systems that they were not against it; that they wished they had the power development. The president of one system up home, who does not have a holding company over him, is asking the State to go into the power business. The power system itself does not have the money to do it. Officials of small systems have told me they are not against the St. Lawrence project; that they wish they had the power, but they would lose their jobs if they said so—and that I believe to be the fact.

PROPAGANDA TECHNIQUES OF CONFERENCE

At this point I think it is pertinent to this whole question to call attention to the propaganda techniques of the National St. Lawrence Project Conference, headed by Mr. Carroll B. Huntress, who is chairman.

I want to make it clear here and now that this conference is unalterably opposed to the St. Lawrence development. It has collected and spent thousands upon thousands of dollars against the development of the Great Lakes-St. Lawrence Basin.

Because of this fact it should be a matter of concern that much of the propaganda that has been sent out lately by this organization has tried to give the impression that the conference is an unbiased organization, and on occasion, by inference, the impression has been given that the conference might even be an organization that was not opposed to the St. Lawrence. This is usually done by means of an introductory statement attached to a piece of propaganda.

Upon further reading of the propaganda itself, a biased attack against the St. Lawrence project is always revealed. This is insidious propaganda of the worst kind and is never resorted to by those whose cause is just.

TREATY VERSUS AGREEMENT ISSUE

I come now, Mr. President, to a more specific discussion of the minority views of the Senate Foreign Relations Committee members who are opposed to the project.

The first issue raised in the minority views is the one relating to the question of whether or not the legislation should be in the form of a treaty or in the form of an executive agreement. This argument is as old as the proposal itself to develop this project as a public undertaking.

It has been answered time and time again with overwhelming evidence of the validity of making this legislation in the form of an executive agreement. Still the opposition brings out the same old arguments in favor of a treaty.

In 1946, when this matter came before the Senate Foreign Relations Committee in the form of Senate Joint Resolution 104, the greater portion of the testimony admittedly was devoted to a discussion of the economic issues. Nevertheless, considerable time was consumed then on this same constitutional issue of treaty against agreement.

I might add, Mr. President, that this attack on the ground of the constitutional issue has been a piecemeal attack, concentrating first on one provision and then on another of the Canadian-American Agreement of 1941.

In an effort to satisfy the fears of the opposition, the proponents of the project have agreed that certain of these provisions, that had been under attack, could just as well be taken out of the St. Lawrence legislation and left for future consideration. As a result, articles 7, 8, and 9 have been eliminated from the agreement.

Article 7 deals with navigation rights in the Great Lakes-St. Lawrence system. Article 8 relates to diversion of water from the Great Lakes. Article 9 has to do with preservation of the scenic beauty of Niagara Falls. Obviously, these three articles were not really germane to the proposed legislation.

Now again we have the opposition attacking the constitutionality of this legislation. Moreover, it seems peculiarly strange that chambers of commerce on the Atlantic and Gulf coasts, cities, railroads, and other groups of the opposition should profess such great concern over the constitutional and treaty-making powers of the United States Senate.

Why did they not raise the question when private power interests were throwing dams across international waters? I refer to the two dams across the St. Johns River between the State of Maine and the Province of New Brunswick in Canada.

One would be almost led to the conclusion that the membership of these bodies is made up largely of constitutional lawyers, so vociferous has their technical constitutional interest been.

When we strip the fundamental constitutional issue of its technicalities we are confronted with this question:

Can the two Governments—Canada and the United States—construct the St. Lawrence seaway and power project under an agreement which requires approval by only a majority of the two Houses of the Congress? The record shows that, according to the strongest kind of legal precedent, there is every reason to believe that the agreement as it now stands is fully within the power of the Congress to approve, both under the commerce clause of the Constitution and under the Boundary Waters Treaty of 1909. This view is supported by a wealth of legislative precedent. The State Department's legal memorandum to the Senate Foreign Relations Committee in the spring of 1946 is conclusive on this point. It is an exhaustive and thoroughly documented report.

1909 TREATY AUTHORIZES AGREEMENT

With reference to the 1909 treaty as a basis for the legal justification of the legislation now pending before Congress, attention is called to the fact that this treaty, which was consented to by the Senate, explicitly provides that future questions relating to boundary waters between Canada and the United States could be settled either by treaty or by agreement.

Hence, it is held by expert legal authority that the 1941 agreement, as proposed to be amended, comes squarely within the provisions of the 1909 treaty, and that Congress may validly base its approval of the agreement on these provisions if it desires to do so.

For too long the alleged legal bugaboo has been a stumbling block in the path of legislation which, if enacted, would mean the opening of the great midcontinent of North America to ocean shipping, and would provide northeastern United States—a deficit-power area in World War II and now—with a huge block of low-cost hydroelectric power.

The proponents of this legislation believe in the future progress of this Nation, and hold that the proposed St. Lawrence seaway and power will be needed in achieving the anticipated growth of the country.

NATIONAL DEFENSE

Let us consider now, Mr. President, the national defense questions which have been raised by the minority members of the Committee on Foreign Relations.

The opposition makes the point that the projected seaway lies in an area which in the past has traditionally been considered as being relatively immune from hostile attack.

The further point is made that with the development of modern methods of warfare this immunity no longer exists, with the assertion that the seaway is in the most exposed and vulnerable part of the United States except Alaska. This, of course, is based on the advances made in military aircraft and on the newly heralded polar route idea. The whole assumption of the opposition, if carried to a logical conclusion is that air power, plus the atomic bomb, raises an offensive warfare question for which there is no defensive solution. At the present time, I am inclined to agree with this view.

This leads to the inescapable conviction that no place in the United States—or in the world, for that matter—is capable of being defended against these offensive weapons. That being the case, why quibble over whether one place is relatively safer than another?

Inasmuch as the United States already has atomic bombs capable of destroying any other nation, it is certain that we shall not be attacked unless that nation too has atomic bombs. Under those circumstances, bombs can cripple installations on the eastern seaboard, in the Midwest, the South, and the Far West, with almost equal facility. It does not matter, in an age dominated by supersonics, guided missiles, and an array of other weapons capable of raining down out of the stratosphere, whether the

target is somewhere on the St. Lawrence or where it may be.

Furthermore, it is apparent that if an atomic bomb were to be dropped on some installation along the St. Lawrence, as a result of wind drift and other factors in connection with radiation from the bomb, the greater portion of New York State, and possibly southern New England, would suffer seriously from the same bomb.

Let us pursue a little further the suggestions of the opposition. Maj. Gen. Follett Bradley, retired, suggests that the solution is dispersal of facilities, even to the point of placing the most important facilities underground.

I should like to say a word about Maj. Gen. Follett Bradley, retired. The minority report mentions Maj. Gen. Follett Bradley once, and fails to state that he is retired, and thereafter refers to him only as "General Bradley." Of course everyone in the United States knows Gen. Omar Bradley. I think hardly anyone outside the military knows Gen. Follett Bradley, retired. Certainly from reading the minority report no one could know that he was a retired general, and that he is not at the present time, and was not when he gave his testimony, a member of the armed services. He is at liberty to work full time for the opposition to the St. Lawrence seaway if he is so disposed. As a matter of fact, the testimony at the hearings brings out the fact that Gen. Follett Bradley—not Omar Bradley—testified that he began to become a St. Lawrence expert only a short time before the hearings. The records of the United States Congress will show further that he was paid $825; I presume it was for his testimony.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. LUCAS. Can the Senator give us the information for the record as to who paid the general such a high price for his wonderful testimony?

Mr. AIKEN. The National St. Lawrence Project Conference, which is housed in the American Railroad Association Building downtown, and has reported receipts of $18,000 for the period for which it reported, but it undoubtedly has a considerable amount of contributions in the way of personnel, office space, and other expenditures which probably do not appear in its report. This organization brought forward a retired general and a retired admiral. They had every right to do so. The retired general and the retired admiral had every right to testify against the St. Lawrence seaway, even though they became experts only a short time before the hearing and started studying the reports, as General Bradley testified in response to the question of the Senator from Wisconsin [Mr. WILEY].

What I want to bring out is that they were not representing the armed services of the United States. They were not disinterested witnesses, because General Bradley was paid $825 and Admiral Willson was paid $1,000 for the testimony. If that be disinterested testimony, I should like to know what interested testimony would be. I suppose the general would like to know why the admiral was worth $175 more than he was, but he can find that out whenever he has an opportunity.

Maj. Gen. Follett Bradley, retired, suggests that the solution is dispersal of facilities "even to the point of placing the most important facilities underground."

If that be the only solution—and I am not trying to say whether it is or is not—then, how about all of the surface facilities we now have? If these are rendered obsolete, our surface transportation facilities, power plants, and all of the other installations that are so necessary for our economy, either in peace or war, would be crippled.

The further point is made by Gen. Follett Bradley that, for the sake of national security, if additional facilities are to be built, "they should be dispersed toward the south and west." This is defeatism of the rankest kind. It is, in effect, saying that New England and the eastern seaboard cannot expect to expand or grow because it would not be feasible to provide any more transportation or power facilities in that area. This is sectional discrimination of the first order. Does this line of reasoning jibe with the implied assumption of the opposition that no place is 100 percent safe?

As I have pointed out, I am forced to conclude that in atomic warfare one place is about as safe as another.

Does this mean that because of this fear we should stop the march of progress, forthwith abandon all constructive development of the country, and sit back and await the implied day of doom? To follow that course is the surest way to national oblivion whether we have peace or war.

I maintain that the proponents of this project are not ready yet to give up on America. We are not ready to say that there is no hope for peace and no need for constructive expansion and growth in our economy.

In connection with the opposition's discussion of the national defense aspects of this project, considerable emphasis is placed upon the use of such names as Maj. Gen. Follett Bradley, retired, of the United States Air Force—$825—and Vice Adm. Russell Willson, United States Navy, retired—$1,000. I have referred previously to these men.

While these may be imposing military names, it seems to me that the endorsement of the project on the part of the Joint Chiefs of Staff in 1946 in the assertion that the project "would be in the interests of national defense," is ample military authority in behalf of the project.

The strong endorsement of the project by the Secretary of State, George C. Marshall, also an outstanding military figure, lends credence to the worthiness of the proponents' contentions that the project has meritorious national-defense value.

The opponents of the project called attention to the statement of the present Secretary of the Army, Hon. Kenneth C. Royall, before the Senate Foreign Relations Committee.

I quote the statement:

> The Army's position and the War Department's position is that the St. Lawrence seaway is not vital to national defense, but that the project would be helpful to national defense.

The inference is made that the fact that the seaway would be helpful to national defense is not a sufficient reason for going ahead with the project. This is, in my mind, taking advantage of a play upon words which is not too significant. I am satisfied to accept the project on this basis. As a matter of fact, I suppose there are not too many projects in the country that would be labeled vital to national defense. At least it would be difficult to reach harmonious agreement as to what is vital to national defense, even among the military.

Surely I have not claimed, and I think it is reasonable to assume that most of the other proponents of this project would agree with me, that this project is not a super, top, national-defense undertaking without which it would be impossible ever to win a war.

That is, if we use the definition and terminology commonly used by military personnel.

It would be interesting to see how the military people would classify various coal-generating plants, for example. Would they rank these plants as vital to national defense? Would they rank any or all railroad lines as vital to national defense? I doubt it.

The opposition refers to the vulnerability of the seaway not only to bombing but to accidents or to sabotage. I do not think we can say that any place is secure from acts of sabotage. We can say that the seaway is no more vulnerable than many other strategic points.

With reference to accidents, I should like to call attention to the 1941 study of the Department of Commerce which refutes the arguments about accidents and weather as well:

> The engineering plans call for a minimum curvature radius of 5,000 feet which provides for ample visibility around the bends.
>
> Such a channel cannot be called tortuous.
>
> In regard to fog, it happens that fog is far less frequent on the upper St. Lawrence than in New York Harbor, there being 10 days of fog in New York Harbor for every 1 day at Montreal.
>
> In respect to width, the plans call for channels with a minimum width of 450 feet, and the canalized section with a bottom width of 200 feet.
>
> This compares very favorably with, for example, the Hudson River channel up to Albany, which has a normal width of 300 feet, widening to 400 feet in rock cuts.
>
> Furthermore, only a short distance of the seaway will consist of restricted channels.
>
> That the St. Lawrence route holds no terror for seafaring men is indicated by the frequent use made of the existing shallow channel.
>
> In 1938 there were 5,898 through transits by vessels traveling between the Great Lakes and Montreal or points beyond.
>
> These vessels carried 8,285,000 tons of cargo.
>
> A comparison of the accident records of the St. Lawrence and Panama Canals during the prewar years 1935–39, inclusive, indicates that the accident records on the St. Lawrence between Lake Ontario and Montreal, a distance of 183 miles, was much better in fact than that on the Panama Canal.

On the St. Lawrence there were 2.3 accidents per 1,000 transits as compared with 5.7 on the Panama during those 5 years.

The minority views refer to the suggestion that the Panama Canal, for security reasons, be converted into a sea-level channel and adds that if the St. Lawrence seaway were constructed:

One may also well ponder how much money some future President of the United States may request of Congress to convert the St. Lawrence project into a safe, sea-level canal.

In reply I should like to quote from an article in the July 1947 issue of Popular Science magazine, called New Plans For Panama, by Stephen L. Freeland. This is what Mr. Freeland says about the sea-level route:

Deep dredging, as the name implies, calls for digging the sea-level canal to grade in one operation from the present summit level.

This method would eliminate the need for alternate locks and prior construction of flood-control works.

It would, however, call for an awful lot of water to fill the enormously enlarged channel. It would also call for tools that have never been built, though they are not impossible: dredges that could sink spuds and operate buckets under 135 feet of water, for instance.

Mr. Freeland goes on to point out that while the sea-level plans may sound favorable, shipowners, operators, masters, and pilots see plenty wrong with them. He says:

If you drop the level of the canal 85 feet, they (the shipping people) point out, you make a restricted waterway out of the entire channel between Miraflores and Gatun—31 miles of Gaillard Cut instead of the present 7.

And there would be 12 dangerous bends of 20° or more instead of the 2 now in the comparatively easy reaches of Gatun Lake.

In addition, they maintain that the whole canal would be tied up in the event of fog in Gaillard because ships would have no place to wait except in harbors at either end of the canal.

These statements lead one to conclude that the sea-level suggestion may not be so perfect as some would have us believe.

We are faced with the fact that after Hiroshima and Nagasaki it is futile to talk of invulnerable structures anywhere on earth. It makes no difference whether we are talking about the St. Lawrence, Panama Canal, the steam-generating power plants for New York City, the ships, or lines of railroads, or anything else.

In fact, Mr. President, I do not like to think of the development of the St. Lawrence seaway in terms of war, but if we must do so we must realize that the most inviting target which we have in North America is not the St. Lawrence seaway, but the port of New York itself, where there is approximately two and one-half times the amount of generating equipment as would be installed at the dam at Massena; and it is also the greatest terminus of our supply lines to all parts of the world.

The opposition also attacks the question of whether or not the protected route over the St. Lawrence is a factor of national defense. I cannot foresee what will happen in the future. The only evidence I have to go on is the experience of the last war when thousands of lives were lost in sinkings by German submarines along the Atlantic coast of the United States from the Gulf of Mexico to the North Atlantic.

It has been reliably reported that 6,000 American sailors and 400 ships were lost along the Atlantic seaboard during the last war. Many of those losses could have been averted if the seaway had been in use.

As for the claim that submarines are more deadly in the Gulf of the St. Lawrence than in some other waters, it is only logical that it would be easier to protect waters in a concentrated area from submarines than it would be to protect waters over the wide expanse of the Atlantic seaboard.

In discussing the question of the seaway being ice-bound a part of the year, one would gather from the statements of the minority report that the seaway, if completed, would become the major transportation facility for that area. This is a wholly erroneous assumption. It is like trying to put the cart before the horse.

The whole idea back of the seaway, the whole reason for developing it, is to make of it a supplementary transportation facility to the existing facilities. In no case do we assume that the seaway would take over even a major portion of the burden of transportation. It would be used to help out during the 240-days of the year when the seaway is free of ice and operating fully.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from Wisconsin.

Mr. WILEY. Mr. President, I have been listening to that portion of the argument in relation to Secretary Royall's statement. I wonder if the Senator would be willing to permit me to put in briefly what I think is Secretary Royall's testimony indicating that it is in the interest of national defense. Would the Senator have any objection?

Mr. AIKEN. I would have no objection at all.

Mr. WILEY. On pages 154, 155, 156, and 157 appears the statement of Mr. Royall that the seaway would be helpful to national defense. That is his conclusion. Then he does a tremendous job in lining out why it would be helpful to national defense. He says:

Planning for industrial mobilization for a possible war is an important part of America's present defense program. The St. Lawrence seaway project would be of assistance to future industrial mobilization by providing a large additional source of electric power for the Great Lakes and adjacent regions, including parts of Canada.

Although it cannot be stated dogmatically that lack of electric power adversely affected either the results or the speed of World War II, yet there were times when we were faced with a possible power shortage and had to impose restrictions and allocations which would not otherwise have been necessary. Today there is some over-all shortage of power in the North Central States, we are informed. If another war required a greater industrial effort than World War II—and it might well require it—the provision of additional electric power from this project would be of considerable value.

Your committee asked the specific question whether additional sources of power were needed in the immediate future for experimentation and development of new weapons. I do not believe that those two activities raise any present problem except to the extent that a general power shortage in any particular area might affect all industry in that area.

The availability of power in the Great Lakes region would also encourage development of productive facilities there, and thus tend to increase America's over-all industrial potential. It is perfectly possible that we would need this potential in the event of another all-out conflict.

Dispersion of industry is a desirable protective measure against the type of air warfare which we can reasonably expect in any future war. The point has been made that the development of this project would tend to relieve the industrial congestion along the eastern seaboard. On the other hand, there is already a large amount of industry now in the Great Lakes region, and with the polar concept of a possible air attack, this particular region is much more vulnerable than it has been in the past. It is therefore, difficult to say with any definite assurance whether from the standpoint of industrial vulnerability this project would be advantageous or disadvantageous. I am inclined to believe that it would have more advantages than disadvantages, largely because it may have the effect of spreading industry more uniformly throughout the entire Great Lakes region.

The seaway would provide during about two-thirds of the year an additional route to Europe—a route which, I believe, is a somewhat shorter one from certain lake ports to England. Any addition of new waterways or any improvement of existing waterways, if found economical, would be of benefit to the Nation's industry as well as the Nation's defense. This new route to Europe would serve both as an alternate and as a reserve route in the event of war. It would have the added advantage of including 1,200 miles less ocean distance, thereby minimizing to some extent the risk and danger of submarine and other attack.

While it cannot be stated with certainty that the delay in shipments by rail or boat or the congestion of port facilities in this country during World War II adversely affected the conduct of the war or its timing yet it is true that there were uneasy moments in the matter of all transportation and that a situation might well have arisen or might arise in a future war where an additional alternate ocean-shipping route—or a safer route—would be of considerable value.

Rail transportation at times threatened to become a bottleneck during or after World War II. Rail transportation would be less concerned in a future emergency if water transportation were available for the entire haul from the Great Lakes region to trans-Atlantic destinations and all or a part of the rail haul from the Lakes to eastern ports would be thereby eliminated. Furthermore, the additional water power as a substitute for steam plants would also reduce the transportation of coal and other fuels and would thereby relieve the threat of a rail bottleneck to some extent in the event of a future war. The avoidance of transshipment would also serve to conserve personnel and time.

I do not believe that my information is sufficiently definite and accurate to answer the fourth question in your letter; that is, the value of the seaway for bringing in iron ore from Laborador and other foreign sources. As I understand it, there is some difference of opinion on the extent of exhaustion of iron ore in the Lake Superior district. That is a question which experts, including those in the Department of the Interior, are better qualified to answer. There is apparently considerable ore in

Labrador, but the feasibility and desirability of bringing that ore into the United States presents economic and other questions which can be better answered by others.

Another probable advantage of the seaway is the easy access it would afford to Greenland and Newfoundland points which may be of more strategic value in a future war than they are today. If we should at any time maintain bases in that part of the world this means of access would be of considerable defense value.

The seaway would also provide increased facilities for shipbuilding and ship repair in the interior in time of war. The fact that the lake region is near the supply of steel makes it particularly well located for those activities. At the present time the shipbuilding facilities—and I am speaking of facilities for larger ships which are not now constructed in the interior—on our coasts seem adequate, more than adequate, really, for construction of the necessary commercial ships, as well as the necessary warships; and there is nothing to indicate that this condition will change for many peacetime years. However, in an emergency, at least an alternate shipbuilding industry for ocean-going vessels, would be helpful. And circumstances might well arise where it would be safer and more convenient to repair or recondition ships in the Great Lakes region.

The lake shipbuilding industry, as well as the shipping route through the St. Lawrence, would be subject to a seasonal factor. This would be accentuated by the fact that the period available for shipping and shipbuilding would coincide with the agriculture labor peak in the Middle West. But it is believed that the disadvantageous seasonal factor would be more than offset by the advantages which I have mentioned.

The point has been made that the construction of the seaway would facilitate invasion of our country. The War Department does not believe that there is merit in this contention. Not only is an invasion from the sea unlikely with our superior naval power but it is also true that if an invasion seemed imminent the locks and other installations could be easily destroyed.

However, there is possibly another—and a related—disadvantage. While the War Department believes that under reasonably anticipated circumstances the seaway and the locks can be adequately defended, yet the necessity of defending them would be an added defense commitment—a commitment which would require more men and equipment and money than would be necessary if the seaway were not constructed.

I have previously mentioned the vulnerability of the seaway to polar atack. A partial answer to this is the fact that at least the seaway tends to spread the vulnerability and thus to make it more likely that, even in the event of a successful enemy air attack on the country, more net shipping facilities would remain undamaged.

I repeat: In the opinion of the War Department the St. Lawrence seaway, while not vital to national defense, would be helpful to national defense.

Senator WILEY. Have you any questions?

Senator AIKEN. Yes. I think it is generally understood that the United States is collaborating with the Dominion of Canada. It is also generally understood that the Province of Ontario is becoming desperately short of electrical energy. Is it not fair to assume that through the construction of the seaway and the consequent strengthening of our Canadian neighbors we are thereby adding to our own security?

Secretary ROYALL. Yes. I mentioned that in here, that it would increase the industrial potential of a portion of Canada which would be of value to us.

Senator AIKEN. The other matter is this: The opponents have claimed, and you have already pointed that out, that the locks and the canals would be vulnerable to attack in the event of war. Would the locks be more vulnerable than a hundred other strategic points, such as the port of New York, our rail centers, and a good many other places? Would it be as easy to defend the site of these locks on the St. Lawrence as it would on the Soo Canal, for instance, or many other places?

Secretary ROYALL. Of course, there are a number of ports and other facilities which would be just as vulnerable as the locks. There would be a great variety. There would be some that would not be as vulnerable. We believe that they could be safely defended.

I thank the Senator.

Mr. AIKEN. I thank the Senator from Wisconsin for reading Secretary Royall's testimony into the RECORD.

Mr. President, it has been shown over and over again that the transportation peak for moving grain and other farm commodities from the Midwest comes during the period August to November, when the seaway will be open. What is expected of the seaway is that it will merely shave off some of the seasonal peak of traffic, thus enabling more products to be transported during that period, and at a low cost.

As for any suggestion that the seaway would not be used because the St. Lawrence is frozen over during the winter, let me point out that Montreal, which is subject to similar conditions, already is the second largest exporting port in North America.

Mr. President, the farmers are tired of having their grain rot on the ground for lack of transportation facilities. They, along with businessmen, are tired of the inability of the railroads to meet the transportation needs of the Midwest. It is only fair that some consideration should be given these farmers of our grain belt.

Mr. President, when a project of great national importance is considered, a project vitally important to our economy, we are getting altogether too much in the habit of considering it in the light of the effect it will have upon our railroads. That has often raised in my mind the question, Does our economy exist for the purpose of supporting our transportation system, or is our transportation system a necessary adjunct to our economy? I am afraid that too often we consider these great developments in the light of how they will affect the tail that wags our economic dog.

Mr. President, I am glad there is talk of developing a better waterway down the Missouri and the Mississippi. I want the people in the Midwest to have two outlets for their grain. If they are shipping it to northern Europe, they will be able to ship it far cheaper by means of the St. Lawrence seaway project, once it is completed. If they are shipping their grain to Mexico or South America, they will naturally ship it down the Mississippi River to the Gulf of Mexico.

It will greatly strengthen our economy if the people in the great Grain Belt have two means by which they can ship their grain to other parts of our own country and to other parts of the world at cheaper rates.

As for the national-defense features of the St. Lawrence seaway project, Mr. President, the whole concept of the seaway has been missed by the opposition in assuming that major reliance should be put on the seaway as a transportation link or as a ship-construction area. Again let me make it clear that the seaway is designed and intended only to supplement other facilities. I am strongly convinced, however, that it is a very vital and necessary supplement that is needed now, and has been needed for a long time.

In admitting that a considerable amount of traffic does move over the Great Lakes now during the ice-free season- the traffic last year amounted to 176,648,000 tons—the opposition points out that this is a special type of cargo, and that the seaway would not be adapted to the transportation of general cargo.

Let me say that general cargo will unquestionably move over the seaway during the open season; but assuming that this type of cargo would not move at all over this system, the seaway still would be justified as a facility for transporting grains, oil, ores, cement, and other heavy cargoes which the railroads obviously cannot handle now and for which only water transportation is economically feasible.

In other words, it matters not what kind of cargo the seaway moves during the rush season, for it will leave less of a backlog for the railroads to try to move during the time when the seaway is not in use.

In connection with lakes traffic, it is pertinent to point out that the 176,000,000 tons moved last year was a new peacetime record. Included in that total were 76,000,000 tons of iron ore, 58,000,000 tons of coal, 418,000,000 bushels of grain, and 21,000,000 tons of limestone. All of these commodities lend themselves to stock piling, and therefore they can be moved over waters that are closed during 4 months of the year.

I call particular attention to the minority report on page 9 which brings up the point that the seaway might not be suited or adaptable to the fast freighters which might be constructed in the future. We find in our highways a close parallel to this line of reasoning. Our highways of today—at least the ones here in the East—are not built to permit high-powered motor cars to run at top speed.

We have to exercise some self-control and not step on the throttle too hard, because these highways will not permit safe driving at exorbitant speeds, even if the cars are designed to achieve greater speeds.

I think the same line of reasoning can be applied to the St. Lawrence. It is agreed that ships can be built, and are built today, that will achieve such high rates of speed that it would be feasible to open them at full speed only on the high seas. I see nothing wrong with expecting that Liberty ships, or any other ships that might ply the waters of the St. Lawrence, would operate at three-fourths or one-fourth throttle, or whatever speed is necessary.

Surely if the choice is between having ships operate at a reduced rate of speed for 75 miles of the seaway or not to operate at all, the proponents of the St. Lawrence would greatly prefer the former.

Time in ocean shipping has not traditionally been of the essence.

Mr. President, paralleling this question of the speed of ships on the seaway is the issue of the channel depth and the size of ships it will accommodate. It has been shown by the Maritime Commission that Victory ships could go through the proposed 27-foot canal when loaded to 79 percent of capacity, and Liberty ships could do so when loaded to 85 percent of their total deadweight carrying capacity. This is not unusual for inland waterways throughout the world. Ships on such routes do not normally carry full load.

Moreover, here is a significant point: Ships can carry a full pay load without drawing full draft, for all cargoes do not weigh the same; and as is frequently the case, a ship's hold will be filled, but the ship will not be down to the load water line.

Also ships can take on cargo to three-quarters of their capacity, let us say, in the Great Lakes, and then proceed down to Montreal, and there take on fuel and supplies, and go to sea with a full load. This again is a wholly feasible procedure.

Furthermore, the St. Lawrence locks will be 30 feet over the sills; so whenever some additional dredging is done, the seaway will accommodate vessels of deeper draft.

Mr. President, much has been said of the letters which officials of some of the existing ocean-shipping lines have written, to the effect that they would not use the seaway if it were constructed. However, they wrote those letters because they are opposed to the seaway, and they are opposed to it because they own terminals at our present coastal ports, and they do not want any competition from terminals which might be built on the Great Lakes. That is why they are against the seaway. Further than that, our shipping interests have no right to come before the Congress and protest against spending their money to help the people of our great Midwest, after the way they raided our Treasury during the war, and after the billions of dollars they have received in subsidies, which our taxpayers have had to pay. Right here, Mr. President, it occurs to me that we should take notice of the fact that America is having an acute shortage of oil, crude oil in particular. We notice it very strongly in the Northeast. The shortage is spread over a great part of the country. I would like to call attention here to the fact that the power going to waste each year at one site on the St. Lawrence River at Massena, where it is proposed to build a dam, is equivalent to the amount of power which would be generated each year by 41,000,000 barrels of oil, 20,500,000 on the United States side, 20,500,000 on the Canadian side. Inasmuch as we furnish Canada with her oil, construction of the seaway could save 41,000,000 barrels of oil annually.

Right now in my State we are having to pay 14 cents or better for a gallon of oil. That amounts to something like $7 a barrel, if it is desired to figure it at the retail price. The St. Lawrence would produce power, equivalent to that produced by 287,000,000 worth of oil at the retail price. Of course those figures are not practical, but they are as practical as some that have been put forward by the opposition.

I call attention now to the argument found in the minority views, at page 10, which raises the question as to whether or not this country can provide the military manpower to protect the seaway. In answering this, I say that the St. Lawrence would not be any harder to protect than would the lines of the railroads or other ports of the country.

The junior Senator from Massachusetts asked a question the other day, where would we get the manpower to protect the development on the St. Lawrence? It is my opinion that we would use exactly the same manpower, exactly the same airplanes, exactly the same guns, that we use to protect the aluminum plants on the St. Lawrence and the chemical plants which are some distance away, at Niagara Falls.

Furthermore, it has been figured by Mr. R. L. Hearn, general manager and engineer of the Ontario Hydro Corp., that 50 men operating the St. Lawrence development would do the work of 50,000,000 Chinese laborers, working 8 hours a day, for 8 days. In other words what I am trying to point out is that the St. Lawrence would enable us to release a tremendous amount of manpower for other purposes in the event it became acutely necessary.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from Wisconsin.

Mr. WILEY. Again I should like to call to the attention of this body, right in line with what the distinguished Senator has said, the fact that the importance of the seaway from the standpoint of defense was dramatically set forth by Secretary Marshall when he said:

> In this connection I wish to read the following statement approved by the Permanent Joint Board on Defense, United States-Canada, at a recent meeting:
>
> "The St. Lawrence seaway. The Board considered the significance of the St. Lawrence seaway project from the point of view of the joint defense of the United States and Canada. It was recognized that the completion of a deep-water navigation route from the sea to the heart of the continent would provide additional facilities for the movement of ships and essential supplies in wartime and would also make possible the construction of oceangoing vessels in inland areas. Furthermore, the new source of power made available by the St. Lawrence project would greatly increase the defense potential of the two countries. It is therefore the view of the Board that the early completion of this long-delayed enterprise on a cooperative basis satisfactory to both Governments would directly contribute to the security of the North American Continent."

Mr. President, I should like at this time to read into the RECORD also, because it is right on the point, a question or two I asked Secretary Marshall, and his answers thereto:

> Senator WILEY. We have learned, in two costly experiences, that all wars are total wars, fought with all the manpower and total resources of nations, and we are told that we shall have peace only through strength, and this does not include military strength only, but total industrial capacity. We hear, for instance, that one reason why Russia is dawdling in peace settlements is that she expects us to have a depression soon.
>
> I want to know this, Mr. Secretary: Would it help in our international peace efforts to give definite evidence to the world that this country is not merely interested in horse races and dog tracks and night clubs, but that as a Nation we are ready to gird ourselves and construct projects such as this which will increase our industrial and transportation capacity?
>
> Secretary MARSHALL. I think it would help materially.
>
> Senator WILEY. I understand Russia has plans for diverting rivers from the watershed of the Arctic Ocean into the Volga River, to improve navigation and obtain some gigantic amount of power, I believe about 10,000,000 horsepower capacity. That is five times as much as the St. Lawrence power. Now Russia has about 100,000,000 more people under her control than the United States. If she should develop her power resources and steel-producing capacity, say within the next 20 years, up to the level of the United States, while we languish in controversy among ourselves, what would be the effect upon our international relations, upon our position of leadership in the world?
>
> Secretary MARSHALL. Well, I think it is clearly evident that our favorable action with regard to this would definitely strengthen our position and meet similar efforts of other countries. You mentioned the Soviet Union. I think, Mr. Chairman, also, we have here one of those fortunate situations where a great project, which will have, I think, a great deal to do with the economy of this country, happens to be also a very definite strengthening of the power of defense.
>
> Senator WILEY. If, at the same time they develop their industrial capacity, they succeed in developing the atomic bomb, we would be "behind the 8 ball" both in military power and political influence in the world, would we not?
>
> Secretary MARSHALL. Very much so.
>
> Senator WILEY. The moral is, therefore, that while we try to help other countries to improve their economics the principal method of establishing our own security is by building more tools and sources of power for our limited population, so that we can make up for lack of numbers by greater mechanization and higher productivity per worker.
>
> Secretary MARSHALL. I think that is a correct statement. I would add to it the thought that here is something that affords a great improvement in communications, a great improvement in power, and a great opportunity to strengthen our relations with Canada. And whatever our necessities in the international field, it is of fundamental and first importance that in the Western Hemisphere there be strength and unity, and I think this particular measure is very helpful in this respect.

Mr. President, I want the distinguished Senator who is speaking to emphasize the point Marshall emphasized, the need of demonstrating to the world that we on this continent, having entered into agreements with Canada, are not going to break faith; we are going ahead; we are going to fulfill our obligations, not simply because they are obligations but because it is in the interest of national defense and the welfare of our people.

Mr. AIKEN. I thank the Senator from Wisconsin. I understand the agreement with Canada is the only agreement at all like the one under consideration the United States has made with any foreign country which it has failed to carry out. I feel that the testimony of General Marshall should carry infinitely more weight than the testimony of General Follett Bradley,

retired, whom the opposition brought forth, at a cost of $825, to testify against this project.

Mr. President, on the question of national defense, it is assumed by the opposition that the St. Lawrence seaway could be breached at any point along the route. The same line of reasoning would apply to any of the hundreds of railroad lines throughout the country.

We cannot afford to assume the attitude that we cannot go forward with the development of our country for fear that the creative facilities of progress are not worth the price because it would take too much manpower to defend them in time of war.

One is forced to ponder the question as to whether any progress can be made, or if any progress is worth the price, under this line of reasoning, which the opponents put forth.

In connection with the construction of this deep-water channel in the Great Lakes-St. Lawrence system, the minority report lays great emphasis upon their assumption that the Federal Government would, in addition to the construction of the main channel, have to provide adequate harbor and docking facilities in the Great Lakes ports. I can see no reason for believing that the ports in that area would make any such demands upon the Federal Government.

In support of this statement, I should like to quote a statement by Mr. Daniel Hoan, president of the Great Lakes Harbor Association.

This is what he said before the Senate Foreign Relations Committee in 1946:

> I defy the opposition to find one single city that will not readily finance whatever additional piers, warehouses, or docks that may be needed to accommodate greater draft vessels and to build them where sufficient water is available or can easily be made available.

In view of this statement there is no justification for the oppositions' alarm over the need for including port-improvement costs in considering cost figures for the seaway.

Moreover, the issue was labored rather persistently by the junior Senator from Massachusetts last Wednesday as to whether or not the cost of improving harbor facilities of the Great Lakes ports should be included in the cost of the St. Lawrence project.

I reiterate the answer I gave then, that certainly the cost of deepening Great Lakes ports should not be charged against the seaway, any more than the cost of improving Boston Harbor, which may be the other terminus of the run, should be charged against the seaway.

It is significant to note here that, while Federal funds have been spent on the port of Boston, the Commonwealth of Massachusetts also has spent sizable sums on the Boston Harbor.

Only last summer, Mr. Frank Davis of the Boston Chamber of Commerce testified before the Foreign Relations Subcommittee that the State had spent over $26,000,000 on harbor and waterfront facilities. An additional $20,000,000 has been appropriated to the Port of Boston Authority with which to construct new piers and develop the commerce of the port.

So, if Boston people can raise money to improve their port, why is it not logical to assume that the port cities of the Great Lakes would do the same thing and without Federal aid.

Mr. President, I turn now to a discussion of the power phase of this project.

At the outset of its discussion of the power part of the project, the views of the minority committee were:

> We believe that a serious weakness in the majority's position on this point lies in their failure to make it clear that it may be wholly possible to construct, if necessary, the power project without also constructing the navigation facilities contemplated in the seaway project.

This is an effort to employ the divide-and-conquer technique. While they admit that construction of the power project perhaps can be justified, I would be willing to wager that if such legislation were introduced in this body, the power companies, no doubt with the able assistance of the railroads, would fight it.

Mr. President, regardless of what has been said, I should like to say that the huge power profits resulting from the excess payments which the people of New York and New England pay above what they would have to pay if they obtained the power at rates commensurate with other more favored parts of the country, are the real reason for the opposition to the project. I should like to make a prediction, Mr. President: If the St. Lawrence seaway project is defeated we will see a campaign put on almost immediately, if it has not been started now, to turn Niagara Falls over to the power interests. The Niagara-Hudson Power Co., subsidiary of the Niagara Falls Power Co., I daresay, will make every effort to grab off that great public resource. If they succeed in doing so it will be the biggest steal of national resources ever put over on the people of this country. I want to say to the Niagara-Hudson people that so far as I am able I shall do everything within my power to keep them from taking over Niagara Falls, even if the St. Lawrence seaway is not built. I make that as a prediction, that that is what they will try to do, but they must block the St. Lawrence seaway in order to have a chance to get away with it.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I should like to point out to the Senator from Vermont that the New York State Constitution takes care of the situation to which he refers quite thoroughly. There is a provision in it now whereby any such steal as that to which he refers would be impossible at this time. The people of the State of New York intend to control their water resources in perpetuity, and it is so provided in our State constitution.

Mr. AIKEN. Mr. President, back in 1941 Congress gave the power company up there the temporary right to divert 5,000 cubic second-feet additional from the falls to develop power for war purposes in New York State. I think I voted for that provision. Mr. President, I predict that they will try to obtain an extension of that privilege for 50 years. My guess is that is what they will try to do.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I want to point out to the able Senator that that was done by this particular agreement——

Mr. AIKEN. That is correct.

Mr. IVES. As a war-emergency proposition. But it still falls within the provision of the State constitution. If it were to be made in perpetuity it still falls within the purview of the provision which I cited, and there could be no steal by any such proposition.

Mr. AIKEN. The Hudson Co. is obtaining the power now and intends to keep it, and I predict that it will try to secure authority to continue to obtain the additional Niagara Falls power if it has to go to the New York State Legislature, or to the Congress of the United States, to get it. That is what it is going to try to do in my opinion.

Mr. IVES. Mr. President, will the Senator again yield?

Mr. AIKEN. I yield.

Mr. IVES. I cannot answer as to what it may try to do. I think I can speak in part at least for the New York State Legislature—I used to know something about it—and I can assure the Senator and the Senate that if that which the able Senator from Vermont says is attempted to be done, those who attempt to do it will not get away with it.

Mr. AIKEN. Not if I can help it.

Mr. IVES. Or I, either.

Mr. AIKEN. The company certainly should not get away with it. However, there is at present some 700,000 horsepower of electrical energy going to waste on the American side of the Falls, at the American Falls.

I ask unanimous consent, Mr. President, to have inserted at this point in my remarks a letter written by Governor Lehman to the senior Senator from New York [Mr. WAGNER] under date of June 7, 1941, printed on page 5096 of the CONGRESSIONAL RECORD of June 12, 1941, in which Governor Lehman expressed the fears, as were clearly apparent in his letter, that the utility companies might attempt under the cover of war to grab off Niagara Falls.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF NEW YORK,
EXECUTIVE CHAMBER,
Albany, June 7, 1941.

Hon. ROBERT F. WAGNER,
United States Senate,
Washington, D. C.

DEAR SENATOR WAGNER: On May 29, 1941, an agreement between the Government of the United States and the Government of Canada, dated May 20, 1941, was submitted to the Senate of the United States for approval. This agreement constitutes a temporary modification of the International Boundary Waters Treaty of 1909 and provides an additional diversion of 8,000 cubic second-feet at Niagara Falls, 5,000 cubic second-feet of which will be utilized in New York State. The agreement is predicated upon the existence of a power shortage for national defense industries located in New York State and is subject to reconsideration by the two Governments on October 1, 1942.

Heretofore the State of New York has not been consulted with regard to this agreement which concerns one of its vital natural resources. Hence, there has been no opportunity for State authorities to express their views. I wish to take this opportunity to state that where the promotion of defense industries is concerned, the Government of the United States will find the State authorities ever ready to cooperate. Since there is a threatened shortage of power in New York State, particularly for the expansion of defense industries, the State is only too glad to cooperate in any arrangement which will meet this need, even if it is only a partial solution of the difficulties. But in making this offer, State authorities must consider not only the immediate needs, which are universally recognized, but must also protect the broad interests of the people of the State.

The State is vitally concerned in this instance because of its long-established policy to develop the people's water-power resources in the public interest. This is a policy in which the State authorities have had your valued support. I recall that in connection with the convention and protocol of January 2, 1929, between the United States and Great Britain (Canada) for the development of Niagara Falls, you wrote to then Governor, Franklin D. Roosevelt:

"I need hardly add that were this a proposal for a totally new grant of water power for private development rather than a temporary experimentation, I would be unalterably opposed to it. As you well know, I advocate that the State retain the ownership and control of water power at its source."

In reply, my distinguished predecessor wrote to you on February 9, 1929:

"It is, of course, clear that the proposed treaty with Canada is a temporary measure only, running for the diversion period of only 7 years, and that the State of New York is in no way restricted as to its full control of this water after the 7-year period has run. The stipulation received by the State of New York clears up the matters long in dispute between it and the private company and makes it perfectly clear that the State has the full sovereignty and control over the water on the American side of the Niagara River for all time."

In this policy the government of the State of New York has not wavered. As recently as January 15, 1941, I addressed the legislature of this State as follows:

"I hope to see a public development of the latent power resources of Niagara so that the people of the State, whether in New York City, Buffalo, Binghamton, Albany, or on the farms, may participate in its benefits as well as those of the St. Lawrence."

I mention this to show that the Governors of the State of New York have a consistent record in the policy of public development of the people's water-power resources. This policy has been implemented by plans of the Power Authority of the State of New York for the joint development of the resources of the St. Lawrence and Niagara Rivers which promises to become a reality by the enactment of H. R. 4927, now before Congress.

You will recall also that in 1918, at the behest of the War Department, the State of New York enacted legislation which permitted the Niagara Falls Power Co. to divert an additional 4,500 cubic second-feet of water at Niagara, under conditions agreed upon with the Governor of the State at that time. And be it especially noted that the State of New York has been constantly in litigation with the Niagara Falls Power Co. ever since in an endeavor to make it abide by the terms of its agreement. Even to this day the State has not succeeded in enforcing all of the terms.

It is now proposed to permit this company to divert an additional 5,000 cubic second-feet from which the company will derive a revenue of approximately $1,500,000 without any additional investment on its part. This would appear to be duplicating the situation of 1918 unless due diligence is exercised in formulating the terms on which any license is issued and it would seem at variance with President Roosevelt's position as stated in his speech of May 27, when he said, "This is no time for capital to make or be allowed to retain excess profits."

The situation is further complicated by the recent report of the "Examiner" in the Federal Power Commission case in which he recommends to the Commission revocation of the Niagara Falls Power Co.'s license unless the company can clean house within a month.

In view of this long history, you will agree with me that nothing should be done by the Senate of the United States to prejudice the interests of the State of New York. Although the State authorities are glad to cooperate at this time of emergency by consenting to a temporary diversion of additional water at Niagara River for the use of defense industries, we should like it understood that the State still adheres to its policy of public development of water-power resources, and would like it further understood that, in line with the policies repeatedly annunciated by the President of the United States and incorporated in the Federal Power Act of 1935, the interests of the State will receive prior consideration in the ultimate disposition of the latent power of Niagara Falls.

To secure this protection of the rights of the State, it is suggested that the Committee on Foreign Relations of the Senate stipulate in its recommendation to the Senate that the agreement be approved on the following conditions:

1. That when the agreement comes up for reconsideration on October 1, 1942, such reconsideration should again be referred to the Senate for approval;

2. Any license issued by the Federal Power Commission under this agreement should be temporary and concurrent only with the life of such agreement;

3. License should be issued subject to the existing laws of the State of New York;

4. License should be revocable if and when the State of New York shall proceed with the development of this resource;

5. That the State of New York be consulted by the Federal Power Commission as to the terms of the license.

I know you are deeply interested in protecting the interests of the State of New York and I am confident you will take appropriate action. I would also appreciate your submitting a copy of this communication to the chairman and members of the Foreign Affairs Committee.

Very sincerely yours,

HERBERT H. LEHMAN.

Mr. AIKEN. Mr. President, I am sure, from the caliber of the opposition's report, that they are not unmindful of the fact that to eliminate the seaway part of the project would add materially to the cost of the power phase of the undertaking.

The other day the Senator from New York estimated that the additional cost to the State of developing the power alone would be $100,000,000, and I agree with him in that respect. But the purpose of the opposition to the development of the power project without the navigation project is the same old purpose of divide and conquer, because they know the Midwest would not vote to spend several hundred million dollars of Federal money in developing the power project if the Midwest was to be shut off from access to it.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. Let us get clear upon the separate development business. I made such a proposal here to the Senate but my proposal did not call for the expenditure of a nickel of Federal money for the project at all. Under my proposal, by a treaty between the United States and Canada authorization would be granted to the State of New York and the Province of Ontario to work out such a program between themselves, to be financed by themselves.

Mr. AIKEN. Mr. President, we have been waiting for a long long time for New York and Ontario to make that proposition. When New York comes to Congress for consent to the right to do it—and New York has not been here for that purpose yet, and I see no indication that they will come——

Mr. IVES. Will the Senator support me if and when I make such a proposal under concrete control by way of legislation?

Mr. AIKEN. That depends upon the form in which the proposal is made. I am in favor of developing the St. Lawrence power. I am not in favor of developing it for the benefit of any single utility corporation.

Mr. IVES. Mr. President, it is understood that it is to be developed in line with the provisions of the constitution of the State of New York which I have already cited.

Mr. AIKEN. Mr. President, I told the Senator at the beginning of my remarks that I would support the development of St. Lawrence power if I knew that not a kilowatt-hour was going out of the State, so long as it was developed solely for benefit of the State of New York. But I think other States should benefit also.

Mr. IVES. I am sure the Senator and I can get together on that proposition.

Mr. AIKEN. I much prefer that it would be developed for the benefit of other States which are within economic transmission distances. I am in favor of development of natural resources, whether in New York, Wisconsin, Nevada, or Mississippi, or whatever the State may be, because such development would strengthen the Nation and add to the security of our Nation, and provide additional business and industry to every State, no matter where the development might be located.

Mr. President, it is perfectly logical and understandable why the elimination of the seaway part of the project would add materially to the cost of the power phase of the undertaking, because much of the work that needs to be done at the main dam is common both to transportation and power.

Therefore, in figuring costs, they are divided as between transportation and power.

Whereas, if the power development alone were undertaken, all of the costs would be allotted to power.

The point I am trying to make is that these two undertakings are complementary, particularly the work at the proposed site of the power plant.

The opposition is fully aware of this fact, and if legislation should be introduced for the power phase alone, they would find plenty of excuses to oppose the undertaking.

In discussing the role of power in the making of atomic energy, the opposition took exception to a statement by the proponents of the project, that electricity is a basic and necessary element in the production of atomic energy.

The minority report makes the point that the availability of large quantities of power was not a basic reason why the atomic energy projects were located on the Columbia River and the TVA areas.

I have made inquiry of the Atomic Energy Commission as to these claims. Here is the reply I received, and I quote from a letter written by Mr. Carroll Wilson, manager:

> Basic considerations in the selection of the Hanford site for the plutonium production plant of the atomic energy program were its isolation, the volume of water from the Columbia River available and suitable for cooling purposes, and the availability of power.
>
> No one of these factors could be described as the determining reason for the selection of the site, rather it was the combination of factors which determined the choice.
>
> The availability of power was the basic factor in the selection of the Oak Ridge (Tenn.) site.
>
> There is a steam plant located at Oak Ridge which supplies types of current not available from outside sources and serves also as an emergency supply in the event of failure of power from outside sources.
>
> Power in large quantities is a basic requirement for the production of fissionable materials.

Previously the question has been raised by opponents of the project that there is no need to develop St. Lawrence power because atomic-energy power for peacetime use will be available shortly. The joker in this argument is that it might be available, but not shortly, and certainly not cheaply.

I should like to quote from a statement by Mr. David E. Lilienthal, Chairman of the Atomic Energy Commission:

> Power is, of course, the most spectacular application of atomic energy. But it is not here, and it is not just around the corner.
>
> Within 2 or 3 years we should have a demonstration power unit for testing and experimental work—it could be made to light lamps and run washing machines.
>
> Some of our scientists and engineers say we should have a fairly practical, efficient unit within 10 years. Even so, atomic power won't be cheap power in 10 years.

This statement appeared in the magazine section of the New York Times on January 11, 1948.

Another significant statement concerning the use of atomic energy is carried in Associated Press reports of January 13, quoting Sumner T. Pike, one of the five United States Atomic Energy Commissioners. This is what Mr. Pike says:

> It seems reasonable to expect that atomic power will come in gradually, will serve to supplement rather than replace other sources, and may never do more than to fit into niches for which it is particularly suited.

Furthermore, we have the first annual report of the Atomic Energy Commission, which was laid on our desks last Tuesday, and which definitely states that it will be not less than 20 years before we can expect any practical use of power from atomic energy.

At page 19 of the minority report there is a discussion as to the priority that should be given to various projects in deciding which to go forward with. I was particularly interested in a statement in a quotation on that page to the effect that the construction of high-powered wind tunnels should take precedence over the St. Lawrence project, for example. This raises a very fundamental and vital question.

I do not think I am giving out any security secrets when I say that it has been fairly generally known that the military have been considering the construction of a high-powered wind tunnel, or perhaps a number of wind tunnels—I do not know how many. The big question is, Where can they find enough power to operate the wind tunnel? Not less than 100,000 horsepower would be required for this purpose. So it is a very pertinent question of national defense to consider the feasibility of developing the St. Lawrence as a possible source of power in connection with this or similar projects of national defense.

OPPOSITION UNCONCERNED ABOUT ORE SUPPLY

When the minority report came to a discussion of the iron-ore supplies and the steel industry of the Midwest, I find that it took a rather unconcerned view of the fact that the Lake Superior iron-ore supply is rapidly being exhausted. Lately it has been said that we should develop the high-cost, low-quality ore of the Midwest, rather than have a way open to bring in high-grade ore from the outside.

The report of the minority does not admit that there is any need to be concerned about having a seaway available for bringing in foreign high-grade ore after the Mesabi Range is exhausted. Reference is made to the fact that the industry is extensively engaged in making plans to meet the situation. But how would they meet it? Here is the answer:

> By gradually increasing tonnages of ores concentrated from the low-grade taconate and jasper ore.

The important point overlooked here is how much will it cost to beneficiate this ore? That, Mr. President, is the joker. There is serious reason to believe that the cost of beneficiating this low-grade ore will mean a considerable increase in the cost of processed steel. Furthermore, if the industry has to resort to the use of low-grade ore, there is every reason to assume that the steel industry will be removed from the Midwest.

Transportation is a major expense in the production and distribution of steel, and there are plenty of low-grade supplies in other areas of the country where, if the seaway is not built, cheaper transportation facilities will be available.

However, the real reason why some interests oppose the seaway is this: When high-grade ore is exhausted in the Midwest, then the steel plants there will have to turn to the high-cost production of steel from low-grade ore, and thus force the major part of the industry to the coastal cities.

Baltimore plants used Chilean ore during the war and would have an advantage over Cleveland, Gary, Chicago, and other Midwest cities if they can prevent those cities from getting low-cost high-grade ore also.

It would not be consistent with national security to concentrate our steel industries on the Atlantic coast; yet that is what certain interests would force us to do.

SELF-LIQUIDATING FEATURES OF SEAWAY

The point which I should like to discuss next is one of which the opposition speaks very critically. I refer to the self-liquidating features of the seaway.

May I observe, Mr. President, that this is a very peculiar line of argument to be coming from the opposition, when we consider the fact that for years they have attacked the seaway because it would take too much money from the Federal Treasury. Now when an effort is made to make the seaway self-liquidating, the attack is still continuing.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. One of the reasons why the attack is still continuing is that under the provisions of the proposal now before us, in all probability, as the project would develop, it would still require too much money from the Federal Treasury to keep it going.

Mr. AIKEN. I understand that the opposition estimates that there would be a deficit of between $2,000,000 and $5,000,000 a year.

Mr. IVES. I think that is a very moderate estimate of what would be lacking.

Mr. AIKEN. I like to be moderate.

Mr. IVES. If the Senator wishes to be really broad, I think it is estimated that anywhere from $10,000,000 to $25,000,000 a year would be lacking.

Mr. AIKEN. Very well. Let us take $10,000,000 a year, which is not likely. We are appropriating this year for our armed services more than $11,000,000,000. The money which we are appropriating for our armed services this year, assuming that the seaway had a deficit of $10,000,000 a year, would pay that deficit for more than a thousand years. If the deficit were only $2,000,000 a year—which some of the opposition have been considerate enough to admit—a single year's appropriation for the armed services would, if I am figuring this correctly in my mental arithmetic, pay the deficit for about 5,250 years, which is a long time. I do not believe we ought to quibble over whether the project will cost us $1,000,000 or $10,000,000 a year.

Mr. IVES. Mr. President, will the Senator further yield?

Mr. AIKEN. I yield.

Mr. IVES. I merely wish to point out that undoubtedly the Senator's estimates are correct when he estimates the length of time during which appropriations for the armed services would pay for the cost of this seaway, if the expenditures for the armed services were substituted for that purpose. However, that does not liquidate the seaway. Nor does it pay for its cost of operation from any other source than the Federal Government.

Mr. AIKEN. If we demanded proof positive in detail that every project constructed with Federal money would yield

to the country returns adequate to liquidate the investment, the chances are that we would never make any investments. Did the railroads have proof when they built their lines across the prairies that they would get all their money back? I do not know how it is possible to prove, to a cent, what the income will be.

Mr. IVES. The fact remains that the railroads, insofar as actual expenses were concerned, were not turning to the Federal Government to pay for their cost. To be sure, rights-of-way were granted, and other concessions were made, but the stockholders themselves were largely responsible for the payment of expenses.

Mr. AIKEN. In the past the railroads have been given 10 percent of all the land area of the United States.

Mr. IVES. That is what I stated. Rights-of-way were granted.

Mr. AIKEN. That is correct.

Mr. IVES. But the cost of construction was not being financed by the Federal Government.

Mr. AIKEN. Some of the railroads made more from their land grants than they did from their railroad operations.

Mr. IVES. Perhaps so.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from Wisconsin.

Mr. WILEY. Mr. President, I have listened to this argument about the possibility of the St. Lawrence waterway not paying. I think it will be found in the record that General Wheeler said that it would pay. It will be found in the record that a great engineer by the name of Herbert Hoover said that it would pay—probably not for the first 3 or 4 years. I call attention to the facts which cannot be disputed.

If the St. Lawrence waterway were built, I should be perfectly willing to stand on the record of what I am about to say. I believe that the first year the passenger tolls would pay from $1,000,000 to $3,000,000. They have not been included in the estimates.

Moreover, Mr. Julius Barnes says that 400,000,000 bushels of wheat would be transported from Canada, and at least 400,000,000 more from the States west of Wisconsin, and including Wisconsin, would have to be transported. If we assume a minimum saving of 5 cents a bushel, the farmers of this Nation would save $40,000,000. If that is not an adequate return, I do not know what to call it.

I have not the record before me, but I have sent for it. I think it will be found that every year the Federal Government is expending for transportation on Federal highways for which it receives no direct return, millions of dollars, and it will expend many more. The project proposed will be a great national Federal highway. We are asking for the opportunity to demonstrate that it will be self-liquidating, but in the face of that opportunity every road block is thrown, every fear, everything from the Constitution down to disputing the figures of the only engineer whose testimony is recorded. That is General Wheeler, who has estimated the cost. No one disputes what he stated.

So, I repeat, this is no time to sell America short. I remember that on one occasion I spoke in the Senate, in 1940, and said, in substance, "Mr. President, I move that the Secretary of State report to us the conditions of our forces in the Far East."

I was calling attention to Hawaii and the Philippines, and suggesting that perhaps some day there might happen to this Nation what happened to the Russians. No one paid any attention.

Now we have the judgment of Secretary Marshall, one of the greatest men of his age. We have the testimony of Secretary Royall, who demonstrates the need of this seaway for defense. Then some become picayunish and say that it will not pay the first few years exactly the operating costs. The undisputed evidence shows that it will pay the operating costs. In the first few years it may not pay the liquidating costs.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from New York.

Mr. IVES. I merely wanted to point out that I think this is the most ingenious argument yet presented by the proponents of the proposition, namely, in order that it can be demonstrated that the seaway will pay for itself we must have it constructed. I merely point out, in that connection, that, assuming all of the rosy coloring that was given to the project by the distinguished Senator from Wisconsin, assuming all the hundreds of millions of bushels of wheat, and all the tonnage and traffic to which he has referred, were actually to be forthcoming—in other words, with the 52,000,000 tons, which was the figure to which the estimates have been upped by the latest accounts, and which are still going up—if they were forthcoming, the project might pay for itself.

But there are some of us who have very grave doubts that there will be such tonnage on the seaway. If there should be, the diversion of tonnage from other means of transportation would be of such a nature that in all probability serious consequences would ensue as far as those other means of transportation were concerned.

I thank the Senator from Vermont.

Mr. AIKEN. Mr. President, I do not know whether the seaway would pay every dollar of expense the first year, the second year, the third year, the fourth year, or what year, but I am willing to accept the report of the United States Department of Commerce, because I know of no better authority to which to turn. But if there were to be a substantial deficit, I would still be in favor of the St. Lawrence seaway.

I do not agree with the Senator from New York that tonnage would be diverted from other ports, because it would be composed principally, according to the Department of Commerce, of oil, coal, ore, and grain, of which New York's port gets only grain at this time, and it is losing that tonnage rapidly to other ports.

Mr. IVES. If the Senator will yield further, I should like to correct a misunderstanding which the Senator seems to have in connection with my remarks. I was not referring to ports, but to means of transportation, which is quite a different thing.

Mr. AIKEN. If there is 10 cents to be saved, I would rather save it for the farmers of Minnesota and North and South Dakota than for the New York Central Railroad.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. WILEY. I have found some very important evidence indicating that we are now spending $460,000,000 a year on Federal aid, and will be spending that amount for the next 3 years. That is Federal aid simply in connection with our highways, which are another means of transportation.

I want to say only a word in reply to the distinguished Senator from New York [Mr. IVES]. I have never found him picayunish nor have I found him small in his estimates of things, but it seems to me that in this instance he is using simply a yardstick of dollars. We have the testimony of men like Marshall, Royall, Wheeler, Eisenhower, and others, who will not guarantee, as no one can, even physical operation. Doctors have said that the smallest physical operation is serious with respect to the outcome. These men have valued everything except the dollar equation. They have told us the importance of the project from the standpoint of defense and from the standpoint of giving a shot to the economic lifeblood of this country. They have spoken of a fourth seacoast. In addition to that, men like Hoover and others, who are successful men, have told us that in their judgment the seaway will pay out in dollars very soon, if not in the first few years. On that I base my judgment. I am not taking merely the word of someone who is a legislator.

Secretary Royall gave us seven or eight reasons why the seaway was important in national defense. That is no real answer to the atomic bomb. He gave us the picture, as he saw it. He is a South Carolinian. He told us what it would mean to the future of this country.

I repeat, that in evaluating any great public work we do not merely say we can guarantee its performance. We have to look into the future. America has been built and will continue to be built by men and women who have faith in the future in connection with the economic, physical, and spiritual growth of this Nation. In the future, instead of 50,000,000 persons in the St. Lawrence River and Great Lakes Valley there will be 100,000,000. Anyone who has any sense of values at all knows that hundreds of thousands of persons will require transportation. To have adequate transportation we must have facilities. I told someone today of my experience in seeking to get a boiler to replace one which had been injured. A distance of only 400 miles is involved, but it has taken 3 weeks for the railroads to transport the boiler. That indicates, in our section, at least, what is needed—the expansion of all our facilities, high-

ways, railroads, and canals, and an expansion of our human vision.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from New York.

Mr. IVES. I merely want to observe that that statement is the first indication I have had of a definite nature that the proponents actually admit that this seaway project will not be a self-liquidating proposition. The able Senator from Wisconsin, in the statement he just made, indicated definitely that the probabilities are, on the basis of the estimates of the proponents themselves, that the project will not be self-liquidating.

I want to point out here and now, Mr. President, that I am not interested in the dollar from the standpoint of other means of transportation. It has been intimated that I was worried also about the dollar welfare of the railroads. I am not one bit worried about that. If they all go into bankruptcy, so far as I am personally concerned it would not have any effect. I would feel sorry for them and for our economy, because the Government would have to take them over. What I am worried about is the diversion of traffic—not dollars, but tons. That is what I am talking about.

The Senator spoke of the transportation of a boiler. He was interested in getting a boiler delivered at this time of the year. It bears out the thought that some of us have that this is the time of the year when the railroads have the most difficult time of all; and it is exactly this time of the year when, if there were any sizable amount of traffic diversion as the result of the use of the proposed canal, the additional burdens on the railroads would probably be so great that they could not handle the traffic. That is why I am worried about transportation.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. AIKEN. Just briefly, to permit the Senator to reply to the Senator from New York.

Mr. WILEY. I am sure the Senator from New York did not intend to put words into my mouth.

Mr. IVES. No, no. I was trying to put words into the Senator's thoughts.

Mr. WILEY. If the Senator had actually been listening to what I previously said, he would understand how unfair his own statement was. I analyzed the testimony and tried to bring into the picture the fact that no venture that America has ever made has been guaranteed to be self-liquidating the first or second year. What we are asking is that the Senator and others lift their visors so they can see the significance and the tremendous potentiality of the project. That is all I intended to do. I want to say definitely that it is my hope and my faith, based upon the testimony of former President Hoover, upon the support of every President since Harding, and upon the support of every Secretary of State since Harding—based upon their judgment and their vision—that this project will be self-liquidating.

Mr. AIKEN. Mr. President, if I may have about 10 more minutes I shall be through, and the patient occupant of the chair will be glad to listen to a different voice than mine.

As we know, provision is made for making the power part of the project self-liquidating. Senate Joint Resolution 111 and previous legislation carried the same provision. In an effort now to satisfy the criticism of the opposition, we propose to go all the way and make the whole project self-liquidating. Frankly, I have felt in the past that the seaway part of the project would be entirely justified if it were not self-liquidating. I still feel that way.

But if, in order to obtain approval of the project, tolls would help achieve that objective, then I readily accept tolls.

I should like to call attention to the fact that shortly before the minority report was filed the Department of Commerce completed and issued a rather comprehensive study on the transportation and toll features of the seaway. The title of this study is Economic Appraisal of the St. Lawrence Seaway Project. prepared by the Transportation Division, Bureau of Foreign and Domestic Commerce, Department of Commerce. This report was prepared under the direction of Dr. Paul M. Zeis, Acting Chief of the Transportation Division, and completely refutes the arguments of the minority report. I shall not attempt to go into an analysis of the details of the report. For the purpose of this discussion I shall only mention the summary high lights of the conclusions.

But before proceeding in my reference to the Commerce Department's recent report, which was issued in December 1947, I call attention to the fact that it has generally been agreed, in testimony before the Senate Foreign Relations Committee, that the remaining costs of the seaway part of the project to the United States would be approximately $330,000,000.

It was fairly generally agreed that by adding interest and amortization charges over about a 50-year period, the annual cost of the seaway's navigation project would be between 15 and 21 million dollars, depending upon the rate of interest and other amortization factors. Figuring on the basis of an annual cost of say, $17,450,000, the United States' share will be $13,680,000, and the Canadian share $3,770,000. Canada has already spent considerably more than the United States has on the seaway, and would be given credit for that greater expenditure.

While these are the figures that were generally used at the hearings, the Minority Report also refers to some much higher figures, with annual charges skyrocketing up to about 50 million dollars annually.

This is an exorbitant appraisal of the costs, and has no basis of fact whatever.

It is significant to note that the figure for annual tonnage of traffic, used in the Minority Report, is an old figure of 25,000,000 tons a year.

On this point, I should like to quote from the recent Commerce Report:

> * * * Potential seaway traffic has been estimated at thirty to thirty-seven and a half million tons of iron ore, six and a half to eleven and a half million tons of grain, and about four million tons of bituminous coal, making a grand total for these three commodities of forty and a half to 53,000,000 tons.
>
> In addition there is a distinct possibility that a huge traffic in petroleum might develop, although any substantial traffic in this commodity should be regarded as a long-range rather than an immediate possibility.
>
> Accordingly, the following discussion is in terms of these commodities, ore, grain, and coal, which would move in large volume on the seaway shortly after its completion.

Mr. President, the Commerce Department estimates the total revenue from tolls at from $20,925,000 to $27,100,000 annually.

So, Mr. President, actually we have here an effective answer to the Minority Report, first, concerning the contention that a study of the toll question needs to be made, and, second, concerning the amount of revenue which tolls can reasonably be expected to produce.

As I said in the beginning, the opposition has consistently sought to thwart consideration of this project on the grounds that some additional studies needed to be made. That was their proposal in connection with the toll question. They use the tactics long used by the power and railroad interests of the Northeast.

Inasmuch as a reliable agency of the Government has made such a study—and if the Department of Commerce is not the competent and proper agency to make such a study, I do not know what agency is—and has in good faith given an honest answer to what it thinks the facts are, there is no point in delaying the project for further study on this score. It is equally clear, Mr. President, that the Commerce Department study shows that from the standpoint of potential traffic and the prospect for self-liquidating this project, it is a wholly feasible and worth-while undertaking.

I would not do justice to these comments on the minority views if I failed to mention their implications concerning the question of who will pay for the project if, for any reason, it should not be self-liquidating. Surely the Atlantic and Gulf port cities that are fighting this project—those cities are not the only ones fighting it, but the principal port cities opposing this project are Boston, New York, Baltimore, and New Orleans—could not ask this question with good grace.

FEDERAL AID TO PORT CITIES

I have here some figures from the Rivers and Harbors Division of the Corps of Engineers, United States Army, the people who have charge of Federal expenditures in connection with navigable streams. Here is what the figures show: Federal expenditures for port and channel work at Boston, New York, Philadelphia, Norfolk, Baltimore, New Orleans, Galveston, and Houston, up to June 30, 1946, amounted to approximately $244,000,000. According to representatives of the Boston Chamber of Commerce, Congress has spent approximately $50,000,000 on the port of Boston alone. Some of them use the sorry and silly argument that now that the Federal Government has spent that $50,000,000 on the development of the port of Boston,

it should never spend money on any investment or any project which would compete with the port of Boston.

Total Federal river and harbor allocations since 1934 in Massachusetts, New York, Pennsylvania, Virginia, Maryland, Louisiana, and Texas, were in excess of $350,000,000, or more than our entire cost of the seaway part of the St. Lawrence project.

In other words those cities and States—and I have selected only a few—from which have come the sanctimonious talk against using Federal funds to develop the St. Lawrence project, have been raiding the Federal Treasury all these years, and in at least one case a Member of this body boasted in his campaign for reelection about the proportionately high amount of Federal money he had been able to have appropriated for river and harbor work in his State.

As for the contention of the opposition that because of high costs, this is not the time to go forward with the project, that, again, is an old contention. According to their arguments, the time will never be right for this project. Here, again, they are playing up a side issue. Of course, the reason for adding the self-liquidating features is to make the project pay for itself.

In any event, if we help everyone else in the world, but do not spend money in developing our own resources, the time will come when we shall not be able to help even ourselves.

It is certainly penny-wise and pound-foolish to deprive our country of its means of expansion, through failure to develop its resources. The St. Lawrence is conceded to be one of the most valuable natural resources on the entire North American Continent.

Mr. President, earlier in my remarks today, I have referred to the requests of the opposition that consideration of the project be delayed, so that other studies can be made. Mr. President, because of the fact that consideration of this project has been going on for the last 20 years in a rather active manner, and so many competent studies have been made, there is no point in delay now for the sake of bringing up to date some detailed figures or detailed points. In the case of the Panama Canal, the question of tolls was not settled until shortly before the Canal was opened.

Yesterday, the junior Senator from Louisiana called attention to the fact that up to 1947 the Panama Canal showed a deficit of $124,000,000, and he cited that as a reason why we could not expect the St. Lawrence development to be self-liquidating.

The facts in the case of the Panama Canal are these:

Up to 1940, all expenditures on the Panama Canal, including interest from the time of its inception, amounted to $500,000,000. During this period, the Canal paid 2½ percent interest on this amount, set aside a $50,000,000 fund for depreciation and still showed a $20,000,000 profit.

The loss referred to by the Senator from Louisiana occurred during the recent war when the Canal was used mainly by war vessels of the allied nations on which no toll was charged. Part of the loss was also due to the huge reconstruction works which were necessary at that time.

Mr. President, I wish to agree with what the Senator from New York [Mr. IVES] said a few minutes ago, namely, that the development of the St. Lawrence seaway will bring more business to the railroads. Obviously, we cannot make large amounts of power available to a community without helping all forms of transportation in that community.

Mr. IVES. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. IVES. I do not recall making the statement that the development of the St. Lawrence seaway would bring more tonnage to the railroads.

Mr. AIKEN. The Senator said it would bring more tonnage to the railroads during the winter months.

Mr. IVES. During the winter months.

Mr. AIKEN. That is an argument in favor of the seaway; because if the railroads had adequate facilities for handling the freight during the late summer and fall months, they would be bound to have surplus facilities during the winter months, and during those months the traffic normally using the seaway would keep those surplus railroad facilities in full use.

Mr. IVES. Mr. President, it is difficult to understand by what process the railroads would be expected to have adequate facilities during the summer months for handling the peak-load business which would not arrive until midfall and early winter. Does the Senator propose that all the railroad employees needed in the peak season be kept on during the slack season, which would be the summer, in view of the fact that the canal would be operating at that time?

Mr. AIKEN. No. If the Senator will look at the records, he will find that the business of the railroads increases during the summer, and reaches its peak in October, and then decreases during the winter.

Mr. IVES. I know when the peak load comes, but I also know when the hardest time comes from the standpoint of transportation. That is in the months of November, December, January, and February. That is the hardest time for the railroads. If they are not properly geared to meet that situation, they will be in bad shape.

Mr. AIKEN. The railroads now are imposing embargoes on the shipment of grain to eastern ports because they cannot handle the grain which was shipped late last fall from the Midwest to Atlantic ports. Certainly they need the seaway to supplement their own transportation facilities during the fall months.

MERITS OF PROJECT SOUND

Mr. President, the over-all merits of the project under consideration are as sound today as they were in the years past. In fact, there is a more compelling reason now for going ahead with this project than there has ever been in the past. Surely if we wait until every opposition has been overcome, until every red herring has been deodorized, and until every minute detail has been worked out and answered once and for all, we shall never get anything passed in the Congress.

It is a question of deciding now whether this project will contribute to the growth and development of mid-Continental North America by providing a deep-water outlet to the sea, on the one hand, and, on the other hand, deciding whether the power which can be generated at this project will contribute to the future growth and expansion of our economy.

These questions have been answered beyond all shadow of doubt. No one here can deny or question the fact that adidtional transportation facilities are needed today.

No one in this body can deny that there have been power shortages, general power shortages throughout the country in recent months, and that they exist, and that they are becoming more acute month by month. The shortage has been particularly acute in the northeastern part of the country, the area to be served by the St. Lawrence project.

We have seen the concentration of industry in areas of public-power development, such as the TVA and the Columbia River projects. This concentration is explained by one thing, the availability of low-cost power. In the not-too-distant future it is entirely probable that these areas will reach the saturation point. There is doubt as to whether additional power will be available for new businesses. What will we do then if we do not go forward with a program of further expansion?

I know that the power companies have been talking about their plans for expansion, but at best their expansion is largely in the form of steam-generating plants. This means unquestionably continued high-cost power.

PUBLIC AND PRIVATE POWER NEEDED

To digress a little from the main course of my argument, I cannot help but call attention to the fact that the National Project Conference, which is an out-and-out opponent of the seaway project, has been publicizing the country asking why should the private companies go ahead with their expansion program if the St. Lawrence power is to be developed. The implication is that there would not be a need for the private-generated power then. Experience has shown in the TVA area and elsewhere that where hydroelectric power is made available, the need for stand-by steam power has inevitably increased.

I am informed by the Federal Power Commission, however, that St. Lawrence power could operate very profitably and efficiently without stand-by power, because it is such a high percentage of firm power, a condition which also exists at Bonneville Dam.

Mr. IVES. Mr. President, will the Senator yield? I do not like to interrupt him.

Mr. AIKEN. I yield.

Mr. IVES. I do not like to break into this discussion, but I do want to point out that that is probably correct, to a certain point.

Mr. AIKEN. That is correct.

Mr. IVES. Nevertheless, only about two-thirds would be available under those circumstances.

Mr. AIKEN. I do not question but that some stand-by power would be necessary in order to obtain the fullest development of the St. Lawrence, but it would be practicable, according to the Federal Power Commission, even without stand-by power.

Mr. IVES. It could be done, but it should be borne in mind that that means that only about two-thirds of the 1,100,000 horsepower about which the Senator speaks would be available by that process.

Mr. AIKEN. That is correct. I am nearly through, Mr. President, but I should like to quote from the testimony of the Federal Power Commission before the Subcommittee on Foreign Relations, in hearings which were held in February and March 1946. After presenting certain tables, Mr. Olds, Chairman of the Commission, said:

> In very brief and simple terms these figures show that, of the various groupings shown, Tennessee, with the largest proportional increase in hydroelectric energy in the 15-year period also had the largest proportional increase in consumption of coal for the generation of electrity.
>
> Correspondingly, New York State, with the lowest proportional increase in hydroelectric energy also had the lowest proportional increase in consumption of coal for the generation of electricity.

I think that is an ample answer to the coal interests, who claim they would be seriously injured by the development of hydroelectric power anywhere.

Getting back to the power companies, I am convinced that they will go forward with the development of new facilities. But their facilities alone cannot begin to meet the demand for power in the Northeast and elsewhere.

In the past they have shown no particular foresight in planning ahead. I see no reason to assume that they will be particularly foresighted in planning ahead now.

CONCLUSION

As I near the conclusion of these remarks, may I say that I have made these comments in connection with the minority report for the purpose of showing that, after all, the opposition has raised mainly detailed, technical questions.

It is my desire to make it clear that from a standpoint of national defense, from the standpoint of the general welfare of the country, and from the standpoint of the further development and growth of the country, I am convinced that this project is not only desirable—it is needed. It is imperative.

Mr. President, let me again emphasize the importance of the pending legislation and urge that we pass this bill without delay. This legislation if passed would authorize the approval of the United States-Canadian agreement of 1941, providing for the joint development of the navigation and power resources of the Great Lakes-St. Lawrence Basin for the mutual benefit of Canada and the United States.

The real significance of this project is that it would connect mid-continental North America with the sea lanes of the world, giving to some 50,000,000 people in our own Midwest a deep-water transportation avenue to the outside world.

The power phase of the project would provide close to 13,000,000,000 kilowatt-hours of electricity—one-half of which would be apportioned to this country and one-half to Canada—with which to turn the wheels of progress.

The proposed power station, near Massena, N. Y., would be one of the largest in the world and would generate more power than the entire output of the TVA in 1946.

In considering the issues at stake, they all boil down to this: allied on one side of this question are the proponents who believe in the cause of progress. Allied on the opposite side are the stand-patters and the disciples of a status-quo philosophy. In deciding their vote on this important issue, I urge my colleagues to keep this fundamental issue in mind.

POLITICAL CONDITIONS IN THE SOUTH

Mr. EASTLAND. Mr. President, I notice in the public press that the southern Governors, as a result of their Tallahassee meeting, appointed a committee to deal with the Democratic leadership and recommend a policy to protect the dignity of the South, the rights of the States, and the social institutions of that great area. I hope that this committee's recommendations will not be for further appeasement and vacillation. I hope that their recommendations will not mark another milestone in the destruction of southern institutions. Through recent years the South has retreated step by step until now it is spurned from the throne which we ourselves have created.

Southern people do not desire to leave the Democratic Party. We want to continue in the future as we have in the past. However, we of the South must take whatever political steps are necessary to prevent our social institutions from being destroyed by the force and power of a Government which threatens through the FBI and the Department of Justice, in true Gestapo style, to go further than was done even in reconstruction days. All we demand of the northern leadership is that they stop this drive to destroy us, and govern this great country for the welfare of its people instead of being the servant of organized pressure groups. Do not barter the institutions of the people and the sovereignty of the States for racial votes in northern States.

Mr. President, what I shall say today I say for the welfare of southern people. Our people are steeped in democratic tradition. All they know politically is the Democratic Party. This is my own background. All my people have always been stanch Democrats. I love the South, her people, her traditions, her institutions, and her culture. My grandfather, my relatives wore the gray. My forebears shed blood for the southern cause. Both of my grandfathers, and all my relatives did their part in throwing off the yoke of carpetbagger reconstruction and in setting up the present South with all that the name implies. I am proud of the part they played.

Because of our solidly Democratic background, and because of our natural fear of Republican rule, our people, as a result of the mistreatment we have received from Republicans, are extremely reluctant to follow any course except the one that we have historically followed and this is true even though new conditions and new dangers make new policies advisable. The easy thing to do is to drift along, to say, "Let us at all hazards be loyal to the Democratic Party. Let us settle our controversies within the party; but on election day, come what may, regardless of the issues, we must give our electoral votes to that party." This is said to be sound politics: "Have no controversy; make no enemies; do not rock the boat." That is the easy way to stay in office. Such a course may lead to political power within the party organization, but it also leads to moral degradation. I know that this procedure, Mr. President, will in the end destroy the South and injure her people. I know it will play havoc with the future of my children and the children of my neighbors and friends.

No, Mr. President, we cannot play politics with southern institutions. We cannot, if we can help it, permit our party or any other political organization to follow a course that will result in tragedy for the South. It is evident that the present policies of the Democratic Party now lead to this end.

Mr. President, the grave dilemma in which the South now finds herself and the decision which her people must make involve one of the great problems of present day America.

I am frank to say that unless the southern people act, and act speedily and decisively, our social institutions, our culture, the traditions which still guide us, will be destroyed. In reconstruction, the most shameful era in American history, the Republican Party attempted to destroy the white race in the South. It attempted to form Negro States there with Anglo Saxon people subservient to the blacks. Our States were occupied by Federal troops; corrupt elections supported by the bayonet were the custom. Blacks, whether qualified or not, were voted by unscrupulous and criminal leaders with the promise of financial gain for victory in the election. I seriously doubt if there was ever a period of such corruption and infamy at any time in any Government in modern times. The Democratic Party of that day stood shoulder to shoulder with southern people. It opposed the corrupt reconstruction policies. It supported our aims. It assisted in the return of decency. Through its aid, together with an honest Supreme Court that upheld the Constitution of the United States, and through the superior intelligence and leadership of the Anglo-Saxon, the white people of the South were victorious. We took our place as one of the great sections of this country whose loyalty and fidelity to America has been tested on many battlefields. Since those times and solely because the Democratic Party has stood for State sovereignty and the social institutions of the Southern States, our people have remained solidly Democratic. We were correct in taking this position.

Since that time the South has been the backbone of the Democratic Party. Our people for generations have been loyal through victory and defeat. In

fact, the eminent position of the Democratic Party in the Nation today is due to the loyalty and fidelity of the Southern States. Now conditions have changed, and we find the Democratic Party bent upon the destruction of the institutions of the South.

Mr. President, no election forecast in 1948 gives the Democratic Party any chance of success without the electoral vote of the solid South. It is admitted by practically everyone that the election this year will be close, and it is admitted even by Democratic leaders themselves that it will take practically the entire electoral vote of the Southern and border States to give any Democratic candidate hope of success. In fact, our electoral vote is fundamental in all Democratic election calculations in 1948.

The great southern dilemma, Mr. President, is caused solely by our loyalty to the Democratic Party. Our own party up to now has been certain of us, and therefore cares nothing about us. They give us no consideration because they feel sure that, regardless of what they say or what they do, what the issues are or who the candidate is, our southern people will be led to the polls like sheep to vote the straight party ticket. The Republican Party is just as sure it will receive no political favors at our hands, and therefore cares nothing for us and will give us no consideration. As a result of southern loyalty, Mr. President, and solely because party leaders are certain of our votes, we find the national Democratic leadership today attempting to barter the South's social institutions for the political favors of mongrel northern minority groups in politically doubtful States—groups which place their own special demands above the welfare of the Nation. The leadership of both parties fawns over them. In fact, these minority groups today control the Government of the United States.

Mr. President, the people of the South are expected to remain docile while their civilization and culture are destroyed, while their segregation statutes are repealed by Federal action, and while the white race is destroyed under the false guise of another civil-rights bill. We are expected to remain docile while the pure blood of the South is mongrelized by the barter of our heritage by northern politicians in order to secure political favors from Red mongrels in the slums of the great cities of the East and Middle West. Our people are expected to do this under the guise of party loyalty. Southern leaders are expected to lead the people of the South to their destruction in order to obtain patronage and political favors.

Mr. President, this is the gravest time for the South since the reconstruction era. Indeed, conditions now are similar to those that existed in the 1850's. If one will but read the works of that greatest of all great southern leaders, the revered John C. Calhoun, one will see that conditions today are very similar to the conditions that existed in the last years of his life and that aroused that great South Carolinian to his magnificent efforts to save the South, her social institutions, her people and her culture.

Let me tell the people of the South we cannot afford to be subservient to the party bosses. Subserviency is the cause of our present crisis.

Mr. President, we have no race problem in the South. Both races live side by side in contentment. Both races know and respect the other. The Negro receives a square deal. Both races recognize that the society of the South is built upon segregation. In fact, the races segregate themselves because it is the natural thing to do. Both races recognize that segregation is for the good of both, and I am sure, Mr. President, that the Negro race in the South believes just as strongly in segregation as does the white race. Of course, there are some radicals among them who would oppose segregation, but I know the Negroes and I know that the great masses of them believe in and practice segregation. For example, I have received letters from Negro veterans from Mississippi who protest being placed in nonsegregated veterans' hospitals and request me to get them transferred to a Negro institution.

The agitation for the destruction of southern segregation, Mr. President, does not come from the South. It comes from northern mongrels who desire to crack the color line and from politicians who engage in racial demagoguery to use the Negro to get his vote. The southern Negro knows better. He realizes that this program is not to his advantage. It is significant to me that the northern politicians who rail against segregation live very segregated lives themselves. In fact, they do not associate with Negroes as much as I do. They do not care as much for Negroes as do the people of the South. They promise social equality but they know they cannot bring it about. Northern people would not stand for it any more than southern people. The masses of the people of the North believe in segregation. Everyone knows that. The promise of social equality is a fraud, an attempt to use the Negro for political purposes. Southern Negroes know that. They are not fooled. The northern politician is interested in using him and in voting the Negro in the North. It has been the history in the North that the Negro has been repeatedly used politically and then cast aside. This is not true in the South. Southern people are sincerely interested in the welfare of the southern Negro.

Mr. President, every decent southerner desires the Negro to do well. The South is just recovering economically from the Civil War. Our great problem in the South has been poverty. Both races have been held down because of it. The South has been deliberately impoverished since the Civil War, Mr. President, by freight rate and tariff discriminations, by absentee proprietorship. Our natural resources have been exploited by eastern capital as an outlet for investments to make huge profits from cheap southern labor. The northern politicians who imposed this system on the South and maintained it for years also posed as friends of the Negro and appeared to champion his rights, yet they were merely using him for political and financial gain.

Mr. President, the greatest economic development in America is now occurring in the South. My State, Mississippi, has made more progress since the great depression than any other State in the Union. I am struck by seeing the bustle and expansion of the South as compared with the mill towns of New England. As the South has developed, as the income of our people has risen, the southern Negro has made phenomenal progress. His standard of living has vastly increased. Education and health facilities have improved. In fact, his rise has been assisted instead of hindered by the southern white man.

I know the South must spend more money on Negro education. The Negro is entitled to this. We must improve his hospital facilities. There must be better housing. Every decent southerner believes in these things. This should be done and is being done as rapidly as economic conditions permit. A high standard of living for the southern Negro means higher southern prosperity. Increased purchasing power helps everyone, white and black. Southern people recognize this. The South can now do it and will do it because the shackles of northern domination, the archaic system which has enslaved both white and black, is being thrown off. We now have the capital to develop our own resources.

Mr. President, with reference to the intricate problem in human relations which history has thrust upon the Southern States, I think it would be well for us to recall the words of a true liberal Republican from the State of Idaho, the late William E. Borah, who in a debate on a sectional anti-lynching bill rose to the true heights of his greatness. Since this was no self-serving declaration from a Southerner, I think the Nation would be interested now to recall his words:

> These States are not to be pilloried and condemned without a full presentation of the nature of the task which fate and circumstances imposed upon them, and not without a complete record as to the weight and difficulty of the task, what has been done, and with what good faith it has been met. I shall contend that the Southern people have met the race problem and dealt with it with greater patience, greater tolerance, greater intelligence, and greater success than any people in recorded history, dealing with a problem of similar nature. Let us inquire what it is that the South has had to do, how it has done it, and what reason there is now, after 70 years of great effort, to pass censure or condemnation of those great States and that great people.

At the conclusion of this great speech, Senator Borah stated:

> Only the patient process of education, the uplifting power of religion, the tolerant, noble-minded men and women who give their thoughts to the cause can remove or mollify such injustices or such harshnesses. And that is being done; it is being done in the South; that result the South is achieving; the record so shows; and the people of the South are entitled to our commendation and not our condemnation. They are entitled to our cooperation and support.

Mr. President, the racial agitation in this country today is not over equality of economic opportunity for the Negro. It is not over a program to raise the Negroes' standard of living and better their condition. The issue is the destruction of segregation, the destruction of the sovereignty of the States, and the concentration of all power in the Federal Government. In fact, the Constitutional issue today is the same as it was in the

days of John C. Calhoun when he made his heroic stand for States' Rights and pointed out the fallacy of the theory that the Federal Government had the right to judge, in the last resort, of the extent of its powers.

In the last analysis, these are the issues, Mr. President—issues presented largely by our own party, the Democratic Party, under its radical northern leadership which has taken the lead in the betrayal for political purposes of their friends and benefactors of the South. Both parties, in the wild bidding for votes of organized minorities in the Bronx, Brooklyn, Harlem, and other great cities of the North and East would change the form of our Government and do grave damage also to the masses of the people of the North who have no special ends to serve.

Mr. President, beginning about the year 1938 and continuing without let-up, there has been a concerted assault upon the South's social institutions and upon segregation in both the North and South. This drive has been supported by organizations with a Nation-wide membership, with vast sums of money at their disposal, and has been accompanied by a violent propaganda barrage.

Mr. MAYBANK. Mr. President, will the Senator yield?

Mr. EASTLAND. I yield.

Mr. MAYBANK. The Senator was discussing the antilynching bill and the statements made by the late Senator Borah——

Mr. EASTLAND. If the Senator will wait a moment, I am coming to a discussion to the antilynching bill.

Mr. MAYBANK. I was about to ask the Senator if he has the records showing the number of lynchings, and the details.

Mr. EASTLAND. There was one lynching in the United States last year.

Mr. MAYBANK. I will wait until the Senator reaches that subject.

Mr. EASTLAND. The bills which these organizations have supported in recent years are several. One of them, the anti-poll-tax bill, seeks to have the Congress declare that the payment of a poll tax shall not be a qualification for voting in an election for Senator, Representative, and Presidential elector.

I have heard some people in the South say that the poll tax is not one of the major safeguards of white elections. Of course, it is not, but the fight goes much deeper than that. It is an attempt to transfer the power to define the qualifications of electors from the States to the Federal Government. It is an attempt to give to the Federal Government control of all elections.

Mr. MAYBANK. Mr. President, will the Senator yield?

Mr. EASTLAND. I yield.

Mr. MAYBANK. I should like to remind the Senator that he and I, on this floor and in committee and elsewhere, violently opposed poll-tax repeal measures on two occasions during recent years. I commend him for this statement as to the thoughts of the southern people. It is not a question of the poll tax, or what they think about the payment of the poll tax, but it is entirely a question of Federal interference. In 1942 I recommended to the legislature of South Carolina the repeal of the poll-tax law. Last year that repeal measure passed one branch of the State legislature. I believe that had it not been for the poll-tax fights and the confusion which resulted here when several of us were even apprehended and even brought back here one Saturday afternoon in 1942 or 1943, there would be practically no States in the South today with the poll tax. Each year the poll tax is repealed in a number of Southern States; until we have reached the point where only a few States have such laws. We were in process of repealing our State law when the strong arm of the Federal Government, through the Senate, said "We will do it for you. We will give you no chance." We had a long fight in the Senate, and a vote on cloture on two occasions. and the result was only harmful to progress.

Mr. EASTLAND. Of course, the poll tax does not amount to much. If Southern States wished to do so, all they would have to do to confine their electors to one race would be to provide that no man who had been convicted of bigamy or unlawful cohabitation, or who was guilty of adultery, should vote. That would give us an iron-clad control over our elections.

The facts are, Mr. President, that if Congress has the power to say that the poll tax is not a qualification for elector in national elections, it can say that other qualifications set up by the States are not qualifications, and can strike down all the voting safeguards of any State. If Congress has the power to say what are not qualifications, it has the power to decide affirmatively what the qualifications of electors are. This would be the result if this bill should be enacted and sustained by the Supreme Court. The right to define the qualifications of electors is the cornerstone of State sovereignty. It is one of the fundamental powers of the States. Under no conditions should the South surrender it.

Mr. President, another bill on this program is FEPC, a bill which, stripped of its nonessentials, seeks to use the power of the Federal Government to abolish segregation of Negroes and whites in the South. Its purpose is to break down all forms of segregation in employment, both public and private, in all parts of the country. During the war, when we had a temporary FEPC created by Executive order, its activities were directed to this end. In practice this bill would give minority groups preference in employment over other segments of the population. It would deprive management of the right to hire its own employees and transfer that power from industry to the Federal Government. It would give to the Federal Government the power to make promotions in private business, and through these activities would largely result in Government control of all business. This bill seeks to overrule the segregation statutes of the States. It would destroy the private-enterprise system. Mr. President, never in the history of the Republic has any measure been considered which would give the Federal Government such vast power over the American people. The reconstruction measures of Thaddeus Stevens and Charles Sumner were mild in comparison. This bill alone would degrade, mongrelize, and destroy the South, and yet we have a Democratic President sponsoring it—a man who was nominated for the Vice Presidency because of the support of the Southern States.

There is also the antilynching bill, a bill which if enacted and sustained by the courts would invade the police power of the States and make a Federal crime out of that which under the Constitution is solely within the domain of the States, thus further destroying State sovereignty and our dual system of government.

Mr. President, if the laws here recommended shall be passed by Congress, the groups advocating them have every reason to feel that the Supreme Court, as now constituted, would hold such action constitutional; thus, from now on, the power would be created through action of Congress to destroy State law and State governments. I say for my colleagues from other States, who in this instance have little interest in the laws affecting the South, that this power once being vested in the Federal Government would be exercised in the future to destroy any law which they wished to destroy in their States, and their State governments would actually exist no longer except as a political subdivision to collect taxes for strictly local affairs. Moreover, Mr. President, I want to point out to the minorities in this country who desire that this step be taken that they are creating an instrumentality of Federal power for their destruction, which can be grasped by any future Hitler, Mussolini or any other man on horseback. Actually, the greatest protection the American people have, be they members of minority races or otherwise, is the protection afforded by State law and State government, as guaranteed in the Constitution, not only with regard to civil rights but with regard to all others.

Mr. President, for several years I have seen the storm clouds gathering. I have seen conditions become darker and more threatening. I have seen these organizations become more powerful, more demanding. I have seen both political parties become more servile, until today they are merely the errand boys, the flunkeys, of organized racial and religious minority groups. We see today the rights, the basic and fundamental liberties of a free people, bartered away in order to secure votes for politicians to capture or retain public office.

Make no mistake about it—the drive is on for the total destruction of segregation, with racial mongrelization the inevitable result. Look what the Attorney General of the United States did in the case of Shelly against Kreaemer et al. now pending in the Supreme Court. This was private litigation in which the Government was not a party and was not involved. Yet, to serve his political masters and to carry out the recommendations of the President's Committee on Civil Rights, the Attorney General announced administration political policy. In an amicus curiae brief, plainly filed for political purposes, he said:

Actual segregation rooted in ignorance, bigotry, and prejudice, and nurtured by the

opportunities it affords for monetary gains from the supposed beneficiaries and real victims alike, does exist because private racial restrictions are enforced by courts.

Mr President, late last year, as the crowning effort of northern radicals to put over their antisouthern legislation, the President's so-called Committee on Civil Rights issued a report which has become the Bible of the radical movement in the United States. The crux of the committee's report is the total elimination from American life of segregation, based on race, color, creed, or national origin. This was the committee's fundamental recommendation. The committee also proposed that all Federal grants-in-aid and other forms of Federal assistance to schools and other public or private agencies for any purpose be made contingent on the absence of discrimination and segregation, based on race, color, creed, or national origin, in the recipient institutions.

In addition, the committee report recommends the abolition of restrictive covenants, together with a renewed court attack, with intervention by the Department of Justice, upon covenants which prohibit the sale of property in white areas to Negroes. It is interesting to note that this recommendation has been carried out by the disgraceful intervention of the Attorney General in a private suit now pending in the Supreme Court, a case which I described a few moments ago.

Other portions of the report recommended the abolition by the Federal Government of segregation in education, health services, hospitals, schools, swimming pools, and in all public services of the National Government. It further recommended elimination of segregation in interstate commerce, and in all places of public accommodation or public amusement, and, in addition, in the armed forces of this country. I note, Mr. President, from the public press that this latter recommendation is now being carried out. In fact, the crux of the whole report is the total elimination from American life of all segregation based on race or color. This report was approved by the President of the United States when he stated in a message to Congress on February 2 of this year that we must close the gap between our ideals and practices.

It is interesting to note, Mr. President, that the southern people who were to be so vitally effected by the President's so-called Civil Rights Committee were denied representation on the committee, except for two persons who had already by former action committed themselves to the course which they were expected to pursue. The views of the vast majority of the people of the South, both white and black, who believe in segregation were not consulted, and the idea that there might be opposition to the views of the committee by the vast majoriy of bona fide southerners of all races was dismissed as if it were a matter of little moment.

Mr. President, in the President's special message on civil rights to the Congress he endorsed the bills which I have heretofore described this afternoon. He endorsed the principles embodied in the bill of the Negro Congressman, Rev. ADAM CLAYTON POWELL, abolishing segregation of the races in transportation.

But the President proposes to go much farther than has the Reverend POWELL in destroying segregation. He proposes to create a Civil Rights Division of the Department of Justice with an army of lawyers to launch an intensive campaign for the removal of any form of law or ordinance now existing or hereafter passed by States or municipalities which might provide for the segregation of the races in schools, swimming pools, restaurants, hotels, or segregation in any other manner. Furthermore, the President proposes that this army of lawyers be augmented by the agents of the Federal Bureau of Investigation in carrying out this campaign and announces that hordes of these FBI agents already are being trained for this purpose.

This is the meaning of the message of the President. It contains the most far-reaching recommendations ever made by a President of the United States.

Mr. President, this is the same civil-rights program which passed the Congress between 1866 and 1875. It is the same program which was vetoed in part by President Andrew Johnson, passed over his veto by a reconstruction Congress, and which was declared unconstitutional by the Supreme Court.

Mr. President, the people of the South do not realize the full import of the President's program. I quote from an article in the New York Times of February 8 of this year, which presents an accurate picture of what the South faces at this time:

> Enactment of the President's proposals, some observers point out, would put on the statute books as imposing a Federal civil-rights structure as was erected by means of civil rights acts passed between 1866 and 1875. The first of these was intended to eliminate the post-Civil War black codes by which the Southern States sought to restrict Negroes. The second was designed to assure the rights to all citizens regardless of race or color. Another act was aimed against lynching, and one was passed in 1875 prohibiting Jim Crow practices.

This program would have destroyed the South beyond hope of redemption. The South was saved because the Supreme Court of the United States upheld the Constitution and the sovereignty of the States by declaring these bills unconstitutional. We are now face to face again with the stark realities of this same condition. We have here a Democratic Party attempting to reenact the same program which the Republicans attempted in the heat of reconstruction, which program was responsible for making the South solidly Democratic.

Most of these antisouthern measures would have passed years ago had it not been for the filibuster in the Senate. This is the sole defense the South has thrown up. Every frank southern Senator knows that the filibuster is merely a temporary expedient, a delaying action which solves nothing. It will be overcome in time, and then the Southland, which should be the first loyalty of every true southerner instead of any political party, will be crushed.

Mr. President, year by year when cloture votes are taken to shut off debate and pass these vicious measures aimed at our people, the South grows weaker as the drive against us grows stronger. A few years ago a majority of the Senators voted against cloture. Today a majority vote to invoke cloture. The tactics used against us are succeeding. The South's back is to the wall. Ah, Mr. President, we may defeat our enemies this year and next year, but as long as the present course is pursued the end is inevitable. I am absolutely certain that the South is drifting to her destruction. Northern Democrats tell southern leaders to let the drift continue by following the course we now pursue. They say, "Let us swap your institutions for the minority votes in the North. It is good politics. These groups hold the balance of power. The Democratic Party can thus win the election. You can have patronage, committee chairmanships, and governmental favors." That, Mr. President, is the price we are offered for surrendering the South and permitting the destruction of her people.

Ah, Mr. President, the advice that the South can do nothing because both parties stand for the same thing is an argument of helplessness and hopelessness. There are exceptions, of course; but mark these words: It is often the advice of one who does not desire to take positive, firm action to alleviate the South's present condition. We have passed the point where that kind of argument should prevail.

If the people of the South do not take strong action, we are lost. What the South needs is leadership—leadership which will tell Southern people that they cannot afford blindly to follow a political party which is bent upon their destruction. The South needs leaders who place the welfare of the people above positions of power in any political organization.

The question is asked, What can the South do? The argument is made that both parties stand for the same thing, and that if we withhold votes from the Democratic candidate we merely help elect the Republican candidate, who will be just as bad or worse if he captures the Presidency. Then the argument is made that this is a question that should be fought out within the ranks of the Democratic Party. That latter argument, Mr. President, is unsound. The South is a minority in any Democratic convention since the abolition of the two-thirds rule, and as long as the leadership of the Democratic Party is sure of our electoral votes, they pay no attention to us. In fact, Mr. President, "fight it out in the party" is what the northern bosses want us to say. It is what they expect us to do. Indeed, all their calculations are based upon our taking that position. The disposition of the southern electoral vote is the question. If we withhold these votes, we can dictate our terms. We can stop the Democratic leadership in their tracks.

Common sense demands that the electoral vote of the South be used to protect her people. The stark reality is, however, Mr. President, that our electoral vote is the basis of the movement to destroy our social institutions. Our electoral vote is now being used to promote such purposes. The politicians are

expected to keep us in line in the name of party harmony, while they stay in office through the dispensation of governmental favors.

Mr. MAYBANK. Mr. President, I wish to refer to the statement the Senator from Mississippi made about abolishment of the two-thirds rule, which occurred at Philadelphia in 1936. As he has said, prior to that time the South had the veto power; and with that veto power, regardless of whether it was democratic, the South had something to bargain with.

Mr. EASTLAND. Yes; we did. I say to the Senator from South Carolina that today the South has a much stronger bargaining position than it ever had under the two-thirds rule, and that is by means of the electoral vote.

Mr. MAYBANK. Mr. President, I am happy to hear the Senator from Mississippi say that, because in 1936 I happened to be on the committee—Senator Clark, of Missouri, was chairman—when action was taken to abolish the two-thirds rule, which I, along with a few others, opposed.

I believe the Senator from Mississippi is going to discuss the Electoral College, so with his permission I ask that at the end of his remarks there be printed in the RECORD an article entitled "Southern States Held Able To Force Election of President in House," by David Lawrence, appearing in today's Washington Star. Recently many other able articles have appeared in the newspapers, and they, too, could well be read with profit by all of us.

So, Mr. President, I ask unanimous consent that the article be printed in the RECORD at the conclusion of the Senator's remarks.

The PRESIDING OFFICER. Without objection, the article will be printed as requested.

(See exhibit A.)

Mr. MAYBANK. However, Mr. President, without asking at this time that additional articles be printed in the RECORD, so as further to illustrate the point the Senator has made, as well as the points I know he will make, I wish to make a brief statement about the southern governors' conference. When I was asked about it, I said I had nothing to say until the conference met, but that when it met I would have something to comment on. I wish to say now——

Mr. EASTLAND. Mr. President, if the Senator from South Carolina will permit me to interrupt, let me say that I came to this Chamber today with a fever, and I should like to conclude as quickly as possible. Then of course the Senator from South Carolina can address the Senate in his own time. I make this statement because I am weak and can hardly stand up now. I am sorry to have to make a personal reference.

Mr. MAYBANK. Then, Mr. President, I ask that a copy of the resolution introduced by Governor Thurmond of South Carolina be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD.

(See exhibit B.)

Mr. CHAVEZ. Mr. President, with reference to the abolition of the two-thirds rule at the Democratic National convention in 1936, let me state that what the Senator from South Carolina has said is correct. I happened to be on the committee. The irony of the situation is that those who now are complaining are the ones who voted then for abolition of the two-thirds rule. Only four members of the committee on rules voted against the proposition.

Mr. EASTLAND. Mr. President, the Senator from New Mexico refers to those who are complaining at this time. If the Senator will please mention names, then we can see whether they are complaining.

Mr. CHAVEZ. Very well; I will mention names. The Senator from South Carolina, Representative Cox, of Georgia, Judge Armstrong, from the State of Texas, and the Senator from New Mexico were the only four who voted against abolition of the two-thirds rule.

Mr. EASTLAND. But the Senator has said that those who are complaining now were then in favor of abolishing that rule. I wish to know the names of those who are complaining now.

Mr. CHAVEZ. I am one of them; I am complaining about the abolition of the two-thirds rule.

Mr. EASTLAND. And so am I.

But, Mr. President, the question is, What can the South do? By withholding her electoral votes, the South can defeat in 1948 any Democratic candidate. In fact, no candidate would be nominated if it were known that he would not receive the South's electoral votes. The machines of the North which control the party are not crazy. They will nominate no candidate whose defeat is certain. If the South were to support a southern candidate for President, the election this year would in all probability be thrown into the House of Representatives. Mr. President if that were done, I am confident a southerner would become the President. A Republican would vote for a southern Democrat before he would vote for a northern Democrat. A New Deal northern Democrat would vote for a southern Democrat before he would cast his vote for a Republican. If the South will but act, some great southern leader can become President of the United States next year.

But if the South did not elect the President, this much is certain: A man who believes in the Federal system and in the preservation of the States would win, and, in addition, in that election in the House of Representatives, when each State has but one vote, with the votes that we possess we could absolutely put a stop to this antisouthern drive; we would put a stop to it in Congress; we would put a stop to it at the White House. At the very least this would be our minimum achievement. We would have the veto power over any candidate for the Presidency. The South does not have to act as a unit, desirable as that would be; 60 to 70 electoral votes are sufficient.

No, Mr. President; the question is not "Where can the South go?" The answer to that is simple. The South can go to the electoral college, and can go there with profit. The thing that disturbs my rest and keeps me awake is the question, "Where can the smart city bosses—Mr. Hague, Mr. Kelly, Mr. Avery, Mr. Flynn, and Mr. Sullivan—go?"

Let us remember that the only way the South can be defeated in the electoral college is for the Republicans to unite with the radical northern Democrats. That will never happen.

Mr. President, it is said that when the two-thirds rule was repealed at the national convention in 1936, the South lost its political power. That is faulty thinking. The South has a much more powerful weapon than the two-thirds rule ever was. All we have to do is to refuse to vote the ticket. We have only to give our electoral votes to some other candidate. Then we can call the turn, and we can dictate the party's policies. In that way we can call an instant halt, Mr. President, to this shameful antisouthern drive.

Mr. President, the correct strategy, if the South is to be saved, is to adopt the tactics of our adversaries: Do not blindly follow one party. Put ourselves in a trading position. Be sought after, instead of despised. We should go back to the Constitution, as Calhoun advised, when in 1851, with similar conditions, which he outlined, he predicted that the only thing that could save the Union and could save the South would be independent Presidential electors. A reading of Calhoun's words describing the conditions then prevailing will make any southern Senator think. He predicted the Civil War; and, as I have said, he predicted that the only thing that could save the Union and could save the South would be independent Presidential electors. South Carolina followed his policies until the election of 1860, the last election before the Civil War. Mr. President, southern Senators and southern leaders can read Mr. Calhoun's words with great profit.

So I say that we should go back to the Constitution, as Calhoun advised, and we should authorize our Presidential electors to vote for the candidate, regardless of who he is, who will uphold the Constitution, protect the interest of all Americans, and recognize the peculiar problems of the South. We must reward our friends and punish our enemies. Our people should realize that the South is a sleeping giant. We hold the balance of power in this Nation. We can save the country. Our people must act and act quickly for our protection. There are a few thousand organized people from minority groups in the North who run this Nation by playing "hard to get." Both parties bid for them. As a result they control both parties. Yet they do not have a single electoral vote. The South, with 127 electoral votes, because she is certain politically, is ignored and held in contempt by both political parties. She is on the brink of destruction, drifting without leadership, and only prompt action can save her.

Mr. President, these are questions which must be decided alone by the people of the South. I hope our political leaders do not stand between southern people and a clear analysis of their problem. If the South loses, the people, not the politicians, will pay the penalty. I hope politics and patronage do not destroy our people, their culture and traditions. I hope we can hand down

our institutions pure and undefiled to our children and our children's children. This is a question for southern statesmanship. With firm leadership we can accomplish our salvation.

I know, Mr. President, the movement to carry out this program must come from the people. There must be a grassroots organization in every hamlet of the South. The people must be informed of the dangers involved and of the results if the South is crushed. This all-southern organization must be pushed. There must be mass meetings. The people are ready. The South can be saved.

This much is certain, if the present Democratic leadership is right, then Calhoun and Jefferson Davis were wrong. If the present Democratic leadership is right, then Thaddeus Stevens and Charles Sumner were right, and Lee, Forrest, and Wade Hampton were wrong. If the President's civil-rights program is right, then reconstruction was right. If this program is right, the carpetbaggers were right. That is just what this program means. The South cannot meekly take it and maintain its self-respect. Subserviency leads only to destruction.

EXHIBIT A

[From the Washington Evening Star of February 9, 1948]

SOUTHERN STATES HELD ABLE TO FORCE ELECTION OF PRESIDENT IN HOUSE—ELECTORAL VOTE BLOC COULD BE WITHHELD IF THEY REJECT TRUMAN

(By David Lawrence)

The Solid South can exert the balance of power in the coming Presidential election. Ten States with an electoral vote of 115 can compel the selection of a President by the House of Representatives if the general election is close. Because of that potentiality the South can influence the attitude of the candidates and platforms of both political parties.

The device is sanctioned by the Constitution. It permits each State to choose its own electors and these electors can, if instructed by a State convention, vote as the people of that State may direct.

By withholding 115 votes from the Democratic candidate, for instance, the first ballot in the electoral college may show that no candidate has received the necessary majority of 266 votes. This automatically takes the election of a President out of the hands of the electoral college and, as provided in the Constitution, it transfers the election to the House of Representatives.

STATES VOTE AS A UNIT

But in the House there are, for this purpose, only 48 votes because the members from each State must decide by majority vote for whom the single ballot of that State shall be cast. It is necessary for a candidate to get 25 votes in order to win an election.

It requires a two-thirds vote to make a quorum when the election is placed in the hands of Congress but the actual decision is by majority. In the House it is a majority of the States when a President is chosen and in the Senate it is a majority of the Senators when a Vice President is chosen.

The mere fact that the electors from Southern States would go to the electoral college instructed to vote for an independent Democrat would have its immediate effect on the policies or programs of any man who was a candidate for the regular Democratic nomination.

This method of exercising influence in a national election has not been used heretofore because the South, especially since the War between the States broke up political parties, has been able to wield a veto in the Democratic national nominating conventions. But in 1936, through the influence of the late President Roosevelt, the one-third veto possessed by the South was abolished. Instead of nominating by a two-thirds vote, the Democrats now choose a candidate by a majority vote.

HURT BY LOSS OF RULE

The abolition of the two-thirds rule deprived the South of much of its influence in the Democratic Party. Mr. Truman, by his civil-rights message, has merely taken advantage of the alleged helplessness of the South, for it has been taken for granted that the South could be pushed around and would still vote Democratic on election day.

There are many reasons why the Democratic Party in the South must necessarily remain as it is, especially because of the State primary machinery. There is, however, nothing to prevent the Democrats in the South from using the name Democrat and utilizing the State party machinery and still remain free to support whomever they please in the electoral college or in an election which is transferred to the House of Representatives.

The important point to be borne in mind is that electors pledged to a particular candidate cannot ethically change their minds after a State has voted. This makes it all the more essential that, if the balance of power is to be wielded legitimately, the people of each State be advised in advance so that they may vote for electors who are not pledged to the regular nominee. There is nothing to prevent the regular nominee, however, from having a set of electors chosen in his behalf so that the people can decide between the two sets.

CONTROVERSY MAY BLOW OVER

The whole civil rights controversy may blow over. It may have been merely a desperate gesture on President Truman's part to prevent Negro votes in the big northern cities, which have been Democratic, from going over to the Wallace banner. But sooner or later the coalition of northern Democrats and Republicans will be able to put through legislation on the Negro problem which will be at variance with the wishes of the South. Hence, political action through the use of a bloc of 115 electoral votes appears to be one way that the South can protect itself against steps which it does not favor.

In a close election the 115 votes could do considerable damage to a regular Democratic nominee, but if another Democrat should achieve the popularity as a vote getter that Franklin Roosevelt attained it would not make much difference how the 115 votes were cast.

The counterattack then might come from groups in the North by reviving the third-party idea in those States where the big-city vote is a deciding factor. The presence in the contest this year of a radical third-party candidate is, strangely enough, the circumstance that gives the South its minority power.

If a Republican won a majority of the electoral votes next time the protest of the South would be of no avail. If, however, a Democratic majority is elected in both Houses of Congress, and then the South withholds its electoral vote from Mr. Truman, and the Republicans do not poll a majority of the electoral votes, it would be possible for the 10 States of the South, plus 15 Republican States in the North, to bring about the election of a Republican. It would even be possible for the South's own independent candidate to be chosen President if the Republicans preferred him to the regular Democratic nominee. The Constitution is sufficiently flexible for minority groups to combine to make a majority of their own in the election of a President.

EXHIBIT B

MOTION OF J. STROM THURMOND, GOVERNOR OF SOUTH CAROLINA, AT SOUTHERN GOVERNORS' CONFERENCE, WAKULLA SPRINGS LODGE, WAKULLA SPRINGS, FLA., SATURDAY, FEBRUARY 7, 1948

The people of the States represented by the members of this conference here have been shocked by the spectacle of the political parties of this country engaging in competitive bidding for the votes of small pressure groups by attacking the traditions, customs, and institutions of the section in which we live.

Our people have been engaged for many years in a tremendous effort to restore our section to the place in the economy of the Nation which it should rightfully occupy. On the solution of our economic problems depend the education, welfare, and progress of all of our people and we have spared no effort to solve those problems. Economic underprivilege in the South has known no color line; it has fallen heavily on all races alike. The people of the Nation are well aware of the headway which we have already made toward solving the economic problems of our people, and it will be as a result of the solution of our economic problems that our racial problems will disappear.

Despite our sound, constructive, and sure progress, the political leaders of the country have been unwilling to respect our accomplishments and to let us continue with the task. Their political attacks are calculated only to hamper our efforts and actually militate against the welfare of the very people whom they assert they are trying to help. Under the compulsion of petty political considerations, they have seen fit to outrage and insult our people because they think we have no place to which we can turn.

Without sincerity and in utter disregard of the facts, they again propose a so-called antilynching bill. They ignore the fact that the crime of lynching has been virtually stamped out in the South without outside interference. It is a matter of common knowledge that this legislation would be an unconstitutional invasion of the field of government of the several States.

They have again sponsored a so-called anti-poll-tax bill. It is a matter of common knowledge that this type of legislation is an unconstitutional infringement upon the right of the several States to prescribe voting qualifications.

They talk about breaking down the laws which knowledge and experience of many years have proven to be essential to the protection of the racial integrity and purity of the white and the Negro races alike. The superficial objections to these laws arise from economic rather than political causes, and their sudden removal would jeopardize the peace and good order which prevails where the two races live side by side in large numbers. As a nation we have favored the protection of racial autonomy and integrity in other lands, such as Palestine and India, but a different doctrine is sought to be applied here at home.

They advocate a so-called fair employment practice law, which every thinking American citizen, upon reflection, will recognize to be an anti-American invasion of the fundamental conception of free enterprise upon which our economic structure is erected and which made America great. The right of a man to own and operate his own business, in which he has his savings and to which he devotes his labor and his energy, is to be impaired or destroyed by governmental interference under the guise of protecting the right to work. In effect, such a law would render every private business in this Nation a quasi-public one. Employer and employee alike are adversely affected by this type of legislation, and the concepts upon which it is based are appropriate, not to the American

way of life but only to the economic and political philosophy of the Communist Party.

We are expected to stand idle and let all of this happen, for the sole purpose of enticing an infinitesimal minority of organized pressure blocs to vote for one or another candidate for the Presidency. It is thought that we have no redress. This assumption ignores the electoral college set up in the Constitution of the United States.

We should approach the situation thus presented with dignity, self-respect and restraint. We should refuse to be stampeded or to indulge in idle oratory. We must consider the matter calmly and deliberately to the end that by joint and common action and decision we may demand and obtain for our people the consideration and respect to which they are entitled. We must no longer permit pressure groups by their adroit activities to establish by propaganda and political maneuvering a nuisance value for themselves in election years which threatens to defeat the political rights of others and endanger the progress which we in the South have made to better the lot and circumstance of all our people.

Therefore, I move, Mr. Chairman, that this conference go on record as deploring all ill-considered proposals which have the effect of dividing our people at a time when national unity is vital to the establishment of peace in this troubled world; and that this conference set a meeting not later than 40 days from this date, at a time and place to be designated by the chairman, for the careful consideration of the problems of the Southern States arising from such proposals; and that the chair do appoint a committee from the membership of this conference to make careful inquiry and investigation into such problems, and their solution by joint and common action, and to report to the conference at that meeting, with their recommendations as to further action which may be taken in the premises.

THE PARTITION OF PALESTINE

Mr. KILGORE. Mr. President, the situation in the Holy Land is at once a challenge to the world's conscience and a test of our determination to build the United Nations into a genuine peace organization.

The world is sitting by idly while the British Empire intentionally or unintentionally disregards its mandate duties by permitting organized bands, trained and equipped outside the Holy Land, to invade the Holy Land and shed the blood of those who are dedicated to enforce the decision of the United Nations.

I believe millions of Americans will join with me in the prayerful hope that the President will call on all parties in Palestine and the neighboring countries to put an immediate stop to the tragic and unnecessary bloodshed. Our Government should remind the world that blood is still more precious than oil and that the time has come for the code of the United Nations to replace the Machiavellian code of power politics.

The western democracies have complained frequently—and in my opinion, justly—that the veto was strangling the United Nations and preventing its development as the world peace organization. But what do we find in the Palestine situation? The enforcement of the United Nations decision to partition Palestine is being sabotaged by an under-the-table pocket veto.

Strife and bloodshed in the Holy Land would disappear if Great Britain and the United States, and all other signatory nations to the UN agreement said forcefully and unequivocally that they would insist on implementation of the UN decision, and that they would regard all those who took up arms against that decision as enemies of world peace and of the United Nations—enemies as dangerous and culpable, let us say, as the Greek rebels who took up arms against the legitimate Greek Government.

There is every reason to believe the cause of peace in the Middle East would be advanced tremendously if the United States, Great Britain, and the other signatory nations make it crystal clear to the world that they will not permit their arms and military equipment to go to those nations in the Middle East now threatening to use them to overthrow the solemn decision of the United Nations.

The Palestine decision promised to be a noble and heartening example of what the organized conscience of mankind could achieve through its United Nations organization. For the first time in the history of the United Nations the East and the West, the Soviet bloc and the Democratic bloc, came to an agreement as to what justice and international morality dictated. If that decision is permitted to become a scrap of paper, if it is to be pocket-vetoed by an under-the-table deal with the feudal Arab landlords, if the Arab states are permitted to train and arm their invading guerrillas, then the United Nations has been dealt as grievous a blow as any dealt by the open, formal vetoes already recorded.

The course of honor for those who love peace and Christian decency is clear. America must take the lead in calling for an end to the bloodshed in Palestine and for the immediate enforcement of the United Nations' agreement.

APPOINTMENT OF COMMITTEE TO ATTEND FIFTIETH ANNIVERSARY OF THE FREEDOM OF CUBA

Mr. VANDENBERG. With the indulgence of the Senate, the President pro tempore, speaking from the floor, would like to announce the appointment of the two Senators to be named under Senate Concurrent Resolution 41, in connection with the Cuban ceremony. The President pro tempore names the Senator from North Dakota [Mr. YOUNG] and the Senator from New Mexico [Mr. CHAVEZ].

EXECUTIVE SESSION

Mr. IVES. I move that the Senate proceed to the consideratior of executive business.

The motion was agreed to, and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. STENNIS in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. JOHNSTON of South Carolina, from the Committee on the District of Columbia:

Frank Hammett Myers, of the District of Columbia, to be an associate judge of the Municipal Court for the District of Columbia, vice Nathan R. Margold.

By Mr. VANDENBERG, from the Committee on Foreign Relations:

William H. Beach, of Virginia, and sundry others in the diplomatic service;

John M. Cabot, of Massachusetts, and sundry others in the diplomatic service;

Leslie A. Wheeler, of the District of Columbia, and sundry others in the diplomatic service;

A. Ogden Pierrot, of Virginia, and sundry others in the diplomatic service; and

Harry L. Smith, of Illinois, and sundry others in the diplomatic service.

The PRESIDING OFFICER. If there be no further reports of committees, the clerk will state the nominations on the Executive Calendar.

UNITED STATES PUBLIC HEALTH SERVICE

The legislative clerk proceeded to read sundry nominations in the Public Health Service.

Mr. IVES. I ask that the nominations in the Public Health Service be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc. That concludes the Executive Calendar.

Mr. IVES. I ask that the President be notified at once of the confirmations of the nominations.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

RECESS TO WEDNESDAY

Mr. IVES. As in legislative session, I move that the Senate now stand in recess until 12 o'clock noon next Wednesday.

The motion was agreed to; and (at 5 o'clock and 9 minutes p. m.) the Senate took a recess until Wednesday, February 11, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 9 (legislative day of February 2), 1948:

JOINT UNITED STATES MILITARY ADVISORY AND PLANNING GROUP IN GREECE

Maj. Gen. James Alward Van Fleet, O3347, United States Army, for appointment as Director, Joint United States Military Advisory and Planning Group in Greece, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

IN THE ARMY

PROMOTIONS IN THE REGULAR ARMY OF THE UNITED STATES

(Those officers whose names are preceded by the symbol (×) are subject to examination required by law. All others have been examined and found qualified for promotion.)

To be colonels

Col. Louis Simmons Stickney, O7515, Army of the United States (lieutenant colonel, U. S. Army).

Brig. Gen. William Hesketh, O7516, Army of the United States (lieutenant colonel, U. S. Army).

Col. Maurice Garver Stubbs, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Russell Skinner, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. George Warren Dunn, Jr. [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Alexander Klein, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Arthur Harold Luse, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Daniel Webster Hickey, Jr., [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harry Reichelderfer, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Reamer Welker Argo, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Frederick Adelmer Ward, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Robert Victor Maraist, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Melvin Lewis Craig, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Levie Wilson Foy, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Cord Blizzard, Jr., [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Warren Henry McNaught, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Robert Ignatius Stack, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Bartholomew Robins De Graff, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Albert Collier, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Archibald Miles Mixson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Clifford Bert Cole, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Albert Gresham Wing, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Fred Rehm, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Donald Thomas Nelson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Earl Campbell Horan, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Arthur Grady Hutchinson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Ainsworth Andrews, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. James Julian Pirtle, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Lois Chester Dill, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Edward James Maloney, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Richard Abram Jones, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Milton Brandt Goodyear, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Lt. Col. William Ewart Gladstone Graham, [redacted], United States Army.

Col. William Norman Thomas, Jr., [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Theron DeWitt Weaver, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Frederic Franklyn Frech, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Elliott Wood, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Raymond Greenleaf Sherman, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Brig. Gen. Eustace Maduro Peixotto, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Russel Fountain, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William John Niederpruem, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Frederick William Adams, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Henry Edward Tisdale, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. James Washington Curtis, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Thomas Morris Jervey, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Charles Dayton Carle, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Fred Anthony McMahon, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Hartwell Newton Williams, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Leslie Rudisill Forney, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Franklin Johnson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Tryon Mason Shepherd, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Paul Roy Guthrie, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Arthur Musser Sheets, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Ira Edgar Ryder, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Francis Frost Cooper, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Frank Ward, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harold Edward Potter, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Lt. Col. Willard Lapham Smith, [redacted], United States Army.

Col. Clarence Charles Fenn, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harold Sidney Johnson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Llewellyn de Waele Tharp, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. James Francis Strain, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Harry Lynn Henkle, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Merrifield Graham Martling, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Harry Watson Bolan, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Edward Phillip Wadden, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. George Edward Jacobs, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Beverly Allison Shipp, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Crisp Morgan, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Malcolm Everett Craig, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Brig. Gen. Milton Orme Boone, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harry Jefferson Farner, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Leo Joseph Dillon, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Elbridge Colby, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Lt. Col. Richard Adams Knight, [redacted], United States Army.

Brig. Gen. Franklin Prague Shaw, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Howard Haines Cloud, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Charlie Anthony Valverde, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles William Mays, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. James Carlisle Patterson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Maurice Vernon Patton, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Arthur Vanderpoo' Winton, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Alexander Hill Cummings, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Lt. Col. Blaisdell Cain Kennon, [redacted], United States Army.

×Col. Walter Carroll Ellis, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Wallace Chace Steiger, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harold Baxter Crowell, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harold Eugene Eastwood, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Otis Poindexter, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Ernest Clifton Adkins, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Thomas Green Poland, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Pierre Mallett, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Earle Albie Johnson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Edgar Harland Keltner, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Peter Lynch, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Shirley Wiggins McIlwain, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles August Hoss, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Andrew Christian Tychsen, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Robert John Wallace, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Arthur S. Champeny, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Hamilton Cochran, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Lloyd William Goeppert, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Letcher Ogle Grice, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Alexander Jesse MacNab, [redacted], Army of the United States (lieutenant colonel, United States Army).

Col. Brisbane Hanks Brown, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Lt. Col. Henry William Robinson, [redacted], United States Army.

Col. Charles Henry Wilson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Richard Mathews Sandusky, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Ernest Francis Boruski, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Raymond Cecil Hamilton, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Herbert Karlstad, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Joseph Aloysius St. Louis, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Joseph Saddler Dougherty, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Clarence Ronald Peck, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Clarence Harvey Bragg, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Curtis Newton, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Graeme Gordon Parks, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Edwin Paull Ketchum, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Frank Lee McCoy, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Robert James Kirk, Jr., [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Leo Alexander Bessette, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Amory Vivion Eliot, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Benjamin Mills Crenshaw, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Bickford Edward Sawyer, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Irwin Samuel Dierking, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Joseph Bartholomew Conmy, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Randolph Watson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Collin Stafford Myers, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Frank Sims Mansfield, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Ralph Nemo, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Kenneth Smith Anderson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Pinnix Lake, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Heston Rarick Cole, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Irving Sherwood, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Wilkes Christenberry, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Charles Andrew Beaucond, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Hugh Campbell Parker, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Brig. Gen. Loyal Moyer Haynes, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Cecil John Gridley, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Leonard Henderson Sims, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Edwin Ray, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Maj. Gen. Clyde Lloyd Hyssong, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Albert Edgar Billing, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Winthrop Mott, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Charles MacDonald, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Harvey Shelton, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Hugh Bryan Hester, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Maylon Edward Scott, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Louis Howard Thompson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Michael Condon Shea, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Paul Henry Welland, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Marvin Wade Marsh, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Julian Horace George, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Laurin Lyman Williams, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. John Markham Ferguson, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Clarence Eugene Brand, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Barlow Winston, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

×Col. Chester Morse Willingham, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Joseph Jerome Fraser, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Merl Louis Broderick, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Thomas Patrick Walsh, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William Robert Hamby, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Edwin Rudolph Petzing, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Richard Carvel Mallonee, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Severn Teackle Wallis, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. William May, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Samuel Tankersley Williams, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Clifford Michael Ollivetti, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Vance Whiting Batchelor, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Col. Norman Paul Williams, [redacted], Army of the United States (lieutenant colonel, U. S. Army).

Second Lt. William Jackson Rand, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Darrell Glenn Williamson, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. Joel Charles Lee, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Carl Walters, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

First Lt. Ray Lorentzen Barry, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. Robert Leonard Vandiver, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Roger Treat Jackson, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

First Lt. Kenneth Ballard Smith, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. Hollon Howard Bridges, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. James Tipton Barnes, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. Arthur Wallace Augustine, Jr., [redacted], United States Air Force, with rank from February 1, 1948.

Second Lt. Charles Arthur Sherman, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Albert Verne Works, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from Februanry 1, 1948.

Second Lt. Edward Robert Brandt, [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Harry Leroy Bates, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

First Lt. Charles Edward Limbird, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

First Lt. Thomas Edison Ivey, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. Robert Ervin Nash, Jr., [redacted], United States Air Force, with rank from February 1, 1948.

First Lt. Erling Orvin Wehlander, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 1, 1948.

Second Lt. George Elmer Hedge, [redacted], United States Air Force, with rank from February 1, 1948.

Second Lt. Maston Adolphus O'Neal, Jr., [redacted], United States Air Force, with rank from February 1, 1948.

Second Lt. Edwin Cole Walker, [redacted], United States Air Force, with rank from February 3, 1948.

First Lt. James Harris Mize, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 3, 1948.

First Lt. Paul David Lehman, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 3, 1948.

Second Lt. Mark Edward Wilt, [redacted], United States Air Force, with rank from February 3, 1948.

First Lt. Milton Kenneth Kegley, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 3, 1948.

First Lt. Jack Bonds Robbins, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 3, 1948.

Second Lt. Donald Edward Greer, [redacted], United States Air Force, with rank from February 3, 1948.

First Lt. Wallace Reid Watson, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 4, 1948.

First Lt. Remer LaVerne Harding, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 5, 1948.

First Lt. James Carson Taylor, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 5, 1948.

Second Lt. Charles Clancie Yates, [redacted], United States Air Force, with rank from February 5, 1948.

First Lt. Walter Bennett Forbes, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 6, 1948.

First Lt. Robert Edward Gordon, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 7, 1948.

First Lt. William Monroe Bomar, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 8, 1948.

First Lt. Felix Asla, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 9, 1948.

First Lt. Robert Meade Ryan, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 9, 1948.

First Lt. Irl Duane Johnson, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 9, 1948.

First Lt. Giles Anthony Robb, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 10, 1948.

Captain Ziba Bennitt Ogden, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 10, 1948.

First Lt. Myron Belmont Goers, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 10, 1948.

First Lt. Earl Lewis Suneson, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 10, 1948.

Second Lt. Miles Edsel Taylor, [redacted], United States Air Force, with rank from February 10, 1948.

First Lt. Peter David Summer, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 13, 1948.

Capt. George Zane Schroeder, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 13, 1948.

First Lt. Howard Mac Lane, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 13, 1948.

First Lt. William Joseph McMahon, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 13, 1948.

Capt. Robert William Maloy, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 14, 1948.

First Lt. Malcolm Albert Stewart, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 14, 1948.

First Lt. Howard Estle Kornegay, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 14, 1948.

First Lt. Lawrence Kenneth Ricker, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 15, 1948.

Second Lt. Richard Albert Atkins, Jr., [redacted], United States Air Force, with rank from February 15, 1948.

First Lt. Stanley Joseph Buinicky, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 17, 1948.

First Lt. Marshall Rae Duncan, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 17, 1948.

First Lt. William Doyle Taylor, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 20, 1948.

First Lt. Robert Harry Cline, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 20, 1948.

Capt. Lawrence Vincent Bach, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 20, 1948.

First Lt. Robert Edwin Vickers, Jr., [redacted], Air Force of the United States (second lieutenant,, U. S. Air Force), with rank from February 20, 1948.

First Lt. James Francis Ward, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 21, 1948.

First Lt. Rodger Sheridan Elliott, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 21, 1948.

First Lt. John Patrick Walsh, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 22, 1948.

First Lt. Charles Evans Beardsley, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 22, 1948.

First Lt. Herman Arthur Hammel, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 23, 1948.

First Lt. Louis Rae Harris, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 23, 1948.

Capt. Kenneth Ray Van Zandt, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 24, 1948.

First Lt. William Henry Perkins, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 24, 1948.

First Lt. Edwin Raymond Kellogg, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 24, 1948.

Second Lt. Robert Newton Fidler, [redacted], United States Air Force, with rank from February 25, 1948.

First Lt. William Cullen Schwitzgebel, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 25, 1948.

First Lt. Paul Bryan Monroe, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 26, 1948.

First Lt. William Albert Seward, Jr., [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 26, 1948.

First Lt. Harry Frank Greenhow, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 27, 1948.

First Lt. Donald Michael Walters, [redacted], Air Force of the United States (second lieutenant, U. S. Air Force), with rank from February 27, 1948.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 9 (legislative day of February 2), 1948:

UNITED STATES PUBLIC HEALTH SERVICE

APPOINTMENTS IN THE REGULAR CORPS

To be surgeons (equivalent to the Army rank of major), effective date of acceptance

Frank S. French
Emanuel E. Mandel

To be pharmacist (equivalent to the Army rank of major), effective date of acceptance

George B. Hutchison

To be assistant nurse officers (equivalent to the Army rank of first lieutenant), effective date of acceptance

Mary E. Ingle
Mary Matula
Elizabeth J. Haglund
Genevieve T. Piette
Frances C. Wickham

To be junior assistant nurse officer (equivalent to the Army rank of second lieutenant), effective date of acceptance

Mary Ellen Deady

To be dental surgeon (equivalent to the Army rank of major), effective December 24, 1947

Herbert A. Spencer, Jr.

To be temporary surgeon (equivalent to the Army rank of major), effective December 24, 1947

Herbert Tabor

To be temporary senior assistant surgeons (equivalent to the Army rank of captain), effective December 24, 1947

Elroy G. Burgwald
John H. Miller

To be surgeons (equivalent to the Army rank of major)

Paul T. Erickson
Eugene W. Green
Frederick J. Krueger
Marion B. Noyes

To be senior assistant nurse officers (equivalent to the Army rank of captain)

Gladys M. Ray
Emijean Snedegar
Edith M. Hettema
Jeannette E. Westlake
Rose G. Ernsberger
Amy L. Cawley
Ina L. Ridlehoover
Philomene E. Lenz
Loretta M. Schroll
Gladys C. Guydes
Mary Raprich

To be temporary scientist (equivalent to the Army rank of major)

Don E. Eyles

APPOINTMENTS AND PROMOTIONS IN THE REGULAR CORPS

To be medical director (equivalent to the Army rank of colonel), effective date of acceptance

Frederick A. Johansen

To be surgeons (equivalent to the Army rank of major), effective date of acceptance

Harold M. Janney
Russell O. Settle

To be senior surgeon (equivalent to the Army rank of lieutenant colonel)

Maurice A. Roe

To be temporary medical director (equivalent to the Army rank of colonel)

Maurice A. Roe

To be temporary senior surgeons (equivalent to the Army rank of lieutenant colonel)

Harold M. Janney
Russell O. Settle

To be temporary sanitary engineers (equivalent to the Army rank of major)

Donald L. Snow
Roscoe H. Goeke

To be temporary engineer (equivalent to the Army rank of major)

George L. Carley, Jr.

To be temporary scientist directors (equivalent to the Army rank of colonel)

Floyd S. Daft
Justin M. Andrews

To be temporary scientists (equivalent to the Army rank of major)

Harry D. Pratt
Roy F. Fritz
Ralph C. Barnes
Francis M. Middleton
H. Page Nicholson

To be senior surgeon (equivalent to the Army rank of lieutenant colonel), effective date of acceptance

Percival E. Faed

To be surgeon (equivalent to the Army rank of major), effective date of acceptance

Walter P. Griffey

To be surgeons (equivalent to the Army rank of major)

Charles F. Blankenship
Curtis R. Chaffin
Erwin C. Drescher
Henry A. Holle
John B. Hozier
James G. Telfer
Hugh L. C. Wilkerson

To be temporary medical director (equivalent to the Army rank of colonel)

Percival E. Faed

To be temporary sanitary engineer director (equivalent to the Army rank of colonel)

Harry G. Hanson

To be temporary senior surgeons (equivalent to the Army rank of lieutenant colonel)

Walter P. Griffey
James G. Telfer

To be temporary senior assistant surgeons (equivalent to the Army rank of captain)

Gleb A. Nedzel
Kirkland C. Brace
Lewis Francis
Frederick G. Germuth, Jr.
Vincent E. Price
Hans R. Huessy

To be senior surgeon (equivalent to the Army rank of lieutenant colonel), effective January 5, 1948

Jack Masur

To be surgeon (equivalent to the Army rank of major), effective January 5, 1948

Robert L. Cherry

To be temporary medical director (equivalent to the Army rank of colonel), effective January 5, 1948

Jack Masur

To be temporary senior surgeon (equivalent to the Army rank of lieutenant colonel), effective January 5, 1948

Robert L. Cherry

HOUSE OF REPRESENTATIVES

MONDAY, FEBRUARY 9, 1948

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HALLECK). The Chair lays before the House the following communication from the Speaker.

The Clerk read as follows:

FEBRUARY 9, 1948.

I hereby designate Hon. CHARLES A. HALLECK to act as Speaker pro tempore for today.

JOSEPH W. MARTIN, JR.,
Speaker.

PRAYER

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Eternal God, help us to determine the ways of our thoughts. Strengthened by Thy words, "Whatsoever things are true, honest, just, pure, lovely, and of good report, think on these things," keep us from wandering in forbidden paths. Take away the dross of selfish living and low desires and all that engenders fear and hate.

Our country, O Lord, is so richly endowed; forbid that its resources should be spent in pride and self-aggrandizement. With compassion for the unuttered sorrows and burdens of men, may we promote harmony where doubt prevails, boldly proclaiming the great Christian imperatives: Do unto others as ye would that they should do unto you, and thou shalt love thy neighbor as thyself. With this sense of moral responsibility, be Thou with us in our every word and deed, and Thine shall be the glory. Amen.

The Journal of the proceedings of Thursday, February 5, 1948, was read and approved.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on February 5, 1948, the President approved and signed bills of the House of the following titles:

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818;

H. R. 3322. An act to empower the Secretary of the Interior to grant rights-of-way for various purposes across lands of individual Indians or Indian tribes, communities, bands, or nations; and

H. R. 3326. An act to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 146. Concurrent resolution authorizing the Clerk of the House, in the enrollment of the bill H. R. 1634, to make certain corrections.

The message also announced that the Senate had passed a bill, a joint resolution, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 134. An act to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190);

S. J. Res. 173. Joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes; and

S. Con. Res. 41. Concurrent resolution relative to the expenses of a delegation to attend the ceremonies in Habana, Cuba, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*.

SPECIAL ORDER GRANTED

Mr. PACE. Mr. Speaker, I ask unanimous consent that today, after the close of the legislative business, I may address the House for 15 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. PACE. Mr. Speaker, I also ask unanimous consent that on Thursday next, after the regular business of the day, I may address the House for 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

EXTENSION OF REMARKS

Mr. PRICE of Illinois asked and was granted permission to extend his remarks in the RECORD in three instances, in two of which to include newspaper articles.

Mr. BLAND asked and was granted permission to extend his remarks in the RECORD on the merchant marine.

FERTILIZER

Mr. BRYSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include a resolution from our State's general assembly on the subject of fertilizer.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. BRYSON. Mr. Speaker, following these remarks I attach a concurrent resolution passed by the South Carolina General Assembly on February 5, 1948, urging the absolute necessity for an adequate supply of nitrates and other fertilizers.

It is generally known that agriculture is the basis of all wealth. We boast of our great metropolitan centers, of our industrial areas, but unless agriculture thrives, prosperity cannot be expected. Although our farmers have shown their complete willingness to till the soil regardless as to how arduous the task and how little the profit, they cannot supply sufficient food and clothing without artificial assistance. Nitrates of soda and fertilizers are as essential to healthy agriculture as are penicillin and other modern drugs to good health.

Of all the shortages with which we have to grapple, none is of greater importance than the shortage of fertilizers and nitrates.

I concur in the views expressed in the attached resolution, and hope immediate steps will be taken to guard against the shortages of nitrates and other fertilizers we have had in the past.

A concurrent resolution requesting each Member of the South Carolina delegation in the National Congress, in the United States Senate and House of Representatives, and the Secretary of Agriculture to use their influence and authority to assure an adequate supply of nitrates and other fertilizers for the use of South Carolina farmers during the year 1948

Whereas an unprecedented demand in the United States and in foreign countries for fertilizers has created a shortage of immediate delivery plant foods in South Carolina; and

Whereas a shortage of this kind will seriously curtail the production of food and fiber crops the Government so urgently needs in its plans to rehabilitate war-torn countries; and

Whereas sufficient supplies are apparently obtainable at their source if proper transportation is furnished and if some of the ships now being used to ship fertilizer, grain, etc., abroad are assigned to transporting nitrates to this country; and

Whereas we believe sections of the United States where fertilizer usage has long been a custom should not be curtailed in favor of new fertilizer-using territories where their use is still in the experimental stage; and

Whereas domestic manufacturers and handlers of nitrates and other fertilizing materials should be encouraged as much as possible; and

Whereas steps should be taken immediately to correct these conditions so that a repetition of last year's fiasco will not exist which will cause food and fiber shortages: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That a copy of this resolution be forwarded to the United States Senate and to the United States House of Representatives and to each Member of the South Carolina delegation in the National Congress, to the Secretary of Agriculture of the United States, and to the commissioner of agriculture of South Carolina, with the request that each use his influence to see that the proper authorities have these conditions corrected and urge immediate action to assure prompt delivery of an adequate supply of nitrates and other fertilizers to South Carolina farmers.

ANTILYNCHING LEGISLATION

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include an editorial from Collier's magazine.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi [Mr. WHITTEN]?

There was no objection.

Mr. WHITTEN. Mr. Speaker, lynching is a crime that none of us condone. Under the law of any State, whatever the crime, the State courts can adequately punish the culprit and there is no necessity for any group to take the law in its own hands. This was my view during almost 9 years of service as district attorney; it is the view of the thousands of public officers throughout the South.

I am submitting an editorial from the Collier's magazine of February 14, 1948. This editorial should be read not only by those who may think seriously that such crime of lynching should be made a Federal offense but by those who advocate such action in the hope of furthering the politics of their party by its appeal to the radical agitators of northern cities.

Last year there was one lynching in the entire United States, and in that case the defendants were indicted and tried. I might say, if such offense had been a Federal crime at the time, the defendants would still have been tried before a jury from the same area. Why, there are a thousand and one crimes that are more prevalent in the United States, but no one advocates making them Federal offenses. No one wants to sponsor legislation that would penalize Chicago or New York, the officers of such cities, or force such cities to pay a sum of money to the dependents of those killed in gang warfare, nor even to the innocent who may be killed in such cases. Both of those cities have a thousand times worse record than does the South with regard to lynching.

No, all know that this legislation making lynching a Federal crime is unnecessary. It is advocated because it has become popular in some sections of the United States to attack the South. It is a way to get votes in certain areas. To vote for such measure is to destroy the States and their governments; it is to make a situation worse, and I do not see how any conscientious, right-thinking person could be a party to any such movement. I urge all to read the following editorial. The facts should call for a prayer on the part of those who have advocated such measure, asking to be forgiven for the wholly unjustified attacks on the people of the South and their integrity. In view of the wonderful job the southern people have done in striking out this evil themselves, other sections might well profit by our example with regard to crimes now prevalent in their areas, instead of attacking us further.

Can anyone think of any other crime of which there was only one instance in the whole United States last year?

To say we must have a Federal statute against lynching in order to stamp it out is to appear absurd in view of the record. If every violation of a State law were made a Federal crime, the United States Criminal Code would be 6 feet thick and the enforcement would take almost as many men in the FBI as Hitler had in his Gestapo.

The editorial to which I have referred is as follows:

GOOD NEWS ON LYNCHING

A few years after the Civil War a half dozen or so determined and courageous Virginians, including a college president and a newspaper editor, got together and decided to combat the lynching of Negroes, then a popular custom throughout the South. They stuck by their resolve and swung their weight against lynching in every way they could think of. From that time to this the State of Virginia has been virtually free of this particular crime against morals and human decency, not to mention the law.

We were reminded of the episode when we read the record of United States lynchings in 1947, as compiled early in 1948 by Tuskegee Institute, famous Negro college.

There was only one indisputable lynching in the United States last year—the infamous beating to death of colored Willie Earle by a mob of taxi drivers at Greenville, S. C., followed by their equally infamous acquittal at the hands of a jury of persons who were clearly the killers' peers.

The most encouraging feature of the Tuskegee report was this: In 1947 there were 39 incidents which might have degenerated into lynchings but were kept from doing so by bold, resolute, and conscientious public officials who, in one way or another, defeated the mobs' purposes and saved the potential victoms' lives.

It was not ever thus. Time was, and not so long ago, when sheriffs, jailers, etc., in most of the Southern States knew that to lift a finger against a lynch mob was to endanger their own lives, physical or political.

Nowadays more and more of the substantial and influential people in traditional lynch areas are frowning publicly on this old custom, denouncing it, throwing their weight against it in every practicable way—just as that handful of Virginians did long ago. As a result public officials' backbones are stiffening and justice is being better and better served.

In our opinion, this is the only method whereby the lynch-law barbarity ever can be sponged completely off the American scene. Attempted compulsion from outside—a Federal antilynching statute, for example—might easily retard rather than hasten the cleansing. Here is a heartfelt salute to the lynch-area people who are working this improvement from the inside and from the grass roots; and may their tribe increase.

EXTENSION OF REMARKS

Mr. PRIEST asked and was granted permission to extend his remarks in the RECORD and include an article from the Washington Post of yesterday.

Mr. WILLIAMS asked and was granted permission to extend his remarks in the RECORD and include a concurrent resolution of the Senate and House of Representatives of the State of Mississippi opposing the recommendations of the President's civil rights message.

MARITIME COMMISSION TANKERS

Mr. LYNCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LYNCH. Mr. Speaker, I read with a great deal of interest the preliminary report of the Committee on Interstate and Foreign Commerce entitled "Fuel Investigation." I congratulate the distinguished chairman and the committee on the careful analysis they have made and I am particularly impressed with section 9 of the resolution adopted by the committee which, in brief, recommends that the Maritime Commission should be authorized and required by law to repair any tankers owned by it, or to be acquired by it, and to operate such tankers under charter, or otherwise, to the extent necessary to supplement the capacity of petroleum transportation equipment now in use and that adequate funds should be appropriated to the Maritime Commission for such purposes. It is a laudable resolution. However, resolutions do not bring fuel oil into New York and the Northeastern States. We need something more than resolutions; we need action by this Congress. Unless legislation is passed before the end of this month the Maritime Commission will have neither tankers in operation nor tankers to operate; they will all have been sold under direction of the Congress.

There is now pending the Keogh bill before the Interstate and Foreign Commerce Committee and it is important that action be taken on that bill immediately; otherwise, the fuel situation in New York City and in the northeastern area of the country generally will become even more desperate than it is today. Mayor O'Dwyer has called upon the Congress to act and relieve the situation, and he has requested legislation which is directly in line with the resolution of the Interstate and Foreign Commerce Committee. If the members of the Merchant Marine and Fisheries Committee would spend a day or a night in one of the heatless homes in New York City, we might be able to get quick action on the bill.

I again commend the report of the Interstate and Foreign Commerce Committee, but I insist that this Congress must do more than pass resolutions. We must have action by the Merchant Marine and Fisheries Committee, the Appropriations Committee, and by the Congress itself on this vital issue.

PRESIDENT TRUMAN, MRS. ROOSEVELT, AND THE PALESTINE QUESTION

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, after having been betrayed by his palace guard, nobody could blame President Truman if he were to announce today that he would not be a candidate for reelection under any circumstances.

He not only has been jockeyed into an impossible position, but the way his administration was used to force through the partition of Palestine by threats of reprisals through the Baruch-Marshall plan is likely to break into a scandal that will shock the world.

One thing that attracted my attention this morning was a statement by Mrs. Eleanor Roosevelt saying that "Southern Democrats need more faith in the white race." Now, of all people, she is the last one on earth to advise the white people of the Southern States on this issue.

She seems to imagine that she is running that conglomeration of international hodgepodge up there at Lake Success, known as the United Nations and that it has now become an international gynecocracy, with her in full command.

The best thing the American people can do at this time is to withdraw from it before they drag us into a senseless, cruel, racial war in Palestine.

The SPEAKER pro tempore. The time of the gentleman from Mississippi has expired.

EXTENSION OF REMARKS

Mr. COLE of New York asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. ANGELL asked and was given permission to extend his remarks in the Appendix of the RECORD in three separate instances, in one to include an article entitled "Should Rent Control Be Continued?" and in each of the others to include articles.

Mr. GILLIE asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial from the Fort Wayne Journal-Gazette.

Mr. COLE of Missouri asked and was given permission to extend his remarks in the Appendix of the RECORD in two separate instances, in one to include an editorial from the St. Joseph's News Press, entitled "A Word About Meat, No Rationing Please," and in the other to include a radio address by Jack Beall.

PERMISSION TO ADDRESS THE HOUSE

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and to include therein two tables. It will be more than 300 words, but I would like to extend it at this point in the RECORD.

The SPEAKER pro tempore. Under the practice of the House that has been followed heretofore, such an extension will have to be made in the Appendix.

Mr. RICH. Then, Mr. Speaker, I ask unanimous consent that it be placed in the RECORD immediately following the regular business of the day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EXTENSION OF REMARKS

Mr. McMILLEN of Illinois asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article appearing in the New York Times dated February 7, 1948, with reference to the nutritional value of margarine and butter.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD and include the text of Plea by Inter-Faith Good Will Unit, of Rochester, N. Y.

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD and include an article from the New York Herald Tribune on meat rationing.

LOOKING AHEAD

Mr. MASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include a statement by Samuel B. Pettengill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MASON. Mr. Speaker, will the present cold war with Russia turn into a shooting war? If so, how soon will it start? These are questions that are bothering me, causing me to lose sleep. Undoubtedly they are questions that will be answered soon.

Where will the shooting war start? The Near East, with its oil reserves—a rich prize for any nation that can acquire control over the same—is one of the logical spots for the shooting to start. The fighting in Palestine today between Arabs and Jews is to be the excuse for sending 40,000 American boys to Palestine to "keep the peace." I understand this move is now under consideration by the administration.

Russia has been looking for an excuse, or an opening, to get a toehold in the Near East for many, many years. She longs for control over those oil reserves. Will Stalin also send 40,000 Soviet troops into Palestine to "keep the peace," following our example? If so, what may happen?

Mr. Speaker, the Marshall plan was advanced to give aid to 16 European nations, in order to stop communism from getting control of the whole of Europe. It was to be a peacetime program of economic rehabilitation. I am wondering if it is still just that and nothing more.

On January 21 our State Department made public captured German state papers—captured a long time ago—giving the facts concerning the German-Soviet military alliance, and the objective of that alliance.

On January 22, Mr. Bevin, Britain's Foreign Minister, made a speech in the House of Commons announcing that the British Government had decided to form a military alliance against Russia, embracing in that alliance the 16 western European nations that are to be included in the Marshall plan.

On January 23, less than 24 hours after Bevin's speech, our State Department issued a proclamation saying, "The United States heartily welcomes the portentous step taken by the British Labor Government." These three closely related acts, with the almost perfect timing of them, indicate very clearly that the Truman administration had been consulted before Bevin made his speech and was in full accord with the program as announced.

Mr. Speaker, these steps lead to war, not a cold war, but a shooting war. When and where will it break out? Is the Marshall plan a plan to strengthen this military alliance as a step toward getting ready for the inevitable? If so, then the American people should be told the truth and not be kept in the dark as to its real purpose.

Mr. Speaker, under leave to extend my remarks, I include an article by the gentleman from Indiana, a former member of the Congress, the Honorable Samuel Pettengill. The article is entitled "The Pattern Repeats." It is a thought-provoking article, and it should be read carefully by every Member of Congress.

THE PATTERN REPEATS

Are we already at war, or just a step or two away?

The request to us of the Greek Premier Themistocles Sophoulis for 500 mountain guns follows a familiar pattern. "Give us the guns," he seems to say, "and we will win the war against the Communist guerrillas." What next?

One of England's best informed men in public life, in private conversation, recently said, in substance:

"The United States does not seem to realize that it is at war. You have sent $300,000,000 to Greece, and military officers to help the Greeks win their fight. You recently sent marines into the Mediterranean. You will have to send more money and military forces to Greece. You can't back out. You can't haul down your flag. Russia and the satellite countries on the north of Greece will resist. They will increase their forces, and some day there will be a clash. Then you will have to pour more men and money into Greece, and you will then have a shooting war on your hands. You will have to send millions of men to Europe. No one can predict when this shooting war will start. But you are in a situation which means that you are now at war because you can't back down. England backed out because she is no longer a first-rate power. You are the defenders of civilization."

That is only one man's opinion, but he has important contacts in and out of the British Government.

I am one of those simple souls who believe the people are entitled to be told, with complete honesty, just what are the intentions of our public officials. There seems to be no reason for secrecy.

If we are sending shooting men to the Mediterranean and the Middle East. Russian military intelligence knows it. So why not expose the problem and the danger to the grass-roots judgment of the American people? Maybe they could offer some suggestions of value. Anyhow, they are the ones who pay and die, and have a moral right to be informed.

If our officials had never made a serious mistake in foreign policy, we might think differently. But we have seen the astounding naïveté with which a half dozen men built up Russia as a peace-loving democracy into a greater threat to our security, possibly, than Hitler's regime.

This leads to some skepticism as to whether a handful of men should have the war-making power (supposed to be in Congress under the Constitution) completely in their hands, without the check or benefit of public opinion.

There was Yalta, Cairo, Tehran, Potsdam, the Morgenthau plan, the betrayal of Poland, an ally, the forced surrender to Russia by China, another ally, of important territory and interests in Manchuria and Korea, and by Japan in the Kurile Islands. Not so hot. And at the end of 3 years, no peace anywhere.

Does the pattern repeat—the 50 destroyers, the arming of Iceland, the shoot-at-sight order—all before Pearl Harbor?

In short, has the war power slipped completely out of the hands of Congress and the people? Is the Marshall plan a charity operation to succor the hungry or helpless, or is it an instrument of war?

If we are now as near to war as this Englishman thinks, the real question is whether we should give priority in the use of our assets to build up American defense or allocate them to international charity.

On that great question of our time, I claim the American people are entitled to full knowledge of the facts and to be heard.

SAMUEL B. PETTENGILL.

EXEMPTING FROM ESTATE TAX NATIONAL SERVICE LIFE INSURANCE

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that the bill (H. R. 5221) to exempt from estate tax national service life insurance and United States Government life insurance, which was referred to the Committee on Veterans' Affairs, be rereferred to the Committee on Ways and Means. This bill has to do with a tax matter.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

Mr. RANKIN. Mr. Speaker, reserving the right to object, this bill is really a tax bill?

Mrs. ROGERS of Massachusetts. It is a revenue bill and does not belong to our committee. I think it was sent to our committee by mistake.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that today, after disposition of matters on the Speaker's desk and at the conclusion of any special orders heretofore entered, I may be permitted to address the House for 10 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

CLYDE G. MORRILL

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, apparently relief in a measure has finally come to the New England section of our country because the Department of Commerce has issued certain directives which have the effect of an embargo on the shipment of oil from the east coast. But the problem is not just an east-coast problem. Other sections need relief also.

Mr. Speaker, Mr. Clyde G. Morrill did so much in endeavoring to bring fuel oil and kerosene to the east coast during the war; and only a few weeks ago he had pneumonia, and he left a sickbed in order to secure an embargo on oil being shipped to other countries so that America might be kept warm in the present emergency. He was appointed by Senator WHERRY as a member of the oil committee to make recommendations for solving the oil problem both for the emergency and for the future. This fine gentleman died just a few days ago. His untimely passing came in large measure from the very great effort he put forth trying to protect the health and the welfare of the people of the United States.

INDEPENDENT OIL MEN'S
ASSOCIATION OF NEW ENGLAND, INC.,
Boston, Mass., February 6, 1948.

CLYDE G. MORRILL

The untimely death of our beloved executive director yesterday is a stunning blow to us all. I know you share in the universal thought that we, both personally and as an industry, have lost a brilliant, loyal, and untiring friend.

The many problems he has attacked and solved, particularly during the war and in the trying days through which we are now passing, will stand as an enduring memorial to his great capacities.

To replace such a man in our industry is a task beyond contemplation. Let us resolve to continue as best we can in the void, remembering the wise counsel given to us on so many occasions by our stanch friend and adviser.

JOHN P. BIRMINGHAM,
President.

SAM HARDY

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. Mr. Speaker, I wish to call to the attention of the House, and to the Congress, that this day marks the fortieth anniversary of Sam Hardy on the pay roll of the Committee on Ways and Means. I rise, therefore, to pay just tribute to this loyal, efficient, and devoted public servant who has completed almost a half-century in the service of the Congress of the United States.

It is only fitting, Mr. Speaker, that we should pause to consider the contributions to the work of the Congress which our Sam, and men like him, have given without thought of personal gain or glory to themselves. We too frequently overlook, in the rough and tumble routine of our work, the value of their humble and unheralded services. Yet, without their assistance, given in such abundance and regardless of personal comfort or convenience, this great legislative body could not properly function.

There are many who believe as I do, that Sam Hardy, our trusted messenger, is an invaluable servant of the Committee on Ways and Means. In the long span of his service beginning on February 9, 1908, he has been the keeper of committee records, he has furnished on a moment's notice documents and papers that most of us had forgotten were in existence and yet proved of inestimable value in our current work. In many other ways, Sam has placed the tools of our work in our hands when we needed them and we have relied many times on his personal knowledge of legislative history and committee procedures.

Sam came to the committee in 1908. He was appointed by that great former chairman, Sereno E. Payne, of New York, coauthor of the famous Payne-Aldrich tariff law. Since then Sam has served under nine committee chairmen as follows: Hon. Sereno E. Payne, of New York; Hon. Oscar W. Underwood, of Alabama; Hon. Claude Kitchin, of North Carolina; Hon. Joseph W. Fordney, of Michigan; Hon. William R. Green, of Iowa; Hon. Willis C. Hawley, of Oregon; Hon. James W. Collier, of Mississippi; Hon. Robert L. Doughton, of North Carolina; and Hon. Harold Knutson, of Minnesota.

In the course of Sam's 40 years with the committee he has seen 27 major tax bills become law, 4 tariff laws enacted, the Trade Agreements Act, and its 4 extensions, and 7 bonus bills placed on the statute books.

Sam was only 29 years old when he joined the staff of the committee. Today he is approaching his seventieth year, but to those who see him hustling from office to office, or through the Halls of the Capitol he has lost none of his youthful vigor and none of the cheerful optimism of a young man. In every respect Sam is still "going strong."

In 1908 Sam was employed in the check room of the Old Ebbitt House at Fourteenth and F Streets, where now stands the National Press Building. Through his old friend, Harry Parker, who himself was then serving in his seventeenth year as a committee employee, Sam learned of the opening available with the committee and was introduced to Chairman Payne, who appointed him as a janitor. Thirty years later Harry retired and Sam has thus become our senior messenger.

This day also marks, Mr. Speaker, another milestone in Sam's life, for on February 9, 1913, 35 years ago, he was married to Nannie Brown, of Virginia, and it is likewise fitting that we should congratulate Sam and Mrs. Hardy on having attained this important mark along life's pathway.

One of the most frequent questions asked by members of the committee and others associated with the committee is "Where is Sam?" This only proves how dependent we have all become upon his unique abilities and in our own haste at times we sometimes expect Sam to be in two places at once. But his talents have never extended this far. We too frequently forget that Sam looks after 25 offices of committee members, 6 storage rooms, the committee library, the hearing rooms, the committee office, and the office of the Joint Committee on Internal Revenue Taxation. In addition to being a messenger Sam has become a librarian, mail clerk, doorkeeper, document clerk, and janitor. In fact, there is some truth to his own claim that he has held almost every position with the committee except that of chairman.

I am sure that I express the sentiments of every member of the Committee on Ways and Means, and of those Members of the House who have had occasion to utilize Sam's services, when I say that in Sam's long and unselfish service will be found a fitting example for the younger servants of the Congress and an unwavering beacon for all public servants. He is, and has always been, continuously on the job. He thinks of his job, of the convenience and desires of the committee first, himself last, and anticipates their requirements.

There is a little rule of success that I like to recall now and then to the effect that a successful man is one who performs every task just a little better than necessary. And that rule applies in every respect to our Sam. He does everything just a little bit better than necessary, and in that way has won a place in the hearts of every member of the Committee on Ways and Means. He has left his mark in these marbled halls that will not be forgotten. His footprints are embedded with a great host of distinguished public servants who have served and are still serving the Congress of the United States. His contribution, with theirs, have helped make up the great traditions of the American Congress.

And so to Sam I extend, for myself and for the committee, our heartiest congratulations and sincerest wishes for your

long and continued service to the Congress.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Tennessee.

Mr. COOPER. It is with pleasure that I, as a minority member of the Committee on Ways and Means, concur in the splendid tribute paid by the gentleman from New York to Sam Hardy, one of the most faithful, efficient, and valuable employees of the Federal Government. In expressing these sentiments I feel sure that I express the sentiment of all Members on our side of the aisle.

Mr. REED of New York. I thank the gentleman for his contribution.

Mr. HESELTON. Mr. Speaker, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Massachusetts.

Mr. HESELTON. Mr. Speaker, as a personal friend of Sam Hardy, may I join in this fine tribute?

SELECT COMMITTEE TO INVESTIGATE COMMODITY TRANSACTIONS

Mr. AUGUST H. ANDRESEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, the crash in the commodity markets of last week demonstrates how completely the Truman administration has dominated and fixed the price of grains and other commodities since July 1, 1946. During the past 19 months, volume buying of wheat, coarse grains, fats and oils, and other commodities by the Government, under orders of the Secretary of Agriculture, forced steep advances in these commodities and skyrocketed prices of livestock and poultry feed, beef, pork, dairy products, and other foods. When the Government bought, prices advanced sharply, and when the Government stopped buying, prices of commodities went down.

Last week, although it was announced that the Government still had to acquire another 77,000,000 bushels of wheat and flour for foreign export and relief, the Secretary of Agriculture ordered Government buying of wheat stopped, and the bottom fell out of the commodities market. This drop in commodity prices brought forth announcements of lower prices for feed, flour, bread, lard, meat, and other food products. The spectacular drop in commodity prices of the past few days cost the wheat farmers more than $200,000,000, and additional hundreds of millions of dollars were lost to owners of other farm products.

According to press reports, Secretary Anderson disclosed last Saturday night that a leak had occurred on the Department's decision to curtail grain buying in advance of the public announcement made last Thursday. While thousands of small speculators and traders lost their shirts in last week's debacle, speculators tuned to the pipe line of inside information were able to get out of the market without loss or to take a short position and make tremendous profits in a few days.

The Select Committee To Investigate Commodity Transactions will make a full inquiry into last week's commodity crash to ascertain the names and extent of operations of those who profited by advance inside information. We will ask the Secretary of Agriculture for complete information in regard to the leak which he states occurred in advance of the public announcement.

In my opinion, no one man or group of men, or agency of the Government, should be permitted to possess the power to manipulate or rig commodity and food prices. Such manipulation is contrary to public policy and against the interests of the people. I am personally convinced that the Government commodity-buying program, under the direction of the Secretary of Agriculture, has largely dominated prices of commodities and the cost of food to American consumers.

EXTENSION OF REMARKS

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. HESS asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. KILBURN asked and was given permission to extend his remarks in the RECORD and include a letter regarding the St. Lawrence seaway.

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include an article by Melchior Palyi appearing in the Toronto Northern Miner.

Mr. WOODRUFF. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an article entitled "The Bomb Secret Is Out" by Robert M. Hutchins, chancelor of the University of Chicago. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $189.34, but I ask that it be printed notwithstanding that fact.

The SPEAKER pro tempore. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mr. HARTLEY asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an address delivered by Robert N. Denham, general counsel of the National Labor Relations Board; and in the other a letter from Thomas F. Flannigan, publicity director, New Jersey Affiliated Postal Employees Legislative Committee.

Mr. COLE of Kansas asked and was given permission to extend his remarks in the RECORD and include a memorial to Abraham Lincoln by former Representative Homer Hoch, of Kansas.

Mr. WOLVERTON asked and was given permission to extend his remarks in the RECORD on the subject of petroleum in connection with the European recovery plan, and further to extend his remarks and include an article by W. C. Bryan appearing in the Wall Street Journal of February 7, 1948.

PROGRESS UNDER THE TAFT-HARTLEY LAW

Mr. LANDIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. LANDIS. Mr. Speaker, headlines of the labor press definitely reveal the Taft-Hartley law is working. They contradict union officials' statements that the act is a "slave-labor" law; it will weaken and destroy unions, and impedes collective bargaining.

December 22, 1947, A. F. Whitney, president of the Brotherhood of Railroad Trainmen, made the following comment, "No union can benefit from the Taft-Hartley law." Remember, the law does not even apply to the railroad trainmen.

The A. F. of L. Weekly News Service reveals the following items of great interest: There were fewer strikes, during the month of November 1947, than in any other month since December 1945. The AFL Teamsters' Union reports a large membership increase since the Taft-Hartley law became effective, and on January 1, 1948, they boasted of 1,000,000 members and not a one are on strike. The AFL Paper Box Makers Union won a 14 percent pay boost; also San Francisco pier guards won a raise of 22 cents; 3,500 A. F. of L. Retail Clerks received pay increases; and from New York State comes reports the number of strikes, in that area, are at the lowest level in 50 years. Bear in mind, workers still have the right to strike under the Taft-Hartley law.

These headlines, from their own labor press, do not substantiate union officials' remarks that the law is destroying their unions.

William Green, president of the American Federation of Labor, said they cannot tolerate the oppressive conditions imposed upon them by the Taft-Hartley Act. Under the oppressive conditions let us note other labor press quotations on union activities. Union rolls have reached an all-time record. They also report that labor peace is "99 percent perfect"; and now, the National Labor Relations Board recognizes the rights of craft unions in an industrial unit and gives them an opportunity to establish separate bargaining arrangements. The craft unions alleged the Board had formerly discriminated against them. Another headline reveals employees selected the International Association of Machinists as bargaining agent in 36 additional plants; furthermore this same international union reports wages were raised $221,000,000 last year. Collective bargaining resulted in an average increase of 13 cents per hour. Renewed contracts featuring 11 paid holidays, and 15 to 18 cents per hour pay gains were obtained in New York. Listen to this interesting disclosure: According to Mr. Van A. Bittner, national director of the Southern CIO Organizing Committee, the tempo of organizational activities in the South, showed a decided upswing during the last 3 months of 1947. This pe-

riod is since the effective date of the Taft-Hartley law.

Do these gains and advantages sound like the fruits of oppressive conditions?

Harold C. Hanover, secretary-treasurer of the New York State Federation of Labor, charged that the enactment of the Taft-Hartley law was to destroy the institution of organized labor. The labor press reports point out the following events: The union shop wins out in 100 percent NLRB elections; also the United Electrical Workers Union continues to win protection for workers despite the Taft-Hartley law. In the last 3 months of 1947, since the law went into effect, this union has won the bargaining rights in 30 new plants; 20,000 new members have been added to the union; contracts covering 125,000 workers were signed or renewed and 55 of those contracts brought union security to 7,500 workers for the first time; and in a union drive for higher wages, it is stated the Taft-Hartley law fight strengthens the UE Sylvania locals.

Labor's own admission of progress, in its labor press headlines, fails to support Mr. Hanover's conclusion.

A paragraph from a labor paper editorial says:

> The Taft-Hartley Act is the crack in the dam, threatening to unloose the floodwaters of anti-unionism and industrial dictatorship. If not checked that flood will sweep the country once more into an era of low wages, long hours, reduced buying power, and underconsumption, straight into a depression.

The following incidents from the labor press refute this editorial comment.

The oil workers boost their pay $106,100,000; 150,000 clothing workers get a 12½-cent raise; the longshoremen won an 8-cent raise, with more to come; airplane mechanics received a 16-cents-per-hours increase; and the A. W. Cash Co. granted a pay raise making a total of 45 cents on the hour. In Seattle, auto mechanics won a 25-cents-per-hour increase. Especially take note of this next article. In New Jersey, membership in a union, before the passage of the Taft-Hartley law, was only 88 percent of the workers in a particular plant, and now, since the law went into effect, union membership in that factory is 100 percent.

I want to make it clear, so there will be no misunderstanding, all labor press articles referred to herein, were taken from labor papers issued since the Taft-Hartley law became effective.

These kind of headlines are convincing the rank and file members, that the Taft-Hartley law is not a slave-labor act; it is not preventing them from organizing new locals, or obtaining higher wages and better working conditions.

I say again, that union leaders, whose interest is that of securing greater benefits for their members, have nothing to fear in the Taft-Hartley law.

FUEL SHORTAGE

Mr. YOUNGBLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include certain articles contained in the Detroit Free Press.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. YOUNGBLOOD. Mr. Speaker, there exists in the State of Michigan and particularly in my own city of Detroit a shortage of natural gas. Since January 28 over 100,000 industrial workers have been idle because of this shortage. The unemployment compensation burden has been increased by 50,000 applicants as a direct result. The situation is critical and becoming every day more intolerable.

Regardless of the causes of this shortage; regardless of the factors involved and regardless of any other persons or factors involved this situation calls for immediate action. The situation is not only as I have said intolerable but it is also unnecessary.

Mr. Speaker, I have called for a congressional investigation into this matter and the following are the articles in the Detroit paper which I referred to in my opening paragraph:

BEHIND GAS SHORTAGE LIES INTRICATE WEB

(By Robert Lund)

Potent factor in the utilities battle which lies behind Detroit's critical gas shortage is a Federal Government order calling on American Light & Traction Co. to divest itself of stock holdings in Detroit Edison Co.

How loss of an electric-utility stock affects gas consumers is a complex corporate pyramid.

The spider web unravels like this:

Michigan Consolidated Gas Co. is controlled by American Light & Traction. In turn, American Light is controlled by United Light & Railway Co., a holding company.

In the late twenties, American Light, with an eye toward a Midwest empire of utility companies, purchased 257,841 shares—about 20 percent—of Edison's outstanding stock.

Two officers of American Light now sit on the Edison board as representatives of American Light's interest. They are F. L. Conrad, a director of American Light, and R. T. McElvenny, vice president and assistant to the chairman of American.

The Securities and Exchange Commission has ruled that, under the Holding Company Act, United Light must divest itself of its interest in American Light.

Simultaneously, the SEC also ruled that American Light should dispose of its holdings in Edison and Madison (Wis.) Gas & Electric Co.

In compliance with the SEC ruling, American Light has already marketed a substantial block of its Edison stock. Brokerage quarters predict two additional offerings this year will see the last of American Light's interest in Edison.

In effect, the SEC ruling puts United Light out of business. It also takes a deep slice out of the earnings of American Light.

Under a plan filed by United Light with the SEC last October, American Light would continue as a holding company. It would own an integrated gas-utility system.

These properties would be operated by still another company—Michigan-Wisconsin Pipeline Co. and Austin Field Pipeline Co.

Funds to form the last two named concerns would come from the proceeds of the sale of the Edison stock.

If Michigan-Wisconsin Pipeline is successful in its attempts to build a line from Texas to supply eastern Wisconsin and Michigan areas, including Detroit, the profits from such a venture would more than offset the loss in revenue from the sale of the Edison stock.

The new company would be manned by the same executives that now head United Light.

CITY A PRIZE FOR GAS FIRMS

(By Leo Donovan)

Why natural gas is so vital to Detroit industry is apparent in almost every manufacturing process in the machine shop of the world.

Industrial gas is at least a $7,000,000 annual prize for which the utilities giants battle.

The Michigan Consolidated Gas Co. reports that 50 percent of all industrial gas sold in Detroit and piped here 1,200 miles from Texas and the Hugoton fields in Kansas is used for heat-treating metals.

Another 25 percent of the industrial gas sold by the local distributing utility is used for baking enamel finishes on automobile bodies.

The other 25 percent is used for miscellaneous industrial uses, principally for melting metal, die casting, block treating of motors, and baking bread.

Why 200,000 men are idle in Detroit may be analyzed from the almost countless types of jobs and skills in which industrial gas plays a vital part.

Industrial gas is used in such a variety of applications as bunsen burners in factory medical departments; in tool-room heat-treating; in drying ovens; flame cutters; tool room, electric-repair and machine-repair torches; in enamel burn-off furnaces; for soldering irons, rivet heating, cleaning and hardening furnaces; for atmosphere generators, circulating air furnaces, and for foundry maintenance.

It's used in brake tube and gas tank assembly lines; in foundry black-wash ovens; for melting lead; for conveyor torches; in core-room foundries; for oil-burner pilot lights; for several types of core ovens, rotary sand dryers, mold dryers.

In automobile paint departments it has wide use for bonderizing, oven drying, finish enamel baking; repair ovens, and in tin furnaces and for melting lead.

Figures of Michigan Consolidated show that in 1947 the company distributed its gas sales in the following classifications.

For residential hot water and cooking, $13,195,000.

For industrial gas, $7,006,000.

For commercial use in stores, laundries, bakeries, etc, $1,923,000.

For space heating of homes and stores, $9,348,000.

If the company were to sell industry-manufactured gas it would cost the company about $1.81 for every thousand cubic feet, as contrasted with the current rate of slightly more than 20 cents a thousand cubic feet for natural gas, a company spokesman reported.

Only space-heating gas has remained at the same price to the consumer since 1941, the gas company reported. That rate is 62 cents a thousand cubic feet.

The industrial gas rate of 43 cents a thousand cubic feet is 28 percent lower than the rate in 1941; the residential rate of $1.03 is 32 percent lower, and the commercial rate of 78 cents is 28 percent lower, the company reported.

Without Detroit's industry and the efforts of the late Councilman John W. Smith, Detroit would not have natural gas.

Smith led the fight to bring natural gas to Michigan, and the Panhandle Eastern Pipeline Co. grew from a small utility to one of the largest pipe-line companies in the country because of Detroit's continuously expanding use of the fuel to operate its industries.

GAS SHORTAGE PROVES GREATEST BLOW TO CITY'S INDUSTRY SINCE DEPRESSION

(By Clyde Bates)

Detroit has been plunged into the greatest mass unemployment since the depression by the critical gas shortage, the board of commerce revealed.

More than 150,000 men are idle, scores of plants are closed and production has been curtailed at others.

The Michigan Consolidated Gas Co. announced that it would be unable to restore gas to plants before next Monday and maybe not then.

This meant another week of idleness for workers whose resources already have been drained by payless days.

Total loss in production and pay rolls threatens to reach staggering proportions. Loss to industry has been estimated conservatively at $30,000,000 a week by the board of commerce.

Chrysler Corp., hardest hit of the major industries, has suffered an estimated $20,000,000 loss. Pay roll loss to 50,000 idle employees has been $3,000,000.

These figures were corporation estimates.

The board of commerce figures also revealed that gas shortage lay-offs have dropped industrial employment to the lowest figure since 1935.

At that time an estimated 315,000 workers were employed in the Detroit area.

Current lay-offs, the Board of Commerce estimated, have reduced factory employment to 319,000.

Other developments in the gas and fuel situation Tuesday were:

1. Common council hurried two petitions to Washington. One was directed to Secretary of the Interior Julius A. Krug, asking all possible aid in getting oil to Michigan Consolidated. The other petition was addressed to the Federal Power Commission, demanding information on what the FPC is doing to alleviate the natural-gas shortage.

2. Fred H. Robinson, Panhandle Eastern Pipeline Co., executive, urged immediate intervention by Governor Sigler. Robinson's wire to Sigler said that "this situation has become so aggravated that in our opinion executive action is necessary to bring about a solution."

3. Mayor Van Antwerp appointed seven persons to serve on the Citizen's Fuel Oil Commission, in an effort to assure proper distribution of available slim supplies.

4. Panhandle Eastern assured continued delivery of its contracted maximum of natural gas to Michigan Consolidated, despite FPC orders to continue emergency pipe-line deliveries to Ohio.

5. Applications for unemployment benefits rose to record heights in two of Detroit's four offices, MUCC officials said. A total of 20,000 claims were filed Tuesday, 5,000 more than Monday's total. By the week end officials expect to file 110,000 claims, the greatest since the VJ-day reconversion.

Ford Motor Co., only mildly hit by the gas shortage, donated another 5,000,000 cubic feet of gas to the Michigan Consolidated Monday, Henry Fink, gas company president, said.

Ford diverted 30,000,000 cubic feet into Michigan Consolidated lines over the week end.

Fink said a reserve supply of 1,145,000 gallons of oil for making artificial gas has now been built up, compared with only 300,000 a few days ago.

POLITICAL FIGHT OVER GAS LEAVES CITY CHILLED

(By Hub M. George)

Wrangling over Detroit's gas supply, with frequent crises, has been a favorite political pastime for at least a quarter of a century.

James H. Lee, assistant corporation counsel, and Detroit's recognized authority in utility matters, believes the 2-year battle between Michigan Consolidated Gas Co. and Panhandle-Eastern Pipeline Co. over natural-gas supplies for Detroit is a leading factor in the present shortage.

The franchise of the old Detroit City Gas Co. expired 24 years ago.

Controversy and litigation have been almost interminable since.

Its latest development was the order of the Federal Power Commission a year ago authorizing the Michigan-Wisconsin Pipeline Co., an affiliate of Michigan Consolidated, to pipe natural gas from Texas to the Austin storage field 140 miles north of Detroit.

That authorization anticipated expiration in 1951 of Michigan Consolidated's contract with Panhandle-Eastern to supply up to 125,000,000 cubic feet of gas daily to Detroit.

Panhandle fought the decision bitterly. It offered, on the basis of three proposals of its own for increased service, to step up deliveries to 180,000,000 cubic feet daily. The offer was not accepted.

The $7,000,000 Detroit-Austin field extension is scheduled for completion in late spring.

The long fight is for control of the rich Detroit industrial market.

In all existing contracts, the priority of the householder is recognized.

Industry is being served mainly on an interruptible, off-peak-load basis. It is the first to feel a shortage.

After the 1924 expiration of franchises, the city was without a binding arrangement for 3 years.

Court action finally forced agreement on a scale of rates in an arbitration procedure headed by Justice Frank Murphy, then a recorder's judge, now of the United States Supreme Court.

When litigants challenged the rate base the city succeeded in establishing the regulatory control of the State public utilities commission.

Until that time coke gas was practically the only supply.

Early in the 1940's city council forced the Columbia Gas & Light Co., a holding company controlling Panhandle-Eastern, to extend its main pipe line from Dana, Ind., to provide Detroit with natural gas.

Council and the gas firm engaged in a series of fights over rates.

The city and gas company joined hands to dissolve the company controlling the pipe line from Indiana to Detroit.

This brought a $4,500,000-a-year reduction in consumer rates. More than $26,000,000 is held by a Kansas City Federal appellate court for distribution to Michigan consumers in rebate of overcharges.

Detroit will eventually receive $11,000,000 of this total.

City and company joined again in a successful fight to utilize the Austin field for reservoir storage of a summertime surplus of Panhandle gas.

Panhandle contended it was not obligated to provide gas for underground storage.

That sharpened the rivalry. Panhandle and Consumers Power Co. were already developing the Michigan gas storage field near Big Rapids.

It was in 1945 that the Michigan-Wisconsin pipe-line project got under way.

Originally Michigan Consolidated contended it was going to cut off Panhandle's supply after 1951 and serve its field exclusively.

More recently, however, adjustment of the contract to 87,000,000 cubic feet a day has been discussed.

It will take nearly 2 years to complete the Michigan-Wisconsin pipe-line project, and presumably an equal time to greatly augment Panhandle's deliveries.

The latter company already has won approval, however, for step-up and booster changes to augment service in small degree in the intervening period.

FACTORY FIGURES

Detroit industry, though hard hit, has by no means been paralyzed by the natural-gas shortage.

A survey of some of the plants affected indicates that while some have been closed completely, others have been able to keep many of their employees on the job.

The following table shows the number of workers employed in the plants checked, the number laid off, and the length of time they have been idled:

Industry	Number employed	Number off	Number days off
Eaton Co.	809	750	6
Bohn Alum Co.	6,000	1,000	4
Detroit Steel Products	900	350	2
Kelsey-Hayes Wheel	1,100	800	5
Detroit Michigan Stove	750	700	7
Chrysler Corp.	70,000	50,000	6
General Motors Corp.	28,000	1,600	4
Ford Motor Co. HP truck plant	10,900	500	4
Briggs Manufacturing	21,000	20,500	4
Packard Motor	8,400	5,500	7
The Budd Co.	8,000	200	7
Standard Steel Treating	60	6	1
Michigan Steel Processing	25	12	5
Congress Die Casting Division	125	125	6
Superior Steel Treating Co.	20	10	5
Ainsworth Manufacturing Co.	800	200	4
Square D. Co.	1,600	16	2
Glenvale Products Corp.	175	125	5
Commonwealth Brass Corp.	580	20	4
Starr Heat Treating Co.	28	5	5
Detroit Aluminum & Brass Manufacturing Co.	700	50	1
Atlas Foundry Co.	135	135	1
Hoskins Manufacturing Co.	300	135	7
Commonwealth Industries, Inc.	50	7	5
Barnes Gibson & Raymond Co.	400	6	4
Wolverine Tube Co.	1,200	1,000	7
Monsanto Chemical Co.	310	250	2
Revere Copper & Brass Co.	1,000	12	4
Michigan Steel Casting Co.	380	25	9
L. A. Young Spring & Wire Corp.	2,800	2,000	4
Detroit Bevel Gear	300	10	5
Detroit Steel Corp.	225	[1] 225	1
American Brass Co.	1,200	[1] 1,200	2
Commercial Heat Treating Co.	180	[2] 180	2
Federal Mogul Corp.	800	800	5
Nash-Kelvinator Corp.	4,300	1,400	5
Detroit Steel & Tube Co.	480	40	5
Gemmer Manufacturing Co.	1,300	750	6

PAULEY RESIGNATION

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MACKINNON. Mr. Speaker, in yesterday's papers I read a news item

reporting that the Special Assistant to the Secretary of War for Procurement, Mr. Edwin W. Pauley, has resigned and that his resignation has been accepted. He was a high Government insider who admitted making fabulous profits speculating in commodities.

In this connection, I simply wish to observe that the publicity given to his theatrical gyrations which obviously resulted from the impact of the blow he received in December have in no way diminished the truth of the charges. In this case it is true as Samuel Johnson once remarked, "Attack is the reaction." Mr. Speaker, in this case the weight of the blow can best be judged by the extent of the rebound.

EUROPEAN RECOVERY PROGRAM

Mr. GAVIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include an editorial.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GAVIN. Mr. Speaker, I want to take this opportunity to momentarily discuss the proposed Marshall plan now in the making, and to say that in my opinion the Marshall plan is in for some rough sledding in the Congress unless scaled down to size, and unless an organization is set up in which the Congress has confidence, and unless a commonsense, reasonable program is presented to assist those countries that are in need of assistance, rather than attempt a program to subsidize all the countries of the world.

It appears that unless we concentrate on the spots where there is desperate need of help, rather than take in the entire world, we may scatter our hits in so many different directions we will not win any ball game.

There is no question but that certain parts of Europe must be helped to bring about economic stability in the world. However, we should be practical realists in developing this program as to what we can and cannot afford to do without breaking the American taxpayers' backs.

We are approximately $260,000,000,000 in debt. Therefore, it is time for careful thinking before it is too late. Certainly, one can readily recognize that this country cannot indefinitely finance all the countries of the world.

We have pumped approximately $20,000,000,000 into Europe since the end of the war without appreciable results. We now should direct our efforts where the need is greatest.

When all is said and done, the whole problem in continental Europe is coal. The whole economy of Europe is dependent upon coal. Everywhere we traveled in Europe last fall the problem was coal. And next after coal is steel, and after steel is the rehabilitation of the transportation systems in the war-torn countries.

So, if we get the coal and steel and transportation industries rehabilitated in these sore spots, it will give that industrial impetus necessary to effect a recovery through all of Europe. However, if we take on a plan to finance and rehabilitate all the countries of the world, the American taxpayer—who is demanding tax relief and is entitled to it—will rebel. In fact, they are rebelling now. They are on the alert and asking what it is all about.

I said when I came back from Europe—and I want to say it again—that unless a separate organization is set up outside of the State Department, free from any governmental interference, to operate this program in a hard-headed, practical, businesslike manner, that it is my honest and unsolicited opinion that a great many Members who might have accepted a reasonable program will vote against any program at all.

This organization, when set up, should be composed of the keenest minds in American finance, coal, steel, transportation, and agriculture. Men of broad experience. Practical men who understand that two and two make four. Men who have been successful operators and not world thinkers and do-gooders who have concluded that Uncle Sam's pocketbook is inexhaustible.

Those who are proposing this program will have to deflate their present ideas and get down to business; tell the American people the least amount that is essential and necessary to effect industrial rehabilitation in these sore spots where help is desperately needed; tell the American people exactly where the money is to be spent, how it is going to be spent, who is going to do the spending, and the results that we expect to achieve from the investment we are proposing to make.

The State Department should handle affairs of state and should get out of the economic affairs of the Nation. I do not say this critically, but I honestly believe they are not qualified by training or experience to take on and handle a job of this stature.

If we continue promiscuous spending through the various governments of Europe, as we have done in the past, I feel certain we will not effect the kind of a recovery the world hopes for, and nothing concrete will be accomplished, and the American taxpayers' dollars will go down the drain as they have in the past.

This is a job for hard-headed American businessmen and industry; and it is going to require the keenest brains and ingenuity that are available.

Certainly it is evident that those who have been handling these matters since the end of the war have not gotten any definite results for the billions of dollars poured in since 1945.

We all recognize that help is needed in some of these war-torn countries, and certainly we do not intend to withdraw from participation in world affairs. Yet, on the other hand, the day has come when we cannot continue exhausting our natural resources—oil, coal, iron ore, and our money—without eventually crippling our own productivity and bankrupting ourselves; ending up in economic chaos and inflation.

The oil situation today is an indication of the shape this country is in. In fact, I think you will agree with me that it is a desperate situation and that something must be done about it.

This whole proposed plan should be scaled down to meet the size of our pocketbook and a reasonable amount of money placed where it will do the most good.

In conclusion, permit me to state that unless the program is placed in the hands of a qualified, competent group of administrators in whom the American people have confidence to do the kind of job that must be done—to get results for the money expended—I feel certain this proposed spending program is going to have a rather tough time in the Congress. The American people are weary, and have reached a point of utter exhaustion in these gigantic world-spending plans. It is time to wake up and think about our own country, and what the depletion of our natural resources means for its future. We want to do our part—and we will do our part—but promiscuous spending without results must be stopped.

[From the Punxsutawney (Pa.) Spirit]

COAL IS THE KEY

The key to European recovery—and to the success of the Marshall plan—is coal. In the words of Coal Age, "Because of the lack of coal, factories run part time, fields are less fertile, and firesides are cold."

Before the war, Britain and Germany together supplied the bulk of Europe's coal. Now production in the Ruhr is at half the former level, and England can barely produce enough for her own domestic requirements. As a result, Europe has had to go through the costly process of hauling coal from the United States. During the current year, it is estimated, our exports to western Europe will total the enormous figure of 45,200,000 short tons.

This cannot be indefinitely continued. To quote Coal Age again, "Two developments are vital. First, western Europe must reequip its mines. This calls for a vast production effort on its own part, as well as the import of specialized equipment from the United States. Second, a river of coal, 34,200,000 tons in 1951, must breach the iron curtain and flow from Poland to the west."

In this country, free enterprise has created an efficient coal industry. It remains to be seen if Europe can profit by our example.

EXTENSION OF REMARKS

Mr. SNYDER asked and was given permission to extend his remarks in the RECORD and include two editorials.

Mr. JENKINS of Pennsylvania asked and was given permission to extend his remarks in the RECORD and include a letter from a constituent on the President's proposal to take out of the Veterans' Administration program of training the flight training which has heretofore been in the program.

Mr. CANFIELD asked and was given permission to extend his remarks in the RECORD and include a radio address by the gentleman from Illinois [Mr. DIRKSEN] on Abraham Lincoln.

Mr. MATHEWS asked and was given permission to extend his remarks in the RECORD and include a short quotation from a report to the Governor of the State of New Jersey.

Mr. HORAN asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. BUTLER asked and was given permission to extend his remarks in the RECORD in two instances, first on the St. Lawrence waterway and in the other to include a brief explanation of a bill being introduced today by him for the railway mail clerks.

SPECIAL ORDER GRANTED

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent that I may address the House for 10 minutes today following the disposition of matters on the Speaker's desk and the conclusion of special orders heretofore granted.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the RECORD in three instances and to include extraneous matter.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that I may address the House for 15 minutes today following the disposition of business on the Speaker's desk and the conclusion of special orders heretofore granted.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD in three instances and include editorials.

THE FUEL OIL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, for weeks the committees and Members of Congress, as well as the public, have been told by representatives of the State and Commerce Departments that further reductions in exports of petroleum and petroleum products would be impossible. They have also been told by these spokesmen that, even the thought of an embargo for a limited period is out of the question. They have said that it is dangerous and might wreck the economies of other nations.

I want to point out today that upon the analysis I made last Thursday, which appears at pages 1157 and 1158 of the RECORD, this argument is completely refuted. Apart from the unsatisfactory reductions announced on January 30, it is clear that a complete 100-percent embargo has been declared by the Department of Commerce as to products going to certain countries. There is such an embargo on kerosene to Denmark and Eire, on gas oil and distillate fuel oil to the Republic of Panama and Iceland, on residual fuel oil to New Zealand and the United Kingdom.

I understand the Office of International Trade has up to today issued export licenses for only approximately 400 barrels of all oils for shipment from east coast ports. We understood on January 30 that the Department would refuse to license any shipments of oil through east coast ports. Obviously, this is a complete 100-percent embargo for all intents and purposes, of exports from this shortage area. I also understand that the Treasury Department is now in the process of notifying all customs offices to enforce the regulation as to all shipments. This, in effect, has implemented the complete embargo of January 30 on the export of all those products for an indefinite period from the critical areas, unless a date be set in the announcement.

I know that Members of Congress will bear these facts in mind in the consideration of any legislation dealing with further restrictions or an embargo. Certainly the clear facts outweigh any misgivings and doubts on the part of the officials of the Departments of State and Commerce. Although it is a relatively unimportant point, I hope each of you will make these facts very clear to all at home who may have occasion to read certain syndicated columns, attacking any embargo suggestion or attempting to smear the authors as being engaged in "smart politics" and referring to their sincere and honest efforts to provide solutions to this critical situation as "politics of reckless folly."

We all know that several of these columnists readily respond to the appeals of their friends in the departments, but, unfortunately, too many people who read their columns are not aware of this particular type of specious demagoguery, which is still engaged in in some quarters.

I realize that we are dealing with a technical subject. It is unfortunate that the terminology varies so sharply. I previously pleaded that we settle upon some simple language and stick to it. It is no wonder that people are confused when they hear of tons one day, barrels the next day, gallons the next day, percentages the fourth day, dollars the fifth day, and net balances at the end of the week. The same thing is true when we hear of allocations, quotas, export licenses, and actions undertaken through the customs offices.

However, I think you may wish to have the record clear at this point. You will find that in the release of January 30, which I included in my remarks at page 852 of the RECORD, I stated I was glad to be able to report that at 4:30 o'clock that afternoon the Department of Commerce announced a revised program on the exports of fuel oil, and I quoted this paragraph from the release, "In addition, the Department announced it would eliminate licenses for export of petroleum products to export from those areas of the country where fuel can best be spared during this emergency period." Of course, we all understood that to mean that the Department would not issue licenses from east-coast ports, and it appears that it has done so only to the relatively minor extent of some 400 barrels of all kinds of oil.

Today's action, if I understand it correctly, is a recommendation that the decision not to export or issue export licenses is not sufficient and that it leaves an opening, however slight, of relying upon licenses which may have been issued prior to January 30. Therefore, the decision to notify the customs offices to refuse to authorize any shipments whatever plugs that loophole most effectively. Yet, I must add that I am not satisfied it will be a sufficient action, and I intend to comment on that as soon as I can obtain more exact information as to the text of the announcement.

At this point, I might add that I understand there are some legal questions involved and now being considered. The only ones I can think of might have to do with contracts already entered into for shipment during this period out of these ports to other countries. As a lawyer, I cannot overlook the difficulties of such a situation, if it exists. Nevertheless, morally, I cannot believe that any person who entered into such a contract recently is entitled to any consideration whatsoever. Obviously, one possible motive would be the few extra filthy dollars in foreign sales at this time of critical shortages here. So far as I am concerned, that is a wholly inadequate reason for any American taking from his neighbors short supplies in this unhappy period, and I certainly hope we can get to the bottom of all factors leading to these foreign sales. No one can deny that they have had their effect on increased prices throughout this country, and I think they are an example of the blindest kind of an approach to the problem of convincing the American people that our free enterprise system has worked and can work, if those responsible for its conduct will rise above the petty desire to make a few extra dollars, at the expense of their fellow countrymen. I can think of no surer way for any industry to find the American people demanding a resumption of Government controls and even, perhaps, the nationalization of their industry than for it to ignore the legitimate expectations of the people of this country, in terms of supplying them with an adequate amount of their goods at reasonable cost. Therefore, if this is the legal difficulty, I am not going to waste much sympathy upon those who have brought it upon themselves. If he or it has to take a loss, he or it should do so without whining. Certainly, the chances are that the loss will be infinitesimal compared to the accrued profits, if this is the kind of thing involved.

EXTENSION OF REMARKS

Mr. GOFF asked and was given permission to extend his remarks in the RECORD and include an article from the Nation's Business entitled "Our New Friends, the Japanese."

PROPOSED AMENDMENTS TO EXISTING PUBLIC LAWS

Mr. BREHM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BREHM. Mr. Speaker, in my opinion at least two public laws should be amended. One deals with social security, wherein a widow, through no fault of her own, has failed to file for death benefits under her husband's social security employment prior to February 10, 1947.

One of my constituents, an aged lady, whose husband died in 1939, did not know until March of 1947 that her husband was covered by social security. During that month, while looking over some old papers, she discovered her husband's social-security card. She immediately contacted the regional office but was informed that she was not entitled to a lump-sum payment due to the fact that she had not filed claim for benefits prior to February 10, 1947.

Now, it may be that some statute of limitation date is necessary, but it seems to me that there are exceptions in all cases and that the law should be flexible enough to see that justice is done in these exceptional cases. This poor widow lady is a case in point. She needs every penny which she can get to meet the high cost of living. She did not know that her husband carried social security. Why, then, should this poor aged lady be denied that which under the law of common sense rightfully belongs to her even though the law on the statute books denies her this meager help.

In my opinion, the law should be so amended as to give the Administrator of the social-security program authority to use his discretion and interpretation in dealing with cases such as this, and that he should not be compelled to adhere strictly to the law in cases of this nature.

The second law to which I refer is the one which also puts a time limit on the date wherein a discharged veteran may file for his mustering-out pay.

I trust that both of these laws may be amended by the proper committee. If that is not done within a reasonable length of time I intend to introduce legislation looking toward the amendment of these two laws.

EXTENSION OF REMARKS

Mr. MERROW asked and was given permission to extend his remarks in the RECORD and include an article written by him entitled "The Aircraft Industry."

Mr. MURDOCK asked and was granted permission to extend his remarks in the RECORD and include a letter received by him.

DO NOT BE FOOLED LIKE LITTLE RED RIDING HOOD BY THE WOLF IN GRANDMOTHER'S CLOTHES

Mr. POULSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. POULSON. Mr. Speaker, this week the Secretary of the Interior, Mr. J. A. Krug, will have introduced into this Congress a so-called compromise bill on the disputed tidelands oil case. According to the news releases issued by the Department, they will give back to the various States 90 percent of the income and retain only 10 percent for themselves. That in itself is the wolf in grandmother's clothes.

Before we show up that statement let us call your attention to the fact that it is selling out a principle for a few pieces of silver. They say nothing about the control of the harbors, bays, and inland waterways. Yes, they say they keep only 10 percent, but they keep the absolute control of all properties below low tide and their operation, and this is the crux of the whole problem.

There is approximately only $5,000,000 involved in this oil revenue in California, but on the other hand there are untold millions of dollars involved in our harbor and inland waterways properties and revenues, for which there is no provision made in the Interior Department's bill. Once we adopted this bill they would use it as a springboard to control the entire port and inland waterways property not only of California but of the entire United States.

Now, let us return to this so-called generosity of giving the States 90 percent. It is true they grant 37½ percent directly to the States off which the oil and gas are recovered, or in other words they give them 37½ percent of the total 100 percent which we claim the States own. Now as to the 52½ percent which will be paid into the Federal reclamation fund, let me say that that is a misnomer because the money is paid into the general fund and there is a bookkeeping credit set up showing that the 17 Western States have as a credit this so-called amount. Let it be said right here that this does not insure this money going to the States because each and every year the Appropriations Committee appropriates the money for the building and completion of reclamation projects. It might look better to have a nice credit in the fund but it has no bearing on their actions. As an example, some States have big credits and are getting no appropriations because they have no projects deemed feasible at this time. Let us assume the Secretary is right, which he is not, on this reclamation fund, and assuming this money goes to the credit of the 17 Western States, here is what California would be doing. Just last week the Secretary authorized the most unfeasible project ever presented to Congress, the eight-hundred-million-dollar central Arizona boondoggling project, which would take water out of the mouths of the people of southern California. So, according to the Secretary's propaganda, California would contribute the money for another State to use to take water from the mouths of its own people under his formula. Under the present revenues from oil in California tidelands it would take almost 300 years to pay for this Arizona project if all of the money to be set aside for reclamation were given to Arizona alone. Do you think the people of California will go for this? Of course not.

EXTENSION OF REMARKS

Mr. WILLIAMS. Mr. Speaker, I was previously granted leave to extend my remarks and include a concurrent resolution of the Senate and House of Representatives of the State of Mississippi. I now ask that that be changed to show that resolution as being presented by the entire Mississippi delegation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

TRACTOR FUEL

Mr. PRESTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. PRESTON. Mr. Speaker, I read with interest a report filed by the Committee on Interstate and Foreign Commerce on the fuel-oil situation. I was gratified to see that a satisfactory degree of cooperation had been had with the oil industry. I note some reference was made to the agricultural situation. I would like to point out, Mr. Speaker, that in our part of the country, down in Georgia, this is the season of the year when people turn their lands preparatory to planting. We have increased the use of tractors in our country 30 percent. The oil industry has cut the allocation of tractor fuel in our area by 30 percent. Consequently a real emergency is existing in our section of the United States. I would like to ask the committee that in future negotiations with the oil industry they undertake to get a proper allocation of tractor fuel for the Southern States, who begin their farming operations much earlier than they do in other sections of the United States.

The SPEAKER pro tempore. The time of the gentleman from Georgia has expired.

EXTENSION OF REMARKS

Mr. HAYS asked and was granted permission to extend his own remarks in the RECORD.

CONTRIBUTION OF THE BOY SCOUTS OF AMERICA TO THE AMERICAN PEOPLE

Mr. HAYS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS. Mr. Speaker, the Boy Scouts of America, now more than 2,120,000 strong, are observing the thirty-eighth anniversary of the founding of the movement in America. As a former Boy Scout, I can speak first-hand concerning the things for which this organization stands and the practical contribution that is being made by these boys and their leaders to the welfare of our country.

For their theme, which they emphasize this year, they have chosen the slogan,

"The Scout Citizen at Work." This is just an extension of their slogan, "Do a Good Turn Daily." Everybody knows the Boy Scout and his good turn, but when you add up a million or more good turns in the form of service to the home, the community, the Nation, and the world, the total dimensions are hard to believe.

The Boy Scouts have embarked on a program of civic service with direct values to you and me, and every community where a Scout unit exists. They cooperate with existing agencies such as the American Legion, the Red Cross, 4–H clubs, and other service clubs. They do systematic work in conservation of our national resources, including setting out trees, helping maintain wildlife refuges, cooperating in forest fire prevention, trail building in National and other parks, and many other activities that are closely related to the Scouting program.

In their home communities, individual Scouts and Scout troops are always ready to take on a job. They are the ones who get out in the cold and shovel snow from fire hydrants when the regular departments are overworked; they set up safety guards at coasting hills where younger children are playing; they do many other useful and important tasks as needed.

All of this, although it does involve hard work, is something of an adventure to the Boy Scouts. You and I know that it is fine citizenship training, based on the Scout ideal of service. The least we can do in return is to give our support to the Boy Scouts in our home communities and elsewhere. They need it and deserve it. I do not want to appear as a sentimentalist, but I say heartily: Thank God that the boys of America have a fine organization like this to help them to grow to be physically strong, mentally awake, and morally straight.

EXTENSION OF REMARKS

Mr. MILLER of California. Mr. Speaker, on last Friday I obtained permission to extend my remarks in the RECORD. At that time I did not know that the matter would run over the legal limit. I now have an estimate from the Public Printer that it exceeds the limit by $213. Notwithstanding this, I ask unanimous consent that the extension be made.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

SPECIAL ORDER GRANTED

Mr. EBERHARTER. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes on Thursday next following any other special orders entered for that date.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

REDUCTION IN FORCE BY VETERANS' ADMINISTRATION

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, the Boston papers carry a story to the effect that 250 employees of the Veterans' Administration in the branch office and the regional office have had their services terminated and this follows a marked reduction that took place last year. We know that throughout the country between eight and ten thousand employees were let go last year. The unfortunate occurrence is due to the fact that the Veterans' Administration cannot come back to Congress and ask for a deficiency or supplemental appropriation because when they appeared before the Appropriations Committee last year, according to evidence brought out in hearings held about 6 or 8 weeks ago, officials of the Veterans' Administration were instructed that they could not come back for a deficiency appropriation. The antideficiency book or law was thrown at them, the first time it has ever happened.

I assure you the Committee on World War Veterans' Legislation is very sympathetic. I do hope that the Committee on Appropriations will look into the question of whether or not a deficiency or supplemental appropriation is needed in order to give the maximum service to our veterans, and, if so, I hope the Appropriations Committee will bring out of committee the needed appropriation as soon as possible.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

VETERANS' ADMINISTRATION NEED FOR DEFICIENCY APPROPRIATION

Mr. CASE of South Dakota. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. CASE of South Dakota. Mr. Speaker, the chairman of the Appropriations Committee is not on the floor, but being a member of the Subcommittee on Deficiencies, I am sure I can say that it is always the policy of that committee to consider estimates for deficiency or supplemental appropriations when they are submitted by the Bureau of the Budget in due order. It has been my experience that whenever a supplemental estimate has come up involving the affairs of the veterans and the Veterans' Administration that it has always received very sympathetic and careful consideration.

EXTENSION OF REMARKS

Mr. MUNDT (at the request of Mr. MICHENER) was given permission to extend his own remarks in the Appendix of the RECORD.

WHERE DOES STASSEN GET HIS MONEY?

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, so many Members are going out to make speeches this week that I have been wondering what they are going to talk about. I know there will be Lincoln Day addresses and all that.

But I have been bothered by two questions that I am sure the people would like answered. Here they are: The Marshall plan, we are told, is to keep us out of war with Russia, kill communism. I am just wondering if we get mixed up in this Palestine business and send an army there, as we are being asked to do, will we be fighting side by side with Russia for one group or another, over there? And will it be with the Jews or the Arabs?

Then there was another important question that bothered me. I remember the gentleman from Minnesota, Mr. Stassen—and I wish some of our Members from that State who are so invaluable here in the House would tell me about him—when Mr. Stassen was before the committee at the other end of the Capitol he refused to answer some questions about where he got his information about men who were making so much money speculating. I can understand that because that was a touchy little subject; but I cannot understand why he should not be willing to tell us where he is getting the money to conduct the campaign he is carrying on for the Presidency.

For months the young gentleman has been going up and down the countryside, enumerating his qualifications for this high office, giving his views on domestic and foreign problems. The press recently quoted him as saying we should spend some $20,000,000,000 on the Marshall plan. He seems to talk easily about "big money." Perhaps his appearances have netted him substantial sums. On that subject I have no information. He could enlighten us.

Of one thing I am quite sure. The people usually are interested in the sources of the income of their public servants. They are interested in learning whether candidates for public office, especially for the highest office in the world, have accepted funds, incurred financial obligations to individuals or groups which have or might have a special interest in future national policies.

So the request—and this is the second time I have made it—that Mr. Stassen disclose without delay the source of the funds which he is spending or which his friends, with his knowledge, are spending in promoting his campaign. And, as Mr. Stassen suggested to Mr. Pauley and to others, how much money are you spending in your campaign, Mr. Stassen? And tell us, please, Mr. Stassen, are there any international bankers, are there individuals or groups interested in other nations who are backing you in this drive for this high office? Come on, now, Harold, let us be frank; just who is paying the freight?

FIFTIETH ANNIVERSARY OF THE SINKING OF THE U. S. BATTLESHIP "MAINE"

Mr. MICHENER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk Senate Concurrent Resolution 41, relative to the expenses of a

delegation to attend the ceremonies in Habana, Cuba, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*, and concur in the same.

The Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by adding at the end of section 3 thereof the following: "The funds made available under this concurrent resolution shall be available for paying the expenses of a delegation to attend the ceremonies that will be held in Habana, Cuba, on Sunday, February 15, 1948, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*, to be composed of two Members of the Senate to be appointed by the President of the Senate, two Members of the House of Representatives to be appointed by the Speaker, and two representatives of the United Spanish War Veterans, consisting of the commander in chief and one other member of that organization, together with the expenses of any of the employees of the committee whose services are required in connection with this ceremony."

The Senate concurrent resolution was agreed to.

Mr. MICHENER. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MICHENER. Mr. Speaker, this is an emergency matter. The foundation resolutions have passed the House and the Senate. A similar resolution to Senate Concurrent Resolution 41 was introduced by the gentleman from Pennsylvania [Mr. VAN ZANDT] and has not been considered by the Committee on House Administration. I am sure that committee did not realize the urgency of the objective.

The celebration in Cuba, referred to in this resolution, takes place on February 15, 1948; and if the purpose of the Congress is to be carried out as heretofore expressed, then this Senate Concurrent Resolution 41 must be agreed to by the House today.

Mr. Speaker, I have conferred with the minority leader, with the Acting Speaker, and with the gentleman from New Jersey [Mr. SUNDSTROM], chairman of the subcommittee of the Committee on House Administration, and there is no objection on the part of any of them to agreeing to this Senate concurrent resolution.

REPORT OF THE AIR COORDINATING COMMITTEE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 524)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read, and together with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce and ordered to be printed:

To the Congress of the United States:

I transmit to the Congress, for its information and consideration, the Report of the Air Coordinating Committee, for the calendar year 1947.

The committee was established by Executive Order on September 19, 1946, in order to achieve full development and integration of United States aviation policies and activities, and includes representatives of the executive agencies primarily concerned with aviation. Through its Aviation Industry Advisory Panel, the committee draws upon the experience and the views of the air transport and aircraft manufacturing industry, of organized labor, and of other aviation interests.

I hope the report may prove useful to the Congress in its deliberations on aviation matters, which are of such great concern to our country's welfare.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 9, 1948.*

SECOND DECONTROL ACT OF 1947—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 526)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read, referred to the Committee on the Judiciary, and ordered to be printed:

To the Congress of the United States:

Last July the Congress enacted the Second Decontrol Act of 1947, which extended certain limited wartime economic controls over key materials and facilities still in short supply as a result of the war. Specifically, it authorized distribution and use controls over tin and tin products, antimony, and cinchona bark, quinine, and quinidine; import controls over fats and oils, rice and rice products, nitrogen fertilizer, and pig tin; the power of granting priorities assistance under certain specified conditions where the prompt export of a material is clearly advantageous to the national interest; rail transportation controls; and export controls.

This act expires on February 29, 1948. The export controls and rail-transportation controls have already been extended for 1 year. I have already recommended, as a part of the broader allocation powers contained in the anti-inflation program submitted to the Congress on November 17, 1947, the enactment of provisions which will include the continuance of the other controls provided by the Second Decontrol Act.

It appears unlikely that a decision will be reached by February 29 on the broader aspects of this program. In the meantime, these limited controls over a few vital commodities, which are essential to the protection of our domestic economy and the carrying out of our international responsibilities, must not be permitted to lapse by default.

In extending these powers last July, the Congress recognized that controls were still needed because of the continued world-wide shortage of many critical materials. This need has not diminished. On the contrary, supply shortages for some commodities in the coming year are expected to be as acute as at any time since the end of the war. This is particularly true in the case of some commodities for which we are heavily dependent upon foreign sources of supply not yet recovered from the war.

As required by the Second Decontrol Act, the Secretary of Commerce has already submitted to the Congress two quarterly reports describing operations under the act, the policy framework under which controls are being administered, and the results which have been obtained by the actions taken. As provided by the act, these reports contain specific recommendations as to whether or not these controls should be continued in effect, with a full statement of the considerations underlying these recommendations. The second report, dated January 30, 1948, recommends the continuation of all of these powers except the power to allocate quinine, which is no longer needed.

Some of the serious consequences which would result if these powers are not extended beyond February 29, 1948, are as follows:

1. The international arrangements under which the United States secures an equitable share of the world tin supplies would be disrupted, and it would be impossible to assure that an adequate supply of tin would be available in the United States for essential purposes, such as food preservation.

2. Our efforts to add to a stock pile of tin in the United States and to conserve tin for this purpose would be seriously handicapped.

3. It would be impossible to carry out the international allocations of fats and oils, rice and rice products, and nitrogenous fertilizer, planned on a cooperative basis by the International Emergency Food Council, a United Nations body. Failure to meet these planned allocations would injure the economies of foreign countries and seriously hamper the attainment of United States foreign policy objectives.

4. It would be impossible to assure the export of minimum quantities of tin plate and nitrogenous fertilizer urgently needed abroad to increase food production and to prevent food from going to waste. The inevitable result would be greater suffering abroad and larger foreign requirements for basic foods grown in the United States.

I cannot believe that the Congress wishes to bring about the confusion both at home and abroad which would result from the expiration of these powers at this time. I, therefore, urge that prompt action be taken to continue the powers contained in the Second Decontrol Act of 1947, which are now scheduled to expire on February 29, 1948.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 9, 1948.*

FEDERAL AID HIGHWAY PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 525)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and referred to the Committee on Public Works and ordered to be printed:

To the Congress of the United States:

The roads of this country have been improved tremendously in the past 30

years. Over the years we have developed an increasingly efficient highway network. This has been made possible by active cooperation between the States and the Federal Government.

In this partnership the Federal Government has contributed part of the funds, extensive technical assistance, and the means for unifying the State systems into a national network. The States and local subdivisions also have contributed funds and have been primarily responsible for planning and actual construction. Working together, the Federal, State, and local governments have developed the most efficient and extensive road system in the world.

Successive congressional enactments were directed first toward improving rural roads and intercity highways. More recently a start has been made toward improving also the through highways in our cities. Today Federal aid is helping to develop an integrated traffic network to meet National, State, and important local needs.

It is necessary for the Congress to consider new highway legislation during the present session because the existing authorization will be substantially committed by December 31, 1948. While construction under these commitments will be continuing for at least 2 years thereafter, it is necessary at this time to extend the authorization in order that the States may have adequate opportunity for the orderly development of further construction programs.

In recent years our highway construction has not kept pace with the growth in traffic. When the war came, we sharply curtailed the highway-building program, limiting ourselves to a minimum program of repair and permitting improvement and new construction only where urgently necessary for war purposes. After the war ended, construction was necessarily delayed still further as a result of shortages of material and high costs.

On the other hand, the volume of business in the United States has grown more than 50 percent since 1940. This is reflected in the fact that we are now using one-third more trucks, which are carrying heavier loads and traveling more miles. There are also about 1,000,000 more automobiles in use now than there were in 1941, despite the fact that the production of automobiles for civilian use was discontinued during the war. In all, there are nearly 3,000,000 more vehicles on the road than before the war.

By any reasonable standard, our highways are inadequate for today's demands. Future demands will inevitably be greater as business traffic continues to expand, as our population grows, and as we build roads to reach needed resources now relatively inaccessible. Furthermore, we must reconstruct important stretches of road which were not built to carry heavy traffic safely and at reasonable speed. Modern automobiles, heavier trucks, greater pleasure and commercial travel all increase the need to improve our highways as a means of lowering the present shocking total of highway accidents.

To build the highways that will meet these needs will require continuous effort over a long period of time and on an extensive scale. For the immediate future, we must limit expenditures to avoid excessive costs resulting from overtaxing the capacity of the construction industry and to avoid inflationary pressure on the national economy. But we can and must continue to rebuild and modernize our highways where their present obsolescence results in excessive safety hazards and wasteful maintenance costs, and where present traffic capacity is most seriously inadequate.

Taking all of these factors into account, I recommend that the Congress enact legislation at this session continuing the Federal-aid highway program for the fiscal years 1950 and 1951 at an annual rate of $500 million. Under the provisions of the basic highway law, the funds for the first of these fiscal years would become available for commitment not later than January 1, 1949. I have asked the Administrator of the Federal Works Agency to submit to the appropriate committees of the Congress proposed legislation to this end. The same legislation should continue the authorization for direct Federal construction of roads in public-land areas, such as the national forests, national parks, and Indian reservations, in an annual amount of $71 million.

Enactment of legislation at this session will permit continuity in planning and construction. Most of the State legislatures meet early in 1949. The States need a firm basis of Federal action in advance in order to determine the engineering and budgetary aspects of the State highway programs.

The program I am recommending now is a conservative one, necessary to maintain prudently our investment in highways. When conditions permit in the future, we should plan to accelerate our progress toward a highway system adequate to carry our expanding agricultural and business traffic, to accommodate with safety and speed the personal travel of our people, and to meet the needs of our national security.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 9, 1948.*

SYNTHETIC LIQUID FUELS

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 453 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190), and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Lands, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this resolution would provide consideration for H. R. 2161, a bill to extend the life of the Synthetic Fuels Act of 1944 for an additional 3 years, and to authorize an additional $30,000,000 for the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances.

Unless this bill is passed the synthetic liquid fuels program would expire in April 1949—but it has been deemed advisable to extend the authority for the program now, so that contracts for construction of plants can be entered into.

It has been estimated that the oil resources of this Nation now approximate 20,000,000,000 barrels. At the present rate of consumption this supply of natural oil will be exhausted in about 10 or 12 years, and we will then have to rely entirely upon imports or domestically produced synthetic fuels. In the event of a future war we would not want to rely on imports—and for that reason this legislation is vital to our national security.

Research under this program for the past 4 years has produced marvelous results. Production of synthetic fuels from oil shales, coal, and timber and agricultural products is no longer in the experimental stage—it is an accomplished fact. There is still a question of cost, however. It is still more expensive to produce synthetic fuels than it is to tap our natural supplies, but it is expected that further research and development in production methods will decrease production costs of the synthetic fuels to a level to permit their general commercial use.

Fortunately, there is no shortage in this country of the raw materials from which synthetic fuels are made—and when production methods are perfected this country should never again be faced with fuel and gasoline shortages.

There should be no objection to this resolution. It is a general open rule, which merely provides 2 hours' debate on the bill. This bill is an important measure to guarantee the future national security of this country, and I urge you all to vote for it.

Mr. SABATH. Mr. Speaker, this is a timely bill in view of the shortages of fuel oil that exist today. It clearly demonstrates and proves the wisdom and the foresight of the New Deal that 4 years ago, in 1944, voted $30,000,000 for study and erection of demonstration plants to develop the production of synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances. This wisdom is so universally recognized that an additional

$30,000,000 is sought for in this bill to continue development and to provide for the construction of more demonstration plants. I hope the bill will meet with the unanimous approval of the House.

The chairman of the Committee on Rules, the gentleman from Illinois [Mr. ALLEN], has partially explained the justifications for the passage of this bill. Therefore I shall only touch on the high points of the research and construction which has thus far been accomplished. Already two mines are in operation near Rifle, Colo. One of the mines is for selective operation, that is, the mining of any richness to produce between 5 and 80 gallons per ton. The second mine, essentially an underground quarry, with a capacity of 1,500 tons a day, will permit accurate determination. The Rifle area already indicates the possibility of recoverable oil totaling 200,000,000,000 barrels in Colorado alone.

A demonstration plant is being constructed in Louisiana, Mo., to produce about 200 to 400 barrels of gasoline a day by the hydrogenation of coal, and should be in operation by fall of this year.

It is believed that the lignite coals in the United States are estimated to have a conversion value of liquid fuels of 500,000,000,000 barrels, nearly 25 times the proved petroleum reserves in the United States. Also large laboratory facilities for the development and improvement of the synthetic liquid fuel processes have been established at Pittsburgh, Pa.; Morgantown, W. Va.; and Laramie, Wyo., and it is also proposed in the near future to penetrate the Illinois fields as well as other fields.

The Bureau of Mines is ready to contract for the construction of a Fischer-Tropsch demonstration plant which will reduce the costs and increase the production of fuel far in excess of the plants that supplied Germany with its fuel during the war.

In view of these tremendous deposits, which outstanding engineers maintain will provide fuel in the United States for a thousand years, I feel that we should not be so greatly worried about the future of our oil supplies. I hope with the continued research to develop the utilization of other products from which to acquire oils, our supplies will be greatly increased and will serve to stop the oil companies from gouging the American people as they have done of late in increasing the cost of liquid fuel by 30 percent, which has cost the American people additional millions of dollars.

LIQUID AND SOLID FUELS AVAILABLE IN THE UNITED STATES FOR 1,000 YEARS

Mr. Speaker, I observed an article appearing in yesterday's Washington Post by Mr. Ben Funk, a recognized authority, who has given a great deal of study to the production of liquid fuels from shale, coal, and other substances, and who quotes Government statistics in estimating that our coal deposits can supply us with solid and liquid fuels for at least 1,000 years. I am sure it will be enlightening to the membership and I insert it in my remarks for their information. It is as follows:

SIXTY-EIGHT-YEAR SUPPLY OF SHALE OIL STEEPS ROCKIES

(By Ben Funk)

RIFLE, COLO., February 7.—America's concern over petroleum resources is teaming with postwar inflation to bring shale oil into the commercial picture for the first time.

Oil shale abounds in the mountainous West. The problem has been to get out the oil and make it pay in competition with much cheaper higher grade petroleum. Extraction methods were costly.

Now research in the Bureau of Mines demonstration plant on a mountainside 7 miles west of here indicates that the shale oil can be produced for $2 to $2.50 a barrel. That places it for the first time right alongside petroleum, which has had a 50-percent price hike since the war.

At nearby Grand Junction, a 35-year-old chemist, H. D. Brown, has obtained a patent on an oil-shale-production process that he claims will yield high-gravity crude for less than $2 a barrel.

But don't expect shale oil to jump right out and compete in a free market with big-brother petroleum. It remains inferior to petroleum in just about every respect.

PLENTY OF IT

The future of shale oil depends upon several imponderables. For example, the discovery of another East Texas oil field or a number of smaller fields would remove the need of an immediate petroleum substitute.

On the other hand, a war would bring it into immediate large-scale production. When it comes to quantity the petroleum industry can't hold a candle to the mountains of shale oil ready to be tapped in the West.

The Green River oil-shale formation of Colorado, Utah, and Wyoming alone is estimated by Government engineers to contain 78,000,000,000 barrels of oil. That is four times more than the petroleum industry has produced since Ed Drake drilled the first well at Titusville, Pa., back in 1859.

Shale oil produced so far at the Rifle plant is low-grade stuff with a 21 gravity rating. This compares with 35 gravity in western Colorado's Rangely field and 39 gravity in the Oklahoma City field. However, it yields about the same byproducts as petroleum—and a few more.

Production of shale oil began in Scotland a hundred years ago. Its development in foreign countries was speeded during World War II, when it helped to fuel the armies and navies of Germany and Japan.

There are mountains of rich oil shale in the West, but for many years oil-wealthy America turned up its nose at them. Mechanized war woke the United States to the realization that its petroleum resources were not unlimited. Experts warned that a new source of fuel would be essential in another emergency.

So Bureau of Mines specialists appropriated all that the Germans and Japanese had learned of shale-oil production and began to go on from there.

Congress appropriated $5,000,000 to develop the know-how to get oil from shale and coal in big quantities. The Government estimates that our coal deposits can supply us with solid and liquid fuels for at least a thousand years. It figures shale will yield enough oil to maintain the present rate of petroleum production at least 68 years.

After surveying a score of possible sites, the Bureau of Mines chose Anvil Point, a cliff 8,200 feet high, for its shale mine. In the Colorado River Valley, 9,500 feet away and 3,000 feet below, a plant-scale refinery is under construction.

The richest shale usually is found near the top of high escarpments. It crops out in long lines of bold cliffs.

The Government isn't aiming at commercial oil production at the Rifle plant. Instead, engineers will experiment to find the best and cheapest ways to produce the oil. Their findings will be passed on to private industry.

The Bureau of Mines expects to develop the blueprints for a successful industry that could be launched into immediate big-scale production whenever necessary.

E. D. Gardner, Chief of the Bureau of Mines Oil Shale Division, says the Government isn't in competition with private researchers like Brown.

"If his process will do what he claims," Gardner said, "we will be happy to help him develop it."

FIFTEEN GALLONS A TON

Core drilling at the Government mine indicates the oil-shale beds are 500 feet thick and contain an average of 15 gallons of oil to the ton. That's about 300,000,000 barrels of oil to the square mile.

The Rifle installation, while only a demonstration unit, is one of the biggest industries in Colorado. It is divided into two sections—mining and processing. Goal of the mining section is to get out the shale for 50 cents a ton.

Standard ore reduction methods are used to crush the shale into chunks about 4 inches in diameter. Forty tons of shale are placed in a retort and ignited. As the fire burns downward the vapors are drawn off and condensed. Rich shale has a coking tendency and the retorts are hinged at the bottom to drop the entire load of spent shale after cooking.

When the refinery is completed in about 6 months, engineers will be able to demonstrate every step of production from mining to oil refining.

Mr. Speaker, I have briefly given the availability of tremendous deposits of coal, shale, and other substances, and explained some features of the bill. I know that they can be explained more fully by the gentleman from California, the chairman of the Committee on Public Lands [Mr. WELCH], by the gentleman from South Dakota [Mr. CASE], and other members of the committee, and will not take up the time of the House in discussing other provisions of the bill upon which they also can give complete and detailed information. However, I ask permission for the insertion of two articles and an editorial bearing on the subject matter of my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

WHO IS INTERESTED IN ARABIAN OIL?

Mr. SABATH. Mr. Speaker, it has been frequently published that certain gentlemen in the Department of State in this country are greatly interested in protecting American and British oil companies in the oil rights that they have acquired from Iran and other countries in that part of the world. It appears to me that many of these gentlemen seem to be more interested in these oil companies than in the future interest of America.

Only a few days ago I read that Secretary of Defense Forrestal and some other gentlemen formerly connected with certain large interests are endeavoring to prevail upon the President to reverse his position on Palestine. It is my understanding that they have acted on the assumption that the existing situation there and conflicts of governments may affect these oil companies in retaining

the rights they obtained from the Iran Government.

It is difficult for me to believe that these reports and statements are true and I hope, if true, that the President will not permit himself to be swayed by those who have a greater interest in oil—that we will never need—than in the lives and blood of thousands of people in Palestine.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. McCORMACK. The Palestine question is the first real test of whether or not the United Nations will be a success. The United Nations, through the General Assembly, has taken action, as the result of a two-thirds vote, in the creation of a free and independent Jewish commonwealth in Palestine. It seems to me it is absolutely necessary that that question be settled satisfactorily, and that the threat of the Arabs not be permitted to influence responsible officials and responsible nations who are seeking future peace, in seeing that the necessary force—and by force I mean power—is used, implementing the action of the General Assembly of the United Nations to carry out the action taken as the result of a two-thirds vote.

Mr. SABATH. I thank the gentleman from Massachusetts who, I know, even before becoming such a valuable Member in the Congress urged and worked in the interest of bringing about freedom and independence to the people of Ireland; and who is now so greatly interested and helpful in the cause of Palestine. I recollect, whilst he was the chairman of the important resolutions committee at the Democratic National Convention in 1944, that it was through his able ability that the party unanimously adopted a plank in the platform, going on record for an independent Jewish commonwealth. Not only the Democrats, but also the Republicans, have gone on record in their platform to aid the Jewish people. The Congress has twice approved aid in order that the Jewish people could obtain an independent Jewish commonwealth.

Consequently, I think it is outrageous on the part of anyone, who holds an important position in the Government and who has the ear of the President from time to time, to seek to change his views, especially in view of the fact that the President and our country more than any other has brought about the favorable action on the part of the United Nations in providing an independent state for the Jewish people.

I have confidence that the President will not be led astray into taking a backward step notwithstanding the efforts and influences exercised on the part of some of these gentlemen and of British diplomacy.

Mr. Speaker, under the leave granted me, I insert an article and an editorial dealing on this subject. They give much light on the issues involved and I commend them to the reading by the membership and the American people in the hope that they will urge the cessation of the injustices that are being imposed upon the Jewish people in Palestine. The editorial appeared in January 28 issue of the New York Herald Tribune and the article by I. F. Stone, entitled "The Big Swap—Jewish Blood for Arabian Oil" appeared in PM on January 28, as follows:

[From the New York Herald Tribune of January 20, 1948]

ARMS FOR PALESTINE

It is "indefensible," as the newly formed Committee to Arm the Jewish State declares, for the United States to put its whole influence behind the creation of a Jewish state in Palestine and then impose an embargo on the export of the arms which are more and more plainly indispensable to such a state's survival. The notion that there is something immoral about providing arms in a situation which one has deliberately created with the full knowledge that arms would be necessary is redolent of that mawkishness which seems too often to confuse every international issue. The first and simplest answer to the sudden question of arms for Palestine is to lift the embargo at once. The least which the United States can offer to the Jewish Agency and to Haganah is free access to the available supplies or weapons for self-defense.

This is the first and obvious answer. It is not the full answer. The questions of security and of enforcement were obviously central to the United Nations' decision for a partition of Palestine; yet these were precisely the questions which were shirked by all the great powers. They cannot be shirked much longer. The legal foundations for the partition of Palestine have been left on swampy ground. Legally, partition has been recommended by the General Assembly as a measure for meeting a situation, in the language of the Charter, "likely to impair the general welfare of friendly relations among nations." The Arab states are fomenting a warlike rebellion against this recommendation. They can truthfully assert that the Assembly has no binding power; on the other hand, they are themselves bound by the general obligation on all UN members to settle international disputes only by peaceful means and to refrain from the threat or use of force in any manner inconsistent with the purposes of the United Nations.

Administration of partition, in the transition period, was vested by the Assembly in its Palestine Commission. But the Assembly, aware of the uncertainty of the authority thus conferred, specifically requested that if a threat of peace arose during the transition period, the Security Council should act under its general power to deal with such threats. The threat has not only arisen; it is imminent. There is no reason why the United States should deny arms to the Jewish community in Palestine. But there is at the same time every reason why the United States should raise the basic question of enforcement in the Security Council, at once and emphatically, and demand a clear decision on the underlying responsibilites. Without it, this country will have to give Jewish Palestine access to arms, since this country was so largely instrumental in offering Jewish Palestine a freedom which everyone knew would be dangerous. But since it is the UN Assembly, under the egis of the Security Council, which has decreed and is immediately responsible for partition, the United States both may and must ask a decision on enforcement from the Council.

[From the New York PM of January 28, 1948]

THE BIG SWAP: JEWISH BLOOD FOR ARABIAN OIL

(By I. F. Stone)

WASHINGTON.—The State and War Departments have made alarming headway in their campaign to win the President over to a Pontius Pilate policy on Palestine.

Both Departments are largely in sympathy with British plans to aid the Arabs against the Jewish community in the Holy Land, and want the White House to wash its hands of the whole affair and look the other way when the real shooting begins.

Latest manifestation of these official attitudes is the case of the American ship *Exford*, which was refused permission to unload in Tel Aviv yesterday on a cabled tip from the American Government to the British.

This indicates the extent of American cooperation in the British naval blockade, which is shutting off supplies to the Jewish community in Palestine while British arms are shipped to neighboring Arab countries in preparation for large-scale war this spring.

The movement here to extend bipartisanship in foreign policy to Palestine, as reported in yesterday's New York Times, represents an effort to win the Republicans over to a conspiracy of silence while a new war of extermination, this time against Palestinian Jewry, is being waged. This might be termed the bipartisan policy of the pogrom.

Both State and War Departments have been engaged in a behind-the-scenes whispering campaign designed to smear Jewish refugees and the Palestinian Jewish community and to spread the view that American needs for oil unfortunately require betrayal of United States obligations to the UN.

This boils down to a cynical policy of swapping Jewish blood for Arab oil, a curious policy for a Government which is engaged in exposing the U. S. S. R. for a similar cynicism about Poland in the recently published Nazi-Soviet documents.

In inner circles the oil argument is not taken seriously. The New York Times reported yesterday there is apparently little evidence to support the theory that the Arab states are so disturbed about partition that they will cancel the American oil concessions.

The real British strategy in the Middle East has been clear since the little Munich of March 1939, when the White Paper policy was launched to build an Arab bloc by appeasement at the expense of the Jewish community in Palestine.

British difficulties in Egypt over the Sudan and in Iraq, where anti-British demonstrations forced the government to disavow its new treaty with England and then to resign, emphasize the British need to divert Arab antagonism.

British tactics are reflected in an editorial published on January 10 by the bitterly anti-Zionist Economist of London. The Economist said that Britain and Egypt, "like the brothers in some Victorian novel, often indulge in a certain amount of cutting in the club" but invariably "close their ranks whenever their common interests are immediately threatened."

The Economist went on to say that the state of affairs in Palestine may bring about an Anglo-Saxon rapprochement in 1948, the common interest in this case being to prevent Palestine from becoming another battleground between American money and Russian ideas.

Just how the British are demonstrating this common interest was disclosed by Maj. Lyall Wilkes, a Labor member of Parliament and a veteran of the Middle Eastern campaign in the last war, in a letter published January 10 in the London New Statesman and Nation.

Major Wilkes said that Britain had supplied 40 military planes to Egypt from the end of the war until last July, that a British military mission was training the Iraq army, and that the British taxpayer subscribes £2,000,000 a year to the upkeep of the Trans-Jordan Arab Legion.

"A blatant contradiction in our Palestine policy," Major Wilkes protested, "has been that, although the threat of Arab violence has been given as the reason why labor could not fulfill its traditional policy, yet it has been the British Government itself which

since 1945 has created and equipped the Arab forces in the Middle East and tipped the balance increasingly in their favor."

Bevin in his foreign policy address to the Commons last Thursday asked for enforcement of the UN border decision in the Greek dispute but indicated no change in the determination of his government to wreck the UN decision on Palestine.

Unless there is a reaction from friends of the UN and of Palestine in this country, the United States of America will become a silent partner in a program designed to destroy Jewish Palestine.

The SPEAKER pro tempore. The gentleman from Illinois has used 9 minutes.

Mr. ALLEN of Illinois. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. JENKINS] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. JENKINS of Ohio. Mr. Speaker, there is no question that synthetic liquid fuels can be made from coal and from oil shale. There is an abundance of these materials in the district which I have the honor to represent.

I was very active in the preparation and passage of the law under which $30,000,000 is now being used in experiments with reference to the manufacture of synthetic liquid fuels. I think the Bureau of Mines has done a fine job in connection with these experiments, and the result of their efforts has been very successful.

I am strongly in favor of the bill under consideration and I hope it passes unanimously.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may require to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Speaker, in any consideration of the long-range petroleum outlook for the United States, the question of synthetic liquid fuel production becomes of paramount importance. The Committee on Interstate and Foreign Commerce recently embarked on a continuation of a study of the petroleum situation which was begun by this committee during the Seventy-third Congress in 1934. At that time, the House approved House Resolution 441 and in accordance with this resolution, an oil investigating subcommittee, under the chairmanship of Congressman William P. Cole, of Maryland, was created by the Interstate and Foreign Commerce Committee.

The importance of synthetic fuel production looms so large because of the recognition of two prime facts, first, that the discovery of new oil fields within the borders of the United States lags behind the rate of increase of demand for petroleum products; and, second, in case of an emergency the risk of foreign supplies being cut off is too great to place extensive reliance on the continuation of such supplies in times of war.

The fact that our domestic known reserves might be insufficient to supply our requirements was recognized by the Interstate and Foreign Commerce Committee as early as 1935. On January 3, 1935, at the opening of the Seventy-fourth Congress, the Interstate and Foreign Commerce Committee submitted a report. It is interesting to quote from this report, which was filed more than 13 years ago:

Based upon conservative estimates of known reserves, an excessive supply of petroleum to meet future demands does not exist. Numerous estimates of the petroleum resources of the United States have been made during the past quarter century. Should future daily demand continue approximately in the amount required today, and no additional discoveries of new fields be made, the present known reserves would last—according to most estimates—approximately 15 years.

Oil shale, coal, and other substitutes provide, at increased cost, vast quantities of petroleum products.

We do not feel justified, however, even in view of the admitted possibility of improved methods of recovery being employed, and of additional discoveries of new pools, and of the use of substitutes and of possible improved mechanical devices, in arriving at the conclusion that the petroleum reserves available in the country today to meet future demand are excessive, but, on the contrary, we feel that they are of a very limited nature.

The foresight exercised by the gentleman from Maryland, Mr. Cole, and his subcommittee is all the more amazing if it is remembered that those were the days when Congress had under consideration the "hot oil" legislation whose purpose it was to curtail the excessive production of crude in the several States and to put a floor under crude-oil prices which had reached a new low because of greatly increased production.

This point of view, that crude might become scarce, was reiterated in a report on May 14, 1937, of the Committee No. 817, Seventy-fifth Congress, reporting favorably on extension until June 30, 1939, of the "hot oil" legislation and it was emphasized that under these circumstances the matter was one of national concern.

In reporting favorably House Joint Resolution 456, during the Seventy-fifth Congress in July 1937, first session, extending for two more years the consent of Congress to the Interstate Oil Compact, the committee stated again:

Oil is not unlimited, as many do not realize, and the time when substitutes or greater improvements of recovery or refining process will be of major importance is not so far distant.

In 1942 the gentleman from California [Mr. LEA] who had succeeded the gentleman from Maryland, Mr. Cole, filed a report entitled "Petroleum Products for National Defense." In this report, under the heading "Problems for the future," the committee made the following prophetic statement:

Looking at the petroleum problem from the long-time viewpoint, we appear to be approaching a time of greater scarcity, higher prices, and eventually, the use of substitute materials.

Again in 1943, in a report entitled "Petroleum Supplies for Military and Civilian Needs," the committee stated the same theme:

As measured by the life of a nation, our domestic supply of oil is brief. Beyond that, America must eventually share in the supplies of other lands. And then beyond that perhaps we must resort to substitute fuels such as can be gained from oil shales, coal, and alcohol.

In a further report, dated January 2, 1945, the committee stated the following:

We know we can look with some reliance on the availability of oil imports. Beyond that we may look to synthetic petroleum products from oil shales and coal, and to substitute fuels such as alcohol derived from vegetable products. Our knowledge of these sources can be much improved by scientific research and practical experiments for the improvement of quantity and quality production and at reduced costs.

Congress has taken the first important step to accomplish these purposes by enactment of the Synthetic Liquid Fuels Act, Public Law No. 290, approved April 5, 1944. We, as a Nation, cannot afford to be indifferent to the importance of this problem.

The report continues:

The committee heartily commends the action of Congress in enacting the Synthetic Fuels Act and recommends that every practicable research and experimentation be prosecuted under the provisions of that act with a view of assuring the country the continuation of the benefits we now enjoy from oil.

In its final report, submitted by the gentleman from California [Mr. LEA] to Congress on December 30, 1946, the committee uttered the following warning:

Oil demands are running much higher than was generally anticipated for the immediate postwar period. * * * In appraising the availability of synthetic fuels, full consideration must be given to the magnitude of capital investment and manpower which would be required to meet our oil needs, or any substantial part of them, from synthetic sources. The Nation cannot rely upon an undeveloped synthetic industry to meet emergency needs, and it should encourage this research to the fullest extent. The kind of oil reserves we need for security are those which can be promptly supplied with the least practical need for more critical materials, more capital, and more manpower, when these will be scarce and urgently needed for other purposes.

Then again the committee urged that—

Research in the synthetic production of alternative fuels for various purposes from natural gas, coal, and oil shale, and any other promising source should be continued with the active cooperation of industry. The research might well be directed at servicing specific needs such as jet-propulsion fuels, Diesel oils for submarines, and heating oil for homes.

During the Eightieth Congress, the Interstate and Foreign Commerce Committee in compliance with the Legislative Reorganization Act of 1946 continued its studies of petroleum problems. In two recent reports, which I filed with the House on January 26 and February 4, the committee has pointed to the seriousness of the long-range outlook for petroleum in the United States. In its January report, the committee urged the immediate authorization of additional funds and continuing authority to the Department of the Interior for accelerating the program of development of oil from coal and shale. The Committee is, therefore, gratified that the House is given the opportunity today to act favorably on H. R. 2161 which carries out

the recommendations of the Interstate and Foreign Commerce Committee. This bill is an urgent step in the right direction. Whether it is a sufficient step requires further study on the part of all those who are concerned with the plentiful supply of petroleum for the United States both in times of peace and war.

Mr. SABATH. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to proceed out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, the purpose I had in mind in my 1-minute speech was to try to bring about a constructive result. In view of the observations made by my valued friend the gentleman from South Dakota [Mr. CASE], I wish to make reference to the evidence which supported the observations I made that the Veterans' Administration was fearful of asking for a deficiency appropriation. I have before me a copy of the hearings held before a subcommittee of the Committee on Veterans' Affairs on December 9 and 10, 1947, with regard to conditions in the office of the Veterans' Administration at Boston, Mass. I happened to be present at those meetings and participated therein. I ask you to look at page 60 of the hearings. There I called attention to the fact that there was a cut of $38,959,220 made by the Appropriations Committee, of which about $27,075,000 was in salaries and personnel, and that as a result of that reduction in appropriations 10,000 employees had to be let go throughout the country at that time. In the course of the hearings I asked these questions:

Mr. McCORMACK. You had to cut down 10,000 positions, and you had to allocate that cut throughout the country?

Mr. CLARK—

He was Acting Administrator at the time—

Yes, sir. And that had to be on the average of $2,707.50 per annum.

Mr. McCORMACK. So, might I ask you, the solution of this was to consider conditions throughout the country in allocating this deficiency appropriation?

Mr. CLARK. I am afraid you are right, Congressman.

Mr. McCORMACK. Is there any hesitancy on the part of the Veterans' Administration in asking for deficiency appropriations?

Mr. CLARK. Well, there is this hesitancy: When the Administrator of Veterans' Affairs had his hearing before the Appropriations Committee he was told that he could not come back to that committee for a deficiency on this particular item.

Mr. McCORMACK. I had heard that, but I never definitely established the fact.

Mr. CLARK. I think that is true; is it not, Mr. Moore?

Mr. Moore is the budget officer of the Veterans' Administration. Mr. Moore said:

That is correct, sir. He was not only told that, but the language of the act was brought to our attention; that is, the language of the deficiency act.

Mr. McCORMACK. In other words, if you didn't allocate it adequately over the 12 months, you might not have enough?

Mr. MOORE. Yes, sir.

Then later in the hearings an attempt was made by some of my friends to show what the cut was in the Bureau of the Budget after it went over from the Veterans' Administration and before it came up to Congress in the President's message.

I asked the following questions:

Mr. McCORMACK. When was the first time that you know of that any Appropriations Committee directed you or stated to you that you could not come back with a deficiency appropriation?

Mr. CLARK. I don't know that we have ever been told that prior to the last appearance, although we may have been. Do you recollect, Mr. Moore?

Mr. MOORE. Last year was the first year.

The CHAIRMAN. Was that one man, or was it the committee?

Mr. CLARK. I was not there at the time.

Mr. McCORMACK. In bygone years you were not prohibited by the President or the Director of the Budget from asking for deficiency appropriations?

Mr. CLARK. I have been present before the Appropriations Committee with former Administrators when the committee would say: "Well, now, Mr. Administrator, if you find that you cannot get along with this appropriation we want you to come back and tell us what your situation is, so that we can consider your request for additional funds."

Mr. McCORMACK. They would say: "We want to cut it now. But do the best you can, and if you can't get through with this, come back and we will consider a deficiency." Isn't that true?

Mr. CLARK. I think so.

Mr. Speaker, that is the evidence upon which I based my observations. They are fearful of bringing in a deficiency or supplemental appropriation. Now, they are not going to draw a distinction between a deficiency and supplemental appropriation.

I hope that the members of the Appropriations Committee will look into this situation because it is very acute. I do not care whether it is a supplemental appropriation or a deficiency appropriation, if the circumstances warrant I hope that immediate action will be taken to clear up the matter. I recognize that there is a distinction between deficiency and supplemental appropriation bills, however, very few outside of Congress are aware of that. So far as the Veterans' Administration is concerned it has felt that it has received directions not to come up for any additional funds so far as increase in personnel is concerned.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from South Dakota [Mr. CASE].

Mr. CASE of South Dakota. Mr. Speaker, the important business of the day is consideration of a synthetic fuels bill, but in view of the remarks of the gentleman from Massachusetts perhaps a word or two should be said on that subject and I therefore ask unanimous consent to proceed out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. CASE of South Dakota. Mr. Speaker, the testimony to which the gentleman from Massachusetts referred by the words he read stated that the attention of the representatives of the Veterans' Administration had been called to the antideficiency statute. The antideficiency statute provides that when appropriations are made for an activity the funds shall be so distributed and allocated by the agency that it will not incur deficiencies during the year. If the Veterans' Administration was told that it should not incur a deficiency it was done by the words the gentleman has read through calling attention to provisions of the antideficiency statute. But it certainly is also true that many agencies do foresee that the funds they have will not permit them to carry on an authorized program as it develops during the year and when that happens they go to the Bureau of the Budget and ask for a deficiency or supplemental estimate. If the Bureau of the Budget approves that estimate it then comes down here to the Appropriations Committee. Speaking generally, we call them deficiency appropriations if the funds are made available for obligation in the current year and supplemental if made to supplement appropriations made for a succeeding year.

In my experience as a member of the Appropriations Committee and as a member of the Deficiency Committee, I have never seen the time when a request for supplemental money by the Veterans' Administration was not given careful and sympathetic consideration. At the same time it is the duty of the committee to examine requests of the Veterans' Administration for funds just as it does requests from other agencies. No greater disservice could be done the veteran than for us to create a situation in which someone again would ride into high office by promising a 25-percent cut in all expenditures, including veterans' allowances. The veterans have not forgotten the so-called Economy Act of 1933.

Mr. MICHENER. Mr. Speaker, will the gentleman yield?

Mr. CASE of South Dakota. I yield to the gentleman from Michigan.

Mr. MICHENER. I want to congratulate the Appropriations Committee if it has given the several departments to understand that when they bring in their budgets they are presumed to present everything within their knowledge required to carry them through the fiscal year. After listening very carefully to what was read from the hearings by the gentleman from Massachusetts I think this is what it all boils down to. In my opinion, the general feeling of the House is, that when a department or bureau presents its annual budget it should include every possible thing within its contemplation at the time of presentation.

Now, the habit has grown down through the years, of bringing in a smaller budget than was warranted when, at the same time, it is intended

at the time the budget is presented to come in and ask for a deficiency appropriation later on. I congratulate the committee on its efforts to determine on a budget which is fixed. Too much money in the past was spent by authority of deficiency appropriations.

Mr. CASE of South Dakota. Mr. Speaker, the gentleman from Michigan has stated the situation correctly. The Deficiency Committee would be derelict in its duty if it permitted agencies to incur deficiencies in violation of the statute without calling their attention to the statute. At the same time the RECORD should also show that when we considered supplemental estimates from the Veterans' Administration last summer, some of the original estimates were revised, both up and down. In some instances the Veterans' Administration found that it did not need as much money for the paying of certain benefits under the GI bill as it anticipated. On the other hand, it was found that the number of veterans attending school was larger than had been anticipated, so authority was given for transferring some of those funds. The most recent recommendation before the Congress was in the President's budget message, in which he suggested that the trend of Veterans' Administration expenditures now could well be downward. The President's budget message carried a table with these figures for veterans' services and benefits:

Actual for 1947	$7,370,000,000
Estimate, 1948 expenditures	6,632,000,000
Estimate, 1949 expenditures	6,102,000,000
Appropriations asked for 1949	5,154,000,000

But, if there be additional need for funds, I am sure if a supplemental estimate is submitted by the Bureau of the Budget the committee will receive it and give it careful and thoughtful consideration in the light of what the actual needs are shown to be.

Mr. SABATH. Mr. Speaker, I yield 10 minutes to the gentleman from Georgia [Mr. PACE].

Mr. PACE. Mr. Speaker, I ask unanimous consent to proceed out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. PACE. Mr. Speaker, it seems the hour is drawing near when the people of the South must counsel among themselves upon a future course of action.

We have all seen it coming, but we have been hesitant to act because there remained the hope that party ties and established practices would restrain our leaders to stay within the bounds of reason and be guided by the ordinary impulses of appreciation and understanding. But it is apparent now that our leaders are more concerned about their own political preferment than with the welfare and loyalty of the people of the South.

Such inconsiderate conduct on their part can be understood. They confidently believe they have and will continue to keep the vote in the South. They have become so brazen as to think they can cast any insult, violate any tradition or trample any principle of our people with complete impunity. It may be that our patience in the past is partly responsible for this growing disdain of our feelings.

It was not so long ago when the South was all that remained of the Democratic Party. With only hope, and often without it, most of us fought on for Cox in 1924, for Smith in 1928, and kept alive the party of Jefferson and Jackson. We thought then that our cherished traditions and the right of the people in each State to conduct its own affairs would be guarded and protected by the leaders of our own party.

That our confidence was misplaced can no longer be questioned. Our leader has urged the Congress to enact legislation which is directly contrary to the welfare and best interest of the South, including laws to regulate the qualification of voters, to prohibit segregation in all public places and conveyances, to set up an FEPC to bring on intolerance and disorder, to create a gestapo in the South under the name of antilynching and antidiscrimination, and has asked the Supreme Court to declare illegal and unenforceable the provision in deeds which restrict the ownership of neighborhood homes to certain races or groups.

I join with other decent people in condemning lynching and all other forms of lawlessness. But it does seem to me the people of the South should be commended, rather than condemned, for the progress and efforts they have made in blotting out this evil. There was only one lynching in the entire Nation last year. Just one, mind you, and those who participated were promptly brought to trial. Can any sensible person claim that this one act makes this a question of great national importance, or will every fair-minded person conclude that the proposal shows an utter lack of appreciation for the earnest and constant efforts we have made to wipe out lynching and is no more than a bid for votes from one group. The records of the Department of Justice show there has been an increase in every form of crime except lynching.

When one condemns the act of lynching it does seem he should say at least one word in condemnation of the crime which has most often brought on lynching, that is, an assault on some innocent woman. There is and can be no crime as dastardly as the violation of the purity and privacy of an innocent woman. There can be no punishment severe enough for one guilty of such an act. Everyone knows that when Federal protection is thrown around these fiends it will encourage them in their conduct.

I greatly regret some seem to think that the only protection needed is for the person guilty of such conduct and refuse to lift their voice to ask better protection for the innocent ones who suffer the most. In his message to Congress the President says we must not let one person walk in fear of lynching—I wish so much he had indicated at least the same interest in bringing about conditions whereby the women of the Nation can walk without fear of attack and assault.

The Republican Party offers us no hope or encouragement on these issues. They, too, are out to get votes and, with few exceptions, they are ready and willing to trample under foot the rights of the States and the principles so long and dearly cherished by the people of the South. Already they are preparing to bring before Congress several of the measures recommended by the President. To fully realize our situation it must be understood that President Truman set out to outdo Henry Wallace, and now the Republicans, in control of both Houses of Congress, are preparing to press these measures for passage. We will get no help from them, either now or hereafter.

We must, if possible, first try to prevent being driven out of our own party or keep it from adopting new policies and principles which disregard our interests and welfare. Our success in these efforts will determine in good measure our future course of action.

There is another feature of the President's message which concerns me very much. He speaks only of rights and freedom; the right to equal justice, the right to jobs, the right to homes, the right to education, the right to have a voice in Government; freedom of thought, freedom of expression, freedom of worship, freedom from want, freedom from fear, freedom of opportunity, and on and on.

But not one single word about the duties, obligations and responsibilities of citizenship. Not one word of what men should do, of what men must do to earn these rights and to preserve these freedoms.

With every right there is a duty, with every freedom there is a corresponding obligation, and it seems to me the time has come when the President and others in high places should get back to these fundamentals. The performance of our duties and the fulfillment of our obligations come first. We should first earn our privileges before we enjoy them.

For years now the people have been told of nothing but their rights, they have been advised constantly of the freedoms to which they are entitled, and today there are millions of people in this country who have no understanding of their responsibilities of citizenship and have no desire or intention of assuming them.

We all cherish our rights and they must be protected. We all treasure our freedom and it must be vigilantly guarded. But these rights will not survive, nor will this freedom long continue, unless those who enjoy them daily perform the tasks required for their protection and preservation. They are not self-perpetuating. They can be kept and rightly belong only to those who have the courage, the industry and the determination to guard and defend them.

Those who claim the right to equal justice must first be just. Those who demand the right to a job must be ready to do an honest day's work. Those who demand a home must be willing to labor and pay for it. Those who would have a voice in Government should contribute

to its support and respect its laws. Those who would be free of want and fear must be ready to help the needy and refrain from any conduct which would bring fear or danger to others. And those who would enjoy freedom of opportunity must undergo, if necessary, the same hardships, dangers, and trials as did the brave men who established here the greatest land of opportunity known to man.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

Mr. WELCH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190).

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2161, with Mr. SCRIVNER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California [Mr. WELCH] is recognized for 1 hour, and the gentleman from Arizona [Mr. MURDOCK] will be recognized for 1 hour.

Mr. WELCH. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, the purpose of H. R. 2161 is to extend the life of the Synthetic Fuels Act of April 5, 1944, from 5 to 8 years and to authorize an increase in the appropriation for carrying on this research work in the development of synthetic liquid fuels from $30,000,000 to $60,000,000.

It is a further step to bring synthetic oil and gasoline production to a degree that will meet the future petroleum consumption of this country, which has now reached over 2,000,000,000 barrels a year.

The Department of the Interior and the American Petroleum Institute estimate our known oil reserves at approximately 20,000,000,000 barrels. With petroleum consumption increasing at an alarming rate it is imperative that Congress take every step possible to develop the synthetic-oil industry to meet these demands.

Synthetic oil and gasoline produced from coal, shales, or natural gas has long since passed the experimental stage. Germany proved this fact by the use of synthetic oil during World War II. Ten years or less will exhaust our known petroleum reserves.

Secretary of Defense Forrestal has warned that the United States is so short of oil that if war came tomorrow we would need 2,000,000 barrels a day more than the Nation can produce.

Plants for the production of shale oil have been placed in operation near Rifle, Colo.; Louisiana, Mo.; Pittsburgh, Pa.; Morgantown, W. Va.; Laramie, Wyo.; and laboratories have been established in many other places. The Bureau of Mines is ready to proceed with construction of a Fischer-Tropsch demonstration plant, which will be made possible under this legislation. The deposits of coal and shale in the United States are estimated as being sufficient to produce enough oil to supply the United States for over 2,000 years at the present rate of consumption. Oil-shale deposits in Colorado alone are estimated as capable of producing 200,000,000,000 barrels of oil.

It has been estimated that it will require upward of $9,000,000,000 to produce sufficient liquid fuel to supplement or replace the demands for natural oil and gas. If private capital can do the job, very well and good; if not, the inescapable responsibility rests with Congress.

Ten years is a very short time in the history of a great Nation. Our national security as well as our peacetime economy demand that we prepare for the inevitable and act before it is too late.

Mr. MURDOCK. Mr. Chairman, I yield myself 10 minutes.

The CHAIRMAN The gentleman from Arizona is recognized for 10 minutes.

Mr. MURDOCK. Mr. Chairman, first I wish to congratulate my colleagues for bringing this bill before the House today. I, of course, congratulate the author of the bill, but I want especially to congratulate the chairman of the Committee on Public Lands for bringing the measure before us. The chairman of this committee, in season and out of season, calls the attention of his committee and others in Congress when opportunity affords, to the fact that we are apparently running short on oil in this country and that it is a mistaken policy for us any place in the Nation to draw needlessly upon our petroleum reserves when we can obtain the needed product in some other way; and that is one thing with regard to this bill on which I wish to congratulate the chairman of the committee.

Needless to say, I favor the bill. It is a simple bill. It continues former legislation. I was a member of the Public Lands Committee at the time the original bill was passed. I recall distinctly the arguments both in the committee and the House for its passage in 1944. Then as now there was a great increase of petroleum products used.

It had become apparent that we were, during the war, reaching a dangerous limit on petroleum reserves with an increasing consumption of gasoline and fuel oil and that we should start the wise public policy of seeing if we could not find other sources and synthetic fuels. We were told that foreign nations were producing synthetic gasoline from lignite, all kinds of coal, and even from shale.

It was understood then, of course, as now that private enterprise producing gasoline and such products recognized the increasing demand but were not in a position to carry on the experimentation necessary to devise these new means of production, that it was the logical function of government operating through the Bureau of Mines to create experimental plants, pilot plants, not with the idea of producing commercial gasoline or oil but merely to find the know-how and to contribute that know-how to American industry to be ready for the day when we should have to tap those vaster reservoirs. We were told we have unlimited supplies of coal and, as the chairman has just pointed out, unmeasured and almost limitless shales from which oil may be extracted when our engineers learn how to do it. Therefore the original bill was passed and much has been done to date under it. Formulas from abroad, some of them captured property held by the Alien Property Custodian as a result of the recent war, have been tried out and improved upon. Some equipment and machinery produced abroad have been brought to this country. We find we can improve it with our engineers and actually produce more efficiently than the same equipment produced abroad.

The bill before us today is to continue that work, which is even now in its infancy. The original act provided for an authorization of $30,000,000 and a period of 5 years. This bill extends the time of the authorization three additional years, making 8 years instead of five, and increases the authorization from $30,000,000 to $60,000,000.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from California.

Mr. JOHNSON of California. I want to compliment the gentleman on the interesting argument he is making. It is also refreshing to see that this is not a party issue. It is a matter of what is the right thing to do to solve a complicated problem. It so happens that I am a member of a subcommittee of the Armed Services Committee that has been giving consideration to the oil problem. I want to point out, and this probably has been done heretofore, that in 1947 the average consumption of oil per capita in the United States was 608 gallons as against 367 10 years previously and also that the fuel in the country that is being used most is petroleum fuel. It seems to me the only possibility we have to maintain the production required for the increase in use that is evidenced in petroleum fuel, both for domestic purposes and for national defense purposes, is to find some way to make synthetic oil. I am, therefore, heartily in favor of this bill and hope it will pass.

Mr. MURDOCK. I thank the gentleman.

The Public Lands Committee of the House had before it the Secretary of the Interior, who told us that the consumption of gasoline and oil today is very much higher than before the war or during the war, so that the increase is a continuing one and there is apparently no leveling-off process in sight. We are inclined to increase consumption in spite of the logic that it should fall off following a war.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from Arkansas.

Mr. HARRIS. May I say to the gentleman that the information the Committee on Interstate and Foreign Commerce has had recently is that the consumption of petroleum and petroleum products in this country has increased 70 percent beyond what it was prior to the war. It is about 5,500,000 barrels per day now and it was about 3,200,000 barrels in 1940. In response to what the gentleman from California [Mr. JOHNSON] said a moment ago, I believe there have been something like 1,500,000 conversions from coal to fuel oil for fuel purposes in this country, which gives added emphasis to what the increased demands are.

Mr. MURDOCK. I thank the gentleman for these facts and for his emphasis on the great increase in demand.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. In connection with my study of this subject, the figures that struck my attention as showing the trend were these: During the last year, in connection with new residential construction in this country, 400,000 units put in oil-burning equipment for heat; and, in the case of over 1,000 orders placed for locomotives in this country, all but 33 were of the Diesel type or oil burning.

Mr. MURDOCK. Yes. That helps account for some of the increase.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. JOHNSON of California. This is a statement by Mr. Ball, of the Department of the Interior, Chief of the Oil and Gas Division, made to our committee. He said:

> The amount of energy supplied in the United States from 1935 to 1946 by coal increased 36 percent, and by oil and gas 96 percent.

That just emphasizes the trend toward the use of petroleum fuel. I would also like to quote another sentence, with the gentleman's indulgence:

> The annual consumption of petroleum fuel in the United States today is greater than that of the entire world in the year 1938.

Our present-day consumption exceeds what the entire world used in 1938, and it is still climbing.

Mr. MURDOCK. Mr. Chairman, I wish to say that I was one of the committee during the war who went across the Potomac River to the National Airport one morning to see one of our colleagues fly a plane from Pennsylvania into Washington, the first airplane to be flown into the National Capital powered by synthetic gasoline or gasoline made from coal.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. MURDOCK. Mr. Chairman, I yield myself five additional minutes.

We thought that flight was historic, and were glad to be a party to the celebration. That happened several years ago. I shall always be proud of even the small part I had in the original legislation which this bill continues. Now we have pilot plants which have developed the technique so that certain processes are developing to the point where private enterprise can utilize them in producing the fuels. After all, that is the theory and purpose of the law. I want to make it perfectly clear that the full program here is to find the know-how and to give such information to the private-enterprise corporations who will produce these things commercially so that they may continue getting the Nation's needs from new supplies.

Mr. KEEFE. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from Wisconsin.

Mr. KEEFE. The gentleman has partially answered the question that I wanted to ask. As I understand the program, it involves, under the expenditures heretofore made, the construction of so-called pilot plants now in operation and doing research in the matter of the reduction of oil shale and coal, and so on, to the production of petroleum products, and it is proposed to enlarge that program.

Mr. MURDOCK. That is right, and to extend the time.

Mr. KEEFE. Under the appropriation contained in the bill, is it proposed that these processes and these pilot plants that are to be constructed, or that have been constructed, will continue in operation as continuous research plants, or at what point does the Government leave this field and private industry take hold of the situation, and what becomes of the synthetic oil, and so on, that is produced in these demonstration-pilot plants?

Mr. MURDOCK. I have my own views on that, but I see the author of the bill on his feet. I yield to him.

Mr. KEEFE. I am very much in favor of the bill, but I would like that information.

Mr. CASE of South Dakota. The question which the gentleman raises is a very proper one. Part of the program carried out under the act is laboratory research. Beyond that is a demonstration program. The reason for its extension is this: There are three fields in which the demonstration program is under way: One is in the oil shales, one is the use of the so-called Bergius process for the hydrogenation of coal, and the third is the application of the Fischer-Tropsch or gas synthesis process to coal to get the hydrocarbons and the desired products.

This program was authorized in 1944, but there were delays due to strikes and to the demands of the war, so the first plant for oil shales just got into operation last year. They have not had a very long experience in the operation of the plant yet.

The second plant, the hydrogenation plant at Louisiana, Mo., will not get into operation until this fall. The program presently authorized will expire in April of 1949. There will not be sufficient time between this fall and April of next year to get a sufficient history to serve as a reliable guide for industry to plan a production program.

The third plant has not yet been constructed because of the delays growing out of the war. So if we are to have the benefit of a Fischer-Tropsch plant which is proposed, this bill is needed now so that contracts can be made for its construction. It is important to develop the Fischer-Tropsch process because it seems particularly valuable for producing Diesel fuel oil and motor gasoline, while hydrogenation seems better for high octane aviation gasoline.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

Mr. MURDOCK. Mr. Chairman, I yield myself five additional minutes.

Mr. KEEFE. Is it contemplated that after these pilot plants and demonstration plants have been constructed and have been in operation a sufficient length of time to demonstrate the feasibility of the cost of production of synthetic petroleum products, those plants will continue indefinitely in operation as research centers in that field, and will the resources of the plants and the discoveries as they are made be made available to private industry that may want to make investments in these fields?

Mr. CASE of South Dakota. Answering that last question first, certainly the processes here will be available to private industry, as to how long the research will continue, that will depend upon the problems that are revealed or solved during the research. The Rifle, Colo., plant can produce only 50 barrels a day, so obviously it is only a pilot or a research plant. This is a research-demonstration program and not a production program.

Mr. KEEFE. To what extent is private industry presently engaged in the production of synthetic fuels?

Mr. CASE of South Dakota. Private industry at the present time is doing something along this line, the major activity being a $250,000,000 plant which is under construction in western Pennsylvania, and on which a group of coal companies in Pennsylvania are cooperating with the Standard Oil Co. of New Jersey. The coals of the Pennsylvania fields are coking coals, industrial coals, for which there is and always will be a great commercial demand. This research program proposes to tap a new field, the field of noncommercial oil shale and of subbituminous coal which has a limited commercial demand. Those fields are important for the reason that the oil shales alone offer the possibility of producing oils in 10 times the volume that can be produced from our natural petroleum reserves and the subbituminous coals offer a potential reserve 40 or 50 times that of petroleum.

The subbituminous coals of the country are about 42 percent of the coal reserves. About 20 percent is lignite and the other 22 percent is higher-grade subbituminous coal. The lignite fields alone are estimated to contain enough material to increase our petroleum reserves in this country by 25 times, enough to carry us along for a thousand years.

Private industry is also using natural gas now to produce synthetic liquid fuels.

But from a conservation standpoint we should not use natural gas, which is limited. Natural gas is being used, however, because it lends itself to a relatively simple and cheap process. You sort of jump over one step in the process required for coal or shale. But gas can be used for other purposes of course. Coking coals can be used for other purposes, too, but the oil shales and the lignite coals have no great commercial value unless they can be utilized for something like this. The research to date indicates that the lignite coals are particularly susceptible to this treatment and a good recovery may be obtained.

Mr. KEEFE. I thank the gentleman.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from Michigan.

Mr. CRAWFORD. This program calls, in the over-all approach, under today's price level, for an expenditure of $9,000,000,000, as stated a few days ago by the Secretary of the Interior and as restated today before our committee. Who is going to put up the $9,000,000,000, and when? We had a little experience in the rubber industry when we built pilot plants for the synthetic rubber industry. Private companies are now operating pilot plants producing GRO and butyl rubber by the thousands of tons, but our pilot plants continue, I mean the pilot plants built and operated by the Government of the United States, to do exploratory work. My guess is that the pilot plants now being built under this program will run for the next 10, 25, and perhaps 50 years or longer, because the Government will be into this program up to its eyes and private industry will be in it. The petroleum industry, the chemical industries in connection with your plastics, the steel industries—because 16,000,000 tons of steel are required for this program—the rubber industries because from this product will come by-products which will go into the production of synthetic rubber, and so on down the line. The coal industry, the oil industry, the steel industry, the rubber industry, the rubber-goods producing industry, all of those are tied up. I think the gentleman has raised a point here which you can answer in a practical way by saying that this will become the established policy of Government, and these pilot plants will go on down through the years.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. MURDOCK. Mr. Chairman, I yield myself five additional minutes.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I am glad to yield to the gentleman.

Mr. ALBERT. I appreciate the fine presentation that the gentleman is making. There is one further source of oil which will be badly needed in the future. That is oil in the so-called worked-out fields. Private industry has made many strides toward recovery ultimately of this oil. Does this bill provide any encouragement toward extending the know-how in the secondary recovery of oil?

Mr. MURDOCK. I do not know that it does, but I recognize the point the gentleman is making and that is we ought to get those heretofore unattainable and therefore unused reserves. I think that will be done.

One additional reason why we ought to pass this legislation and extend the time as well as the authorization and the appropriation later is the very thing the gentleman has brought out, that we have heretofore in tapping oil fields skimmed only the most accessible oil. We are deepening wells and getting oil from deeper levels, and I think we are improving the technique of gathering the oil so as to get a larger proportion. That is the thing that needs to be worked on further. May I say further that just this morning before our committee the question was raised of what we are doing toward extracting fuel from shales. It was pointed out by the engineers who were on the witness stand that we are able by distillation and other processes, such as hydrogenation to get this fuel from under the ground. Some think this may be done without mining. That, of course, is in line with the gentleman's question.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. GAVIN. May I say for the gentleman's information that I intend to introduce an amendment here today to permit a program of production research on secondary oil fields and stripped fields such as have been mentioned here by the gentleman from Oklahoma.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. ROCKWELL. Further answering the inquiry made by the gentleman from Wisconsin [Mr. KEEFE], may I say that the oil companies have been very cooperative with the Bureau of Mines in the operation of the plant at Rifle, Colo. They take the oil shale and put it through a retort, and then the samples are sent to the research laboratories of the colleges of the country as well as the laboratories of these big oil plants, with the idea that they may find the cheapest processes possible.

They think it will be only a short time, so that they can produce this oil in competition, and take the place of the present crude oil.

Mr. MURDOCK. Mr. Chairman, I thank the gentleman for this further information.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. HARRIS. I wanted to add a word to the proposal for a secondary recovery program. After all, there has been much talk about the shortage of petroleum and petroleum products, and that the reserves will only last a given time. Of course, we all recognize that if we find no more petroleum there would be a shortage in the course of years. I think it might be well to point out, however, that we are increasing our reserves each year, and to add a program of research that would go into these depleted oil fields would add to the reserves. Before we had the so-called Interstate Compact Commission and a program of conservation, many fields were depleted, especially those that are water driven, and millions and millions of barrels of oil rest within those pools. We need to recover that oil in order that our people may have the benefit of it.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

Mr. MURDOCK. Mr. Chairman, I yield myself three additional minutes.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. GAVIN. I might say to the gentleman that Mr. J. P. Jones testified before the Subcommittee on Oil of the Armed Services Committee the other day and he estimated that 4,000,000,000 barrels of oil are obtainable from the current secondary methods, but he said an estimated 100,000,000,000 to 150,000,000,000 barrels are being left underground for lack of technology needed to recover them. So it is evident that the amendment which I will offer ties into this over-all program. Our ambitions are to secure more oil.

Mr. HARRIS. I appreciate that important fact, and I should like to ask the gentleman if any consideration was given by the committee for providing an authorization for research work in the development of processes to recover oil under what is known as the secondary recovery program?

Mr. MURDOCK. I do not recall that there was, before the committee. This bill had reference to formulas for converting shale and all kinds of coal into synthetic oil.

Mr. HARRIS. The bill as considered and presented to the House simply applies to synthetic fuel?

Mr. MURDOCK. As I understand it, that is correct.

Mr. HARRIS. Now, would the gentleman answer this question: There was an authorization in 1944 for a period of 5 years, in the sum of $30,000,000.

Mr. MURDOCK. That is right.

Mr. HARRIS. That program would expire in April 1949, if not extended.

Mr. MURDOCK. That is right.

Mr. HARRIS. How much of that authorization has been used?

Mr. MURDOCK. It is my understanding that it has all been appropriated. The $30,000,000 has been appropriated. I do not know how much of it has been used.

Mr. HARRIS. But the entire $30,000,000 has been appropriated by the Congress?

Mr. MURDOCK. That is my understanding.

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. RICH. With reference to what the gentleman from Arkansas [Mr. HARRIS] just stated, the gentleman from Pennsylvania [Mr. GAVIN] will offer an amendment which will give an opportunity for the purpose of trying to reclaim millions and millions of barrels of oil now in the ground, under secondary recovery wells. We know that is the right kind of oil if we can get it. Now all we need

is a million dollars or so for experimentation, to try to get that oil from the ground and then we will have millions and millions of barrels of oil that probably cannot be reclaimed if it were not for the amendment which the gentleman will introduce.

Mr. HARRIS. Mr. Chairman, will the gentleman yield for a statement?

Mr. MURDOCK. I yield.

Mr. HARRIS. I may say to the gentleman that the oil-producing States are spending and have been spending for a number of years a lot of money on secondary-recovery methods.

Mr. MURDOCK. Mr. Chairman, I trust the bill will pass and I reserve the remainder of my time.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. MURDOCK. Mr. Chairman, I think I should not take more time of the House.

The CHAIRMAN. The gentleman from Arizona has consumed 28 minutes; the gentleman from California 5.

Mr. LEMKE. Mr. Chairman, I yield such time as he may desire to the gentleman from Washington [Mr. MACK].

Mr. MACK. Mr. Chairman, H. R. 2161, in my opinion, is a good bill. I believe that the enactment of this bill and the carrying out of its purposes may result in the establishment of great new industries in western Washington which in time will provide new jobs and pay rolls for many thousands of people.

Western Washington has great known deposits of coal, particularly in the Centralia, Tenino, and Toledo areas. A Bureau of Mines survey completed in 1946 indicates that one deposit near Toledo contains not less than 8,031,000 tons of coal. Other large coal deposits are known to exist near Centralia and Tenino.

Development of these coal fields and their use as a possible source of synthetic gasoline has been held back for lack of an adequate preliminary examination by the Bureau of Mines of all the potential possibilities of these west Washington coal fields. Failure of the Bureau of Mines to make that survey is due solely to a lack of funds with which to defray the costs which passage of this bill will eliminate.

On January 6 of this year I appealed to the Bureau of Mines for a thorough examination and study of the possibilities of developing the western Washington coal fields of Centralia, Tenino, and Toledo, both as to creating a new source of coal and as to its possibilities for making synthetic gasoline.

The Director of the Bureau of Mines, James Boyd, in answer to my appeal, informed me that—

> It is regrettable that despite your interest and that of your constituents and our obligation to develop the mineral resources of the United States that funds are not available to carry out this highly desirable investigation.

If we provide the Bureau of Mines this $60,000,000 to carry on work in exploring the possibilities of deriving gasoline from coal, I am sure that the Bureau will make in western Washington what its director, in his letter to me, called "this highly desirable investigation."

The large coal deposits which studies by the Bureau of Mines indicate exist in southwestern Washington lie about midway between the two greatest cities of the Pacific Northwest—Portland, Oreg., and Seattle, Wash. Any new industries which coal developments bring to southwestern Washington, therefore, will be of great benefit to both of these two Pacific Coast States.

May I point out further, Mr. Chairman, that at the present time Washington and Oregon have no oil or no gas production of their own. If the investigations, which this bill authorizes, are made in western Washington and prove successful in developing a synthetic-oil supply, this will be the forerunner of great industrial expansion in western Washington, for then we will be relieved of the expense of importing all our fuel oil and gasoline from the California oil fields, which are more than 1,000 miles distance from us.

Of added advantage to our State is a provision in this bill which calls for exploration by the Interior Department scientists, through pilot plants, of the possibilities of obtaining valuable byproducts from wood waste. Such studies may lead to discoveries that will obtain products of great industrial and commercial values from bark, sawdust, and other waste wood that is now burned in sawmill burners.

Mr. Chairman, I hope this bill will pass.

Mr. LEMKE. Mr. Chairman, I yield myself 5 minutes.

The CHAIRMAN. The gentleman from North Dakota is recognized for 5 minutes.

Mr. LEMKE. The need for this kind of fuel and its desirability are universally understood, so I shall not discuss that. The possibility of manufacturing synthetic fuel oil is beyond question, it is no longer even in the probability stage; it has now progressed far enough so that we know that we have and can produce 500,000,000,000 barrels of fuel oil from coal and shale in this country and that 500,000,000,000 may be increased.

The question now is to get the experiments far enough advanced to know that it can be done at a cost that will permit independent or private business to produce it in competition with the production of oil in the usual method. For this reason this bill asks that the time be extended for three additional years and that an additional amount of $30,000,000 be appropriated. This seems to me to be reasonable when you remember that billions of dollars are now consumed in fuel oil each year and when you realize that the increased consumption of fuel oil and other oils has been over 20,000,000,000 gallons a year as compared with the period just prior to the war.

That is not only in one line of consumption but different lines, motor vehicles, locomotives, and so forth, and especially the increase that has come from the large number of home owners who prefer fuel oil to coal and other methods of heating their homes. But even at the estimate of 500,000,000,000 barrels of additional oil that can be produced by this method there is still a limit and new fields must be discovered.

These experimental plants cooperate with private industry. The Secretary of the Interior, Mr. Krug, this morning appeared before our committee. So did Dr. Schroeder. They testified that there was full and complete cooperation between private industry and the Government in these efforts which are still in the experimental stage as far as cost of production is concerned.

I wish to say to the Committee that this bill came up before the Subcommittee on Mines and Mining of which I am Chairman, with full opportunity of discussion. There was a rather extensive and full explanation of the bill and there has been nowhere any opposition, either before the Subcommittee on Mines and Mining or the Committee on Public Lands as a whole. As far as I know there is no opposition, and I will be very frank to say that I do not believe that any Member who is informed of the situation will object to the passage of this bill

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. RICH. The purpose of establishing these experimental plants was to determine definitely that oil could be produced from shale in order to convince private enterprise that it could be done before they spent millions of dollars on plants, and that they were on the right road.

Mr. LEMKE. I agree with the gentleman and I am glad he made that remark. I may say that the department this morning told us they were not only experimenting in their own laboratory but they were shipping oil shale to universities and other experimental institutions as well as to private industry to find out just what percentage of oil could be extracted from different kinds of shale.

Mr. RICH. They certainly do not want to locate a plant in a locality where the operation of the plant would not be practical, until the laboratory has disclosed that it will be something worth while

Mr. LEMKE. I may say for the gentleman's information that the Secretary of the Interior stressed that very point. He wants more time to do this and he stated that the time had been too short during the war when they had to hurry a lot of this stuff, that they should have had more time for investigation in order to find out what the possibilities were before they build a plant.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. WELCH. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. CRAWFORD].

Mr. CRAWFORD. Mr. Chairman, I think the House is ready to vote on this proposition and I do not care to delay the matter further except to point out one phase. Here we are spending the preliminary money building pilot plants, doing experimental work and gathering experimental information which is necessary for the establishment of a great basic industry, the first step of which will perhaps be the greatest from a dollar standpoint of any first step ever taken in any American industry.

As has been pointed out, the Secretary of the Interior and the experts who have been working in this field for the last 3 or 4 years calculate that $9,000,000,000 will be required to build the necessary plants in order to turn out this production which the public will be expecting as a result of debates such as we are carrying on here today.

Where will that $9,000,000,000 come from to go into a new industry? Will the financial markets at the present time absorb a $9,000,000,000 offering? Of course, they will not, because offerings are going sour on the financial market every week now where firms are trying to sell securities for the purpose of expanding old industries, where the market is now ready for the goods. Can the Government of the United States finance during the next 3, 4, or 5 years half of this job, let us say four and a half or five billion dollars? If the Government attempts to finance the undertaking, where will the Secretary of the Treasury get the dollars? Through selling more bonds to the public or to the banks? If so, that means for the time being, that is, assuming prices do not substantially break, that such operation would be further inflationary.

Capital goods produced when employment is running full, when there is a seller's market, when prices are exceedingly high, I say that at that time capital expansion is inflationary because it further bids for scarce goods and for a short supply of labor. If you attempt to build the plants during the period when the markets are running as they have been running the last 4 or 5 years, instead of the job costing nine billion at the time you estimated your cost, that estimated cost may run to $15,000,000,000 by the time you finish the plant. When you start talking about individual plants that cost $100,000,000 you are getting into big money in any man's country. Some of these individual plants that are being planned will cost $100,000,000 or more.

Where will those plants be located? In what States? In what cities? Near what railroads? Near what canals or rivers? How will the basic raw materials be put at the place where the consumers are located? There are great economic questions involved.

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from Pennsylvania.

Mr. RICH. If they are wise, they will place the plants where the source of the raw material is, more than likely, because of the fact it would cost so much to move the raw material to the plant.

Mr. CRAWFORD. I think the gentleman's business sense is correct but to do these things in a businesslike way you will have to have time to make your plans instead of building as we did the synthetic-rubber industry during the war. The house collapsed all at once. We had no time to do planning. All of that is evidenced today by the fact that we now find plants were located in the wrong spots from the standpoint of economic and efficient operation. The time has come now when private industry wants to buy synthetic-oil plants from the Government, or the taxpayer, and the value at which those plants will be sold depends very largely on their geographic locations, and as relates to efficient and economic operation. If the Government does finance these plants, some day they might want to sell them and private industry might want to buy those plants, but if these plants are to be financed by private industry, certainly you will have to have a dissimilar market for the absorption of the securities than that which we have at the present time.

I simply wanted to spend 2 or 3 minutes developing this particular phase of the subject, because, in my opinion, we have no time to lose on this program. I am in favor of this bill, and I would strongly recommend that as soon as possible—and by that I mean, make it possible—within the next 1, 2, or 3 years we should go out here and build at least three of these plants which the Government proposes, as much as $350,000,000, and let those plants be financed by private industry or by Government, or by the two working together. But the point I make is that we should get those three plants into production and get on the way with this program so that when future trouble does break out we will not have to build a $9,000,000,000 program in 9 months, with all the terrible costs and waste and extravagance that goes along with such a program in such a hurried manner.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from Colorado.

Mr. ROCKWELL. Does not the gentleman believe that the operation of these pilot plants should come first, though?

Mr. CRAWFORD. These are very necessary, these steps we have been taking in the last 3 years, and the steps you are further taking by this authorization are very necessary. Any private industry or any branch of private industry that goes into a new field, if the management has any good sense at all, will do experimental work before it goes and builds a big plant. This is the experimental work that is being carried on in a new field by the Government so as to furnish incentives and inspiration and leadership to the people. Certainly, that is very necessary. In the absence of such experimental work as you are now carrying on you will throw away a billion dollars and hardly know how it happened.

Mr. ROCKWELL. May I add to that the fact that at the present time in this Rifle plant in Colorado there is cooperation between Continental Oil and Texaco and other big oil companies, and the colleges, and this research will save billions of dollars later on. For that reason I think that this should come before the big program that you speak about.

Mr. CRAWFORD. I do, too, but we have had 3 years now of this research and experimental work under Government, plus all that is being carried on by private industry. So, with the embarrassing situation we are getting into both domestically and foreign, in my opinion it is time now to take some practical steps and get down and start designing and acquiring the material and constructing at least three commercial plants for the production of liquid fuel from your coal and shale deposits.

Mr. MURDOCK. Mr. Chairman, I yield such time as he may desire to the gentleman from Oklahoma [Mr. ALBERT].

Mr. ALBERT. Mr. Chairman, the Committee on Public Lands is to be congratulated upon bringing this measure to the floor. They have made it clear that the need for expanding our oil resources in view of increasing demands is greater than ever before. The development of techniques for the production of oil synthetically is an important national problem.

Closely related to this problem is that of developing our techniques and know-how in the field of the secondary recovery of oil. Here is a tremendous reservoir of oil that only awaits the know-how in production. I therefore hope that the amendment of the gentleman from Pennsylvania is adopted.

Mr. WELCH. Mr. Chairman, I yield 5 minutes to the gentleman from Nebraska [Mr. MILLER].

Mr. MILLER of Nebraska. Mr. Chairman, the bill before us is one to construct and operate demonstration plants to produce synthetic liquid fuels from coal, oil shales, and agricultural products. These are demonstration plants to be produced under Government supervision. I think it is well the Government enter into this field of activity. As pointed out before our committee this morning by Secretary Krug, we have about 31 percent of the visible oil supply of the world but for the past several years we have been furnishing about 63 percent of our supply to the rest of the world. To that extent, we are running out of oil.

The report states that the visible supply of oil reserves in the United States is conservatively estimated at about 20,000,000,000 barrels, and we consumed in 1946, 1,750,000,000 barrels of that oil. It can be readily seen that if we continue consuming oil at this rate we will soon run out.

It was also shown in the hearing this morning that there are reserves in the lignite coal, the shale and the rock of the United States, enough oil to last us probably a thousand years if it is developed.

This last summer, with several members of our committee, I visited the experimental plant at Rifle, Colo. It was a revelation to see mountains of shale rock that can produce oil. They put some of that rock in the top of huge containers, lit a little fire on top of it, and oil dribbled out down below. There are over 2,000,000,000 barrels that can be extracted by heat.

I suggested to the Secretary this morning that maybe we could light the whole mountain on fire and just sort of collect the oil down in the ravines. That might be done. At least we ought to consider getting the oil out of that rock on the spot, not shipping it to some place in Missouri or in some other State. It ought to be done at that particular place. It is necessary to refine that oil, and that is no small job.

I would also point out that this country is oil-minded and most machinery and

new houses are equipped for burning oil. I noticed on my desk this morning an advertisement from an oil company which stated that we are using 20,000,000,000 gallons more of petroleum products in 1947 than we used in 1941. In 1937 we were using 367 gallons per capita but today 608 gallons per capita.

On the question of how to get this oil developed, we are short of steel in this country. The gentlemen from the Pennsylvania and other oil fields have said we ought to do something about getting this secondary or marginal oil fields developed. Well and good, but last year we exported 7,000,000 tons of steel, much of it for an oil line in the Near East. Secretary Krug stated very accurately this morning that he thought that was the Achilles' heel of our oil industry, that some bully of the east might very easily cut off that oil supply.

We need to develop our resources here at home. On the public lands there are probably large supplies of oil as yet unknown that can still be uncovered. May I point out, too, that Germany relied almost entirely upon synthetic oil for her plants during the latter part of the war, and on synthetic high-octane gasoline taken from coal. We have those formulas in this country. They have been improved upon. High-octane gasoline can be produced from coal.

I recommend to the committee that we pass this bill; that we take some action to augment our depleting supply of petroleum, and do it from the known surpluses we have of lignite, coal, shale, and other rock that now exists in this country. Unless we do that, you who have been crying for oil in the East will be crying louder and louder every year. John Lewis started the trend to oil, and I believe the demand will increase. So it is necessary that the Government first take steps to work out the formula and process; but once that is worked out, it ought to be made available to private industry. They will carry on. I understand oil companies are spending millions in the synthetic-oil field. The Secretary this morning suggested the Government ought to build three large commercial plants. They would cost hundreds of millions of dollars. It seems to me that private industry, once the program has been developed, ought to carry on, and the Government should relinquish the manufacturing after the formula has once been established.

I feel also that the alcohol plants in Omaha and Muscatine, Iowa, ought to be kept ready to use the surplus farm products which most surely will again plague our country. These plants furnish added assurance of a rubber and alcohol supply for our country. I prefer they be operated by American business; but if this is not possible, then controlled by Government.

Mr. WELCH. Mr. Chairman, I yield 10 minutes to the gentleman from South Dakota [Mr. CASE], the author of the bill H. R. 2161.

Mr. CASE of South Dakota. Mr. Chairman, part of what I have said has already been said in the very generous debate which has been going on. I do not think there has been a person who has spoken on the floor who has opposed this bill. I appreciate the time yielded to me by the gentleman from Arizona to answer some of the questions that have already been raised about this operation.

I have found that when a man introduces a bill in Congress people often ask "Why did you introduce that bill?" I remember a little experience in introducing a controversial piece of legislation once which Congress eventually passed, although it was vetoed.

Repeatedly my motives were questioned as to why I should have introduced the bill. I introduced this bill for the same reason that I have introduced that bill, because I believe that the national interest called for the introduction of such a bill.

The bill was introduced on the 24th of February 1947. The Committee on Public Lands, of which the distinguished gentleman from California [Mr. WELCH] is chairman, and the Subcommittee on Mines and Mining, headed by the able gentleman from North Dakota [Mr. LEMKE], reported the bill out unanimously on June 24, 1947. That was a short time before Congress recessed last summer. The bill was put on the Consent Calendar, but under the policy followed by the committee of objectors on the Consent Calendar, it was passed over without prejudice since it involved more than $1,000,000. Thus it was necessary to wait until such time as a rule could be obtained for its consideration and a place found on the House Calendar for bringing it up for consideration under the rule.

The merit of the bill is suggested by the circumstances which brought the matter to my attention and led me to introduce H. R. 2161. In my hand is a little memorandum given to me by the head of a Cabinet department, not the Secretary of the Interior, on the oil supplies in various portions of the world. The question of the oil supplies in various parts of the world had come up at a downtown conference, in February 1947, with reference to the defense situation where reasons were advanced for our adopting a policy which would keep open the oil lines to the Near East. Frankly, I was astounded at the time that we should be predicating a national policy that would involve us in the Near East on the slender reed of dependence on pipe lines to the oil fields of the Near East. The developments of the past few days have not lessened my apprehensions on that score the least bit. But it was growing out of fears generated at that time, that I began looking around to see what we could do. I knew we had some large fields of lignite in the Northwest. I knew in a general way suggestions had been made for developing synthetic liquid fuels from these shale coals. I went into it enough to decide the thing was to work for the extension of this program.

So I introduced H. R. 2161 as a companion bill to S. 134 and on various occasions I have sought to draw attention to the significance and importance of this program. When the Interior Department appropriations bill was up last year, it may be remembered that I made a point of order against certain language which seemed to curtail the authority to contract for prosecution of the program which had been delayed because the war was going on in 1944.

The time is here to continue the program and to push it with all practicable speed. Materials necessary for the building of some of the plants were required for the prosecution of the war. The ammonia plant at Louisiana, Mo., which had been proposed for use for one of the processes—the application of the so-called Bergius process was first allocated to this work—then the Ordnance Department decided that they needed it again and it was proposed to build this plant somewhere else. Then the war moved along a little better, but before the Bureau of Mines started building the new plant in California or wherever it was to be and this ammonia plant at Louisiana became available again. That plant is to come into operation this fall.

The plant working on the oil shales got into operation at Rifle, Colo., only a few months ago.

The plant proposed for the Fischer-Tropsch demonstration plant which will use the gas-synthesis process has not yet been constructed but will be constructed if this legislation is extended. Mr. Boyd, director of the Bureau of Mines, says that the Bureau at the present time is ready to contract for construction of the Fischer-Tropsch demonstration plant, but this will not be possible until the new legislation proposed is enacted.

At this point, I will insert a communication from the director of the Bureau of Mines and an article on synthetic-liquid fuels in the United States by Dr. W. C. Shroeder, chief of the Bureau's office on this subject:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
BUREAU OF MINES,
Washington, D. C., January 23, 1948.

Hon. FRANCIS CASE,
House of Representatives.

MY DEAR MR. CASE: This is in response to your telephone call of January 21 to Under Secretary Chapman, requesting an expression of the reasons for an extension of the Synthetic Liquid Fuels Act as provided in H. R. 2161 and S. 134. I am pleased to supply the following information:

A large investment now has been made by the Federal Government in research and demonstration plant equipment.

TWO HUNDRED BILLION BARRELS IN COLORADO SHALES

Two oil-shale mines and a demonstration plant for the production of shale oil were placed in operation near Rifle, Colo., early in 1947. One of the mines is for selective operation; that is, the mining of shale of any richness between 5 and 80 gallons of oil per ton. The second mine is essentially an underground quarry with a capacity of 1,500 tons a day, and will permit accurate determination of mining costs. This mine has been in operation only since October and a production of 25 tons per man-day already has been achieved. It is anticipated that this production will reach 40 to 50 tons per man-day during 1948.

Exploration work in the Rifle area has shown that the estimates of reserves of oil in the form of oil shale may be on the low side. Present limited core-drilling work indicates the possibility of recoverable oil totaling about 200,000,000,000 barrels in Colorado alone.

Further extensive core drilling is necessary to give these new estimates a firm status. From the operation of the crushing and retorting plant information of direct commercial applicability and value is being gained every day. This work should be pressed forward as rapidly as possible with the trained staff and extensive equipment now available.

HYDROGENATION PLANT BY FALL

A demonstration plant to produce about 200 to 400 barrels of gasoline a day by the hydrogenation of coal is being erected on the site of a Government-owned synthetic ammonia plant at Louisiana, Mo. All concrete work and buildings will be completed by the end of February, and all major items of equipment will be on hand by the end of March.

It is anticipated that this plant will be in operation in the fall of this year. The products will be high octane aviation gasoline, Diesel oil, fuel oil, and chemical by-products. The plant will use about 100 to 300 tons of coal or lignite a day.

Western coals will be used in initial operations because some of them are exceptionally amenable to the hydrogenation process. It is planned that all major types of coal in the United States will be tested if a sufficiently long operating period is provided.

Total reserves of coal in the United States are very large and will provide coal for many hundreds of years for combustion purposes as well as for synthetic liquid fuels.

On a heat-unit basis about 20 percent of the total coal reserve of the United States consists of lignite, and another 22 percent is subbituminous coal.

In the national interest these low-rank solid fuels should be converted to liquid fuels as a conservation measure, rather than using metallurgical coking coals and other high-grade solid fuels that are in great demand for industrial and domestic use, and which will be exhausted long before the lower-rank fuels occurring west of the Mississippi River.

The lignite coals alone would have a conversion value to liquid fuels of approximately 500,000,000,000 barrels, nearly 25 times the present proved petroleum reserves of the United States.

The hydrogenation plant has cost approximately $7,000,000, and a staff of about 200 people is being assembled and trained for its operation, which is new to American industry. Each day of operation will add valuable engineering data concerning this process which the United States can employ to meet gasoline and oil shortages.

FOUR HUNDRED WORKERS IN LABORATORIES

In addition to the oil shale and coal hydrogenation demonstration plant work, large laboratory facilities for the development and improvement of the synthetic liquid fuel processes have been established at Pittsburgh, Pa., Morgantown, W. Va., and Laramie, Wyo.

These laboratories are now staffed with trained groups totaling about 400 scientists, engineers, and assistants. They are completely equipped to investigate the methods and processes by which the United States can provide oil and gasoline from sources other than petroleum.

To obtain the main benefits from this considerable investment in plants, buildings, and technical staff, it is essential that the synthetic-liquid-fuels program be extended beyond April 1949, the expiration date of the present authorization.

It is also essential that this legislation be approved before the fiscal year 1949 to provide a basis for using the contract authorization granted by Congress so that funds can be obligated under this authority to continue the synthetic-liquid-fuels program at its present schedule.

At present the Bureau of Mines is ready to contract for the construction of a Fischer-Tropsch demonstration plant, but this will not be possible until the new legislation under H. R. 2161 and the companion bill S. 134 is enacted.

Cordially yours,

JAMES BOYD,
Director.

[From Mechanical Engineering of December 1947]

SYNTHETIC LIQUID FUELS IN THE UNITED STATES

(By W. C. Schroeder, Chief, Office of Synthetic Liquid Fuels, Bureau of Mines, member ASME)

The disappearance of the reserve capacity to produce natural crude oil in the United States is the most important difference between the country's prewar and postwar economic and security situation. Prior to the war, a reserve of 20 to 21 billion barrels would have permitted domestic production of about 5,000,000 barrels daily at the maximum efficient rate, while actual production was less than 4,000,000 barrels. In essence, there was a cushion of 1,000,000 barrels a day to soak up the heavy war demand and to provide time in which the civilian consumption could be curtailed to provide still greater supplies for military uses.

Now a domestic crude production near 5,100,000 barrels daily is barely sufficient to meet the country's needs. It is also most probable that demand will continue to rise, for over 90 percent of the locomotives on order are Diesel engines, domestic-oil-burner sales are at the highest rate in the history of the industry, fewer automobiles are burning more gasoline than before the war with an estimated 4.5 million new ones produced this year, and a developing passenger and freight traffic in the air is requiring larger volumes of high-octane gasoline. A predicted consumption requiring 6,000,000 barrels of petroleum products a day by 1951 may err on the low side.

Today the country is still meeting its oil demands from a known reserve of 21,000,000,000 barrels plus a small net import of crude oil and petroleum products, but it is evident that domestic reserves must soon be increased or new sources of supply found. The prospects for increasing reserves in the United States are not bright, and the maintenance of the 21,000,000,000-barrel reserve has only been possible through extensions and revisions of previous estimates on known fields.

The reserve and exploration picture has become increasingly disquieting because discoveries of new oil pools have now failed to match consumption for 8 or 9 years while at the same time consumption is mounting rapidly.

On the other hand, the question is not, Can the United States find new sources of oil? but rather, What sources should be used?

SOURCES FOR OIL

Exploratory effort will undoubtedly find billions of barrels of oil, and this work should be carried forward vigorously. Deeper horizons, as well as drilling on the continental shelf, should help to maintain the oil reserves. Secondary recovery, that is, the attempt to rework old fields which have been exhausted by the ordinary pumping methods, is assuming greater importance. In some oil sand it is estimated that 30 to 50 percent of the original oil may still be unrecovered. How far this work will go will depend to a considerable extent on the cost of recovering oil by these methods, as compared to the cost of producing it from other sources. It is estimated that postwar costs for discovering new oil are about three times prewar costs, in part the result of a generally higher price level but also because of greatly increased drilling and exploration work necessary to find the oil.

Importation of foreign oil is another possible source of large supplies. Until 1947, the United States had been a net exporter of petroleum and generally on a large scale. During the first 6 months of 1947 the country has shown a small import balance. This may, and probably does, reflect the beginning of the change in location of the large bodies of the world's proved oil reserves.

If the assumption is made that the American petroleum industry can operate freely in the foreign fields and will not have to pay exorbitantly for concessions, taxes, or oil, it is the author's belief that oil can be imported at a lower cost than it can be produced synthetically in this country at this time. From some economic viewpoints, this might be the best means for meeting any shortages of crude oil which may occur in the United States.

On the other hand, foreign consumption of petroleum increased about 13 percent for the year 1946, as compared to 1941, and it is evident that some of the world's so-called backward nations are awakening to the need for a mechanized economy to supply their large populations. Moreover, industrialized nations such as England and France are finding it difficult to meet their energy requirements from coal and are showing a definite tendency to turn to oil as the most practical substitute. If this trend continues and increases, the proportion of the world's oil available to the United States may tend to diminish markedly.

This discussion of imported oil has not so far considered the strategic aspect of foreign sources. Sea lanes along the coast of the United States were difficult to keep open in the late war even with well-organized land-based protection at hand. In spite of the effort to protect tankers, the shipment of oil became so critical that it forced rapid construction of the Big Inch and Little Big Inch pipe lines. It is not difficult to visualize the much greater problem that would be created by the long journey through open waters from the Persian Gulf area or even from South America.

In addition to the shipping problem, the oil industry and, under emergency or war conditions, the Government may be faced with the problem of preventing either the physical destruction of the foreign oil fields and their equipment or possible seizure. It is the author's belief that the United States, whose economic health and protection are so greatly dependent on oil, should never allow the security of a large proportion of its supply to rest in distant foreign lands.

SOURCES OF SYNTHETIC OILS

In a broad chemical sense, it is probable that most carbonaceous material could be used for the production of oil. Practically, however, since huge volumes of raw material must be available at low cost near the synthetic-oil plants, the choice is limited to natural gas, oil shale, and coal, and in some circumstances possibly agricultural wastes.

To establish a synthetic-fuel industry furnishing a considerable fraction of this country's oil needs will impose heavy demands on these raw materials, and the choice of the ones to be used will be determined by at least four major factors, as follows:

1. Raw material available.
2. Water supply.
3. Predominant type of products wanted, i. e., fuel oil, Diesel oil, or gasoline.
4. Location of market and transportation costs for products.

The significance of these factors is related to the synthetic-oil processes used and will be pointed out under consideration of the individual processes.

FISCHER-TROPSCH PROCESS USING NATURAL GAS

Fischer-Tropsch catalyst chambers

The Fischer-Tropsch process has in recent years been designated by a number of names, depending to some extent on the engineering features by which the reactions were accomplished on a large scale. The basic chemistry is still the reaction investigated by Fischer and Tropsch in which carbon monoxide reacts with hydrogen to eliminate water (or

carbon dioxide) at the surface of a catalyst to form straight-chain or isoparaffins (and some unsaturated compounds) in the liquid range. Fig. 1 shows the original apparatus used by Fischer in the Kaiser Wilhelm Institute at Mulheim-Ruhr for a study of the Fischer-Tropsch reactions. With cobalt and thorium catalysts, the product was largely paraffinic in nature, containing about 10 percent isocompounds, and ranged from a solid wax through Diesel fuel and gasoline fractions to gases such as butane, propane, ethane, and methane. Iron catalysts tend to yield more wax and about the same amount of isocompounds.

The use of the Fischer-Tropsch process determines the type of products that can be made, although the selection of the catalyst and operating conditions can vary the product within limits. Since the cobalt catalysts give paraffinic compounds, a Diesel fuel of 100 cetane number can be produced while the gasoline is only about 45 octane. The iron catalyst gives a lower cetane Diesel fuel, but gasoline of higher octane suitable for motor fuel. The process as now operated does not lend itself to the production of high-octane aviation gasoline with good rich-mixture performance.

To carry out the Fischer-Tropsch reactions on a laboratory scale is not difficult, but on a large scale the rapid removal of the heat of reaction (46,000 B. t. u. per gallon of oil formed) became difficult. In addition, the temperature at the catalyst surface must be controlled within a few degrees, for if it is too hot the production of methane grows at the expense of oil formation and the catalyst may be ruined, while too low a temperature slows down the process and gives excessive wax formation.

The German commercial plants in 1944 had catalyst chambers of complex construction, containing large amounts of steel to carry the heat of reaction to cooling water. Oil production per chamber was about 18 barrels a day, and a large number of chambers were necessary for a plant of reasonable size, as shown in figure 2. This equipment was expensive to build and operate.

Several new types of catalyst chambers are under development in this country. Two of these now give promise of commercial application. In one, which was largely developed in the oil industry, the synthesis gas is blown through the catalyst bed to keep it in a fluidized state, and the heat is removed by water-cooled surfaces in this fluid area. It is reported that high rates of throughput have been achieved, and that chambers producing several thousands of barrels of oil a day are possible.

The research laboratories of the Bureau of Mines have developed a chamber in which a cut of oil from the process is passed through the catalyst bed to carry away heat both by conduction and evaporation. Figure 3 shows the pilot plant which has been used for this work. The flow of gas and oil is cocurrent. Space velocities of gas through the catalyst about four to five times the German rates have been achieved, and no material difficulty is foreseen in enlarging this chamber to a capacity of 500 barrels per day or more.

Synthesis gas from natural gas

Natural gas is largely methane, and to convert this to synthesis gas (carbon monoxide and hydrogen) two methods can be followed as shown:

$$(1)\quad \underset{\text{Methane}}{CH_4}+\underset{\text{Water}}{H_2O}\rightarrow\underset{\text{Carbon monoxide}}{CO}+\underset{\text{Hydrogen}}{3H_2}$$

$$(1a)\quad CH_4+\underset{\text{Carbon dioxide}}{CO_2}\rightarrow 2CO+2H_2$$

$$(1b)\quad 2CH_4+H_2O+CO_2\rightarrow 3CO+5H_2$$

or

$$(2)\quad \underset{\text{Methane}}{CH_4}+\underset{\text{Oxygen}}{\tfrac{1}{2}O_2}\rightarrow\underset{\text{Carbon monoxide}}{CO}+\underset{\text{Hydrogen}}{2H_2}$$

Reaction (1) is generally used in synthetic-ammonia plants to produce hydrogen. It is often carried out at about 900° C., by passing the mixture of natural gas and steam through tubes filled with a catalyst of nickel on aluminum oxide. For the Fischer-Tropsch process the gas is too rich in hydrogen, and one proposal for getting the proper ratio of hydrogen to carbon monoxide is to introduce carbon dioxide in the reacting mixture as in (1a), or carbon dioxide and water as in (1b). One carbon monoxide to 2 hydrogen is suitable for the cobalt catalyst, and 1 hydrogen to 1 carbon monoxide for the iron catalyst. These reactions are endothermic, and the heat comes from the combustion of natural gas on the outside of the tubes.

The second method for making synthesis gas from methane does not use an external supply of natural gas to provide heat but carries out a direct, partial combustion of gas with oxygen. The oxygen is obtained by low-temperature fractionation of air.

Which of these two methods will prove the most economical will depend upon the cost of the natural gas compared with the cost of oxygen. Oxygen has the added advantage, however, that production of the synthesis gas can be carried out under pressure, and its use affords an outlet for the large amount of low-pressure steam generated in the catalyst chamber which can be used to make power for the oxygen plant. If oxygen is not used, it would be necessary to find some extraneous outlet for the power resulting from the Fischer-Tropsch operations.

Location of plants using natural gas

To locate Fischer-Tropsch plants using natural gas, it is necessary first to determine the raw materials needed. A plant making 10,000 barrels per day of primary product is near the mimimum that should be considered an economic unit. Since the initial investment in the plant is high, it should be amortized over as long a period as possible, which in this case was assumed to be about 25 years. Then the requirements are as follows:

Gas, 120,000,000 cubic feet per day; 43,000,000,000 cubic feet per year. Approximately 1,000,000,000,000 cubic feet over the life of the plant.

Water, 15,000,000 gallons daily.

Products, wax and oil, Diesel oil, motor gasoline, and alcohols; total 10,000 barrels daily.

These requirements are not easily met, since they call for a locality with 1,000,000,000,000 cubic feet of gas exclusively for the plant, and ample supplies of cooling water. Table 1 indicates some of the major proved gas reserves in the United States.

TABLE 1.—*Proved gas reserves in United States*

Location:	*Trillions of cubic feet (approximately)*
Appalachian	5
Kansas	14
Oklahoma	11
Louisiana	22
Texas	86
California	11

Obviously, if all this gas were available for Fischer-Tropsch plants, many suitable locations could be found, but this is not the case. On the Appalachian field, it is used for industrial and domestic purposes, and the reserves in the main are scattered and do not offer good plant locations. In Kansas, Oklahoma, Louisiana, and California the reserves are concentrated, but they supply the huge natural-gas pipe lines, and the number of locations which could furnish a total of 1,000,000,000,000 cubic feet to a Fischer-Tropsch plant is limited. In a State like Kansas, for example, it is probable that not more than a few 10,000-barrel-a-day Fischer-Tropsch plants could be located. The problem is further complicated because some areas which have sufficient natural gas would have difficulty in meeting the water requirements. This reasoning assumes, of course, that the gas going to the pipe lines will not or could not be greatly curtailed to meet large synthetic-liquid-fuel requirements.

Probably the greatest bulk of idle gas is in the Gulf coast and southwest Texas. Proved reserves are approximately 40 trillion cubic feet, and at the present time pipe-line demand is relatively small. Locations near the coast, which will provide ample water for cooling, should meet the plant requirements. In this area natural gasoline is recovered by condensate operations, and about 50 percent of the gas is returned to the well for repressuring. The Fischer-Tropsch plants could, however, be tied in with these condensate operations.[1]

Of the present proved reserves of natural gas as much as 30 to 50 trillion cubic feet might be available for conversion to liquid fuels. From 50 trillion cubic feet the total liquid product is estimated at four to five billion barrels. In this discussion no attempt has been made to estimate the effect of new discoveries which can add materially to the gas available for industrial use as well as for liquid fuels.

FISCHER-TROPSCH PLANTS USING COAL

The carbon monoxide and hydrogen used for the Fischer-Tropsch synthesis can be made from coal as well as from natural gas. The usual method for making these gases, and the one used in all the commercial Fischer-Tropsch plants in Germany, was to make coke from coal and then gasify the coke in water-gas machines. That process could be used in the United States, but it has very serious disadvantages. Two of the most important are that the initial investment in the combined coke-oven water-gas equipment is very high and the coal must all be of coking quality. This last requirement would eliminate many of the largest and thickest beds of coal in the United States, especially in the West, from use in the Fischer-Tropsch process. At the same time, it could throw a very large demand for fuel on the relatively limited reserves of good coking coal. From both a conservation and cost standpoint, it seems essential to devise a gasification process which does not depend on coking coal.

Gasification of noncoking coal with oxygen and steam, either in the pulverized or coarse state, is possible and may offer the solution to the gasification problem. This would be particularly true if the gasification were conducted under pressure, and the synthesis gas delivered directly to the Fischer-Tropsch plant without further compression. The volume of oxygen to be compressed is much less than the volume of synthesis gas, and the steam could be supplied under the necessary boiler pressure.

The Lurgi gasification process does operate under pressure, but as used up to the present time requires a sized fuel and produces considerable quantities of methane. If the temperature of the entire fuel bed were increased materially, the methane concentration could be reduced, but this probably means either a fluidized bed or pulverized fuel. In the latter cases, the operating temperature through the fuel zone would be fairly uniform and could be held at a level that would

[1] While this discussion is concerned with natural gas in the United States, it is interesting to observe that gas reserves in other countries might supply considerable amounts of synthetic fuels. For example, the latest available (May 1947) report of the Ministry of Fomento shows near 1,000,000,000 cubic feet of natural gas daily discharged to the atmosphere in the Venezuelan oil fields. This amounted to approximately 400,000,000 in the Maracaibo district; 300,000,000 in the Maturin district; and around 230,000,000 in the Barcelona district.

give high concentrations of carbon monoxide and hydrogen. The investment in an oxygen plant is large, and production costs, even excluding the cost of power available from the Fischer-Tropsch process, are still relatively high. The prime function of the oxygen in the process is to furnish heat to maintain the high reaction temperature through combustion of some of the coal. The oxygen needed can be reduced or eliminated by highly superheating the gases and steam going to the reacting zone.

At this point, the possibilities of underground gasification should not be overlooked even though it is true that considerable development work remains to be done. Figure 4 shows tunneling operations for underground gasification at Gorgas, Ala. From this experiment[2] it was found that this process can utilize a high percentage of the coal. With oxygen, and particularly if the whole operation can be conducted under pressure, it should not be difficult to secure very high temperatures and a gas suitable for synthesis purposes. At the same time, it is evident that each coal bed will present its own problems and require specialized development work.

The whole gasification problem is under intensive investigation both by industry and by the Bureau of Mines, and it seems reasonably certain that within the next year major improvements in the gasification processes can be expected.

About 35,000 cubic feet of water gas is needed to make a barrel of Fischer-Tropsch oil. Even on the basis of the best methods now available, very few gasification engineers are ready to talk costs below 10 cents per 1,000 cubic feet of synthesis gas, assuming a good grade of coal at $2 a ton. This means that the gas to the Fischer-Tropsch process for a barrel of oil will cost about $3.50. To this must be added the Fischer-Tropsch processing costs which will be small compared to the cost of gas production. At the present time, it would appear that substantial reduction in the cost of Fischer-Tropsch oil is going to depend upon producing synthesis gas at low cost. Before leaving this subject, however, it should be noted that Fischer-Tropsch primary product is a high-grade oil and can be refined to useful products with negligible losses.

The raw materials required for a 10,000-barrel-a-day Fischer-Tropsch plant using coal are approximately as follows:

Coal, tons per day (about 12,000 to 13,000 B. t. u.)	6,500
Coal, tons per year (about 12,000 to 13,000 B. t. u.)	2,400,000
Coal, tons, for an assumed plant life of 25 years	60,000,000
Water, gallons per day	15,000,000
Synthesis gas, cubic feet per day	350,000,000

Assuming a coal bed about 8 feet thick, approximately 10 square miles would be needed over the plant life. More than 20 States with good coal reserves would offer numerous sites for such plants. In order to minimize transportation cost for coal and water, it would be desirable to have sites at which both materials are readily available, and such sites will be limited. In the East, the water problem will not be as difficult as in many of the Western States. The question of plant location with respect to markets is one that will be decided by the cost of coal versus the cost of transportation of oil and gasoline. Many of the eastern coal fields are near large markets but mining is relatively expensive, while in the West coal is available in thicker beds, often at low cost, but the product will have to be shipped to the point of use. At the present time, sufficient information is at hand to estimate for a given set of circumstances the most economical arrangement.

[2] Conducted jointly by the Alabama Power Co. and the Bureau of Mines.

COAL HYDROGENATION

The broad features of the chemistry of the coal-hydrogenation process are known, although a thorough understanding of the individual reactions and the conditions that affect them still remains to be worked out. To make a liquid product by hydrogenation, the coal is mixed with heavy oil from the process, the mixture is heated to about 450° C. and hydrogen gas introduced under pressure in the presence of a catalyst. It is now known that the coal dissolves in the oil (such solution is possible in coal-tar fractions or hydrogenated coal-tar fraction) or at least depolymerizes to the extent that the very large molecules are broken down and are present in the liquid in an unsaturated and very reactive state. If hydrogen gas is immediately available, it enters the molecular structure to produce a stable oil-like material. If hydrogen is not available, the reactive molecular groups tend to repolymerize and form asphaltic material which is exceedingly difficult to liquefy by subsequent treatment. The function of the catalyst, which is generally tin oxide or iron sulfate, depending on the pressure, seems to be to promote the reaction of hydrogen with the liquid medium which in turn gives up hydrogen to the newly formed molecular groups.

The complete flow diagram and equipment for the hydrogenation process are extremely complex. Since the process operates at pressures from 3,000 to 10,000 p. s. i., a considerable number of highly specialized engineering problems are met. Bureau of Mines laboratories for a broad-scale investigation of the coal-hydrogenation and Fischer-Tropsch process are shown in figure 5.

The hydrogenation process is well adapted to the production of aviation gasoline from coal and, in fact, is the only large-scale synthetic process at present which will give a base stock for 100-octane gasoline with good rich-mixture performance. It does not produce as good a Diesel fuel and at this time it probably will not produce motor gasoline as cheaply as the Fischer-Tropsch process. In addition, a light hydrogenation of coal at low pressure may offer a good synthetic process for the production of fuel oil.

It is estimated that the cost of producing and compressing hydrogen is 50 percent of the total cost of producing gasoline by the hydrogenation process. Improvements in the production of synthesis gas for the Fischer-Tropsch process are also improvements for the hydrogenation process, since the carbon monoxide portion of the synthesis gas can readily be reacted catalytically with steam to give hydrogen.

Because the cost of compressed hydrogen is about one-half the total cost of gasoline, it is important to consider the use of natural gas as a source for hydrogen. Natural gas at 5 cents would give hydrogen at about one-third the cost of obtaining it from coal at $2 a ton, and would result in a material saving both in the plant investment and operating cost of a hydrogenation plant. This possibility depends, of course, upon having natural gas near or piping it to a coal field. In certain areas of Wyoming, Illinois, and Texas, natural gas and coal could be secured for such operations.

The amount of gas needed is not large compared to the liquid product. Assuming that the hydrocarbon gas from the converters is used to make as much hydrogen as possible, the amount of natural gas would be approximately 6 to 8 percent of the product on a weight basis. This would have the effect of making large amounts of liquid product available from a small amount of natural gas. The possibilities from both the economic and conservation viewpoints of a hydrogenation process using natural gas to furnish hydrogen are sufficiently attractive to justify a thorough analysis which is now being made by the Bureau of Mines.

The minimum-size commercial hydrogenation plant for the United States is about 30,000 barrels a day, and the following estimate for a raw material is based on such a plant:

Coal, tons per day (about 12,000–13,000 B. t. u.)	17,000
Coal, tons per year (about 12,000–13,000 B. t. u.)	6,120,000
Coal, tons, for assumed plant life of 25 years	153,000,000
About 30 square miles of 8-foot coal needed over plant life.	
Water, gallons per day	50,000,000

The location of these plants offers much the same problems as those encountered for Fischer-Tropsch plants operating on coal.

OIL-SHALE PLANT

Since oil shale of reasonably good grade contains 10 to 50 percent carbonaceous material from which oil can be produced, it might seem uneconomic to mine this material for the production of oil in comparison with coal which contains a high percentage of useful carbon. This reasoning does not take account of certain basic advantages which oil shale possesses. The first of these is the occurrence of the shale in essentially horizontal strata containing an average of about 30 gallons of oil per ton of shale in a bed 70 to 100 feet thick in Colorado and extending in almost continuous but thinning beds into Utah and Wyoming. Mining costs under these conditions are of a different order of magnitude from those encountered in mining underground coal beds one-tenth or one-twentieth of this thickness. The second advantage is that the processing of oil shale is relatively simple, costing less for initial investment and plant operation than coal.

The effect of differences in processing is reflected in still another way. Assuming coal contains 90 percent carbonaceous material and shale only 18 (about 30 gallons of oil per ton), it might be expected that it would require five times as much shale as coal to make a barrel of oil. Instead, 1.5 tons of shale will make a barrel of oil, while 0.65 ton of coal are required for a barrel of oil. The ratio then is not 5 tons of shale to 1 ton of coal but 2.3 tons of shale to 1 ton of coal. The large amount of coal is required to furnish heat and energy to the coal process which is not needed in shale processing. With mining costs one-fourth to one-third of those for coal, it is apparent that oil shale is a suitable source of raw material for synthetic fuels.

The Bureau of Mines oil-shale plant, which is now in operation at Rifle, Colo., is investigating on an extensive scale all phases of shale-oil production. Figures 6 and 7 are views of some of the mine and plant areas.

The plan for economic studies of the mining is now fully developed and a large-scale mine to demonstrate operations at the rate of 5,000 tons a day has been opened. A 70-foot shale bed is minable in 3 benches, and entryways are large enough to take a large-electric or Diesel shovel underground. All operations such as drilling, blasting, loading, and transportation are predicated on the maximum degree of mechanization, and detailed economic studies indicate that production of about 40 to 50 tons of shale per man-day can be achieved. Under these circumstances, the shale will be mined for about 50 cents per ton.

Processing after mining involves crushing the shale and retorting (heating) to produce oil. The end product is an oil having a gravity of about 25° to 30° A. P. I., depending upon the method of retorting.

On the basis of present knowledge, oil shale can be refined to yield industrial fuel oil and Diesel fuel with a cetane rating between 35 and 45. It cannot be looked upon as a

good motor-fuel stock, for it yields a low-octane (about 50 or 60) gasoline. Shale oil differs materially from petroleum in that it contains considerable amounts of unsaturated or olefinic compounds. It cannot be refined into substitutes for petroleum products by the normal methods used on petroleum, and special methods must be developed. A light hydrogenation of 200 or 300 p. s. i. pressure has given very good results on Diesel fuel but disappointing results on motor fuel. The whole refining problem needs and is receiving intensive investigation. This work will be carried out by extensive cooperative tests with industry and special studies in Bureau of Mines laboratories.

The raw material needed for a 10,000-barrel-a-day oil-shale plant on the basis of processing the 70-foot bed in the Green River formation of Colorado is as follows:

Oil shale, tons per day	15,000
(For 25-year plant life about 2 square miles of a 70-foot bed of shale).	
Water, gallons per day (with recirculation)	1,700,000

Since the oil-shale beds exist in enormous areas in three States and in smaller quantities in many others, the location of the necessary reserves for many plants will offer no difficulty. However, the shale is in mountainous terrain, frequently at elevations of 7,000 to 8,000 feet, and the plant sites must be selected with care. Although this process does not require a large amount of water, the richest shale reserves are in somewhat arid regions of the country, and the availability of the water will be one of the determining factors in plant location.

SUMMARY

Since the passage of the Synthetic Liquid Fuels Act in 1944, it has become increasingly apparent that the United States will turn to synthetic sources to augment its petroleum resources. It is anticipated that costs at the plant will be from 3 to 5 cents a gallon higher than the present prices of products from petroleum, although further reduction in synthetic costs may be achieved by process improvement and large-scale operation. The raw materials that will be used first are natural gas, oil shale, and coal. The raw material or processing method to be used will depend on the economics surrounding each plant installation, as well as the type of product desired, that is, industrial fuel oil, Diesel fuel, or gasoline.

This paper has attempted to show the basic raw materials needed for the synthetic-fuel plants, and the major problems involved in site selections. The establishment of a synthetic-fuel industry to supply an appreciable fraction of the country's oil needs must be preceded by study to determine areas in which raw materials and water are available in adequate supply.

It is not desirable to delay the establishment of a synthetic-fuel industry until an emergency period. To build a capacity of one to two million barrels daily would require several years and large amounts of steel and other materials as well as manpower. This program would be about 5 to 10 times the magnitude of the synthetic-rubber program during the last war. It would be most desirable to avoid such a drain of national resources during an emergency.

Mr. ELLSWORTH. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. ELLSWORTH. I just wish to say that I am in full accord with the necessity for protecting and conserving our oil supplies and other liquid fuel supplies. I would like to ask the gentleman if the title of the bill as it now reads, namely, "authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil, shales, agricultural and forestry products and other substances," may be interpreted to include alcohol as a fuel? Alcohol is a fuel and it may be made from wood, or forestry products. I am interested in that subject. We have made some developments along that line going along in the Northwest, and I believe this legislation should be made to apply to those developments if aid in perfecting the alcohol-from-wood process is needed.

Mr. CASE of South Dakota. Of course the title is accurate in that respect, in describing what is in the present act. The pending bill is to amend the act of April 5, 1944, the first sentence of which reads as follows:

That the Secretary of the Interior, acting through the Bureau of Mines, within the limits of critical materials available, is authorized for not more than 5 years to construct, maintain, and operate one or more demonstration plants to produce synthetic liquid fuels from coal, oil, shale, and other substances, one or more demonstration plants to produce liquid fuels from agricultural and forestry products, with all the facilities and accessories for the manufacture, purification, storage, and distribution of the products.

Certainly the clause which relates to the production of liquid fuels from agricultural and forestry products would cover the question raised by the gentleman from Oregon.

Mr. ELLSWORTH. As the gentleman knows, ethyl alcohol is used as a blend with gasoline as a fuel for the operation of motor vehicles in many parts of the world. It is conceivable under the present development, to manufacture ethyl alcohol from sawdust. It is possible that alcohol made from wood will ultimately be available at a price which will make blending with gasoline very feasible. I would like to ask the gentleman if, in his opinion, when the proper time comes, this legislation may not be applied to such experimentation and other work along that line.

Mr. CASE of South Dakota. As a matter of fact, some of that work is now being carried on in the laboratory-research program. But most of the discussion has related to these demonstration plants. In addition to these plants, there are at the present time laboratory facilities established at Pittsburgh, Pa., Morgantown, W. Va., and Laramie, Wyo. Those laboratories are now staffed with trained groups totaling about 400 scientists, engineers, and assistants, and they are equipped to investigate methods and processes by which the United States can provide oil and gasoline from sources other than petroleum. In addition, there are certain research problems assigned to laboratories operated by the Department of Agriculture.

Mr. JOHNSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of Illinois. I am deeply interested in this, because I offered the amendment to this original bill in 1944 to include agricultural products.

Mr. ELLSWORTH. May I ask the gentleman from Illinois if it was not his intention at the time he introduced that amendment that it should include the manufacture of synthetic fuel obtainable from forest products?

Mr. JOHNSON of Illinois. Absolutely, even to the extent of waste sulfide liquors going down the stream from wood-pulp plants, which contained a great deal of recoverable amount of sugar, from which you can make alcohol. You can make alcohol from anything that contains sugar or starch. There is a tremendous amount of waste going down the streams. Alcohol could have been recovered from the sulfide liquors that are being wasted. In carrying out the original purpose and intent of this bill, along the line that the gentleman from Oregon is interested in, the original laboratory at Peoria immediately went to work on this. They have made high-grade liquid motor fuel from even corncobs, as well as some other byproducts. They are deeply interested in carrying on this program. In this same connection, I might mention that our Subcommittee on Fertilizer is very deeply interested in the disposal of some of these Government alcohol plants, for instance, the one at Kansas City, the one at Omaha, the one at Muscatine, Iowa, particularly the one at Muscatine, which has done such a wonderful job.

Mr. CASE of South Dakota. The gentleman, of course, refers to plants operated by the Department of Agriculture.

Mr. JOHNSON of Illinois. Yes; but they ought to use it.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

Mr. WELCH. Mr. Chairman, I yield two additional minutes to the gentleman from South Dakota.

Mr. CASE of South Dakota. Mr. Chairman, I think there is no opposition to the passage of the legislation, but for the record I wish to give the figures of where the lignite coal is located. North Dakota—and bear in mind my State is South Dakota—North Dakota has 600,000,000,000 tons of lignite; Montana has 315,000,000,000; Texas, 23,000,000,000; my State, South Dakota, does have 1,000,000,000 tons of this coal, but the greatest reserves of lignite are obviously in the States of Montana and North Dakota.

Assuming a one-third loss in mining, the remaining 626,000,000,000 tons of the known lignite coal reserves would have a conversion value to liquid fuel of approximately 500,000,000,000 barrels. That is approximately 25 times the present crude-oil reserves of the United States. These figures were given to me by Mr. N. H. Collison, special assistant to the Secretary of the Interior, in connection with hearings on a deficiency appropriation bill in December.

Mr. Chairman, this bill ought to be passed at once in order to make it possible for the Bureau to carry on this program at top speed and to make its contracts for the fiscal year 1949, particularly if it is to go ahead with its contracts for the plant that has not yet been started.

So, this bill should be passed today. I am happy for the wide interest shown here today. The bill has been supported

by the chairman of the Committee on Public Lands, the Committee on Rules and the Committee on Interstate and Foreign Commerce as well as other ranking Members of the House. You can tell the people of the country that Congress is doing something for the development of synthetic liquid fuels. Synthetic fuel oil is already indicated on a basis competitive with petroleum and the day is not far distant, in my judgment, when gasoline produced by synthetic processes will be within 5 cents of the price now paid for gasoline produced from petroleum. When we propose to do that, with the tremendous reserves we will unlock in this program, certainly we are passing legislation of the most vital and long-time national interest.

The CHAIRMAN. The time of the gentleman from South Dakota has again expired.

Mr. WELCH. Mr. Chairman, I yield 7 minutes to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION. Mr. Chairman, this bill contains but a few lines. Yet, in my opinion it is one of the most important bills that will likely be considered at the present session of Congress. For a number of years, I was chairman of the Committee on Mines and Mining but under the Reorganization Act, matters coming under the jurisdiction of that committee were transferred to another committee.

The bill before us amends the act of April 5, 1944, which act authorized the construction and operation of demonstration plants to produce liquid fuels from coal, oil, shales, agricultural, and forestry products, for a period of 5 years and authorized the expenditure of $30,000,000. This bill changes that law in two particulars—it extends the period of this experimentation three more years and the amount expended to sixty million.

You, the American people and myself have been disturbed for some years because of the likelihood that our oil and gasoline supplies would become exhausted. It is estimated by our scientific and expert men in this field that the foreseeable oil resources of this Nation at this time is 20,000,000,000 barrels. We are now consuming oil products at almost the rate of 2,000,000,000 barrels a year and it is predicted that we may exhaust our known oil reserves and resources within the next 10 or 12 years. It is most disquieting to know that in the year 1947 we consumed in this country 20,000,000,000 gallons more oil than we did in 1941, the largest prewar year consumption, and we consumed last year 7,000,000,000 more gallons of oil than any of our biggest war years.

Let us notice some of the items that account for this great increase of 1947 over 1941. Thirty million motorists are using annually two and a half billion more gallons than in 1941. Seven million trucks and busses are using 3,000,000,000 more gallons than in 1941. Our armed forces are using three and a half billion more gallons than in 1941. Railroads, airlines, and ships are using two and a half billion more gallons than in 1941. Farmers are using one and a half billion more gallons than in 1941. New products, made from petroleum, use 1,000,000,000 more gallons than in 1941. The users of liquefied petroleum gas use one and a half billion more gallons than in 1941. Industry is using 2,000,000,000 more gallons than in 1941. Oil burners are using two and a half billions more gallons than in 1941. So—the total used in 1947 was 20,000,000,000 gallons more than in 1941 and 7,000,000,000 gallons more than that used in our biggest war years and with our expanding economic life, this will no doubt increase.

Petroleum is of first importance to our national defense and likewise to the domestic economic life of this Nation. Unless we can develop petroleum from coal, shale, and the products of agriculture and forestry, we can begin to see the end of the glory, power, and industrial and agricultural wealth of this Nation. Happily, we can see now clearly how we can provide this most essential product to our national life and existence.

SYNTHETIC OIL FROM COAL AND SHALE

Early in the last war many persons believed that Germany could not fight a sustained great war because she did not have oil from which to make gasoline and other petroleum products so very necessary in supplying her war needs, but German scientists had been active in developing synthetic petroleum from which she could make high-octane and other high types of gasoline.

In 1945 the Congress, in my opinion, took a very wise step in providing our Nation with leadership to discover and develop synthetic liquid fuels from coal, shale, agriculture, and forestry products. There is no limit to the rich coal and lignite deposits of this Nation. A majority of the States have rich coal or lignite deposits. There are millions of acres of coal in Alaska with a seam that is more than 80 feet thick. The State of Utah has a seam that is more than 32 feet thick. Kentucky, West Virginia, Virginia, Tennessee, Alabama, Ohio, Indiana, Illinois, Pennsylvania, and Maryland have many seams of coal varying in thickness. The numbers of tons of coal would run into astronomical figures. South Dakota and some of the other States have thick veins of lignite. This coal and lignite would provide us with oil, gasoline, and other petroleum products for thousands of years.

SPLENDID PROGRESS

Our own scientists and mineralogists have gone far enough into these investigations and tests to show that the development of synthetic liquid fuels is feasible. One private concern in Pennsylvania is putting in a plant that will cost $250,000,000 to convert coal into petroleum. I know of no way that this Nation could spend $60,000,000 to a better advantage for peacetime pursuits as well as our national defense than in discovering and developing the processes to extract petroleum from coal, shale, and agricultural products. We have millions and millions of acres of oil-bearing shale. These discoveries are most assuring to me and I know they will be to all those who familiarize themselves with the facts. We not only are assured of ample supplies of oil, gas, and other petroleum products, by these processes, but in the beginning it will be produced at little more than the present cost of oil taken from the oil pools throughout this country, and, furthermore, it will develop a great synthetic fuel industry that will require the investment of $9,000,000,000.

The Government will not put up these plants. It is planned to have these synthetic fuels developed by private industry. This industry will use literally billions of tons of coal and other billions of shale and lignite. The Government is not going into the manufacture of synthetic fuel. It is working anxiously and actively in developing the scientific processes by which this may be done. It, of course, will furnish the private enterprise with the know-how and private enterprise will afford a great market for coal, lignite, and shale and a market for the equipment necessary to carry on these enterprises and that will mean more jobs for American workers, and above all, it will cause our country to be independent, and furthermore, our country will no longer be dependent for its petroleum supplies on Iraq and other distant foreign lands. It may keep us out of World War III. We will not have to fight over oil wells in foreign lands. I am very happy today to have the opportunity to help further this great American program.

Mr. WELCH. Mr. Chairman, I yield such time as he may desire to the gentleman from Colorado [Mr. ROCKWELL].

Mr. ROCKWELL. Mr. Chairman, I am very much gratified at the attitude of the committee on this bill. I recall very well in 1944 when we had the original bill, the discussion before our committee, and the difficulty we had to get it passed through the Congress. The war, and what we have learned since then, has taught us valuable lessons concerning the need for more oil and gasoline. There are a million more homes being heated by oil today than there were before the war, not to mention the other uses for gasoline and oil. The oil shales in Colorado will supply, according to the testimony given before the Committee on Public Lands this morning, over 200,000,000,000 barrels of oil, enough to last 100 years at the present rate of consumption, if we did not have anything else. Also in the Rocky Mountains we have great beds of coal that are still untouched. We can, if I may say so, supply our friends in California and our friends to the south not only with the water they need in the future, but with the oil to heat their homes and to develop their industries.

Mr. WELCH. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. RICH].

Mr. RICH. Mr. Chairman, I was very much interested in the statement made by the gentleman from Michigan [Mr. CRAWFORD] a while ago in reference to the business angle that the Department is going to be compelled to take if we are going to make a successful proposition of getting oil from rock. Naturally, we all know we need oil. Now, where are we going to get it? It seems to me

that the thing to do is to build plants close to the mountains of raw material rather than to bring the mountains of raw material close to the plants. That is an economic measure, and I do not care what part of the United States it is, it is essential to do just that. It is going to be necessary in order to save transportation costs. Now, besides extracting oil from the rock, there was testimony given before the Armed Services Committee by John Paul Jones, from Bradford, Don T. Andrus, of Bradford, and Larry Smith, of the Independent Petroleum Association of America, showing that there were millions and millions of barrels of oil underground that could be recovered by a secondary recovery from stripper oil wells. When we get that kind of oil you know exactly what you have got. It is gold, rivers of black gold, that we can use, and we know that we have got the very best oil in McKean County, Pa., the greatest and the best quality oil field in the whole United States. There they have millions and millions of barrels of oil that can be extracted from these wells, if we will give a little time and attention in trying to supply the know-how to recover it. My colleague the gentleman from Pennsylvania [Mr. GAVIN] is going to offer an amendment here which has been agreed to by all the members of the committee, which I hope will be adopted. They will only ask for a very, very small part of the money to be used in experimental purposes in endeavoring to reclaim that oil. If that amendment is placed in the bill as is, it will make a much better bill and make it so that it will do something for the welfare of this Nation, not only for this year, but for years and years to come. I hope that we can adopt that amendment, and I hope that the Department will be able to determine just the proper place for its experimental work in shale oil. Experimenting should be continued in order that they will not build a great many plants before they know what kind of plant they ought to build and where they ought to build it, thus saving millions of dollars of taxpayers' money. If the Bureau of Mines will give their time and attention to that particular phase, I feel that this bill will be a great success; one that will benefit this country of ours, and one that should pass.

Mr. WELCH. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon [Mr. ELLSWORTH].

Mr. ELLSWORTH. Mr. Chairman, when this bill first came before the Congress I was a member of the Committee on Mines and Mining. The bill was reported to the floor from that committee and I was very happy to see it passed. When the gentleman from Illinois [Mr. JOHNSON] offered his amendment to include agricultural and forestry products within the scope of the authorization of the bill, I supported the amendment.

I think it is extremely important that the matter of obtaining synthetic fuel be looked into as far as farm products and forestry products are concerned. It happens that in my congressional district the only commercial-scale experiment ever conducted in the United States for the manufacture of ethyl alcohol from sawdust was undertaken during the war by the Defense Plants Corporation. Following the end of the war, the plant, which was constructed for the purpose of manufacturing alcohol from wood waste, was placed in operation by a lessee corporation under the Defense Plants Corporation, now the Reconstruction Finance Corporation. It was discovered, however, when the plant was put into operation that instead of being a complete plant ready actually to turn out alcohol there were some engineering and design difficulties, the correction of which would cost some $250,000. The company, which had been organized to operate a going plant, but had no responsibility for the design and construction of that plant, did not see fit under the type of lease it had with the Reconstruction Finance Corporation to go ahead and make a capital investment to complete the plant to produce alcohol. At the present time that plant is in the hands of the War Assets Administration. I think that ultimately it will be sold by the War Assets Administration on such a basis as to be operative commercially.

This will be the first effort in the United States to produce ethyl alcohol from wood. Alcohol has heretofore always been produced from food products, grain, principally. There is not enough grain produced in this country or in the world to feed the population of the world with grain, the most nutritious food, to the extent needed, so it seems high time that this country should go ahead and develop processes for manufacturing alcohol from a product that is presently wasted, namely, sawdust and other waste wood.

When I interrupted the gentleman from South Dakota [Mr. CASE] a few moments ago and asked the question regarding the application of this bill to such things as manufacturing alcohol from wood, I had our situation in Oregon in mind. I wondered if there was any application in this bill to work of that kind. The reply of the gentleman from South Dakota [Mr. CASE], the author of the bill, clearly indicates that the language of the pending bill and of the statute which it amends is not only broad enough to include the construction of demonstration plants for the production of liquid fuels from forestry products, but it is specific in that respect. If the plant now in existence at Springfield, Oreg., can be disposed of by the War Assets Administration in such a manner as to insure its commercial operation in the future there will be no need to consider the application of this legislation to the problem. As I understand it, however, the passage of this bill will make it possible for the Forest Service of the Department of Agriculture to proceed to make the Springfield plant a demonstration plant if private investors are unable to or do not want to complete it and operate it. I am therefore very much in favor of the passage of the pending bill.

Mr. JOHNSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ELLSWORTH. I yield to the gentleman from Illinois.

Mr. JOHNSON of Illinois. The gentleman is aware that actually alcohol had been made from wood products up in Canada, in a plant owned and operated by the Chicago Tribune. They built a plant there to make their own wood pulp for their newsprint, and then made a demonstration plant manufacturing alcohol from the waste products of that wood. So it is a practical thing, shown to be so by private enterprise.

Mr. ELLSWORTH. Yes; I am acquainted with that work in Canada. I also know that there is at present in operation a very successful plant manufacturing alcohol from sulfite waste liquors from a big paper mill, I think in Bellingham, Wash. It is a highly successful venture and just shows what can be done with waste wood products with the application of American inventive genius and engineering ability.

Mr. WELCH. Mr. Chairman, I yield such time as he may desire to the gentleman from Massachusetts [Mr. BATES].

Mr. BATES of Massachusetts. Mr. Chairman, I am hearily in sympathy with the provisions of this bill authorizing the construction and operation of demonstration plants for the purpose of developing synthetic fuel oils. I think we are all familiar with the general oil situation throughout this country. It was brought more forcefully to my attention today when I received a telegram from one of the suppliers in the New England area, the Boston area particularly, that had been able to get a tanker from the Maritime Commission under charter-hire provisions in order that they might be able to go down into the Gulf and get some oil. Today, because of their inability to get that oil, they had to cancel the tanker. The situation in New England is desperate because there are thousands of homes up there today without any kind of oil, especially at this time when the temperature is down near the zero mark all the time and this being one of the coldest winters that we have experienced in perhaps the last 25 or 50 years. Anything that will implement the oil situation in this country from the standpoint not only of meeting our domestic requirements but also to enhance the security of the United States is something with which I am heartily in accord and favor.

Mr. WELCH. Mr. Chairman, under permission granted in the House, I insert the following statement:

STATEMENT OF SECRETARY OF THE INTERIOR HON. J. A. KRUG BEFORE THE COMMITTEE ON PUBLIC LANDS OF THE HOUSE OF REPRESENTATIVES THIS MORNING ON SYNTHETIC LIQUID FUELS

In transmitting to the Congress recently my 1947 annual report on operations under the Synthetic Liquid Fuels Act, I stated that the immediate need for supplemental sources of oil and gasoline never was more apparent. With the Nation's reserve productive capacity exhausted, demand for petroleum and its products has surpassed the wartime peak and still is rising. No leveling-off period is in sight. The forecast for 1948 indicates a total demand more than 14 percent in excess of the wartime high of 1945, and it would be even greater if more oil were available.

Final figures are not yet available, but the lowest estimates of our economists indicate that 1947 demand exceeded prewar 1941 by

34 percent. For the first time, oil and natural gas last year supplied more energy than coal. Motor fuel demand was up 18 percent since 1941; kerosene, up 46 percent; distillate fuels, 68 percent; residual, 34 percent; and others, 43 percent. These increases are the result of the tremendous postwar increase in industrial activity and a rapid growth in population. The development of our energy resources is vital to continued prosperity in this country.

With only 31 percent of the world reserves, the United States cannot continue to produce 63 percent of the world's consumption, and this is practically all domestic consumption. The Nation already is squeezed between increasing demand and decreasing margin for expansion of productive capacity. The effect is reflected in distress calls from communities lacking adequate fuel oil during the recent cold wave. If further abnormally cold weather arrives—and the winter is far from over—these shortages may become even more widespread and severe.

The petroleum industry is working around the clock to fill soaring demands. It is cooperating wholeheartedly in an industry-wide campaign of conservation, even to the extent of spending large sums for advertising to urge consumers to take it easy on gasoline and to save fuel oil by not overheating houses. These efforts deserve the highest commendation, but they are not a long-range solution. Expansion of productive capacity through increased exploration and enlarged refining capacity are badly needed. In addition, industry should be given every encouragement to stimulate exploration on the Continental Shelf and in the Caribbean and South America. My department is making every effort to assist in this work.

Proved reserves of crude oil in the United States total approximately 21,000,000,000 barrels. Indicated reserves in the Middle East now are placed at 27,000,000,000 barrels, and the results of exploratory drilling in this area are so favorable that the total may be lifted well above 50,000,000,000 barrels. Thus, while the United States remains by far the world's greatest consumer of petroleum, the production center now appears to be moving to the Middle East. Obviously, as a nation, we cannot afford to become dependent upon a long supply line from the Middle East for a commodity as important to our well-being as petroleum.

Because of the growing unbalance between demand and supply, the United States cannot rely exclusively on petroleum to supply all future requirements for liquid fuels and related products. Every effort must therefore be made to develop new domestic sources of fuel oils, lubricants, and gasoline. Fortunately, with the authorization provided in the Synthetic Liquid Fuels Act, one such effort is already well under way. It should be intensified.

In brief, all research laboratories and the oil-shale demonstration plant contemplated by this legislation now are in full operation. A coal hydrogenation demonstration plant will be in operation next summer. Dr. James Boyd, Director of the Bureau of Mines, is here and shortly will give you further details on these operations.

In a recent statement on petroleum requirements before the Special Subcommittee on Petroleum of the Armed Services Committee, House of Representatives, Secretary of Defense James Forrestal said:

"The manufacture of synthetic liquid fuels from coal and shale has the considerable advantage of very extensive coal and shale resources in the United States. I am of the firm opinion," he said, "that the United States Government should not only support pilot-plant operations in the synthetic liquid-fuel industry but also should support a few large-scale plants sufficient to provide the engineering know-how and to advance technical developments. The encouragement and promotion of the synthetic liquid-fuel developments is an important part of the petroleum policy of the National Military Establishment."

The development of synthetic fuels should be an equally important part of our national economic policy. A serious deficiency of liquid fuels could stop us abruptly in our progress toward greater industrial achievement and a strong, expanding economy. We have evidence of that possibility today in the closing of industrial plants and the laying off of workers as a result of the current shortage of petroleum.

It is my own conviction that the magnitude of a synthetic fuels industry adequate to compensate for the foreseeable deficiency in domestic petroleum requires that a start be made immediately, using data already available from research and demonstration plant work. The establishment of such an industry would be far too large an operation and would require too much time to be undertaken only after a national emergency had arisen. To attempt it then inevitably would result in a repetition of the oft-told tale of too little, too late.

To produce daily from synthetic sources the 2,000,000 additional barrels of oil (or slightly less than 40 percent of our current daily consumption) which Secretary Forrestal has said would be needed for another major war effort would require, according to preliminary estimates, about 16,000,000 tons of steel and the expenditure of approximately $9,000,000,000. Such a program would be about 10 times the magnitude of the synthetic-rubber program completed during the last war. It should be undertaken now so that it can be completed over a period of 5 to 10 years, not only as a defense measure but also for our economic security.

In my report I suggested that at least three commercial-size plants should be built as prototypes and as soon as possible if this country is to attain maximum progress toward self-sufficiency in oil. The first would utilize oil shale; the second, coal and the hydrogenation process; and the third, coal and the gas synthesis process.

These plants, I feel, should be built and operated by private industry. Without governmental assistance in some form industry may be reluctant to start plant construction at this stage in the development of synthetic fuels processes with the competition of cheaper petroleum still prevailing and the future clouded with uncertainties.

The immediate requirement is that construction of the initial commercial plants begin at the earliest possible moment. Toward that end, with the advice of industrial groups and the technical aid of the Bureau of Mines, I intend soon to offer specific proposals to initiate an American synthetic liquid-fuels industry.

Mr. MURDOCK. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama [Mr. HOBBS].

Mr. HOBBS. Mr. Chairman, I did not want the debate to close without paying tribute to the author and to the committee that reported this bill for the wisdom they have manifested and for their conservatism in the amount authorized. I believe every cent of it is wisely authorized. I believe you could go even further than you in your wisdom have gone. Yet I certainly do want to congratulate the committee and the author of the bill for bringing this measure to the floor.

The CHAIRMAN. All time has expired. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the act of April 5, 1944 (58 Stat. 190), is amended by changing the words "five years", in the first sentence, to read "eight years", and by changing the numeral "$30,000,000", in section 6, to read "$60,000,000."

Mr. GAVIN. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. GAVIN: On page 1, line 6, strike out the period and insert the following: "and by adding to section 1 of the act the following: 'and a program of production research and secondary recovery from stripper oil fields and in refining processes.' "

Mr. CASE of South Dakota. Reserving a point of order, Mr. Chairman, as the amendment was read, was it an amendment to line 6 of the bill with a further amendment of the original bill?

The CHAIRMAN The amendment goes to page 1, line 6, of the bill now before the committee.

Mr CASE of South Dakota. Mr. Chairman, may I ask to have the amendment again read?

There being no objection, the Clerk again reported the amendment.

Mr. CASE of South Dakota. Mr. Chairman, may I ask the gentleman what he thinks the cost of that program would be, that would be provided for a feature not incorporated in the basic act at the present time?

Mr. GAVIN. That is a rather difficult question to answer. However, I do think that this program could be safely undertaken for approximately $1,000,000.

Mr. CASE of South Dakota. Obviously if we are going to take a considerable amount of money out of the authorization for establishing a new program, it would raise a question as to its desirability on this legislation. I would be glad to withhold the point of order and let the gentleman make a statement. I would like to have it understood, however, that if this program of research is to be extended to a program of research for secondary recovery from stripper wells and refining processes, that not more than a million dollars be allocated to such purpose from this particular authorization.

Mr. GOSSETT. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. GOSSETT. I think these figures have not been put into the RECORD and they are very important. Experts have recently testified that while we have a recovery in this country of 28,000,000,000 barrels of oil, their estimates in the same fields show that 100,000,000,000 barrels could be recovered. In the Bradford field in Pennsylvania, for example, by primary recovery methods they took from that field 236,000,000 barrels, and then by the application of secondary recovery processes they got another 236,000,000 barrels, but they still have in that field alone more oil not recovered than has been recovered.

Mr. GAVIN. At that point may I say they contend there are between six and seven hundred million barrels still remaining in the sand, and I call to your attention, that is a very old field.

Mr. GOSSETT. That is true. Some gentlemen have made the statement that we now have recoverable reserves of some 22,000,000,000 barrels. We have at

least 100,000,000,000 barrels in those same areas that are not recoverable under present production methods. This bill is a bill to increase the fuel supplies in the country. It certainly ought to be extended to experimentation into the recovery of petroleum. What we want is something that will benefit the country as a whole. These secondary recovery processes are tremendously important. It might interest you to know that of the 420,000 oil wells in this country now, 300,000 of them or 70 percent, are stripper wells. That is, small wells, producing 3, 5, 6, or 7 barrels a day. Those wells are being abandoned at a tremendous rate. I think 9,000 were abandoned last year.

Mr. GAVIN. Nine thousand in 1945. Abandonment of these wells leave approximately 18,000,000 barrels of oil in the ground beneath those wells that have not been recovered but must be recovered by some new technique of reaching those sands to get that oil out.

Mr. GOSSETT. Then again it is entirely probable that scientists will, by the development of new formulas for manufacture, be able to make the existing supplies of gasoline go twice as far. So that when you exclude from the provisions of this bill all stripper fields and refining processes you are taking out of operation a tremendous area in which some experimentation should be carried on.

Mr. CASE of South Dakota. As explained, the amendment should serve the broad basic purpose of increasing fuel reserves and supplies. My object in raising the point of order was to be sure that we have a limitation on the amount diverted to this phase of research from this particular authorization. I believe the chairman has some language in mind to accomplish this; or it could be accomplished by inserting right after the word "and" of the amendment the additional words: "That not to exceed $1,000,000 of the amount authorized by this act may be applied to a program," and so forth.

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. RICH. I would agree to the gentleman's suggestion for this reason: The other day, along with the gentleman from Pennsylvania [Mr. GAVIN] I had in my office Mr. Larry Smith, of the Independent Petroleum Association of America; John Paul Jones; and Don T. Andrus. I asked them what amount of money would be necessary to start this program. Some people naturally would like to get all the money they could, but then I thought it would seem high, so I asked: "Why do you not start out with the program of investigation and then enlarge the program as you progress in the development of some process that will extract this oil from the ground?" They thought that was a wise procedure, and Mr. Larry Smith said: "If we had a million dollars we think we could go ahead and start this program satisfactorily." For this reason, I think a limitation of $1,000,000 is all right.

Mr. LEMKE. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. LEMKE. I shall not object, but I would suggest to the gentleman from Pennsylvania that hereafter he come before the committee with such suggestions rather than to bring them in at this late time, when the bill is about to be passed.

Mr. RICH. I would remind the gentleman that the bill had already been reported from his committee when I talked with these gentlemen.

The CHAIRMAN. Does the gentleman from Pennsylvania care to be heard on the point of order?

Mr. GAVIN. Mr. Chairman, I ask unanimous consent that the Clerk may read the amendment as it would be modified by the suggestion of the gentleman from South Dakota [Mr. CASE].

The CHAIRMAN. Without objection, the Clerk will report the amendment as it would be modified.

There was no objection.

The Clerk read as follows:

On page 1, line 6, strike out the period and insert the following: "and by adding to section 1 of the act the following: 'and that not to exceed $1,000,000 of the amount authorized by this act may be applied to a program of research on secondary recovery from stripper oil fields and in refining processes.' "

Mr. CASE of South Dakota. Mr. Chairman, if that is acceptable I will withdraw my reservation of the point of order.

Mr. GAVIN. Mr. Chairman, I believe the gentleman from Oklahoma [Mr. MONRONEY] wishes to raise a question as to the interpretation of the word "stripper." Let us clarify that right now. We will accept the modification.

Mr. CASE of South Dakota. If the amendment to the amendment is acceptable to the gentleman from Pennsylvania I will withdraw my point of order.

Mr. GAVIN. I will agree to that.

The CHAIRMAN. Is there objection to the modification of the amendment as indicated?

There was no objection.

Mr. WELCH. Mr. Chairman, the committee accepts the amendment as modified.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Amendment offered by Mr. GAVIN: Page 1, line 6, strike out the period and insert the following: "and by adding to section 1, of the act the following: 'And not to exceed $1,000,000 of the amount authorized by this act may be applied to a program of research on secondary recovery from stripper oil fields and in refining processes'."

Mr. MURDOCK. Mr. Chairman, I ask unanimous consent to extend my own remarks in the RECORD at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. MURDOCK. Mr. Chairman, when I first heard the amendment proposed by the gentleman from Pennsylvania [Mr. GAVIN] and the proposal sanctioned by the gentleman from Arkansas [Mr. HARRIS] and other gentlemen from the older oil-producing sections, it occurred to me that it was a good idea. However, I thought at first that instead of offering it as an amendment to this bill, it ought to be offered as separate legislation for certainly it is worthy of a large and independent authorization and appropriation. We are told that under present methods oil fields are considered depleted and are frequently abandoned while there is yet remaining in the ground three or four times as much oil as has been taken out of that field. If such is the case, we certainly ought to have research to find methods and technique for getting a larger proportion out than we are now getting.

Since the amendment has been amended and now limits the amount of this authorization to be used in the research on stripper wells and for more efficient methods of recovery in the oil fields, I certainly am in favor of the amendment. As I understand it, it merely earmarks $1,000,000 out of the $30,000,000 contained in the bill for this type of research work. I doubt whether a million dollars is enough, but certainly this is a kind of research which ought to be encouraged.

I am no engineer, and I may be indulging in some wishful thinking, but I hope that a new technique has already been found for extracting more oil from a field which has formerly been considered exhausted. In the September issue of Fortune magazine for 1947 I found an article entitled "Horizontal Drilling," in which it is claimed that a great engineer has been able by a new method to tap and extract petroleum and other liquid minerals from the earth with far greater efficiency than can be done by presently used methods of pumping from vertical wells. The appearance of this article in such a reliable magazine leads me to hope that better recovery in all of our oil fields may be expected in the future.

Other articles that I have read in earlier issues of the Fortune magazine for 1947 lead me to hope that a practical, efficient, economical technique will be worked out whereby gas or oil may be extracted from coal in the ground or distilled from shale in place in inaccessible regions and the commercial product transported to industrial centers where needed without the great cost of mining and shipping great tonnage of ore. Much more than a million dollars could well be invested in research that will show if these things are possible and feasible.

Mr. MONRONEY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma is recognized for 5 minutes.

Mr. MONRONEY. Mr. Chairman, I take the floor for the purpose of clarifying the definition of "stripper wells."

Mr. Chairman, I am heartily and enthusiastically in favor of Mr. GAVIN'S amendment. I want to be clearly understood on that point. No money that could be allocated by the Congress could be productive of such long-range benefits to the Nation as to increase and improve the production of oil and the discontinuance of the abandonment in old oil fields of more than half of our oil reserves which are never recovered.

I take the floor at this time to inquire of the author of the amendment, the gentleman from Pennsylvania [Mr. GAVIN], if he will enlighten us on the meaning of "stripper wells"?

I am sure he does not wish to confine this to the extremely small producers of

5 or 10 barrels a day, but intends to include in the definition of "stripper wells" any field in which a large quantity of oil remains but which cannot be produced economically under known production methods.

Mr. GAVIN. I may say in answer to the gentleman's question that he is correct. That is my interpretation.

Mr. MONRONEY. This will not limit it to small pumping wells but will include those wells in which a large reserve of oil is still there but which cannot be produced economically at this time?

Mr. GAVIN. And I might say in those fields many oil wells are being rapidly abandoned because there is no economic justification for continued pumping as they do not produce sufficient oil. Once the well is abandoned, the oil in the earth is lost. We should make every effort to carry on programs of research to find new methods to recover that oil, particularly in those fields to which the gentleman refers. The gentleman is right.

Mr. MONRONEY. I am glad to have the gentleman's clarification because I think it is of extreme importance to this country.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. MONRONEY. I yield to the gentleman from Arkansas.

Mr. HARRIS. The gentleman, being from an oil-producing State, knows that a stripper well, of course, is where a pool of oil has been depleted beyond a recoverable prog am under present and existing methods. A well at the present time might be classified as a stripper well producing 5, 10, or 12 barrels per day. Under methods of a secondary recovery program that well might produce many, many more barrels a day.

Mr. MONRONEY. Exactly.

Mr. HARRIS. And the gentleman is correct when he says that a stripper well may not be limited to the ultimate recovery of oil to only 4 or 5 barrels.

Mr. MONRONEY. That is exactly right. To make my position more clear, oil is being produced in my State below 10,000 feet deep. Obviously a well that is producing from 1,000 feet, that produces 4 or 5 barrels a day, is of no greater importance to the country than a well 12,000 feet deep producing 300 to 500 barrels a day. Both of them might be uneconomical under the present known production methods. It is for this reason, I think, that we have to stimulate the ultimate recovery of the maximum oil reserves of this country that are still in the ground and which under present methods are abandoned and posterity loses all hope of recovery of at least 50 percent of our oil reserves.

Mr. MICHENER. Mr. Chairman, will the gentleman yield?

Mr. MONRONEY. I yield to the gentleman from Michigan.

Mr. MICHENER. This bill is a research bill providing methods of study to determine a new way of bringing into being a new type of fuel. Do I understand from the pending amendment that the result might be that uneconomical wells will be subsidized?

Mr. MONRONEY. Oh, no, the gentleman is completely misinformed.

Mr. GAVIN. That has no bearing on the question at all. This amendment is for the purpose of research to find new methods to try to get the greatest amount of oil out of the earth that is recoverable.

Mr. MICHENER. That is what I wanted to clear up. I wanted to know whether or not it is a research bill or whether or not the company will be subsidized to the extent of making the operation profitable in getting the oil out of the ground.

Mr. GAVIN. This is for research only, studies to be conducted by the Bureau of Mines, to recover oil still remaining in the sands.

Mr. MICHENER. I cannot imagine the gentleman from Pennsylvania favoring a subsidy even though it might have some effect in his own district.

Mr. GAVIN. I may say to the gentleman, my very good and able friend from Michigan, this has no bearing on subsidies and he knows how I feel about subsidies.

Mr. MONRONEY. It is important to have these scientific methods applied and that was the purpose of my question to clarify this amendment.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. BATES of Massachusetts. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to compliment the gentleman from Pennsylvania [Mr. GAVIN] for the foresight he has in suggesting this amendment because I can visualize, as one who has served on many committees of the Congress that investigated the oil situation in this country and also in the Saudi Arabian area, how important it is for us to take advantage of every opportunty we can to develop whatever resources we have, even to the point of our stripper well operations. We all know that the future is uncertain so far as this Nation is concerned, being on wheels as we are, and the prospect that at some time not in the too far distant future the international situation may flare up to a point where we may need a great supply of oil.

We know what the conditions in the Middle East are now. We know the political situation that is rapidly developing, and we know that this country today has not enough oil, and so far as we can anticipate we are faced with the proposition, unless we get into the study pertaining to shale oil and the further development of our stripper well operations, and so on, that we may reach the point where those who are now using oil will have to revert to coal or some other means of heat and locomotion. If, as a result of research, we can develop and produce more oil than we can under present methods, thus augmenting the supply in Pennsylvania and other States, along with our study of the shale operation, I know it will mean a great deal to the State of Pennsylvania as well as to the rest of the country; that is the thing that we ought to do. I am heartily in accord with the amendment that the gentleman from Pennsylvania has offered today to this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. GAVIN].

The amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. SCRIVNER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190), pursuant to House Resolution 453, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

The title was amended so as to read: "A bill to amend the act entitled 'An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shale, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes,' approved April 5, 1944 (58 Stat. 190)."

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. CASE of South Dakota asked and was given permission to revise and extend his remarks and include a statement by Dr. Schroeder, of the Bureau of Mines, on the synthetic liquid fuels of the United States.

Mr. KING (at the request of Mr. MURDOCK) was given permission to extend his remarks in the RECORD and include an article appearing in the Torrance Herald of Torrance, Calif., under date of January 8, 1948.

Mr. BATES of Massachusetts. Mr. Speaker, I ask unanimous consent to have printed in the RECORD and referred to the proper committee of the House for consideration a resolution passed by Captain Lester S. Wass Post, No. 3, American Legion, Gloucester, Mass., regarding legislation benefiting widows and other dependents of war veterans.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

WHAT FOREIGN AID MEANS TO MY PEOPLE

Mr. RICH. Mr. Speaker, I want to point out to the people of my congressional district that foreign gifts, advances for relief and rehabilitation, and other authorizations made to foreign countries by our Government since July 1, 1940, to June 30, 1947, amount to $73,092,058,013. More particularly I want to talk about the gifts since the end of the war, from July 1, 1945, to June 30, 1947, amounting to $24,099,211,087. Think of that staggering sum, and we have given away many hundred millions since June 30, 1947. Those are peacetime gifts and are the ones I shall dwell upon at this time. The other wartime figures are just too staggeringly large to comprehend.

Consider the peacetime gifts since the end of the war, amounting to over twenty-four billion, and the suggested gifts of $17,000,000,000 under the Marshall plan, and the additional $800,000,000 suggested within the past few days for China and the Orient. I shall not even consider today this China gift at this time.

On the basis of the 1940 census, the sum of $24,099,211,087 means $183 for every man, woman, and child in America. It is $616 for the average American family. Now, I want to point out to my people what foreign aid since VJ-day means to them, and I insert a table listing the counties in my district in Pennsylvania, the population of each, and the amount it will eventually cost them if we grant the full aid advocated under the present Marshall plan:

County	1940 population	Foreign aid, July 1, 1945, to June 30, 1947, peacetime assistance	Foreign aid proposed by Truman-Marshall plan now pending	Total foreign aid provided and proposed since July 1, 1945
Cameron	6,852	$1,254,121.56	$988,743.60	$2,242,865.16
Clinton	34,557	6,324,967.71	4,986,575.10	11,311,542.81
Lycoming	93,633	17,137,647.99	13,511,241.90	30,648,889.89
McKean	56,673	10,372,859.19	8,177,913.90	18,550,773.09
Potter	18,201	3,331,329.03	2,626,404.30	5,957,733.33
Tioga	35,004	6,406,782.12	5,051,077.20	11,457,859.32
Total	244,930	44,827,707.60	35,341,956.00	80,169,663.60

Now, residents of the Fifteenth Congressional District of Pennsylvania, you see that if this sum is appropriated it will cost you over $80,000,000. A sizable sum, I would say. It is too large for me to obligate my people to pay without their consent.

I insert here a chart showing the amount the Fifteenth District has paid, by counties, for the year 1946, in county tax, road, and borough, and school tax, as well as prior years collections amounting to $638,445. These figures are from the department of internal affairs at Harrisburg, and the 1947 figures are not yet available. It will be noted that the total tax collected for 1946 from the six counties amounted to $5,587,452.

Tax levies and collections for the Fifteenth Congressional District, 1946

Unit	1946 levy	1946 collections	Prior years collections	Total
M'KEAN COUNTY				
County tax	$281,007	$246,531	$16,882	$263,413
Road and borough	492,019	448,839	30,897	479,736
School	1,028,778	868,477	137,213	1,005,690

Let us analyze what $80,000,000 for the Fifteenth Congressional District of Pennsylvania really means in tangible terms. For instance, the salary of a Congressman is $12,500 per annum, plus $2,500 expense account, making a total of $15,000 per annum. This gift of $80,000,000 would pay the salary of your Congressman for more than 5,000 years. And $80,000,000 will pay the salaries of the 435 Members of the House of Representatives at $15,000 a year for more than 12 years. This is the amount we are asked to give away.

Eighty million dollars will pay for 16,000 homes at $5,000 each for veterans in our district. Is not that something to give to foreign countries? Eighty million dollars will pay 22,000 workers a salary of $3,600 a year. Eighty million dollars will pay all the county, road, and borough, and school taxes of all the people in Cameron, Clinton, Lycoming, McKean, Potter, and Tioga Counties for over 14 years, on the basis of the 1946 taxes. And on the basis of the taxes you paid in 1946, $80,000,000 will pay the taxes of all the people in Williamsport and Lycoming County, which includes your city, your school, your county, your institutions, your road and borough taxes, for over 35 years. Is that not astounding? As stated above, it will pay my home county of Clinton taxes for over 140 years. Would you not like to be relieved of all these taxes? Well, you will be taxed just that much additional if Congress votes the seventeen billions for European recovery as proposed by the Marshall plan. I believe the people would and should change their Member of Congress mighty quick who sold them down the river in this manner and placed such a great obligation upon them for so many years to come.

Eighty million dollars will pay $100 a month to 1,000 aged people in the Fifteenth Congressional District for over 60 years. Would that not satisfy the Townsend clubs?

Just see what the Congress is asked to give away to foreign countries. It is not to help the starving; it is to put these foreign countries on their feet, as it were. But remember that in 1945 we gave Great Britain $4,400,000,000 to do that. Now they are asking $5,348,000,000 additional out of this $17,000,000,000 foreign-aid program. Do you want your Congressman to obligate you for this amount, when the money is being used to socialize Great Britain? It does not make sense to me. Added to our already huge national debt, consider what this will mean to our people. Can you stand it? Has the Congress the right to sell our people short without their consent? It seems to me there has long been need for revision in the executive branch of our Government, from the top to the bottom, and the place to start is in the State Department at once, before it is too late. The New Deal State Department and the President will give us away.

Our national debt now is $267,000,000,000—so large it will take the best we can do for 50 years to pay it. The President has asked for $39,700,000,000 to run the Government for next year. That is entirely too much. He is proposing too many new things before we settle the ones already started. He will wreck us as sure as the world turns on its axis if we do not stop him. Why start socialized medicine now, to cost at least $800,000,000 a year? Why start the St. Lawrence seaway now, at a cost of about a billion dollars? It will do Canada three times as much good as us, and we pay the greater share of the expense. Can we afford it at this time? I say no. Why start universal military training now, at a cost of some $3,000,000,000

a year until we have a stable government? We must keep our Nation strong in air power and scientific warfare, and strengthen our State militia. Federal aid to education has been suggested at a cost of $800,000,000 or more a year. Do we want politics in our public schools? Heaven forbid!

Let us be sensible and make a complete survey of our income and outgo before assuming burdens that will break us down and put us in bankruptcy. If I were called to visit one of my constituents and he needed help, I would try to assist him. If he had a home that needed repairs, I would try to get repairs for him—I would not offer to build him a new and expensive house. If he needed food, I would help him get it. I would try to see that he had a job so that he could earn his living—I would not buy him a farm. Probably we should assist in the rehabilitation of European factories. However if a factory were not up to the standard of the best American factories, it would not be my idea to buy absolutely new, up-to-date machinery and install it, to be used later in competition with our American factories while they must wait for equipment. Our State Department does not work that way. They are of the New Deal type; they do not know the value of the taxpayers' dollar. I say their policy must be changed by electing a Republican President—that is the only way it can be done.

When the 16 European nations made their first report of the amount required, they asked for $42,000,000,000. Easy money. Secretary Marshall said it was not so easy, so they scaled the amount down to $22,000,000,000, just about 50 percent reduction in 3 weeks. Then the State Department scaled it down to $17,000,000,000. Now we want to scale the full amount down to not more than $2,500,000,000 all told. If they cannot go it with that we might as well pick up our marbles and come home. Do too much for others and it is worse than not enough. We have had that proven to us by experience. So get wise and economize.

Where is the United Nations? Where is the Bretton Woods Bank? Where is the Stabilization Fund? We heard so much about them several years ago; why do they not function? They left God out when they opened the sessions of the United Nations. Anything will fail if you do not have God as a partner—nationally or individually.

Out of this seventeen-billion gift, tell me why Holland should be given $2,436,000,000? Why give Denmark $582,000,000? Why give Ireland $497,000,000? Why give Iceland $38,000,000? Why give Norway $234,000,000? Why give Portugal $150,000,000? Why give Sweden and Switzerland $700,000,000? Why assume France's and England's share of the burden in Germany? Why assume all the burden of all the peoples of the world? Why give to our former enemies, Germany, Italy, and Austria, the amount of $7,000,000,000? This gift bag does not make sense to me; it looks more like a grab bag.

If we wreck our own country we are of no use to ourselves or to anybody else. As it stands, the Marshall plan is too good for foreign countries and too bad for us. I shall not vote for it as is. I shall do what I can to protect the interest of my own people, and I hope the Congress will not vote this millstone to be hung around their necks for generations to come. We might as well be realistic and conclude we cannot assume such a burden.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. VURSELL] is recognized for 30 minutes.

THE MARSHALL PLAN

Mr. VURSELL. Mr. Speaker, today I want to discuss the Marshall plan. Through the Friendship Trains and by the shipping of millions of packages to the needy people of Europe, the American people have again demonstrated their generosity to people in time of need.

All of us want to help the needy and the hungry of the war ravished nations. We only differ in amounts and in method. After World War I Herbert Hoover and other leading citizens went to Europe where they supervised and saw to it that the millions of dollars of relief really got to the poor people who needed it. If the major part of our relief was handled in this way in Europe today, we would build up more good will and help more needy people at a fraction of the cost under the method the administration is now using which is costing billions of dollars.

The church organizations of the Nation, the Salvation Army and millions of generous spirited citizens would back a plan along this line if the Government would only get out of the way and give them a chance. The Government would only need to furnish the transportation and pay the expenses of some supervision. The Red Cross and the Salvation Army could share a large part of the burden of overseeing the distribution, yet the Government clings to the more expensive and less effective way.

Mr. Speaker, after loading down the American taxpayers with $56,000,000,000 given away to other nations during the war, and $20,000,000,000 more given to them since the close of the war, the administration is now determined to load an additional $20,000,000,000 on to the economy of this country and the American taxpayers as a gift to European countries under the Marshall plan. How long can this extravagant "give-away policy" of the Truman administration continue without completely wrecking the financial solvency of our Nation?

Instead of building homes for our veterans who won the war, and our civilians who supported the war effort, they now propose in this Marshall plan to give away to Europe enough in material, supplies and money to build 5,000,000 American homes costing $4,000 each, at a time when our veterans who won the war cannot get homes. In order to understand how much $20,000,000,000 really is, let us compare it in another way. Through work, investment, sacrifice and struggle, it has taken over 100 years to build in this country the greatest railroad system in the world. The amount asked for to be given to Europe under the Marshall plan is equal to the value of all the railroad systems of the United States including lands, rails, rolling stock, depots and office buildings.

Mr. Speaker, the administration playing upon the heart-strings of the American people in an effort to put over the $20,000,000,000 Marshall plan has continuously told the people that its major purpose was to feed the starving people of Europe. That is a false premise as I shall show in a break-down of the figures.

Hundreds of thousands of people are thrown out of work today because factories are shut down, and other hundreds of thousands of people in their homes, and wards in hospitals are suffering because they cannot get sufficient fuel oil for heat during these winter months. With this serious condition existing in the United States, there is written into the present bill to be furnished to Europe, for the first 15 months of the Marshall plan, $651,900,000 worth of petroleum products. It is admitted we cannot furnish all of these products, and it is admitted by the sponsors of the bill that we will buy what we cannot furnish from Venezuela and other countries, pay for it, ship, and give it away at the expense of our taxpayers.

Remember, this is only the first installment on the Marshall plan. It will have three more years to run if approved by the Congress. We will be compelled to do this at a time when there is a shortage of oil in this country and it is predicted the shortage will get worse in the years to come. Such a commitment will endanger our own national defense and work great hardships on the American people.

Under this first Marshall plan installment we are to give them $262,500,000 worth of tobacco, and we are committed to buy $30,900,000 from other countries and ship to them in addition. I submit that fuel oil and tobacco are not food for starving women and children as the radio commentators and the administration leaders continue to tell the people.

We are to furnish $285,800,000 worth of crude and finished steel and buy $27,100,000 worth of steel from other countries which we will send to Europe. Steel, short in this country, is not food.

We are to ship and give to the European countries $580,800,000 worth of American cotton and buy from other Western Hemisphere countries $209,200,000 worth of cotton under the first year of the Marshall plan. Again, cotton is not food.

The following table will disclose that under the first 15 months of the Marshall plan with the high cost of living and inflation upon our Government, that we are to ship to the European countries $1,275,500,000 worth of food products as follows:

Break-down of food

Bread grains	$753,800,000
Fats and oils	100,400,000
Sugar	27,900,000
Meat	7,700,000
Dairy products	235,200,000
Eggs	36,000,000
Dried fruits	33,500,000
Rice	7,200,000
Other foods	73,800,000
Total	1,275,500,000

The next table will give you a breakdown of many articles including farm machinery that is to be shipped from the United States to Europe under the first 15 months of the Marshall plan:

Tobacco	$262,500,000
Petroleum products	651,900,000
Agricultural machinery	136,000,000
Coal	388,300,000
Mine machinery	81,900,000
Timber	96,300,000
Electric equipment	95,000,000
Trucks	80,900,000
Freight cars	60,000,000
Steel equipment	48,100,000
Timber equipment	16,900,000
Oil cake and meal	21,100,000
Nitrogen	16,400,000
Phosphates	3,100,000
Cotton	580,800,000
Steel	285,800,000
Total	2,825,000,000

Mr. Speaker, including these and other items the United States is to furnish in supplies and ship to Europe under the first 15 months of the Marshall plan $4,500,000,000 in goods. We are to buy from other Western Hemisphere countries $2,360,000,000 worth of merchandise paid for by the American taxpayer to be shipped to Europe. You will note that of this vast amount that only about 20 percent of it is for food for the hungry people of Europe. The administration's propaganda machine has tried to sell the people that the Marshall plan had for its chief purpose the alleviation of hunger in western Europe.

These figures show what a deceptive and false propaganda campaign has been imposed upon the people of the Nation.

Mr. Speaker, this Marshall plan in fact sets up a world-wide WPA for the purpose of rebuilding 16 nations, including Ireland, Sweden, and Portugal, who did not participate in the war, and including the colonies and dependencies of France in Africa, Holland's dependencies, dependencies of the United Kingdom, and the dependencies of Portugal at the expense of the American taxpayers. If we make this move we will later have to include the countries of South America and other countries of the world.

The figures further show to everyone that to carry this program through shipping this vast amount of cotton, tobacco, steel, petroleum, bread grains, meat, fruit and dried products, farm machinery, coal, timber that we are short of, needed in housing for veterans, electrical equipment, trucks, freight cars, fertilizers, and hundreds of other articles, is the real cause of the present high cost of living.

The American people ought not to be called upon to make this sacrifice. Our Government cannot make this sacrifice without bringing on inflation that may wreck this country. Our Government is not in a position financially with a debt of $256,000,000,000 to carry this load. Our American taxpayers who are entitled to relief from high wartime taxes should not be called upon to finance the giving away of even the first installment of the Marshall plan, which I have shown above will cost our country $6,800,000,000.

Mr. Speaker, in the face of these facts the President, his Cabinet officers who are under his control, all tell the public that the expense of the Marshall plan can be borne without much strain on the economy of our country. They know and the people know such statements are not true.

After exporting over 40 percent of the wheat of the Nation during 1947, the Secretary of Agriculture has the audacity to tell the American people and the Congress that the rise in the cost of living is little affected by the shipping away of this vast amount of wheat and foodstuffs, and blames the Republican Party for the high cost of living.

This administration, in cooperation with the international bankers, and the greedy exporters out for every dollar they can get are now putting on the greatest propaganda drive ever known, in an effort to convince the American people under the guise of preventing starvation and stopping communism, that the $20,000,000,000 Marshall plan should be approved.

Mr. Speaker, in the beginning of this drive those supporting the Marshall plan would never definitely say that it would stop the spread of communism in Europe. They knew it would not. Secretary of State Marshall said it was a calculated risk. Some of them now boldly say it will stop the spread of communism in western Europe. Recently they have resorted to fear in an attempt to scare the American people, and by the greatest use of double talk and deception in high places in Government probably ever witnessed in this Nation.

Mr. Speaker, when the Congress, less than a year ago, voted the Greek-Turkish loan we were assured that it would stabilize Greece, a little country with 7,000,000 people. We had already given that country over $700,000,000. Greece is but a little better off today than she was then, and the President will soon ask for many millions more for Greece. They were wrong again.

Mr. Speaker, less than 2 years ago when the administration insisted that the Congress vote the $4,000,000,000 British loan we were told it would shore up the English Government for 3 years, and probably no more money would be needed from the United States. England is now listed on the Marshall plan for about $5,000,000,000 more if it goes through. They have spent most all of the $4,000,000,000 and the most they have to show for it is the perpetuation of their socialist government in power. They were wrong again.

The President now asks this Congress to vote a $6,800,000,000 first installment on the Marshall plan. If we can judge the future by the past 25 years in loaning money to European countries, we may as well realize that it is a gift and none of it will ever be returned. We may as well realize that we are in for twenty or twenty-five billion dollars on the Marshall plan before we are through.

Mr. Speaker, our European Allies with whom we won the First World War, in loans and interest on such loans owe us over $10,000,000,000 on World War I. Neither France nor England or any country except little Finland ever made a real attempt to pay back the money loaned them over 25 years ago.

Mr. Speaker, 2 months ago, on the plea to prevent starvation in France and Italy, $540,000,000 was voted by this Congress. They told the American people it was to save people from starvation. They did not tell the people that everything that was shipped to France and Italy was turned over to the Governments, and that the Governments sold it to the people. That with such distribution the poor and hungry got the last chance at the food we gave them. They did not tell the American people that less than 25 percent of the money expended was or will be used to send food to those two countries. A great portion of it was for finished manufactured products, steel, raw material, machinery of every kind, and oil and petroleum products which are so short now in the United States.

Mr. Speaker, a news dispatch from Paris on January 17 said:

> France received $53,000,000 worth of goods from the United States in the first 24 days after Congress approved interim aid to Europe.

United States Ambassador Jefferson Caffery said:

> Shipments to January 10 included 1,250,000 tons of coal, only 140,000 tons of bread grains, 200,000 tons of petroleum, 28,000 tons of fertilizer, chemicals, oil, sisal, and cotton.

Less than 30 percent of the $20,000,000,000 asked for in the Marshall plan will be spent for food. The generous-hearted people of America are being deceived. Just last week the State Department wanted to give European nations under the Marshall plan 500 American ships costing our Government over a billion dollars. The Congress will not allow this to be done.

Mr. Speaker, the Marshall plan is a bold one. They propose to ship some of practically all of the production of the United States. They propose to ship out vast quantities of petroleum products when Secretary Krug testified a few days ago that this Government should plan to spend $9,000,000,000 with which to build synthetic plants to convert shale and coal to oil and gas, because he foresees as do most of the American people, ultimately a great shortage of oil in this Nation. They propose to ship finished locomotives, to ship steel plants and factories if they see fit, and to ship out immense quantities of steel and finished products of every kind when we are so short of steel in this country that we must delay building homes for our people, railway cars, manufacture less farm machinery, and when, because of a shortage of steel, we cannot build a pipe line with which to transport oil and gas from the oil fields of Texas to other sections of the United States.

Mr. Speaker, the President cries out against inflation, when, in fact, every policy he has initiated since we won the war has increased inflation. There can be no doubt there is a determined effort on the part of this administration to manage the affairs of this country in such a way as will keep inflation and the high cost of living up until after the November election.

The Marshall plan is certain to continue to increase the cost of living, and will keep inflation running rampant.

Mr. Speaker, this administration which recommended UNRRA, a complete failure

with a loss to this Nation of over $2,000,000,000; that recommended the British loan, Bretton Woods, and the Greek-Turkish loan, all of which have proved a succession of failures, now asks the Members of this Congress to again approve their judgment on $20,000,000,000 more to implement the Marshall plan. With such a record of mistakes we cannot trust their judgment on this proposition which might wreck the financial stability of our Government.

Holland, Belgium, Luxemburg, Denmark, Switzerland, Iceland, Norway, and Sweden, without any aid other than some loans, are up to 90 percent prewar production now, and communism is receding in those countries. The Congress should continue with such aid as is necessary for Germany and Austria 1 year at a time. It is entirely possible that England, France, and Italy may be able to get along, if they will make the proper efforts on their own behalf, without much further aid from the United States. If it is found they should have further aid, no aid should be contracted for more than 1 year. The proposition to bring in 16 nations regardless of whether or not they need aid and attempt to write the 4-year plan of aid of $20,000,000,000 for them is too unreasonable and fantastic to seriously consider.

Mr. Speaker, if this Congress goes through and fastens such an enormous expense on the United States Government there is grave danger that it will wreck financially the only government left in the world capable of continuing its might and power of leadership for the preservation of freedom and liberty, and for world peace.

Mr. Speaker, why adopt foolish extravagant policies that will bleed this Nation white of its supplies and finances while Russia waits her time watching us weaken ourselves as a nation? Such a policy will not stop communism in western Europe or slow it down in this country.

We should only give the minimum amount to European nations that will cause them to put forth the maximum effort to help themselves. Unless they put forth the maximum effort to help themselves all our help will fail and be wasted.

We had better spend a few billions in building the strongest air force in the world. Reinforce our military strength wherever needed, rather than to waste billions needlessly in too much aid to foreign countries.

The strongest air force in the world and a government alert in getting its military strength ready for any eventuality will have a greater effect in stopping Russia from moving further into western Europe, than to weaken ourselves by building up a richer prize in western Europe, that cannot be defended, a prize that Russia can move in and take at her will.

If we will increase our Air Force, go forward with research, yes, increase our fire power so that Russia will know we mean business, Russia is less likely to squeeze western Europe to the point of precipitating a war with a country that is prepared.

Mr. Speaker, you cannot buy off communism with the Marshall plan or any plan. You may be able to stop it if you invest in our own country one-fourth the billions in national defense that would be wasted under the Marshall plan.

Mr. CUNNINGHAM. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield.

Mr. CUNNINGHAM. I wish to compliment the gentleman from Illinois on the information he has given us. The part of his address so far that has interested me is that only 20 percent of the money to be spent under the Marshall plan is to be used for humanitarian purposes. Could the gentleman tell us what the real purpose of the Marshall plan is?

Mr. VURSELL. That is a very good question. The gentleman has put his finger on the point that I wanted to bring out. This administration has not been truthful and fair with the American people. This administration, with the Wall Street bankers, exporters, the CIO, and everyone they could put their finger on, has been deceiving the American people, trying to get them back of this plan to put pressure on the Congress because it was a bread-and-butter proposition, when in fact it is a world-wide WPA rehabilitation program, to shore up and rehabilitate all the nations of the world. When we get western Europe going, if Stalin does not take a notion to take it over, I am wondering where they are going to sell all these manufactured products that will put them on their feet. It is the most fantastic, ridiculous program that has ever been presented to the world. The most dangerous thing that this weak State Department has done was to invite 16 nations to sit around a conference table and divide up what they though this country should give to them in money and supplies. It was too dangerous for a prudent government to have gone so far out on the limb with.

Mr. MASON. Mr. Speaker, does the gentleman care to yield at this time?

Mr. VURSELL. I yield to the gentleman.

Mr. MASON. The gentleman has called the Marshall plan an international WPA. I call the gentleman's attention to the fact that on January 21 our State Department released to the public captured German documents, official papers which had been captured several years before but not released, showing the alliance between Hitler and Stalin and the objectives of that alliance. The very next day in the House of Commons, Bevin announced it was proposed to form a military alliance of those 16 nations that are to be embraced in the Marshall plan, directed against the Soviet Union. Then the following day—please get the timing of this—the following day our State Department gave a full approval of the military alliance named by Bevin the day before. That to my mind means that those three things were timed, that our State Department and our administration had been consulted before Bevin made his announcement and that we agreed to it. Those three steps are three steps toward not a cold war but a shooting war.

Mr. VURSELL. The gentleman, I think, is quite right. The trouble with the State Department and with the administration is that it deliberately leads out so far and gets itself and our Nation in such an endangered position on a false premise that they then say to the Congress, "You cannot now do other than to back us up." It appears they had a complete understanding with Britain as the able gentleman from Illinois suspects.

Mr. CUNNINGHAM. Mr. Speaker, would the gentleman care to yield further?

Mr. VURSELL. I yield.

Mr. CUNNINGHAM. I admit I am somewhat confused about the Marshall plan. I read so many conflicting statements in the press and hear so many conflicting statements over the radio as to just what it will do, what its purpose is, that I am wondering if a gentleman connected with the administration who told me a few days ago may not be correct. This gentleman said the real purpose of the Marshall plan was to keep prices high in the United States; that they are more afraid of a depression than anything else. Does the gentleman know anything about whether or not such a statement is true?

Mr. VURSELL. I will touch on that later. There is no doubt in my mind but that one of the real purposes of the Marshall plan is to keep everything high and to keep inflation going until after the election.

Mr. SCHWABE of Missouri. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield.

Mr. SCHWABE of Missouri. I heard a report yesterday that weather conditions over in Europe are favorable for a sizable crop in the year 1948, that there was plenty of moisture in the land, and that the rainfall was very good. Does not the gentleman think that perhaps that would tend to alleviate the necessity of our sending so much food abroad?

Mr. VURSELL. There is no question that favorable weather will reduce the need for bread grains and food. I know a little about that because we made quite a study of that while I was in Europe. But reverting again to the question of the gentleman from Iowa, I think the position that the Secretary of Agriculture took the other day in stating that they were still going to buy more wheat proves conclusively and without a doubt that they want to keep this inflation up.

Mr. CUNNINGHAM. Mr. Speaker, would the gentleman yield further?

Mr. VURSELL. I yield.

Mr. CUNNINGHAM. I wish to go back to the gentleman's statement that only 20 percent was for humanitarian purposes. It strikes me that is a very important statement. If this is for humanitarian purposes and to prevent starvation, can the gentleman inform us how it happens that the United States has gotten so big-hearted all at once? I understand that for centuries great numbers of people have been dying in India and China every year, dying of starvation, and we have done nothing about it except what the people have

sent just like they are sending now through the Friendship Train and CARE packages. How does it happen that the Government of the United States suddenly becomes interested in starvation from an administration standpoint when it never was before?

Mr. VURSELL. Answering the gentleman's question, I can tell him very little except to say that when we were over there last fall we did not see anyone talking or expecting to starve. While there is a shortage of food and while there have been some strikes there because the people did not have all the food they needed or would like to have, the starvation angle is thrown in only to open the great heart of America, thinking they will relieve that situation when, in fact, 75 percent of every dollar is taken for rehabilitation purposes, and, of course, great amounts of it will be wasted because they now intend to turn this matter over to the State Department and take it out of the hands of the military.

The State Department has had experience only in diplomatic work. I shudder when I think what will happen to the European countries and to our own country when this amount of money is turned over to the State Department.

Mr. CUNNINGHAM. Insofar as the humanitarian angle is concerned, does the gentleman not believe we would do much more for the suffering people of Europe if the Government of the United States would use some of this money to help the people through friendship trains and through the sending of supplies and foodstuffs for the people themselves; for instance, if we would encourage our people to send food over there, by transporting it free, and if that would not help those people more than we would under the Marshall plan and that it would do more for the good will of America than to hand it out in the form of steel and ships and for political purposes that the gentleman says it is being used for under the Marshall plan?

Mr. VURSELL. There is no doubt but that we could build up a great deal of good will if we would have approached this relief problem after the last war as we approached it after the First World War. Admitting it is much bigger now than it was then, we might have had to go much further, but if we had approached it in the way we did then we would not have so much hatred of us in Europe. We send a shipload of our wheat over there, we give it to the government, the government sells it to the miller for $4.25 a bushel, then it goes to the baker and through the ordinary course the fellow who is most susceptible to communism still has trouble getting food and he does not know that it comes from the United States.

You know, we voted the British loan, we voted for the Greek-Turkish loan, we voted for all of these hand-outs and we were told that all of those things were going to attain the objective that we sought. But none of those things ever happened.

The facts are that this Congress is not justified by the mistakes of the past, including Tehran as shown by Ambassador Lane in writing his book recently, the mistakes that were made at Yalta, which have thrown the world into confusion and practically lost the peace of the world, in further appropriating money for these purposes. Now they seek to cover up and endeavor to cure the situation by asking us to dump in $20,000,000,000 more. And they talk about food? They wanted to give away, under the Marshall plan, 500 ships the other day. I think that will probably be stopped.

Mr. Speaker, I have quite a bit more material here that will go in the RECORD, so I will not take more of the time of the House, except to say that the President cries out against inflation, when, in fact, every policy he has initiated since we won the war has increased inflation. There can be no doubt but that there is a determined effort on the part of the administration to so manage the affairs of this country that it will keep inflation going until after the November elections.

We have had the mistakes of UNRRA. We have had all of those mistakes. None of their plans have worked; none of them have been sound. Now they ask us to give to the State Department $20,000,000,000 more out of the pockets of the American people. They seek to saddle a load onto the people of this country that may wreck us completely, the only Nation that is capable of carrying on in a reasonable way for world rehabilitation and world peace.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield to the gentleman from Illinois.

Mr. MASON. I just want to call the attention of the gentleman and the House to the fact that our appeasement program in connection with Stalin at Yalta, Tehran, at Cairo, at Potsdam, and at Quebec, carried through by Roosevelt first, and then followed up by President Truman, has resulted in the mistakes that have now become history; mistakes that mean that we have lost the peace, as the gentleman has just said; mistakes that have already cost us over $20,000,000,000 since the war, and now they say that in order to rectify those past mistakes we should make one more at the recommendation of the State Department, the one that has made most of these mistakes, and adopt the Marshall plan and hand out anywhere from $20,000,000,000 on up. I do not think those mistakes that they have committed warrant our following their advice in this matter.

Mr. VURSELL. I quite agree with the gentleman from Illinois.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield to the gentleman from Mississippi.

Mr. RANKIN. Admiral Standley, testifying before the Committee on Un-American Activities this morning, expressed my views about as well as any man ever has. He said that Russia is attempting to take over the United States by the infiltration method. So, before we go to spending eighteen or twenty billion dollars in Europe, the best thing we can do, as the gentleman has said, is to build the strongest air force on earth and clean the Communists out of this country, beginning, as I said before, with the palace guard of the White House and coming on down through every branch of the Government, and cleaning them out of every labor organization, every college, and every other place of power and influence. If we do that, we will not have any trouble with the Communists abroad.

Mr. VURSELL. I thank the gentleman for his comments. Certainly what he recommends should be our first objective. I am really extremely serious when I say this: We should not only try to strengthen our Government from a military standpoint, but we should try to strengthen it from a moral standpoint among the people. We have got a job of selling to do today among our own people, starting with the labor leaders and on down to everybody in America, that we must work in harmony together and be more tolerant. We have a job of selling to do with the big men in business in this country; that they should be more tolerant and try to get along with the men whom they employ. It is a pitiful picture to think of the heads of labor meeting down in Florida at the present time putting up their lines for strife against the Congress, for strife against business, and on the other hand businessmen putting up their lines in some instances unjustly, when we have got to have wealth to protect ourselves in the future. We can only get wealth with much greater production. There may come a time when we will have to stand alone and battle for the firesides and freedom of this country. We ought to spend the next few years trying to get ourselves in the strongest financial position instead of the weakest, in the strongest moral condition, and in the strongest patriotic position, so that if the time comes, and it may, when all of this reckless spending spree and foolishness is over, the United States of America in cooperation with the Western Hemisphere may have to defend itself, yes, save itself with its own power, not only mechanical but from a financial standpoint as well.

Let us build up and conserve our strength to the point where we will keep our country strong against any eventuality that may be forced upon us.

The SPEAKER pro tempore (Mr. ROCKWELL). Under previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 10 minutes.

FUEL SHORTAGE

Mrs. ROGERS of Massachusetts. Mr. Speaker, I rise to remind the House that on December 6, last, I telegraphed the President and asked him to place an embargo on the shipment of oil and the sending of tankers to foreign countries. After over two months and a half the President has finally, through the Department of Commerce, issued what amounts to an embargo, through not granting licenses to dealers to send oil abroad from the east coast and certain other areas.

I further remind the House that if the President had done what he did under his war powers regarding coal, and issued

an embargo on oil, there would have been no suffering today in the United States from cold. The action is a long time overdue, and still more should be done. I feel that the shortage of oil and the suffering is not confined to the east coast. There is suffering in Michigan, Wisconsin, and other States.

Mr. Speaker, I believe the House should act on this matter, and I have introduced House Joint Resolution 310, to temporarily prohibit the exportation of petroleum and petroleum products. It reads as follows:

Resolved, etc., That except as may be necessary to supply the armed forces of the United States, it shall be unlawful to export petroleum or petroleum products from the United States, or any Territory or possession thereof, to any foreign country or countries during the period beginning on the date following the enactment of this joint resolution and until May 1, 1948. Whoever violates this joint resolution shall be subject to a fine of not more than $5,000 or to imprisonment for 1 year or to both said fine and imprisonment.

Mr. CUNNINGHAM. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield to the gentleman from Iowa.

Mr. CUNNINGHAM. I am much interested in what the gentlewoman from Massachusetts has said about the suffering in parts of the United States other than the East. Last week in the city of Des Moines, Iowa, the mayor found it necessary to appoint a committee of five to pool fuel oil used for heating purposes and ration it to the people to prevent acute suffering. There is real suffering in the Midwest from the lack of fuel oil.

Mrs. ROGERS of Massachusetts. I know there is. I have not looked at this problem from a sectional point of view.

Mr. CUNNINGHAM. I appreciate that.

Mrs. ROGERS of Massachusetts. I feel that this is a matter of transportation. Perhaps you have more difficulty than in other places, but I know the suffering is acute in other sections.

Mr. CUNNINGHAM. Strange as it may seem, Des Moines is a distributing point for one or more pipe lines. Oil comes in there and is stored in huge tanks, and from there it is sent out locally and also piped on to the East. In spite of that, there is an acute shortage of fuel oil in the Midwest territory, where the temperature has been below zero for more than a month, and people are actually suffering.

Mrs. ROGERS of Massachusetts. Does not the gentleman feel there is something very strange about this whole distribution of oil problem?

Mr. CUNNINGHAM. Yes; I do. I personally have introduced a bill and I appeared before the Committee on Interstate and Foreign Commerce this morning and testified in behalf of the passage of the bill to stop all exports of fuel oil, Diesel oil, and other oils used for heating purposes until the crisis is passed.

Mrs. ROGERS of Massachusetts. Then our bills are quite similar.

Mr. CUNNINGHAM. I understand from what the gentlewoman from Massachusetts says that she has a bill almost identical to mine which she has introduced. I hope the Committee on Interstate and Foreign Commerce will give us some relief.

Mrs. ROGERS of Massachusetts. I think everyone in the House with whom I have discussed the problem thus far has been very much interested in securing the passage of legislation of the type that we have introduced.

Mr. CUNNINGHAM. Mr. Speaker, will the gentlewoman yield further?

Mrs. ROGERS of Massachusetts. Yes; I am very glad to yield to the gentleman because I think it is a problem that affects all of us.

Mr. CUNNINGHAM. I was interested this morning when I appeared before the Committee on Interstate and Foreign Commerce to hear the chairman state that there was sufficient legislation on the statute books now so that the administration could stop the exportation of fuel oil and so forth if they cared to do so in order to relieve suffering of people in the United States and that no further action by the Congress was necessary.

Mrs. ROGERS of Massachusetts. That is what I stated in my remarks earlier, that on December 6 I telegraphed the President, I think he was in Florida at the time, to issue an embargo which would prevent the shipment of these precious oils which are needed for heating in our own country and prevent suffering. To date no real action has been taken. The Navy has tried to help out a little bit, but the oil they have available for such relief would be just a drop in the bucket as to what we need and they will very likely need their oil themselves and we do not want to deplete their supplies. I think this should have a very great effect on the price structure. I think the prices of oil would go down and I believe that oil would come out of hoarding very quickly and that whole problem would be solved. It is possible that the President may take further action affecting other sections of the country as well as the east coast.

Mr. CUNNINGHAM. After all, there is really no excuse for the Government of the United States to ship oil abroad when our own people are suffering.

Mrs. ROGERS of Massachusetts. I understand the exports to Canada have increased 385 percent in a very short time and also that the oil being shipped to other countries at a profit and it is not being used for the Canadians themselves. But I understand very recently oil was being shipped to Russia. I find a growing indignation on the part of the people of this country. People have died of the cold in certain localities. This morning I talked long distance with the city manager of Lowell. He tells me that the reserves of fuel-oil dealers are good for only a day-to-day supply and that an emergency situation could happen any day. You know what the situation is in the District of Columbia and in New York where they have had to ban the use of fuel oil in many buildings. You know of the suffering there. Then I might go on to state, which I will insert in the RECORD, concerning the great increase in the price of oil and the price of gasoline. I know the gentleman from Iowa and other Members will join with me in trying to secure the passage out of the Interstate and Foreign Commerce Committee one of the many bills that are before that committee. I know that they will want to see that bill passed by the House. There will be no trouble when such a bill comes to the floor of the House. It is a situation which is almost beyond belief. People are trying to stop the conversion of heating systems from coal to oil. That is a very expensive proposition and I think is very unnecessary if a proper program is worked out. When todays' session of the Congress began, I spoke of a Massachusetts man who had given his life in trying to work out a proper solution of this whole oil problem.

Mr. CUNNINGHAM. May I thank the gentlewoman from Massachusetts and state that the people from Iowa appreciate her efforts just as well as the people from Massachusetts appreciate her good work.

Mrs. ROGERS of Massachusetts. I know the veterans appreciate the very fine work that the gentleman did when he was a Member of the Committee on Veterans' Affairs in securing very valuable legislation for the veterans. The Massachusetts veterans are very grateful to the gentleman from Iowa also.

These oil scarcities will not stop at once. You will have a very far-reaching program before all the legislation that is needed has been passed, in order to have a permanent policy that will give us needed oil.

There have been most mysterious statements made today regarding the amount of oil in the United States; the amount that we import and the amount that we export; and the hoarding of oil. Something should be done about that. But today America first should be kept warm.

STATEMENT OF HON. EDITH NOURSE ROGERS, MEMBER OF CONGRESS, BEFORE HOUSE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, AT HEARING ON HER BILL, HOUSE JOINT RESOLUTION 310, FEBRUARY 9, 1948

Mr. Chairman, I appear in behalf of my bill, House Joint Resolution 310, "To temporarily prohibit the exportation of petroleum and petroleum products." The fuel situation in the District of Columbia, in New York State, in New England, and other parts of the country grows worse each day.

The city manager at Lowell, Mass., informed me this morning that from information he received from the Lowell fuel-oil dealers, they have on hand only a day-to-day supply, and an emergency situation can happen any day.

The District of Columbia, as you have undoubtedly seen in the newspapers, has had many emergency calls for fuel oil and a "brown out" is contemplated in order to save fuel oil.

In New York City, Mayor William O'Dwyer on January 31, on account of the scarcity of fuel oil, put a ban on the use of it, except to priority users such as dwellings, hospitals, institutions, public utilities, transportation and communications, food and restaurant stores, school and health facilities. All other users were to be denied fuel oil. The situation there has grown worse and the situation is bad in other parts of New York State.

The States on the East coast of the United States have received allotments of fuel oil from the Navy Department which is to be returned to the Navy Department in June.

This United States Navy supply of fuel oil, however, is very small only a "drop in the bucket" in comparison with the needs in the States that receive it. Many of the States have already used their allotment of United States Navy fuel oil.

On account of the scarcity of fuel oil in many parts of the country, the price has increased. A recent national survey of the retail price of gasoline showed that the average in 50 cities scattered throughout the United States was 25.64 cents a gallon, including taxes, the highest it has been since 1921. The retail price of No. 2 fuel oil, the kind used in most home burners, has advanced from 9 and 10 cents a gallon last spring and summer to between 13 and 14 cents. The average wholesale prices of all petroleum products rose 56.1 percent between June 1946 and November 1947.

The present embargo of the Department of Commerce of 50 percent is not sufficient to provide sufficient fuel oil for the home users and other priority users in the United States, therefore a full embargo should be placed on fuel oil for the next 2 months during the cold weather to insure sufficient fuel oil for our use. I am anxious to cooperate with the committee in the matter.

The SPEAKER pro tempore. The time of the gentlewoman from Massachusetts [Mrs. ROGERS] has expired.

Under previous order of the House the gentleman from California [Mr. BRADLEY] is recognized for 10 minutes.

THE UNITED STATES MERCHANT MARINE

Mr. BRADLEY. Mr. Speaker, the United States merchant marine needs immediate assistance. Under the provisions of laws passed by the Seventy-ninth Congress and the first session of the Eightieth Congress, the United States Maritime Commission is now chartering war-built merchant vessels to American citizens, and is operating a few ships under general agency agreements. Under the same laws, the United States Coast Guard is granting waivers, in some instances, to war-built vessels which do not provide complete compliance with our rules for safety at sea, and is granting waivers to merchant marine personnel when the best interests of the Nation require such waivers and when they can be granted with comparative safety to all concerned.

While the exact numbers are changing from day to day, as of January 15, 1948, there were 1,114 ships under charter from the Maritime Commission, and 111 operating under general agency agreements. These latter, under general agency, were 8 passenger ships, 8 tugs, and 95 tankers, 27 of these tankers being operated by the United States Navy. Thus there were a total of 1,225 Government-owned ships sailing for private operators on January 15, 1948.

It is safe to say that these 1,225 ships require about 50,000 officers and men for their usual crews, exclusive of personnel needed in normal turn-over as the ships complete their regular voyages.

At the same time, there were approximately 1,000 privately owned ships operating on the high seas under the American flag. It is to be noted that these privately owned ships constitute only about four-ninths of the American merchant fleet.

You may ask why more ships are not privately owned. In general, the answer is very simple. It is that the future of American merchant shipping is too uncertain to justify the investment needed to acquire more ships from the Government, even at the comparatively low prices provided under the Ship Sales Act. And now to top off all the uncertainty previously existing—to stop sales almost entirely—the President has submitted a European recovery program which proposes the further transfer of 500 American ships to foreign nations, a proposal which would force an equal number of American ships off the seas.

Mr. Speaker, the provisions of law under which American ships are now being chartered, or operated under general agency, expire on March 1, 1948. After that date, these Government-owned ships must be put into the reserve fleet as soon as they have completed the voyage then in progress. Commencing on March 1, more than 1,200 American-flag ships must be withdrawn from the world's commerce under current provisions of law.

Also, on March 1, the authority of the Coast Guard to waive deficiencies of the safety-at-sea rules and of the requirements for rating seagoing personnel will expire. This will cause the withdrawal of numerous additional American vessels from trade routes for the accomplishment of shipyard work just at a time when our repair yards are pretty well jammed by the emergency job of strengthening tankers for the transportation of fuel oil needed now in northern communities.

Mr. Speaker, there are only a few days left before the 1st of March—entirely too few to get remedial legislation through the Congress and give operators a fair break in their business of ocean transportation. The other body passed this legislation on Thursday, February 5, and it should be considered by this House as quickly as our procedure will permit, for now, operators have no surety in offering cargo space or passenger accommodations for voyages which may not be allowable under the law; shippers do not know where to turn for assurance of future transportation on many ocean routes; officers and seamen do not know whether they will have jobs 30 days from this date. Uncertainty prevails almost everywhere in maritime circles. Yet, this is not a matter of asking the Government for more money. Quite to the contrary, this shipping pays the Government in good cold cash, for charter operations brought some $180,000,000 into the United States Treasury during the last fiscal year and set up obligations to the Treasury of some $197,000,000. In addition to the cash return to the Treasury, this shipping involves wages to seagoing personnel and to allied activities ashore in amounts which are considerable even in our present tremendous national economy.

I realize that it is the desire of Congress to get the Government out of commercial shipping, and I concur in that aim, but the time has not arrived when that can be done with safety to the Nation and fairness to the Americans who earn their living in the shipping industry. We must first get world conditions somewhat back to normal. We must decide on what place we are to occupy in the ocean carrying trade of the world. Then again, the factor of national defense enters strongly into the whole merchant-ship problem for we spent $15,000,000,000 in building this merchant-ship fleet during the recent war, and every indicator in the world today points to the need of keeping all components of the national defense at a high level of efficiency.

The merchant marine—personnel, material, and operators—constitute a real part of the national defense.

We need this additional merchant-marine legislation at the earliest possible moment.

SPECIAL ORDER

The SPEAKER pro tempore. Under the previous order of the House the gentleman from Massachusetts [Mr. HESELTON] is recognized for 15 minutes.

Mr. MICHENER. Mr. Speaker, the gentleman from Massachusetts [Mr. HESELTON] asks unanimous consent to extend the remarks he intended to make at this point, and to include therein some tables.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

THE OIL SITUATION

Mr. HESELTON. Mr. Speaker, I am glad to be able to report the text of a press release, which, I understand, was issued from the office of the Secretary of Commerce, late this afternoon.

I do not have the new country allocations and types of petroleum products, but they will be available early tomorrow morning and I shall attempt to analyze them for a full report to the House on Wednesday.

This is the action to which I referred earlier today. I understand it is released for publications in the morning papers, Tuesday.

In order to further insure that no petroleum products in critically short supply are shipped from the area of greatest shortage in the United States the Department of Commerce has prohibited the use of its petroleum export licenses to clear shipments from east coast ports, the Office of Internation Trade said today. Although only negligible amounts of such products have been exported from the east coast in recent months, it was felt advisable to make sure that no shipments are made until supplies in this area are substantially increased.

Shipments from Gulf and west coast ports are not affected. This ruling is effective immediately and will be in force until March 31, OIT officials said. If the critical shortage is continued, it may be necessary to extend the restriction beyond that date, it was announced.

Treasury Department said customs officials along the east coast have been instructed to enforce this regulation.

The restricted petroleum products include gas, oil, distillate fuel oils (used for home heating and Diesel equipment), motor gas, kerosene, and residual fuel oil.

OIT also approved country allocations of petroleum products, revised to conform with the reduction of the export quota for the first quarter of 1948, as announced on January 30. Because of continuing petrolum shortages in the United States, importing countries are being asked to make further reductions in their requests for petroleum products in future quarters.

In addition, they are being asked to review immediately the first quarter allocations as listed below to determine whether further reductions can be achieved during the remaining winter months, OIT officials said.

Mr. Speaker, in the time available for study this evening, against the actions taken on January 16 and January 30, I think this is a completely unsatisfactory step. I am glad that the obvious hole has been plugged, but when we consider such language as "In order to further insure that no petroleum products in critically short supply are shipped from the area of greatest shortage in the United States"; "It was felt advisable to make sure that no shipments are made until supplies in this area are substantially increased"; "If the critical shortage is continued, it may be necessary to extend the restriction beyond that date"; "Because of continuing petroleum shortages in the United States, importing countries are being asked to make further reductions in their requests for petroleum products in future quarters", how inadequate it is.

I do not see how anyone can be satisfied that this goes far enough. Certainly, in terms of the shipments made in the 39 days since the first of the year, it seems perfectly fair to insist that immediate further action be taken to reduce the allocations now announced by a minimum of 50 percent to meet the voluntary program undertaken by Canada and extended last week to the end of April. You will note that this relief extends only to the end of March. Everyone knows how long it takes to go through channels here. Let us assume that this can be done by Saturday. That will leave us only 46 days of partial relief. It may be argued this is a blind approach. Possibly it is, but I submit it is no blinder than the inexplicable moves which have been made since January 16.

Of course, it is encouraging to read that motor gas has been included in view of the warnings of shortages in gasoline and recommendations of rationing in some areas next summer. Of course, it is encouraging that these countries are being asked to review immediately the first quarter allocations to determine whether further reductions can be achieved during the remaining 1 month. I regret that this did not occur to anyone in the Department when the first quarter program was being set up and when everyone in the United States who reads a newspaper or listens to radio programs knew that the Northeast was in difficulty and that there was every chance it would be worse as the winter went along.

Lest there be any misunderstanding of my suggestion, and to cover the possibility of any reluctance to frame a prompt message to these countries, I think a cable such as the following would be thoroughly understood and would win immediate cooperation:

Because petroleum products are in critical short supply in this country and because we must insure that supplies in our shortage areas are substantially increased immediately, and because we may find it necessary to extend the existing restrictions beyond March 31 unless we can readjust the situation in this country promptly, we regret to advise you that we believe, in the interest of continuing production in this country, maintaining transportation and public utilities, keeping our schools and hospitals and churches and other institutions and individual homes heated to a minimum degree, and in the interests of being able to assist your government and your people, as the American people hope to do, we must ask you to accept a 50 percent reduction in the allocations to your country as announced by this Department on February 9, effective immediately.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. TAYLOR (at the request of Mr. KEARNEY), indefinitely, on account of official business.

To Mr. COURTNEY (at the request of Mr. PRIEST), for 1 week, on account of illness in family.

AUTHORIZATION TO SPEAKER TO PERFORM CERTAIN ACTS DURING ADJOURNMENT OF HOUSE

Mr. MICHENER. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until Thursday next it shall be in order for the Speaker to sign enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MICHENER. Mr. Speaker, I also ask unanimous consent that notwithstanding the adjournment of the House until Thursday next it may be in order for the Speaker to appoint commissions, boards, and committees authorized by law and by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 134. An act to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190); to the Committee on Public Lands.

S. J. Res. 173. Joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

BILL PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on February 5, 1948, present to the President for his approval a bill of the House of the following title:

H. R. 1826. An act making it a petty offense to enter any national-forest land while it is closed to the public.

ADJOURNMENT

Mr. MICHENER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 12 minutes p. m.) the House, pursuant to its previous order, adjourned until Thursday, February 12, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1291. A letter from the Acting Secretary of the Navy, transmitting a draft of a proposed bill to amend section 8 of the Pay Readjustment Act of 1942, as amended, so as to allow certain commissioned warrant officers of the armed forces to count other active commissioned service in the computation of service for advancement to certain pay periods; to the Committee on Armed Services.

1292. A letter from the Secretary of the Interior, transmitting a report pursuant to section 13 of the act of June 25, 1910 (36 Stat. 858), authorizing the Secretary of the Interior to reserve from all appropriations lands within Indian reservations valuable for power or reservoir sites or necessary for use in connection with irrigation projects; to the Committee on Public Lands.

1293. A letter from the Acting Secretary of the Navy, transmitting a draft of a proposed bill to prevent retroactive checkage of retired pay in the cases of certain enlisted men and warrant officers appointed or advanced to commissioned rank or grade under the act of July 24, 1941 (55 Stat. 603), as amended, and for other purposes; to the Committee on Armed Services.

1294. A letter from the Postmaster General, transmitting a tabulation showing the number of envelopes, labels, and other penalty inscribed material on hand and on order June 30, 1947; the number of pieces procured; the estimated mailings; and the estimated costs by departments and agencies for the period July 1 to September 30, 1947; to the Committee on Post Office and Civil Service.

1295. A letter from the Secretary of Defense, Attorney General, and Secretary of the Interior, transmitting a draft of a proposed bill to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores of the United States; to the Committee on Public Lands.

1296. A letter from the Secretary of the Interior, transmitting a report pursuant to the act approved June 25, 1910 (36 Stat. 847, 16 U. S. C., sec. 471, 43 U. S. C. 141 et seq.), showing tabulations submitted by the Director of the Bureau of Land Management showing the withdrawals and restorations made under the act during the period from January 1, 1947, through December 31, 1947; to the Committee on Public Lands.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. KEATING: Committee on the Judiciary. H. R. 4304. A bill providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during World War II; with an amendment (Rept. No. 1360). Referred to the Committee of the Whole House on the State of the Union.

Mr. TABER: Joint Committee on the Legislative Budget. House Concurrent Resolution 147. Concurrent resolution establishing the ceiling for expenditures for the fiscal year 1949 and for appropriations for the fiscal year

1949 to be expended in said fiscal year; without amendment (Rept. No. 1361). Referred to the Committee of the Whole House on the State of the Union.

Mr. ARENDS: Committee on Armed Services. S. 1195. An act to repeal the laws relating to the length of tours of duty of officers and enlisted men of the Army at certain foreign stations; without amendment (Rept. No. 1362). Referred to the Committee of the Whole House on the State of the Union.

Mr. ARENDS: Committee on Armed Services. S. 1528. An act to authorize the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury to accept and use gifts, devises, and bequests for schools, hospitals, libraries, cemeteries, and other institutions under the jurisdiction of the Department of the Army, the Department of the Navy, the Department of the Air Force, or the Department of the Treasury respectively, and for other purposes; without amendment (Rept. No. 1363). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAVIS of Georgia: Committee on Post Office and Civil Service. House Joint Resolution 304. Joint resolution to authorize the issuance of a special series of stamps commemorative of the one-hundredth anniversary of the birth of Joel Chandler Harris, author of the Uncle Remus stories; without amendment (Rept. No. 1364). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOFFMAN: Committee on Expenditures in the Executive Departments. Eighth intermediate report relating to investigation of Agricultural Adjustment Agency and Production and Marketing Administration publicity and propaganda in Nebraska; without amendment (Rept. No. 1365). Referred to the Committee of the Whole House on the State of the Union.

Mr. LEWIS: Committee on the Judiciary. H. R. 4931. A bill to amend the act entitled "An act to codify and enact into positive law title 17 of the United States Code entitled 'Copyrights,'" approved July 30, 1947; with amendments (Rept. No. 1366). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ROGERS of Massachusetts: Committee on Veterans' Affairs. H. R. 4943. A bill to extend the authority of the Administrator of Veterans' Affairs to continue and establish offices in the territory of the Republic of the Philippines; with amendments (Rept. No. 1367). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOFFMAN: Committee on Expenditures in the Executive Departments. House Concurrent Resolution 131. Concurrent resolution against adoption of Reorganization Plan No. 1 of January 19, 1948; without amendment (Rept. No. 1368). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FELLOWS: Committee on the Judiciary. S. 257. An act for the relief of Yoneo Sakai; without amendment (Rept. No. 1352). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. S. 305. An act for the relief of Mrs. Hilda Margaret McGrew; without amendment (Rept. No. 1353). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. S. 316. An act for the relief of Mary Sungduk Charr; with an amendment (Rept. No. 1354). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. S. 409. An act for the relief of Milan Jandrich; without amendment (Rept. No. 1355). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. S. 457. An act for the relief of Anna Kong Mei; without amendment (Rept. No. 1356). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. S. 521. An act to permit the naturalization of Sang Hun Shim; with an amendment (Rept. No. 1357). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 3787. A bill for the relief of Mrs. Maria Smorczewska; without amendment (Rept. No. 1358). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 4050. A bill to record the lawful admission to the United States for permanent residence of Moke Tcharoutcheff, Mme. Lucie Baptistine Tcharoutcheff and sons, Raymond and Robert Tcharoutcheff; with amendments (Rept. No. 1359). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 3 of rule XXII, the Committee on Veterans' Affairs was discharged from the consideration of the bill (H. R. 5221) to exempt from estate tax national service life insurance and United States Government life insurance, and the same was referred to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JOHNSON of Indiana:

H. R. 5305. A bill to authorize the transfer to the Attorney General of a portion of the Vigo plant, formerly the Vigo ordnance plant, near Terre Haute, Ind., to supplement the farm lands required for the United States prison system; to the Committee on Expenditures in the Executive Departments.

By Mr. BUTLER:

H. R. 5306. A bill to increase the maximum travel allowances for railway postal clerks, acting railway postal clerks, and substitute railway postal clerks; to the Committee on Post Office and Civil Service.

By Mr. DIRKSEN:

H. R. 5307. A bill to amend the act of August 7, 1946, so as to authorize the making of grants for hospital facilities, and for other purposes; to the Committee on the District of Columbia.

By Mr. GOFF:

H. R. 5308. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

H. R. 5309. A bill for the acquisition of a site and the erection of a post office at Emmett, Idaho, and appropriating money therefor; to the Committee on Public Works.

By Mr. JACKSON of Washington:

H. R. 5310. A bill to authorize the admission into the United States of persons of races indigenous to Siam, and to make them racially eligible for naturalization; to the Committee on the Judiciary.

By Mr. McGREGOR:

H. R. 5311. A bill granting pensions to veterans of World War I and World War II who are 55 years of age or over; to the Committee on Veterans' Affairs.

By Mr. PRESTON:

H. R. 5312. A bill to amend the Servicemen's Readjustment Act of 1944, as amended, to provide homes for veterans, through veterans' homestead associations, and the public facilities essential therefor; to the Committee on Veterans' Affairs.

By Mr. SANBORN:

H. R. 5313. A bill to authorize the Secretary of the Interior to construct the Preston Bench project, Idaho, in accordance with the Federal reclamation laws; to the Committee on Public Lands.

By Mr. SHAFER:

H. R. 5314. A bill to strengthen national security and the common defense by providing for the maintenance of an adequate domestic rubber-producing industry, and for other purposes; to the Committee on Armed Services.

By Mr. WELCH:

H. R. 5315. A bill to ratify the administrative promotions of employees on military furlough from field postal service, in certain cases, and for related purposes; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON of California:

H. R. 5316. A bill to provide for an act transferring from the Secretary of the Navy to the Secretary of the Interior jurisdiction over lands of the United States within the boundaries of Naval Petroleum Reserves Nos. 2 and 3, and abolishing such naval petroleum reserves; to the Committee on Armed Services.

By Mr. SMITH of Virginia:

H. R. 5317. A bill to amend an act approved July 16, 1947, entitled "An act to provide revenue for the District of Columbia, and for other purposes"; to the Committee on the District of Columbia.

By Mr. WOLVERTON:

H. R. 5318. A bill to provide for the continuation of the transportation services of the Inland Waterways Corporation, for the disposition of its property and other interests, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GORE:

H. R. 5319. A bill to name the Dale Hollow Dam the Cordell Hull Dam; to the Committee on Public Works.

By Mr. PETERSON:

H. R. 5320. A bill to conform and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

H. R. 5321. A bill to provide that enlisted personnel discharged from the armed forces to accept commissions shall suffer no reduction in benefits under part VIII of Veterans Regulation No. 1 (a) by reason of such discharge; to the Committee on Veterans' Affairs.

By Mr. COLE of New York:

H. R. 5322. A bill to amend the Lanham Act so as to permit private sales of permanent war housing to local communities; to the Committee on Public Works.

By Mr. GORE:

H. R. 5323. A bill to declare the Obey River, Tenn., to be nonnavigable; to the Committee on Interstate and Foreign Commerce.

By Mr. VAIL:

H. R. 5324. A bill to repeal the tax on oleomargarine; to the Committee on Agriculture.

By Mr. ANDERSON of California:

H. R. 5325. A bill to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755), as amended, to provide that regulations for any area, section, or flyway of the country shall be based on conditions and needs existing within such area, section, or flyway; to the Committee on Merchant Marine and Fisheries.

H. R. 5326. A bill to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755), as amended, to provide for an advisory committee; to the Committee on Merchant Marine and Fisheries.

By Mr. DAWSON of Utah:

H. R. 5327. A bill to authorize the construction, operation, and maintenance of the

Weber Basin reclamation project, Utah; to the Committee on Public Lands.

By Mr. DEVITT:

H. R. 5328. A bill to amend paragraph 1803 (2) of the Tariff Act of 1930, relating to firewood and other woods; to the Committee on Ways and Means.

By Mr. ELSTON:

H. R. 5329. A bill to authorize the construction of a water pollution control laboratory building at Cincinnati, Ohio; to the Committee on Public Works.

By Mr. SABATH:

H. J. Res. 319. Joint resolution providing for the observance of October 11, 1948, as General Pulaski Memorial Day; to the Committee on the Judiciary.

By Mr. HAGEN:

H. J. Res. 320. Joint resolution to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the creation of the Territory of Minnesota; to the Committee on Post Office and Civil Service.

By Mr. ENGEL of Michigan:

H. J. Res. 321. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. HESELTON:

H. J. Res. 322. Joint resolution to temporarily prohibit the exportation of petroleum and petroleum products; to the Committee on Interstate and Foreign Commerce.

H. J. Res. 323. Joint resolution to temporarily prohibit the exportation of petroleum and petroleum products; to the Committee on Interstate and Foreign Commerce.

H. J. Res. 324. Joint resolution to temporarily prohibit the exportation of petroleum and petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. DIRKSEN:

H. Res. 462. Resolution to appoint a select committee of the House of Representatives to investigate possible fraudulent income-tax returns filed with the collector of internal revenue at New Orleans, La.; to the Committee on Rules.

By Mr. BENDER:

H. Res. 463. Resolution to authorize the Committee on Armed Services to investigate and study the court martial of Pvt. Thomas Gusik; to the Committee on Rules.

By Mr. YOUNGBLOOD:

H. Res. 464. Resolution to authorize the Committee on Interstate and Foreign Commerce to investigate and study natural and artificial gas shortage; to the Committee on Rules.

By Mr. HAVENNER:

H. Res. 465. Resolution requesting Atomic Energy Commission to report on the feasibility of constructing and operating plants to provide stand-by supplies of heat; to the Joint Committee on Atomic Energy.

By Mr. KING:

H. Res. 466. Resolution to instruct the Interstate and Foreign Commerce Committee to formulate legislation authorizing the United States Public Health Service to establish and finance medical scholarships to meet increased demand for doctors in the Government and the Nation at large; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Mississippi, memorializing the President and the Congress of the United States of the grave apprehension and vigorous opposition of the people of this State to the recommendations of President Truman's Committee on Civil Rights, and urging opposition to any congressional enactment of said recommendations; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ABERNETHY:

H. R. 5330. A bill for the relief of W. W. DeLoach, of Kosciusko, Miss.; to the Committee on the Judiciary.

By Mr. CARROLL:

H. R. 5331. A bill for the relief of Vaso B. Benderach; to the Committee on the Judiciary.

By Mr. CASE of South Dakota:

H. R. 5332. A bill for the relief of Walter E. Parks; to the Committee on the Judiciary.

By Mr. DAVIS of Wisconsin:

H. R. 5333. A bill for the relief of Mrs. Tjitske Bandstra Van Der Velde; to the Committee on the Judiciary.

By Mr. FISHER:

H. R. 5334. A bill for the relief of the heirs of Ross Kennedy and Jane Rankin Kennedy; to the Committee on the Judiciary.

By Mr. GOFF:

H. R. 5335. A bill for the relief of Ben W. Schubert; to the Committee on the Judiciary.

By Mr. KEATING:

H. R. 5336. A bill for the relief of Leon Moore; to the Committee on the Judiciary.

By Mr. KEFAUVER:

H. R. 5337. A bill for the relief of Thomas J. Anderson; to the Committee on the Judiciary.

By Mr. LANHAM:

H. R. 5338. A bill for the relief of Agnese R. Mundy; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H. R. 5339. A bill for the relief of John Keith; to the Committee on the Judiciary.

By Mr. NODAR:

H. R. 5340. A bill for the relief of Stanislaw Benedykt Pyka; to the Committee on the Judiciary.

By Mr. PETERSON:

H. R. 5341. A bill to confer jurisdiction upon the United States Court of Claims to hear, determine, and render judgments upon the claims of Tampa Shipbuilding Realty Corp.; to the Committee on the Judiciary.

By Mr. PHILLIPS of California:

H. R. 5342. A bill for the relief of Frank Haegele; to the Committee on the Judiciary.

By Mr. WELCH:

H. R. 5343. A bill for the relief of Mrs. Maria Salome Holland; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1313. By Mr. BATES of Massachusetts: Petition of Lester S. Wass Post, No. 3, American Legion, Gloucester, Mass., and others, urging the enactment of legislation benefiting widows and other dependents of war veterans; to the Committee on Veterans' Affairs.

1314. By Mr. ELSTON: Petition of Mrs. Marguerite McDowell and 30 other citizens of Cincinnati, Ohio, in support of universal military training; to the Committee on Armed Services.

1315. Also, petition of Mrs. C. Lashbrook and 55 other citizens of Cincinnati, Ohio, and vicinity, in support of universal military training; to the Committee on Armed Services.

1316. Also, petition of Mrs. Margaret D. Green, president, and 16 other members of American Legion Auxiliary Unit of Post No. 146, Cincinnati, Ohio, in support of universal military training; to the Committee on Armed Services.

1317. Also, petition of Wilson C. Henize and 34 other citizens of Cincinnati, Ohio, and vicinity, in support of universal military training; to the Committee on Armed Services.

1318. By Mr. REED of Illinois: Six petitions of Russell M. Kreitzer, adjutant, Glen Ellyn Post, No. 3, the American Legion, Glen Ellyn, Ill., containing the signatures of 81 residents of Glen Ellyn, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1319. Also, petition of Hinsdale Post No. 250, the American Legion, Hinsdale, Ill., containing the signatures of 26 residents of Hinsdale, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1320. Also, petition of West Chicago Post, No. 300, the American Legion, West Chicago, Ill., containing the signatures of 80 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1321. By the SPEAKER: Petition of L. G. Wayne and others, petitioning consideration of their resolution with reference to the enactment of House Resolution 46; to the Committee on Rules.

1322. Also, petition of the city of Chelsea, Mass., petitioning consideration of their resolution with reference to legislation for the defense of Jews in Palestine against the Arab world; to the Committee on Foreign Affairs.

1323. Also, petition of Alice E. Logleson and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1324. Also, petition of J. B. Gardhouse and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1325. Also, petition of Mrs. F. A. Winchell and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

SENATE

WEDNESDAY, FEBRUARY 11, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Father, as we remember the great men who by their trust in Thee helped to give this Nation its glorious heritage, remind us that we honor them best when we follow their good example.

Give to the people of America, and to their leaders, the old-fashioned simplicity of faith, the old-fashioned honesty, and the old-fashioned love of country that sought to give rather than to get.

Help us to acknowledge our dependence upon the patience that forgives our failures, the truth that indicts our compromise and our hypocrisy.

We ask Thee not for tasks more suited to our strength, but for strength more suited to our tasks.

May we so live that the sacrifices that have been made for our liberty shall not have been in vain.

This we ask in the name of Thy dear Son, our Lord and Master, Jesus Christ. Amen.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Monday, February 9, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed a bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shale, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190), in which it requested the concurrence of the Senate.

DEATH OF FORMER SENATOR JOSEPH S. FRELINGHUYSEN

Mr. HAWKES. Mr. President, it is with deepest sorrow that I announce to the Senate the death of former Senator Joseph S. Frelinghuysen, who was called into the Great Beyond on Sunday night, February 8, 1948.

Senator Frelinghuysen served with distinction in this body from 1917 to 1923, and made a substantial contribution to Senate activities during his term.

In addition to service in the upper house at New Jersey's capitol in Trenton and other political activities, Senator Frelinghuysen was an outstanding figure in the insurance field. He began his business career as an office boy for a vinegar-producing company at $4 a week when 18 years of age. He quit that job for another position as office boy with the Continental Insurance Co. He rose quickly in that business, to become one of the Nation's important executives in insurance activities, and he was respected by all who knew him.

When the war with Spain began, Senator Frelinghuysen enlisted and served overseas as a lieutenant of cavalry in campaigns both in Cuba and Puerto Rico.

Senator Frelinghuysen was the fourth Frelinghuysen to serve in the United States Senate from New Jersey, and his family has been prominent in that State since the Revolutionary War. His great-grandfather, Brig. Gen. Frederick Frelinghuysen, was the first of his family to serve as United States Senator from New Jersey.

Senator Frelinghuysen is survived by his widow, Emily; his son, Joseph, of Far Hills, N. J.; and two daughters, Mrs. Victoria Bates, of Morristown, N. J., and Mrs. Emily Bilkey, of New York.

As one who knew him personally for many years, and as one of the Senators from the State of New Jersey, I extend to his wife, his children, and other members of the family our deepest, understanding sympathy, coupled with the prayer that God will give them the strength and guidance which are so essentially vital to carry on in this life:

A fine friendship extending over many years existed between Senator Frelinghuysen and me. He was a great American, beloved and respected by the citizens of New Jersey as well as by thousands throughout our country. He has answered the final roll call, as we all must under the plan of God. We will miss him in New Jersey.

I wish now to read to my colleagues my favorite poem, A Comrade Rides Ahead:

Time brings not death, it brings but changes;
I know he rides, but rides afar,
Today some other planet ranges
And camps tonight upon a star
Where all his other comrades are.

For there were those who rode before him,
As there are those he leaves behind;
Although from us time's changes bore him,
Out there our comrade still will find
The kinship of the comrade mind.

Time brings us change and leaves us fretting;
We weep when every comrade goes—
Perhaps too much, perhaps forgetting
That over yonder there are those
To whom he comes and whom he knows.

I would not hold our loss too lightly;
God knows, and he, how deep the pain;
But, friends I see still shining brightly
The brightest link in all our chain
That links us with a new domain.

Time breaks no circle such as this.
For this I swear, because believing:
However hurt, however grieving,
However much a friend we miss
Between the worlds is no abyss.

For friendship binds the worlds together—
World over there, world over here.
From earth to heaven is the tether
That brings the earth and heaven near
And makes them both a bit more dear.

Not weaker now our chain, but stronger;
In all our loss and all our ill
We now shall look a little longer
At ev'ry star above the hill
And think of him, and have him still.

Whatever vales we yet may wander,
What sorrow come, what tempest blow,
We have a friend, a friend out yonder,
To greet us when we have to go—
Out yonder someone that we know.

To all eternity he binds us;
He links the planet and the star;
He rides ahead, the trail he finds us
And where he is and where we are
Will never seem again so far.

Mr. President, I send to the desk a resolution in which I have been joined by my colleague the junior Senator from New Jersey [Mr. SMITH], and which I ask to have read.

The PRESIDENT pro tempore. The Senator from New Jersey submits a resolution, which the clerk will read.

The resolution (S. Res. 198) was read, as follows:

Resolved, That the Senate has heard with profound sorrow and extreme regret the announcement of the death of Hon. Joseph S. Frelinghuysen, who served in the United States Senate from the State of New Jersey from March 4, 1917, to March 3, 1923.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased, together with a transcript of remarks made in the Senate in praise of his distinguished service to the Nation.

Mr. SMITH. Mr. President, I am very glad to join my colleague the senior Senator from New Jersey [Mr. HAWKES] in submitting the resolution he has just sent to the desk, and I wish to add a personal word to the very appropriate remarks my colleague has made.

Joe Frelinghuysen, as we loved to call him in New Jersey, was more than just a member of the Republican Party, more than just a public man. He was a warm, personal friend of many of us, and many had come to love him. He had a wonderful family. I have known them all intimately, and I join with my colleague in sending them my deepest sympathy in this sad hour.

Joe had a wonderful sense of humor, which was one of his great assets. There was no company of which he was a part where he did not add not only to the common sense of the gathering, but also a lightness of touch, sometimes so important in times of serious crisis.

Joe Frelinghuysen served our party in many ways. The record shows his service in the Senate. He served the State of New Jersey in many important capacities, but above all he acted as a centralizing force when we were endeavoring to bring our party together, working for the building up of a fine citizenry, and seeking to carry out the spirit and purpose of our State and our Nation.

Mr. President, the State of New Jersey will miss Joe Frelinghuysen, the United States will miss the spirit which Joe Frelinghuysen symbolized. I am glad to be able to pay this tribute to his memory at this time.

Mr. HAWKES. Mr. President, as I have said, my colleague joins in submitting the resolution I have sent forward. I ask for its adoption at this time.

The PRESIDENT pro tempore. The question is on agreeing to the resolution submitted jointly by the senior and junior Senators from New Jersey.

There being no objection, the resolution was considered and unanimously agreed to.

LEAVE OF ABSENCE

Mr. KNOWLAND asked and obtained consent to be absent from the Senate on Friday next.

MEETING OF COMMITTEE

Mr. KNOWLAND asked and obtained unanimous consent for the Subcommittee on the Interior of the Senate Committee on Appropriations to meet during the session of the Senate today.

TITLE TO TIDEWATER LANDS—NOTICE OF HEARING

Mr. MOORE. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for

Monday, February 23, 1948, at 10 a. m., in the caucus room, room 318, Senate Office Building, upon Senate Joint Resolution 14, a joint resolution to quiet the titles of the respective States, and others, to lands beneath tidewaters and lands beneath navigable waters within the boundaries of such States and to prevent further clouding of such titles, and Senate bill 1988, a bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources.

At the indicated time and place, all persons interested in either of the said measures may make such representations as may be pertinent. The subcommittee consists of the Senator from Oklahoma [Mr. MOORE], chairman; the Senator from Missouri [Mr. DONNELL]; and the Senator from Nevada [Mr. MCCARRAN].

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

SUSPENSION OF DEPORTATION OF ALIENS

A letter from the Attorney General, transmitting, pursuant to law, a report reciting the facts and pertinent provisions of law in the cases of 172 individuals whose deportation has been suspended for more than 6 months by the Commissioner of Immigration and Naturalization Service under the authority vested in the Attorney General, together with a statement of the reason for such suspension (with accompanying papers); to the Committee on the Judiciary.

FORT HALL INDIAN IRRIGATION PROJECT, IDAHO

A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to promote the interests of the Fort Hall Indian Irrigation Project, Idaho, and for other purposes (with accompanying papers); to the Committee on Interior and Insular Affairs.

WITHDRAWALS OF PUBLIC LANDS IN CERTAIN CASES

A letter from the Secretary of the Interior, pursuant to law, a report showing the restorations and withdrawals of public lands in certain cases during the period January 1, 1947, through December 31, 1947 (with accompanying papers); to the Committee on Interior and Insular Affairs.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The PRESIDENT pro tempore appointed Mr. LANGER and Mr. CHAVEZ members of the committee on the part of the Senate.

PETITIONS

Petitions, etc., were laid before the Senate by the President pro tempore and referred as indicated:

A letter in the nature of a petition from the National Maritime Union of America, Port of Tampa, Fla., praying for the enactment of legislation providing increased appropriations to the American Cancer Society, Inc.; to the Committee on Labor and Public Welfare.

A letter in the nature of a petition from N. W. Donnan, of Schenectady, N. Y., relating to the St. Lawrence seaway project; ordered to lie on the table.

COMMERCIAL FERTILIZER FOR FARMERS—CONCURRENT RESOLUTION OF SOUTH CAROLINA LEGISLATURE

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a concurrent resolution adopted by the General Assembly of South Carolina on February 5, 1948, memorializing the Congress of the United States to use its influence in making available adequate stocks of commercial fertilizer for the farmers of my State of South Carolina during the year 1948.

There being no objection, the concurrent resolution was received, referred to the Committee on Agriculture and Forestry, and, under the rule, ordered to be printed in the RECORD, as follows:

A concurrent resolution requesting each member of the South Carolina delegation in the National Congress, in the United States Senate and House of Representatives, and the Secretary of Agriculture to use their influence and authority to assure an adequate supply of nitrates and other fertilizers for the use of South Carolina farmers during the year 1948

Whereas an unprecedented demand in the United States and in foreign countries for fertilizers has created a shortage of immediate delivery plant foods in South Carolina; and

Whereas a shortage of this kind will seriously curtail the production of food and fiber crops the Government so urgently needs in its plans to rehabilitate war-torn countries; and

Whereas sufficient supplies are apparently obtainable at their source if proper transportation is furnished, and if some of the ships now being used to ship fertilizer, grain, etc., abroad are assigned to transporting nitrates to this country; and

Whereas we believe sections of the United States where fertilizer usage has long been a custom should not be curtailed in favor of new fertilizer-using territories where their use is still in the experimental stage; and

Whereas domestic manufacturers and handlers of nitrates and other fertilizing materials should be encouraged as much as possible; and

Whereas steps should be taken immediately to correct these conditions so that a repetition of last year's fiasco will not exist which will cause food and fiber shortages: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That a copy of this resolution be forwarded to the United States Senate and to the United States House of Representatives and to each member of the South Carolina delegation in the National Congress, to the Secretary of Agriculture of the United States, and to the Commissioner of Agriculture of South Carolina, with the request that each use his influence to see that the proper authorities have these conditions corrected and urge immediate action to assure prompt delivery of an adequate supply of nitrates and other fertilizers to South Carolina farmers.

GRAINS FOR PRODUCTION OF ETHYL ALCOHOL—REPORT OF JOINT COMMITTEE ON THE ECONOMIC REPORT (REPT. NO. 888)

Mr. SPARKMAN. Mr. President, from the Joint Committee on the Economic Report, I ask unanimous consent to file a report relating to the allocation and inventory control of grains for the production of ethyl alcohol, and I request that the report be printed in the RECORD, since it is short.

There being no objection, the report was received, ordered to be printed, and to be printed in the RECORD, as follows:

ALLOCATION AND INVENTORY CONTROL OF GRAIN FOR THE PRODUCTION OF ETHYL ALCOHOL

The Joint Committee on the Economic Report, to whom was referred the President's message of January 29, 1948, requesting allocation and inventory control of grain for the production of ethyl alcohol at least until October 31, 1948, having considered the same pursuant to section 6 (b) of Public Law 395, Eightieth Congress, hereby recommends that Congress enact the legislation necessary to accomplish that purpose.

The committee has given careful consideration to the President's message and held hearings on February 5 and 6 on the proposal it contained. At these hearings Government officials, representatives of the distilling industry, and others appeared and testified.

GENERAL STATEMENT

It appears from the President's message and the testimony at these hearings that the grain situation in most European countries continues grave as a result of the devastation brought about by the war and extremely unfavorable weather conditions. While recent reports of the International Emergency Food Committee indicate an improved outlook for the next harvest this same source made clear that no substantial relief may be expected before the new wheat crop this summer and corn crop this fall.

It is estimated that the United States should endeavor to export at least 500,000,000 bushels of wheat from the crop harvested in 1947. A study of the available grain supplies in the United States as compared with the essential domestic and export requirements indicates that there can be no relaxation in our efforts to conserve grain. Although the domestic wheat crop in 1947 was 212,000,000 bushels greater than the domestic wheat crop in 1946, the current domestic and foreign demands are so great that, after providing for the carry-over of reserve stocks of wheat as of June 30, 1948, of 150,000,000 bushels required by law, only 450,000,000 bushels of wheat will be available for export in the absence of further conservation measures. The corn crop in 1947 was 850,000,000 bushels less than in 1946. Other feed grains remained approximately the same and as a result feed grains are in extremely short supply. The amount of wheat which will be available for export will depend to a considerable extent upon the supplies of other grains available for feed, for if other grains are not available for feed, farmers will find it necessary to feed greater quantities of wheat to livestock.

The saving from allocation and inventory control of the distilling industry, estimated at 30,000,000 bushels of whole grain a year (22,000,000 bushels through October 31, 1948), will make a material contribution to the supply of grain available for essential domestic and export requirements.

The Department of Agriculture has made exhaustive efforts to effectuate a voluntary agreement with the distilling industry. The committee heard testimony from all segments of the industry and is convinced that because various parts of the industry advocate different methods of allocation, there is no possibility of the industry entering into an effective voluntary agreement.

The operation of the distilling industry without restriction would result in diversion of grain to this nonessential use to the detriment of farmers, consumers, and other essential businesses who are being requested to reduce their use of grain. In furtherance

of a broad program for the conservation of grain, efforts are being made under the authority of Public Law No. 395, to obtain the cooperation of all grain-using industries in the conservation of grain. If the distillers who have been unable to agree on voluntary conservation are permitted to use grain without restriction, it is difficult to see how any other group could be expected to carry out grain conservation measures.

Curtailed production of ethyl alcohol from grain for beverage use as distilled and neutral spirits will not impose a hardship on the industry. For 22 months during the war period the industry maintained sales without any distillation whatsoever. Its current stocks of alcohol, both whiskys and neutral spirits, will permit the industry to meet its market requirements with ample margin. The distilling industry as of June 30, 1947, had stocks of whisky of 484,000,000 tax gallons. The stocks of whisky at present are approximately equal in quantity to the stocks normally on hand before the war, and, due to greatly increased sales of blended whisky as compared with straight whisky, present stocks of whisky represent a 6-year supply even at last year's high rate of consumption.

Representatives of the Department of Agriculture have testified that if the proposed controls are established, the grain will be allocated so as to assure the greatest possible employment (1) by preventing large distillers from shutting down some plants through the consolidation of quotas, and (2) by giving every distilling plant a minimum monthly quota which will enable all plants to operate. A very small percentage of the employees of distillers are engaged in the actual distillation operations, the vast majority being engaged in the bottling, sales, and other operations of these companies which are not affected, under present conditions, by a reduction or discontinuance of distilling operations.

Claims have been made that the food value of distillers' feeds is so great there ought to be no curtailment in their supply. There is conflicting opinion on this point. The committee is convinced the matter is not of controlling importance because of the ready availability of other protein feeds.

In compliance with section 6 (a) of Public Law 395 the President has submitted to the committee a procedure for the administration of the proposed measure, including a formula for the allocation of grain to distillers. The determination whether the formula should be included in the statute or left to the discretion of the administering agency is more properly made by the legislative committees than by the Joint Committee on the Economic Report, whose primary function is to pass on the over-all economic aspects of the problem. The committee does recognize the necessity of including reasonable grain inventory limitations to eliminate unjustified stock-piling of grain by ethyl-alcohol producers. It further recommends to the study of appropriate committees the lifting of the requirement that the source of neutral spirits used in beverages be stated on the label, to encourage the use of nongrain sources for alcohol.

CONCLUSIONS

The committee is convinced that the shortage of grain is sufficiently evident to warrant restricting nonessential users. That, with the present large stocks of whisky, no more than a minimum addition in stocks could be justified at the present time; and that the situation cannot be solved by voluntary agreements under the provisions of Public Law 395. While the distillery industry uses corn grain primarily, it is our expectation that limitations would save an equivalent amount of wheat for human consumption.

Section 4 (b) of Public Law 395 revived and reenacted title III of the Second War Powers Act 1942, with respect to the use of grain for production of distilled spirits or neutral spirits for beverage purposes. The same manufacturing process is required in connection with the production of distilled spirits or neutral spirits for beverage purposes and of ethyl alcohol from grain for industrial purposes. Since the alcohol used as neutral spirits is interchangeable with industrial grain alcohol, the committee considers integrated control of all alcohol from grain essential to prevent diversion of industrial alcohol to beverage uses. It is likewise desirable to establish inventory control in order to prevent unrestricted buying of grain by ethyl-alcohol producers, which would in part nullify the purposes of the proposed measure.

Further, the power of the President to limit exports of grain should be so used that distilleries in other countries, including Canada, shall be subject at least to the same general degree of restriction as distilleries in the United States.

The committee therefore recommends that legislation to this effect be prepared and enacted.

PERSONS EMPLOYED BY COMMITTEES WHO ARE NOT FULL-TIME SENATE OR COMMITTEE EMPLOYEES

The PRESIDENT pro tempore laid before the Senate a report for the month of January 1948, from the chairman of a certain committee, in response to Senate Resolution 319 (78th Cong.), relative to persons employed by committees who are not full-time employees of the Senate or any committee thereof, which was ordered to lie on the table and to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON FINANCE,
January 1948.

To the Senate:

The above-mentioned committee hereby submits the following report showing the names of persons employed by the committee who are not full-time employees of the Senate or of the committee for the month of January 1948, in compliance with the terms of Senate Resolution 319, agreed to August 23, 1944:

Leona McKinnon, 1443 Spring Road NW., Washington, D. C.; Federal Security Agency; annual rate of salary, $5,905.20.

Milton Mayer, 4817 Thirty-sixth Street NW., Washington, D. C., Public Housing Administration; annual rate of salary, $7,341.

E. D. MILLIKIN,
Chairman.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BUSHFIELD:

S. 2154. A bill to authorize and direct the Secretary of the Interior to issue to William Bow a patent in fee to certain land; to the Committee on Interior and Insular Affairs.

By Mr. MORSE:

S. 2155. A bill to transfer jurisdiction over certain school buildings in Vanport, Oreg., to the Federal Works Administrator and to authorize an appropriation to rebuild a school building in Vanport, Oreg., which was destroyed by fire; to the Committee on Banking and Currency.

PUBLICATION OF NAMES AND COMPENSATION OF EMPLOYEES OF SENATORS

Mr. MAYBANK. Mr. President, I ask unanimous consent to submit for appropriate reference a resolution calling upon the Secretary of the Senate to publish and submit to the Senate the names of all persons employed by the Senate and by Members of the Senate. I understand that this was not done this year, although it has been done before, and I think in justice to the taxpayers and the people generally the names of these persons should be published.

There being no objection, the resolution (S. Res. 199) was received and referred to the Committee on Rules and Administration, as follows:

Resolved, That the Secretary of the Senate is directed to prepare, publish, and submit to the Senate each year a statement showing (1) the names of all persons employed during the preceding calendar year in the office of each Senator and (2) the sums paid by him to each such person by reason of such employment. The report required by this resolution shall be submitted to the Senate on the first day of each regular session of the Congress, except that the report for the calendar year 1947 shall be submitted within 1 month from the date on which this resolution is agreed to.

COMPENSATION TO VETERANS TRAINING ON THE JOB—AUTHORIZATION TO PRINT SENATE BILL 1393 WITH HOUSE AMENDMENTS

Mr. LODGE. Mr. President, I ask unanimous consent that the bill (S. 1393) to increase the permitted rate of allowance and compensation for training on the job under Veterans' Regulation No. 1 (a), as amended, be printed with the House amendments thereto.

The PRESIDENT pro tempore. Without objection, it is so ordered.

QUARTERLY REPORT UNDER SECOND DECONTROL ACT OF 1947—CHANGE OF REFERENCE

Mr. WILEY. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of the letter from the Secretary of Commerce and the second quarterly report under the Second Decontrol Act of 1947, and that they be referred to the Committee on Banking and Currency.

The PRESIDENT pro tempore. Without objection, it is so ordered.

BOUNDARY LINE BETWEEN DISTRICT OF COLUMBIA AND VIRGINIA—CHANGE OF REFERENCE

Mr. WILEY. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of the letter and proposed copy of a bill to amend the act entitled "An act to establish a boundary line between the District of Columbia and the Commonwealth of Virginia, and for other purposes," approved October 31, 1945, and that they be referred to the Committee on the District of Columbia.

The PRESIDENT pro tempore. Without objection, it is so ordered.

REORGANIZATION OF RAILROADS—BILLS REREFERRED TO THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. REED. Mr. President, as the Chair knows and as the Senate is aware, considerable attention has been given to legislation to effect the voluntary or involuntary reorganization of railroads. Both Houses of Congress last year passed a bill, which was vetoed by the President.

Bills were again introduced at the present session. There was a difference of opinion, and two bills were reported from the Committee on Interstate and Foreign Commerce. One of the bills is Senate bill 249, to amend the Interstate Commerce Act, as amended, and for other purposes, reported by myself, and now on the calendar as No. 445. The other bill is the House bill (H. R. 2298), to amend the Interstate Commerce Act, as amended, and for other purposes, which was reported by the Senator from New Jersey [Mr. HAWKES], and which is No. 492 on the calendar.

I am very happy to say that an agreement has been reached as to the terms of a bill. I therefore ask unanimous consent that the two bills be taken from the calendar and be rereferred to the Committee on Interstate and Foreign Commerce.

The PRESIDENT pro tempore. Without objection, the bills will be taken from the calendar and rereferred to the Committee on Interstate and Foreign Commerce.

MEMORIAL SERVICES FOR MOHANDAS K. GANDHI—ADDRESS BY SENATOR TOBEY

[Mr. TOBEY asked and obtained leave to have printed in the RECORD an address to be delivered by him at memorial services for the late Mohandas K. Gandhi, to be held at the Department of Labor Auditorium, Washington, D. C., on February 11, 1948, which appears in the Appendix.]

NOMINATION OF EDWARD ALLEN TAMM—EDITORIAL FROM THE WASHINGTON STAR

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD an editorial regarding the nomination of Edward Allen Tamm to be associate justice for the United States District Court for the District of Columbia, from the Washington Star, which appears in the Appendix.]

ARCHIBALD ROANE—CORRESPONDENCE BETWEEN JEFFERSON DAVIS AND CALEB CUSHING

[Mr. STEWART asked and obtained leave to have printed in the RECORD an article concerning a letter written by Caleb Cushing to Jefferson Davis, from the Knoxville Journal, which appears in the Appendix.]

THE DAUGHTERS OF THE AMERICAN REVOLUTION AND THE FUTURE OF AMERICA—EDITORIAL FROM THE KNOXVILLE LABOR NEWS

[Mr. STEWART asked and obtained leave to have printed in the RECORD an editorial entitled "The Daughters of the American Revolution and the Future of America," from the Knoxville Labor News, which appears in the Appendix.]

TOLLS AND THE SEAWAY—EDITORIAL FROM THE NEW YORK TIMES

[Mr. IVES asked and obtained leave to have printed in the RECORD an editorial entitled "Tolls and the Seaway," published in the New York Times of February 8, 1948, which appears in the Appendix.]

DECENTRALIZE OR PERISH—EDITORIAL IN THE WHEELING (W. VA.) INTELLIGENCER

[Mr. WILEY asked and obtained leave to have printed in the RECORD an editorial entitled "Decentralize or Perish," dealing with his plan for decentralization, published in the Wheeling (W. Va.) Intelligencer of February 4, 1948, which appears in the Appendix.]

MARGARINE AND THE GROWTH OF CHILDREN—ARTICLE FROM THE AMERICAN MEDICAL ASSOCIATION JOURNAL

[Mr. MAYBANK asked and obtained leave to have printed in the RECORD an article entitled "Margarine and the Growth of Children," from the American Medical Association Journal for February 7, 1948, which appears in the Appendix.]

JOSE MARIA GERARDO DE AMUSATEGUI AND RAMON DE AMUSATEGUI

Mr. HATCH. Mr. President, I desire to have a correction made in a measure passed by the Senate, in which some typographical errors appeared. Senate bill 1395 passed the Senate on February 9 with a committee amendment. The errors occurred in the amendment. I now ask unanimous consent that the votes by which the bill was passed and was ordered to be engrossed for a third reading and read the third time, and the vote by which the committee amendment was agreed to, be reconsidered in order that I may have the corrections made.

The PRESIDENT pro tempore. Without objection, the votes are reconsidered, and the question is on agreeing to the amendment of the committee.

Mr. HATCH. Mr. President, I now offer two amendments to the committee amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The amendments will be stated.

The CHIEF CLERK. On page 2, line 15, it is proposed to strike out "Marie" and in lieu thereof to insert "Maria"; and on page 2, line 19, it is proposed to strike out "Marie" and in lieu thereof to insert "Maria Gerardo."

The amendments to the amendment were agreed to.

The amendment as amended was agreed to.

The bill (S. 1395) was ordered to be engrossed for a third reading, read the third time, and passed.

THE EUROPEAN RECOVERY PROGRAM—LETTER FROM MRS. A. K. REPPERT

Mr. CAPPER. Mr. President, I have received an interesting statement from Mrs. A. K. Reppert, of Neodesha, Kans., president and general federation director of the Kansas Federation of Women's Clubs, expressing approval of General Marshall's European economic reconstruction program for recovery and peace, which I ask to have printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

KANSAS FEDERATION OF WOMEN'S CLUBS,
Neodesha, Kans., February 7, 1948.

Senator ARTHUR CAPPER,
Washington, D. C.

SIR: The General Federation of Women's Clubs has passed a resolution expressing its unqualified approval and support of General Marshall's European economic reconstruction program for recovery and peace. As a member of the General Federation of Women's Clubs and as a citizen of Kansas, I am asking for your support of the European recovery program outlined by Secretary Marshall and embodied in the Eaton bill (H. R. 4840), subject to such changes in the administrative proposals as Senator VANDENBERG may suggest.

The position that the United States takes in relation to assisting the devastated countries of Europe to recover their economic and political health is of first importance to the establishment of peace and order in the world. That America should take the lead in providing the assistance necessary to promote that recovery is, of course, generally accepted. Our own self-interest is tied up with the peace, order, and prosperity of western Europe. With enough help from the United States in the period immediately ahead it should be possible for Europe to get on her feet again and eventually to supply her essential needs of food, coal, and machinery. We believe the Marshall plan has given encouragement to these nations to work together and this encouragement is the most significant postwar development in the realm of international relations. The Marshall plan has been called our best bet to build up in the countries of western Europe a buffer to stop the progress of communism as now being so vigorously promoted by Russia in her hope to control all of Europe.

It is needless to take more of your time by prolonging the arguments for the support of the Marshall plan which is now before our Congress for consideration. I do wish to express to you, my State Senator, my firm conviction that the support of the Eaton bill is our obligation and our best opportunity of leading the world to a firmer peace and, by doing so, take our proper place as the world's greatest power for preserving peace. I believe it is far cheaper for our Nation to lead the nations in a program directed to lasting peace than it would be to shy away from the cost of such a program and be again involved in a world war.

Your careful consideration of this critical matter and your support of the Eaton bill will be very much appreciated by me and, speaking from my wide contact with the women of our State, that expresses the feelings and convictions of a large percent of our citizens.

Most sincerely yours,
PAULINE REPPERT
(Mrs. A. K. Reppert).

EXECUTIVE SESSION

Mr. WHERRY. Mr. President, I move that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of executive business. There are but a few nominations on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting several nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

The PRESIDENT pro tempore. Are there any reports of committees? If not, the clerk will state the nominations on the Executive Calendar.

MUNICIPAL COURT, DISTRICT OF COLUMBIA

The legislative clerk read the nomination of Frank Hammett Myers, of the District of Columbia, to be an associate judge of the municipal court, District of Columbia.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk proceeded to read sundry nominations in the Diplomatic and Foreign Service.

Mr. WHERRY. Mr. President, I ask unanimous consent that the nominations in the Diplomatic and Foreign Service be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc.

Mr. WHERRY. Mr. President, I ask that the President be immediately notified of the nominations this day confirmed.

The PRESIDENT pro tempore. Without objection, the President will be so notified.

LEGISLATIVE SESSION

Mr. WHERRY. Mr. President, I move that the Senate resume legislative session.

The motion was agreed to; and the Senate resumed legislative session.

PALESTINE AND THE ARMS EMBARGO

Mr. O'CONOR. Mr. President, while there are many aspects of the Palestine situation which warrant our careful thought and attention, one particular phase of this important problem is of peculiar concern to the United States. I refer to the arms-embargo policy announced by our Department of State.

In the light of grave developments, the placement of the arms embargo definitely denies to the Jewish people an equal opportunity to secure the means of self-defense. Therefore, the action of the State Department is unneutral; and I express the hope that the arms embargo will be lifted forthwith.

When the General Assembly of the United Nations on November 29, 1947, recommended the partition of Palestine, we were encouraged in the hope that a peaceful solution, and one consonant with justice, had been found. While the territory designated for the new Jewish state was far more limited than they had hoped for, the Jews of Palestine have accepted partition in good spirit, although Jerusalem, their ancient capital, was denied them.

The United Nations' decision was reached after long debate and careful consideration. It was well understood that the decision would need to be implemented, and the responsibility was thus assumed by the United Nations to take such steps as events might prove necessary.

Particularly significant is the affirmative action taken by the United States in imposing the arms embargo because no steps have been taken by the United Nations to effectuate its decision, which decision has been arrogantly rejected by the Arabs. Not only have accredited spokesmen for the Arabs notified the United Nations that they will not accept partition, but they have given evidence, by acts of violence, of their intention to resist to the limit the decision reached by the representatives of the nations of the world.

In perpetrating their offenses against the Jews, they are armed with the implements of war procured from Great Britain and from neighboring Arab states. Meanwhile, the United States imposes the embargo, the direct, although possibly unintended, effect of which has been to deprive the Jews of the opportunity to procure arms to protect their lives and the land which has been declared to be rightfully theirs. Under the terms of the arms embargo, adjoining states friendly to the Arab cause can procure the implements of war from this country and then supply them to the Arabs in Palestine.

It is not beyond the pale of possibility that a large portion of the arms now being used by the Arabs against the Jews came from this country either directly or indirectly. Not only could they have been supplied indirectly through friendly neighboring states, but the arms supplied from Great Britain might very well have been made possible by American funds. Under those circumstances, for this country to deny the Jews the right to procure arms from this country places them at a distinct disadvantage.

There is a general feeling in the United States that we should do everything possible to strengthen and support the United Nations in their functioning for world cooperation and peace. In this instance the United Nations has acted definitely; and the Jewish people, in maintaining their present position, are in effect carrying out the mandate of the United Nations. If the Palestine question is not handled satisfactorily, the very existence of the United Nations may be imperiled. Certainly we should not adhere to a policy which is operating to prevent the fulfillment of a decision of the United Nations to which we solemnly pledged our support.

I respectfully suggest that the United States' embargo should be lifted at once. In the name of justice and fair dealing, we can do no less than give the sorely tried Jews of Palestine, whose statehood we have pledged, the means to defend their lives and their national aspirations.

THE MARSHALL PLAN AND THE SHORTAGE OF FARM MACHINERY IN THE MIDDLE WEST

Mr. LANGER. Mr. President, in view of the fact that within a very few weeks the Congress will be considering the Marshall plan, I desire to bring to the attention of my colleagues the fact that all through the Middle West the farmers are still unable to obtain farm machinery. My mail is filled with letters from farmers who say they are unable to obtain tractors, that they cannot secure combines, cannot obtain automobiles. I think the Members of Congress who are particularly engaged in considering the Marshall plan ought to know just exactly what the situation is in the Middle West, and keep that situation in mind at the time the Marshall plan is under consideration by Congress.

SECRETARY ANDERSON'S OPERATIONS ON THE WHEAT MARKET

Mr. O'DANIEL. Mr. President, we have heard much talk lately about Government officials and others who speculated in the commodity markets and won large sums of money because they were tipped off by Secretary of Agriculture Anderson, or others in his Department. Of course, that is just another dirty mess created by this New Deal gang of bureaucrats which has been ruling and ruining our great American Government for the past 15 years.

But, Mr. President, the real gambler in the wheat market and other commodity markets is none other than the Secretary of Agriculture himself. Mr. Anderson is the biggest bull operator on the wheat market the world has ever produced. He operates on behalf of the taxpayers of this Nation who furnish the money. He has a fund of $100,000,000 as capital, and authorized borrowing power of $4,750,000,000. In addition to this fabulous fund of nearly $5,000,000,000, the United States Treasurer is authorized to reimburse him for all losses he may sustain in his speculations. This makes his funds for speculation practically unlimited. He operates under the name of the Commodity Credit Corporation, which is a Government corporation.

Mr. President, the bull operations of Secretary Anderson since last July are wholly responsible for the 40-percent or 50-percent increase in the price of wheat in this Nation, and corresponding increases in the prices of other grain. These increased prices of grain naturally boosted the price of livestock which is fattened on these grains, and likewise increased the price of all meat, butter, milk, poultry, eggs, and other food and clothing commodities. In my opinion, not a much greater crime could have been committed against the consumers of the Nation than to have had their cost of living increased from 40 percent to 50 percent by speculation activities of their own Government.

Mr. President, almost everyone in the Nation is familiar with the feverish determination of the New Deal dynasty to ration and control prices. This communistic desire on the part of members of the dynasty has stood out as one of their most cherished ambitions ever since they got a taste of such power during the war. It was this bull-dogged determination to ration and control prices that caused them to assign to Anderson the dirty job of bulling the wheat market and other markets for the main purpose of increasing the prices of food and clothing to the consumers of the Nation to such an extent that the people would demand rationing and price control. No sane bull operator in the wheat pit would dare risk his own money on such a venture.

In the past, when bull speculators in the wheat market attempted to corner the market, they tried to use a little judgment and pick a year when there was a short wheat crop, but brave Mr. Anderson attempted to corner the wheat market during a year when the Nation produced one of the largest wheat crops on record. Most bull operators in the past also have had to have in mind finally getting rid of their accumulated purchases after they got the market cornered. This is what is termed in grain circles as "getting rid of the corpse." Bull operator Anderson had no such problem to solve because he depended on "getting rid of the corpse" by giving away his accumulated purchases. To accommodate him in "getting rid of the corpse" the President called a special session of Congress to appropriate around a half-billion dollars to be given

away to foreign nations. Congress fell for the trick and swallowed it hook, line, and sinker. This half-billion dollars which Congress appropriated for the President to give away to foreign nations represented, almost to the penny, the cost of the 200,000,000 bushels of wheat which Speculator Anderson bought at an average price of around $2.50 per bushel from July 1 to November 21, 1947. The Presidnt got the special session convened on November 17, 1947, so it looks as if the timing was almost perfect.

Further to substantiate my charges about this speculating spree, I ask unanimous consent to have inserted in the RECORD at this point a chart showing the daily Commodity Credit Corporation wheat and flour purchases from July 1 to November 21, 1947, showing the daily purchases and the daily quotations of wheat on the Chicago Board of Trade during the same period of time.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

Daily CCC wheat and flour purchases, July 1–Nov. 21, 1947, with Chicago futures prices

Noon to noon	Wheat [1]		Chicago futures [2]			Flour [3]		
	Daily bushels [1]	Weekly bushels	High	Low	Close	Daily bushels [4]	Weekly bushels	Daily hundredweight
			September					
July 1–2	75,000		$2.19½	$2.16	$2.19½	486,225		216,100
July 2–3	685,000		2.18¾	2.16¾	2.17¼	175,950		78,200
		760,000					662,175	
July 3–7	2,553,000		2.17	2.15	2.15¼	149,850		66,600
July 7–8	350,000		2.18¾	2.15¾	2.18	296,550		131,800
July 8–9	1,917		2.21¼	2.17	2.20¾	468,450		208,200

[1] Wheat purchase reports are submitted by four regional offices (Chicago, Minneapolis, Kansas City, and Portland) each day Monday through Friday, to the Grain Branch, Production and Marketing Administration. These reports cover purchases made from noon of the preceding day until noon of the reporting day, except that the reports submitted Monday cover purchases made from noon Friday through noon Monday, thus covering 2 marketing days. In some instances, wheat is contracted for on the basis of the futures market, and sellers' hedges are lifted at our discretion in later days to avoid undue pressure on the market. Such purchases are reported to this office on the day when the price is established by the lifting of hedges.

[2] Prices are as of the day shown on the left-hand side of the noon-to-noon column; i. e., the closing price of $2.19½ shown on the line "July 1–July" is the closing price July 1.

[3] Flour purchases are made in Washington and are reported on a straight day-by-day basis, rather than a noon-to-noon basis, as is the case with wheat. Thus, the first flour purchase made in the 1947–48 fiscal year, 486,225 bushels, was made on July 1, not from noon July 1 to noon July 2.

[4] In wheat equivalent at an average extraction rate of 74 percent.

Daily CCC wheat and flour purchases, July 1–Nov. 21, 1947, with Chicago futures prices—Continued

Mr. O'DANIEL. Mr. President, it will be observed from reading this chart that Secretary Anderson began buying wheat just as one of the biggest wheat crops in this Nation started to market. The price on that date, July 1, was $2.16 per bushel. There was no demand of consequence to hold wheat prices that high. The parity price was $2.04. Under the law, Mr. Anderson was obligated to support the wheat price at parity, but he did not wait for the price to go down to parity of $2.04 to start his buying. He started at $2.16, and he kept putting on the pressure of his $5,000,000,000 fund until he forced the wheat price from $2.16 up to $3.12. That is an advance of almost $1 a bushel, or between 40 percent and 50 percent increase. I am sure that this bull campaign was put on for the main purpose of running up prices so that the people would clamor for price ceilings and rationing. Everybody in the grain business knew that nothing on earth was forcing wheat prices up, except Mr. Anderson's heavy purchases.

Mr. President, this disgraceful and dishonest scheme was so plain that even a blind man could see it. Last summer as I traveled over Texas, I told the citizens of my home State what was going on. Since then, I have appeared on Nationwide radio networks and broadcast this information, and have received thousands of letters from good people throughout the Nation praising me for passing out this information. What do we see today, Mr. President? We see what the wheat market is doing when the big bull operator is out of the market. The price has already dropped about 50 cents a bushel. It is still above parity. This drop has somewhat taken the starch out of some of the New Deal administration supporters on both sides of the aisle who were howling for meat rationing and price controls. If this New Deal gang will take its filthy fingers out of the wheat pit and let the legitimate grain dealers handle the buying and selling of wheat and other grains, and permit the law of supply and demand freely to function, the people of this Nation, both consumers and producers, will be much better off. When any Government becomes so commercial and so crooked that it sets up a fund of $5,000,000,000 to be used for speculation in the commodity markets to the detriment of the consumers and taxpayers of our Nation, it is time to call a halt.

Whenever the public servants of a representative democracy develop their ego to the point where they crave not only to plan the people's economy but to control that economy by usurping the taxpayers' money and using it for gambling in food commodities, to the detriment of the people's pocketbooks and their dinner pails, it is time to call a halt. Such skulduggery will inevitably lead to a black-out of liberty and freedom in America.

It is crystal clear, Mr. President, to all except the professional politicians and the bureaucrats in our own Government who will go the limit to perpetuate themselves in public office that this Anderson grain-gambling episode is but a dress rehearsal to the main gambling and speculating spree that will be carried out with the billions of dollars these legal highjackers are figuring on getting into their clutches through the so-called Marshall plan. I will cover that international conspiracy in another speech.

When our Government becomes so thoroughly imbued with dictator philosophy that it takes $5,000,000,000 from the taxpayers and uses the loot to corner the commodity markets and force our people to pay from 40 percent to 50 percent more for their food and clothes than would otherwise be necessary, and does it for the main purpose of creating a clamor for price control and rationing, it is time to call a halt, Mr. President.

I think it is time for Secretary Anderson to resign. This will give him more time to visit in Hawaii and other swanky pleasure resorts with his speculating friends who happened personally to make millions of dollars out of the wheat and commodity markets at the time the Secretary was bulling the markets with the taxpayers' cash.

Mr. LUCAS. Mr. President, I regret exceedingly to see the junior Senator from Texas rise upon the floor of the Senate and make such a vindictive speech. I do not think he does himself any credit. He certainly does not do his colleagues in the United States Senate, or the Members of the House of Representatives, any credit, because whatever Secretary Anderson is doing in connection with the buying of grain, he is proceeding under a mandate of the Congress of the United States.

Mr. President, I would not wish to get into a "bull" argument with the junior Senator from Texas, because I know that I would come out second best in any such argument.

Mr. O'DANIEL. Mr. President, will the Senator yield?

Mr. LUCAS. The Senator had his say. I decline to yield.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. LUCAS. Mr. President, week after week I have listened to the Senator from Texas occupy the floor in this august body with a tirade of invective which frequently astonishes me. So far as the Senator from Illinois is concerned, he has almost reached the saturation point. Heretofore I have restrained myself because I did not wish to dignify the junior Senator from Texas by even answering the kind of tommyrot and poppycock with which he has plastered the floor of the Senate from time to time. It seems to me to be a direct challenge to the dignity of the Senate. It cannot continue without a decisive answer; and when it is answered, Mr. President, it will be answered in terms which the junior Senator from Texas will understand.

Mr. HATCH. Mr. President, I am very happy that the Senator from Illinois has spoken the words which he has just uttered. I had no idea that the Senator from Texas would rise in his place, under the privilege of a United States Senator, and say the things which he has said about our distinguished Secretary of Agriculture—personal invective, mudslinging, and name calling—without the basis of a single fact or figure to support what he has said.

Mr. President, I did not wish to answer such a statement as that. I am glad the Senator from Illinois has said what he has said, because, as everyone knows, Secretary Anderson comes from my State. He is my personal friend. Incidentally, he is able to take care of himself at any place or at any time. His transactions on the Board of Trade have been open and aboveboard throughout the months. Not once did I hear Senators who now complain about Government purchases complain when prices were going up. Not once did I hear them calling Secretary Anderson names.

Mr. President, I have learned through a somewhat long life that when a man lacks argument, when he lacks logic, when he lacks reason, when he lacks justification for a bad cause, he resorts to personal abuse and name-calling. I hope the time will come when the Senator from Illinois will do what he said he would do, and answer the arguments which have been made. Let me say to the Senator from Illinois that if he does not do it, others will.

Mr. CHAVEZ. Mr. President, throughout my life I have heard people abuse others, sometimes their neighbors. I have heard people ridiculed and actually abused personally. But, according to my philosophy, although abuse might prove entertaining to those who like to hear it, it does not prove a thing.

As stated by my colleague the Senator from New Mexico [Mr. HATCH], I know that Secretary Anderson can take care of himself. The only suggestion I would make at this time is that every Senator who heard the Senator from Texas make his statement should know that statements of that type are made every day of the week. So why get excited about it as long as it does not prove a thing?

JUST FOOLISHNESS—EDITORIAL FROM THE WALL STREET JOURNAL

Mr. WILEY. Mr. President, not a day passes but some disgruntled minority pulls on the hair shirt and denounces the American system under which we live. To hear these people complain and to hear them advise us to change our system, one would think the American way of life has been a total failure.

It often takes opinions from outside our country to cut through such hair-shirt moaning in our midst and really open eyes to the superb achievements of our way of life.

I have here a small item from the Wall Street Journal which quotes what a London editorial says of the American system. This is what our British friends have to say:

JUST FOOLISHNESS

We are indebted to Pulling Together, organ of the National Small Businessmen's Association, for calling our attention to a recent editorial in the London Sphere, which presents the case for unfettered enterprise, in the United States at least, as against a planned economy or compulsory state with great simplicity and cogency.

The editorial in question begins by pointing out the wealth of the people of this country measured in the goods and services that mean high living standards. With only 6 percent of the world's area and 7 percent of its population, it says, we Americans normally consume, to cite only a few of the instances given, 48 percent of the world's coffee, 53 percent of its wool, 56 percent of its rubber, and 72 percent of its silk. We produce 60 percent of its wheat, 50 percent of its copper, and 60 percent of its crude petroleum. We operate 60 percent of the world's telephones and 33 percent of its railroads and own 80 percent of its motorcars. Finally, we possess nearly half the world's gold, and the purchasing power of our people is greater than that of the 500,000,000 people of Europe. The editorial concludes:

"Responsible leadership which cannot translate such a bulging economy into assured prosperity is destitute of capacity. But pompous statesmen, looking over the estate, solemnly declare that the methods by which it was created are all wrong, ought to be abandoned, must be discarded; that the time has come to substitute political management for individual initiative and supervision.

"There is only one way to characterize that proposal—it is just damn foolishness."

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. WILEY. Mr. President, earlier in the debate on the St. Lawrence seaway, in questioning the junior Senator from New York [Mr. IVES], I referred to the fact that the New York Legislature had in a 1931 statute authorized the development of St. Lawrence River navigation. The junior Senator from New York assured us, however, that the New York Legislature had never done any such thing, and placed reliance upon his memory of the actions of the legislature during the period of his distinguished service in Albany.

I would now like to place in the RECORD sections of the New York Power Authority Act of 1931 mentioning the St. Lawrence River. It is to the Power Authority Act of 1931 that I was referring when I stated that the New York Legislature looked for the development of the seaway and power project as an integrated unit. I commend this insertion to the attention of the junior Senator from New York, and of all those who have contended that the power project should be developed separately from the seaway project.

New York State, which is most directly concerned with the development of power, in its own Power Authority Act, emphasized constantly the interrelationship of power and commerce.

We have in the course of the present debate heard numerous arguments to the effect that this or that Senator was in favor of the power project at the present time but not in favor of the navigation project. As I have previously shown in citing the testimony of General Robins, of the Corps of Engineers, and other authorities, it would, to use General Robbins' words, "be a crime" to attempt to build a power project without the navigation project.

I respect, as do my colleagues, the right of any Senator to state that he is for the power project but against the navigation project. However, as we have shown, a Senator has the right to make that argument, but his grounds for justifying it are weak and, in my belief, absolutely insupportable. The power project and the navigation project are absolutely inseparable. If my colleagues want to meet the present power shortage, they should support the seaway project, because it is only through developing both phases of this great project that the power shortage can be met.

On the basis of the history of the St. Lawrence seaway legislation, which has been drawn out for decade after decade, we can all believe only this fact: That anyone who states he is for the power project but against the navigation project either has not sufficiently studied the inter-relationship of these two phases, or, unfortunately, he is seeking an out—is trying to justify a negative vote against the seaway. I do not question the motives of any single one of my colleagues, but I submit that the RECORD speaks for itself on this point.

Mr. President, I ask unanimous consent that the sections of the New York Power Act of 1931 which mention the St. Lawrence River be printed in the RECORD at this point following my remarks.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

SECTIONS OF THE NEW YORK POWER AUTHORITY ACT OF 1931 WHICH MENTION THE ST. LAWRENCE RIVER

CHAPTER 772

SECTION 1. That part of the St. Lawrence River within the boundaries of the State of New York is hereby declared to be a natural resource of the State for the use and development of commerce and navigation in the interest of the people of this State and of the United States, and for the creation and development of hydroelectric power in the interest of the people of this State, and such natural resources, including the bed

and waters of the river as instrumentalities of commerce and navigation, and the bed, waters, power, and power sites in, upon, or adjacent to, or within the watershed of the said river, owned or controlled by the people of the State, or which may hereafter be recovered by or come within their ownership, possession, and control, shall always remain inalienable to, and ownership, possession and control thereof shall always be vested in, the people of the State.

SEC. 2. For the purpose of effectuating the policy declared in section 1 and of improving the St. Lawrence River as an instrumentality of commerce and navigation and developing the hydroelectric power resources thereof, there is hereby created a corporate municipal instrumentality of the State to be known as the Power Authority of the State of New York, hereinafter referred to as the power authority, which shall be a body corporate and politic, a political subdivision of the State, exercising governmental and public powers, perpetual in duration, capable of suing and being sued, and having a seal, and which shall have the powers and duties hereinafter enumerated, together with such others as may hereafter be conferred upon it by law.

SEC. 3. * * *.

SEC. 4. * * *.

SEC. 5. Forthwith upon the appointment and organization of the trustees and subject to the conditions and limitations in this act contained, the power authority, in cooperation with the proper Canadian authorities and those of the United States as hereinafter directed, shall proceed with the improvement and development of the international-rapids section of the St. Lawrence River (which is defined as that part of the said river from Ogdensburg to the point where it leaves the territory of this State) for the aid and benefit of commerce and navigation and for the development of the hydroelectric power inherent therein, generally in accordance with the report and plan submitted under date of January 15, 1931, by the majority of the St. Lawrence power-development commission, appointed under chapter 207 of the laws of 1930, and in accordance with the provisions of this act.

The power authority is authorized and directed:

1. To cooperate with the appropriate agencies and officials of the United States Government to the end that any project undertaken under the authority of this act shall be consistent with and in aid of the plans of the United States for the improvement of commerce and navigation along the St. Lawrence River, and shall be so planned and constructed as to be adaptable to the plans of the United States therefor, so that the necessary channels, locks, canals, and other navigational facilities may be constructed and installed by the United States in, through, and as part of the said project.

2. To negotiate with the appropriate Canadian authorities and agencies respecting the improvement and development of the international-rapids section of the St. Lawrence River for the aid and benefit of commerce and navigation and the development of hydroelectric power therefrom, and to plan and agree with them upon cooperative action to that end including any shifting of international boundary lines between Canada and the United States and upon the use, control, and disposition of the facilities to be created and the hydroelectric power to be developed by the project. Such negotiations and agreements shall be conducted and concluded with due regard to the position of the United States in respect to international agreements, and any such agreements as may be reached with Canadian authorities or agencies may be submitted by the power authority to Congress for its approval, if it be advised that such approval is necessary or desirable.

3. To apply to the appropriate agencies and officials of the United States Government and/or of the Dominion of Canada or its provinces, including the International Joint Commission, for such licenses, permits, or approval of its plans or projects as it may deem necessary or advisable, provided that neither the said power authority nor any trustee, officer, or agent thereof shall have any power to waive or surrender for any purpose whatsoever any right of the State of New York, whether sovereign or proprietary in character, in and to the St. Lawrence River, its waters, power, channel, bed, or uses; or the right of the said State to assert such rights at any future time, and provided further that if for any reason the power authority shall fail to secure any such license, permit, or approval as it may deem necessary or advisable, or shall decide not to make application therefor, it is authorized to institute suit, or to apply to Congress for legislation, or take such other action in the premises as it may deem necessary or advisable, in the furtherance of the project and for the protection of its rights and those of the State.

4. * * *.

5. To develop, maintain, manage, and operate that part of the project owned or controlled by it in such manner as to give effect to the policy hereby declared (and all plans and acts, and all contracts for the use, sale, transmission, and distribution of the power generated by the project, shall be made in the light of, consistent with and subject to this policy), namely, that the said project shall be in all respects for the aid, improvement, and benefit of commerce and navigation in, through, along, and past the St. Lawrence River and the international rapids section thereof, and that in the development of hydroelectric power therefrom the said project shall be considered primarily as for the benefit of the people of the State as a whole and particularly the domestic and rural consumers to whom the power can economically be made available, and accordingly that sale to and use by industry shall be a secondary purpose, to be utilized principally to secure a sufficiently high-load factor and revenue returns which will permit domestic and rural use at the lowest possible rates and in such manner as to encourage increased domestic and rural use of electricity. In furtherance of this policy and to secure a wider distribution of the said power and use of the greatest value to the general public of the State, the power authority shall in addition to other methods which it may find advantageous make provision so that municipalities and other political subdivisions of the State now or hereafter authorized by law to engage in the distribution of electrical current may secure a reasonable share of the power generated at the project, and shall sell the same or cause the same to be sold to such municipalities and political subdivisions at prices representing cost of generation, plus capital and operating charges, plus a fair cost of transmission, all as determined by the trustees, and subject to conditions which shall assure the resale of such power to domestic and rural consumers at the lowest possible price. To that end, the power authority may provide in any contract or contracts which it may make for the sale, transmission, and distribution of the said power that the purchaser, transmitter or distributor shall construct, maintain and operate, on such terms as the power authority may deem proper, such connecting lines as may be necessary for transmission of the power from main transmission lines to such municipalities or political subdivisions.

6. * * *.

7. * * *.

8. * * *.

9. * * *.

SEC. 6. The State of New York hereby consents to the occupation and use by the power authority of any and all property of the State of whatever kind or character within the international rapids section of the St. Lawrence River, and hereby vests the power authority with and delegates to it the right to exercise any and every right and power of the State in connection therewith, whether proprietary or sovereign in character, which the State itself might exercise: *Provided*, That such consent and delegation of power shall not permit the impairment or limit or prevent the future improvement of the navigability of the international rapids section of the said river, consistent with the maintenance of this project, but on the contrary the project shall be such as will improve and benefit commerce and navigation therein: *And provided further*, That the power authority shall have no power to limit, waive or surrender any right or interest of the State of New York in the said river or the use thereof. The State of New York does hereby pledge to and agree with those subscribing to the obligations to be issued by the power authority for the construction of such project, and with those parties who may enter into contracts with the power authority pursuant to the provisions in subparagraph 6 above, that the State will not limit or alter the rights hereby vested in the power authority until the said obligations together with the interest thereon are fully met and discharged and/or the said contracts are fully performed on the part of the power authority: *Provided*, That nothing herein contained shall preclude such limitation or alteration if and when adequate provision shall be made by law for the protection of those advancing money on such obligations of the power authority or those entering into such contracts with the power authority. The power authority as agent for the State is authorized to include this pledge and undertaking for the State in such obligations or contracts.

Mr. LUCAS. Mr. President, I shall take only a short time to discuss the business now pending before the Senate. I have no illusions that what I shall say in regard to the St. Lawrence seaway agreement will change any votes when the time finally comes for the Members of the Senate to cast their votes upon this measure. I debate the issue with some reluctance because of the stand taken on it by one of my predecessors in the Senate, from the State of Illinois, the late James Hamilton Lewis, who was one of the most spectacular and colorful figures who ever occupied a seat in this Chamber. He was a brilliant speaker and a great lawyer. In 1934 he was the leader in the debate against the ratification of the treaty. I have had occasion to read the debates which occurred at that time, and I know the arguments which were presented then by the late Senator Lewis, as well as by the late Senator Dieterich, of my State. Some of those arguments have been met as a result of amendatory legislation. Others have not.

Today this matter comes before the Senate as an executive agreement, rather than a treaty. Whether the late distinguished Senators from Illinois, who opposed the treaty at that time would now oppose the agreement, of course no one can tell. But, Mr. President, I have listened to many of the arguments that have been made on the floor of the Senate on the question of whether we should consider this matter as an executive agreement to be approved by a concurrent resolution of the Congress or whether we should consider it as a treaty. Being one who believes in the sanctity

and dignity of treaties, I had some concern until I made an examination of the record, which satisfies me that there is little or no question that the Senate of the United States has a right to consider this matter as an executive agreement, and not as a treaty. I shall briefly state my reasons for reaching that conclusion.

The other day I was interested in the able address made by the distinguished Senator from Utah [Mr. THOMAS], who gave to the Senate in chronological order the agreements and the treaties and the provisions that have been made from time to time between the United States of America and the Dominion of Canada. I saw in that argument the continuous growth of good will and neighborly policy between the United States and Canada. It should be of great help to any Senator in the event he was not convinced before. I shall briefly refer to the 1909 treaty, and I shall discuss briefly the procedure for agreement that led up to the adoption of that treaty between the two countries.

Mr. President, it is my opinion that the present executive agreement flows from and grows out of the 1909 treaty, and that as a result of the wording of the various provisions and articles of that treaty, the Senate of the United States is wholly justified in considering this matter as an executive agreement.

The preamble of the Boundary Water Treaty of 1909 stated that its purpose was "to prevent disputes regarding the use of boundary waters and to settle all questions which are now pending between the United States and the Dominion of Canada involving the rights, obligations, or interests of either in relation to the other, or to the inhabitants of the other, along their common frontier and to make provision for the adjustment and settlement of all such questions as may hereafter arise."

In my humble judgment, Mr. President, the question before us is one of the questions, which has arisen since the treaty was ratified, which can be handled by executive agreement.

Article III of the treaty provides in part as follows:

It is agreed that, in addition to the uses, obstructions, and diversions heretofore permitted or hereafter provided for by special agreement between the parties hereto, no further or other uses or obstructions or diversions, whether temporary or permanent, of boundary waters on either side of the line, affecting the natural level or flow of boundary waters on the other side of the line, shall be made except by authority of the United States or the Dominion of Canada within their respective jurisdictions and with the approval, as hereinafter provided, of a joint commission, to be known as the International Joint Commission.

Article IV provides in part as follows:

The High Contracting Parties agree that, except in cases provided for by special agreement between them, they will not permit the construction or maintenance on their respective sides of the boundary of any remedial or protective works or any dams or other obstructions in waters flowing from boundary waters or in waters at a lower level than the boundary in rivers flowing across the boundary, the effect of which is to raise the natural level of waters on the other side of the boundary unless the construction or maintenance thereof is approved by the aforesaid International Joint Commission.

Article VIII provides in part as follows:

The following order of precedence shall be observed among the various uses enumerated hereinafter for these waters, and no use shall be permitted which tends materially to conflict with or restrain any other use which is given preference over it in this order of precedence: (1) Uses for domestic and sanitary purposes; (2) Uses for navigation, including the service of canals for the purposes of navigation; (3) Uses for power and for irrigation purposes.

Article XIII provides as follows:

In all cases where special agreements between the High Contracting Parties hereto are referred to in the foregoing articles, such agreements are understood and intended to include not only direct agreements between the High Contracting Parties, but also any mutual arrangement between the United States and the Dominion of Canada expressed by concurrent or reciprocal legislation on the part of Congress and the Parliament of the Dominion.

Mr. President, I quote from the Boundary Water Treaty of 1909, which obviously is the basis of the executive agreement now under consideration. In order that I may proceed in what I conceive to be a logical manner, I ask unanimous consent that the executive agreement made between the President of the United States and His Majesty, the King of Great Britain, known as the Great Lakes-St. Lawrence Agreement, dated March 19, 1941, be placed in the RECORD at this point. I do this because it is a document of some length, and it would serve no good purpose for me to read it article by article.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the agreement was ordered to be printed in the RECORD, as follows:

CANADIAN-AMERICAN AGREEMENT OF MARCH 9, 1941

The President of the United States of America and His Majesty the King of Great Britain, Ireland and the British Dominions Beyond the Seas, Emperor of India, in respect of Canada, have decided to conclude an Agreement in relation to the utilization of the water in the Great Lakes-St. Lawrence Basin and to that end have named as their respective plenipotentiaries:

The President of the United States of America:

Jay Pierrepont Moffat, Envoy Extraordinary and Minister Plenipotentiary of the United States of America to Canada;

Adolf Augustus Berle, Jr., Assistant Secretary of State;

Leland Olds, Chairman of the Federal Power Commission;

His Majesty the King of Great Britain, Ireland and the British Dominions Beyond the Seas, Emperor of India, for Canada:

The Right Honourable W. L. Mackenzie King, Prime Minister, President of the Privy Council and Secretary of State for External Affairs;

The Honourable Clarence D. Howe, Minister of Munitions and Supply;

John E. Read, Legal Adviser, Department of External Affairs;

Who, after having communicated to each other their full powers found in good and due form, have agreed upon the following Articles.

PRELIMINARY ARTICLE

For the purposes of the present Agreement, unless otherwise expressly provided the expression:

(a) "Joint Board of Engineers" means the board appointed pursuant to an agreement between the Governments following the recommendation of the International Joint Commission, dated December 19, 1921;

(b) "Great Lakes System" means Lakes Superior, Michigan, Huron (including Georgian Bay), Erie and Ontario, and the connecting waters, including Lake St. Clair:

(c) "St. Lawrence River" includes the river channels and the lakes forming parts of the river channels from the outlet of Lake Ontario to the sea;

(d) "International Section" means that part of the St. Lawrence River through which the international boundary line runs;

(e) "Canadian Section" means that part of the St. Lawrence River which lies wholly within Canada and which extends from the easterly limit of the International Section to Montreal Harbour;

(f) "International Rapids Section" means that part of the International Section which extends from Chimney Point to the village of St. Regis;

(g) "Governments" means the Government of the United States of America and the Government of Canada;

(h) "countries" means the United States of America and Canada;

(i) "Special International Niagara Board" means the board appointed by the Governments in 1926 to ascertain and recommend ways and means to preserve the scenic beauty of the Niagara Falls;

(j) "deep waterway" means adequate provision for navigation requiring a controlling channel depth of 27 feet with a depth of 30 feet over lock sills, from the head of the Great Lakes to Montreal Harbour via the Great Lakes System and St. Lawrence River, in general accordance with the specifications set forth in the Report of the Joint Board of Engineers, dated November 16, 1926.

ARTICLE I

1. The Governments agree to establish and maintain a Great Lakes-St. Lawrence Basin Commission, hereinafter referred to as the Commission, consisting of not more than ten members of whom an equal number shall be appointed by each Government. The duties of the Commission shall be:

(a) to prepare and to recommend plans and specifications for the construction of works in the International Rapids Section in accordance with and containing the features described in the Annex attached to and made part of this Agreement, with such modifications as may be agreed upon by the Governments;

(b) upon approval of the plans and specifications by the Governments, to prepare a schedule allocating the construction of the works in the International Rapids Section on such a basis that each Government shall construct the works within its own territory or an equivalent proportion of the works so approved;

(c) to approve all contracts entered into on behalf of either Government for the works in the International Rapids Section;

(d) to supervise the construction of the works and to submit reports to the Governments from time to time, and at least once each calendar year, on the progress of the works;

(e) upon satisfactory completion of the works, to certify to the Governments that they meet the plans and specifications drawn up by the Commission and approved by the Governments;

(f) to perform the other duties assigned to it in this Agreement.

2. The Commission shall have the authority to employ such person and to make such

expenditures as may be necessary to carry out the duties set forth in this Agreement. It shall have the authority to avail itself of the services of such governmental agencies, officers and employees of either country as may be made available. The remuneration, general expenses and all other expenses of its members shall be regulated and paid by their respective Governments; and the other expenses of the Commission, except as provided for under Article III, paragraph (b) of this Agreement, shall be borne by the Governments in equal moieties.

3. The Governments agree to permit the entry into their respective countries, within areas immediately adjacent to the Niagara River and the International Section to be delimited by exchange of notes, of personnel employed by the Commission or employed in the construction of the works, and to exempt such personnel from the operation of their immigration laws and regulations within the areas so delimited. In the event that the Commission, pursuant to the provisions of paragraph 1 (b) of this Article, allocates to either of the Governments the construction of works, any part of which is within the territory of the other Government, the latter Government shall make provision for the according, within the area in which such a part is situated, of such exemption from customs, excise and other imposts, federal, state and provincial, as may be reasonably practicable for the effective and economical prosecution of the work. Regulations providing for such exemptions may be settled by the Governments by exchange of notes.

4. The Governments shall, by exchange of notes, prescribe rules and regulations for the conduct of the Commission. They may by the same means extend or abridge its powers and duties; and reduce or after reduction increase the number of members (provided that there must always be an equal number appointed by each Government and that the total number of members shall at no time exceed ten); and, upon completion of its duties, the Governments may terminate its existence.

ARTICLE II

The Government of Canada agrees:

(a) in accordance with the plans and specifications prepared by the Commission and approved by the Governments, to construct the works in the International Rapids Section allocated to Canada by the Commission; and to operate and maintain or arrange for the operation and maintenance of the works situated in the territory of Canada;

(b) to complete, not later than December 31, 1948, the essential Canadian links in the deep waterway, including the necessary deepening of the new Welland Ship Canal and the construction of canals and other works to provide the necessary depth in the Canadian Section of the St. Lawrence River; provided that, if the continuance of war conditions or the requirements of defense justify a modification of the period within which such works shall be completed, the Governments may, by exchange of notes, arrange to defer or expedite their completion as circumstances may require.

ARTICLE III

The Government of the United States of America agrees:

(a) in accordance with the plans and specifications prepared by the Commission and approved by the Governments, to construct the works in the International Rapids Section allocated to the United States of America by the Commission; and to operate and maintain or arrange for the operation and maintenance of the works situated in the territory of the United States of America;

(b) to provide, as required by the progress of the works, funds for the construction, including design and supervision, of all works in the International Rapids Section except (1) machinery and equipment for the development of power, and (2) works required for rehabilitation on the Canadian side of the international boundary;

(c) not later than the date of completion of the essential Canadian links in the deep waterway, to complete the works allocated to it in the International Rapids Section and the works in the Great Lakes System above Lake Erie required to create essential links in the deep waterway.

ARTICLE IV

The Governments agree that:

(a) they may, in their respective territories, in conformity with the general plans for the project in the International Rapids Section, install or arrange for the installation of such machinery and equipment as may be desired for the development of power and at such time or times as may be most suitable in terms of their respective power requirements;

(b) in view of the need for coordination of the plans and specifications prepared by the Commission for general works in the International Rapids Section with plans for the development of power in the respective countries, the Commission may arrange for engineering services with any agency in either country which may be authorized to develop power in the International Rapids Section;

(c) except as modified by the provisions of Article VIII, paragraph (b) of this Agreement, each country shall be entitled to utilize one-half of the water available for power purposes in the International Rapids Section;

(d) during the construction and upon the completion of the works provided for in the International Rapids Section, the flow of water out of Lake Ontario into the St. Lawrence River shall be controlled and the flow of water through the International Section shall be regulated so that the navigable depths of water for shipping in the harbour of Montreal and throughout the navigable channel of the St. Lawrence River below Montreal, as such depths now exist or may hereafter be increased by dredging or other harbour or channel improvements, shall not be injuriously affected by the construction of operation of such works, and the power developments in the Canadian Section of the St. Lawrence River shall not be adversely affected;

(e) upon the completion of the works provided for in the International Rapids Section, the power works shall be operated, initially, with the water level at the power houses held at a maximum elevation 238.0, sea level datum as defined in the Report of the Joint Board of Engineers, for a test period of ten years or such shorter period as may be approved by any board or authority designated or established under the provisions of paragraph (f) of this Article; and, in the event that such board or authority considers that operation with the water level at the power houses held to a maximum elevation exceeding 238.0 would be practicable and could be made effective within the limitations prescribed by paragraphs (c) and (d) of this Article, the Governments may, by exchange of notes, authorize operation, subject to the provisions of this Article, and for such times and subject to such terms as may be prescribed in the notes, at a maximum elevation exceeding 238.0.

(f) the Governments may, by exchange of notes, make provision for giving effect to paragraphs (c), (d), and (e) of this Article;

(g) during the construction of the works provided for in the International Rapids Section, facilities for 14 ft. navigation in that Section shall be maintained.

ARTICLE V

The Governments agree that nothing done under the authority of this Agreement shall confer upon either of them proprietary rights, or legislative, administrative or other jurisdiction, in the territory of the other, and that the works constructed under the provisions of this Agreement shall constitute a part of the territory of the country in which they are situated.

ARTICLE VI

The Governments agree that either of them may proceed at any time to construct, within its own territory and at its own cost, alternative canal and channel facilities for navigation in the International Section or in waters connecting the Great Lakes, and to utilize the water necessary for the operation of such facilities.

ARTICLE VII

The High Contracting Parties agree that the rights of navigation accorded under the provisions of existing treaties between the United States of America and His Majesty shall be maintained notwithstanding the provisions for termination contained in any of such treaties, and declare that these treaties confer upon the citizens or subjects and upon the ships, vessels and boats of each High Contracting Party, rights of navigation in the St. Lawrence River, and the Great Lakes System, including the canals now existing or which may hereafter be constructed.

ARTICLE VIII

The Governments, recognizing their common interest in the preservation of the levels of the Great Lakes System, agree that:

(a) each Government in its own territory shall measure the quantities of water which at any point are diverted from or added to the Great Lakes System, and shall place such measurements on record with the other Government semiannually;

(b) in the event of diversions being made into the Great Lakes System from other watersheds lying wholly within the borders of either country, the exclusive rights to the use of waters which are determined by the Governments to be equivalent in quantity to any waters so diverted shall, notwithstanding the provisions of Article IV, paragraph (c) of this Agreement, be vested in the country diverting such waters, and the quantity of water so diverted shall be at all times available to that country for use for power below the point of entry, so long as it constitutes a part of boundary waters;

(c) if any diversion of water from the Great Lakes System or the International Section, other or greater in amount than diversions permitted in either of the countries on January 1, 1940, is authorized, the Government of such country agrees to give immediate consideration to any representations respecting the matter which the other Government may make; if it is impossible otherwise to reach a satisfactory settlement, the Government of the country in which the diversion of water has been authorized agrees, on the request of the other Government, to submit the matter to an arbitral tribunal which shall be empowered to direct such compensatory or remedial measures as it may deem just and equitable; the arbitral tribunal shall consist of three members, one to be appointed by each of the Governments, and the third, who will be the chairman, to be selected by the Governments;

(d) the Commission shall report upon the desirability of works for compensation and regulation in the Great Lakes System and, upon the approval by the Governments of any such works, shall prepare plans and specifications for their construction and recommend to the Governments an equitable allocation of their cost; the Governments shall make arrangements by exchange of notes for the construction of such works as they may agree upon.

ARTICLE IX

The Governments, recognizing their primary obligation to preserve and enhance the scenic beauty of the Niagara Falls and River,

and consistent with that obligation, their common interest in providing for the most beneficial use of the waters of that River, as envisaged in the Final Report of the Special International Niagara Board, agree that:

(a) the Commission shall prepare and submit to the Governments plans and specifications for works in the Niagara River designed to distribute and control the waters thereof, to prevent erosion and to ensure at all seasons unbroken crest lines on both the American Falls and the Canadian Falls and to preserve and enhance their scenic beauty, taking into account the recommendations of the Special International Niagara Board; the Governments may make arrangements by exchange of notes for the construction of such works in the Niagara River as they may agree upon, including provision for temporary diversions of the waters of the Niagara River for the purpose of facilitating construction of the works; the cost of such works in the Niagara River shall be borne by the Governments in equal moieties;

(b) upon the completion of the works authorized in this Article, diversions of the waters of the Niagara River above the Falls from the natural course and stream thereof additional to the amounts specified in Article 5 of the Boundary Waters Treaty of 1909 may be authorized and permitted by the Government to the extent and in the manner hereinafter provided:

(1) the United States may authorize and permit additional diversion within the State of New York of the waters of the River above the Falls for power purposes, in excess of the amount specified in Article 5 of the Boundary Waters Treaty of 1909, not to exceed in the aggregate a daily diversion at the rate of five thousand cubic feet of water per second;

(2) Canada may authorize and permit additional diversion within the Province of Ontario of the waters of the River above the Falls for power purposes, in excess of the amount specified in Article 5 of the Boundary Waters Treaty of 1909, not to exceed in the aggregate a daily diversion at the rate of five thousand cubic feet of water per second;

(c) upon completion of the works authorized in this Article, the Commission shall proceed immediately to test such works under a wide range of conditions, and to report and certify to the Governments the effect of such works, and to make recommendations respecting diversions of water from Lake Erie and the Niagara River, with particular reference to (1) the perpetual preservation of the scenic beauty of the Falls and Rapids, (2) the requirements of navigation in the Great Lakes System, and (3) the efficient utilization and equitable apportionment of such waters as may be available for power purposes; on the basis of the Commission's reports and recommendations, the Governments may by exchange of notes and concurrent legislation determine the methods by which these purposes may be attained.

ARTICLE X

The Governments agree that:

(a) each Government undertakes to make provision for the disposition of claims and for the satisfaction of any valid claims arising out of damage or injury to persons or property occurring in the territory of the other in the course of and in connection with construction by such Government of any of the works authorized or provided for by this Agreement;

(b) each Government is hereby released from responsibility for any damage or injury to persons or property in the territory of the other which may be caused by any action authorized or provided for by this Agreement, other than damage or injury covered by the provisions of paragraph (a) of this Article;

(c) each Government will assume the responsibility for and the expense involved in the acquisition of any lands or interests in land of its own territory which may be necessary to give effect to the provisions of this Agreement.

ARTICLE XI

This Agreement shall be subject to approval by the Congress of the United States of America and the Parliament of Canada. Following such approval it shall be proclaimed by the President of the United States of America and ratified by His Majesty the King of Great Britain, Ireland and the British dominions beyond the Seas, Emperor of India, in respect of Canada. It shall enter into force on the day of the exchange of the instrument of ratification and a copy of the proclamation, which shall take place at Washington.

In witness whereof the respective plenipotentiaries have signed this Agreement in duplicate and have hereunto affixed their seals.

Done at Ottawa, the nineteenth day of March, in the year of our Lord one thousand nine hundred and forty-one.

ANNEX

CONTROLLED SINGLE STAGE PROJECT (238–242) FOR WORKS IN THE INTERNATIONAL RAPIDS SECTION

(See Art. 1, Par. 1 (a))

The main features of the Controlled Single Stage Project (238–242), described in detail with cost estimates in the report of the Temporary Great Lakes-St. Lawrence Basin Committees dated January 3, 1941, are as follows:

(1) A control dam in the vicinity of Iroquois Point.

(2) A dam in the Long Sault Rapids at the head of Barnhart Island and two power houses, one on either side of the international boundary, at the foot of Barnhart Island.

(3) A side canal, with one lock on the United States mainland to carry navigation around the control dam and a side canal, with one guard gate and two locks, on the United States mainland south of Barnhart Island to carry navigation from above the main Long Sault Dam to the river south of Cornwall Island. All locks to provide 30 ft. depth of water on the mitre sills and to be of the general dimensions of those of the Welland Ship Canal. All navigation channels to be excavated to 27 ft. depth.

(4) Dykes, where necessary, on the United States and Canadian sides of the international boundary, to retain the pool level above the Long Sault Dam.

(5) Channel enlargement from the head of Galop Island to below Lotus Island designed to give a maximum velocity in the navigation channel south of Galop Island not exceeding 4 feet per second at any time.

(6) Channel enlargement between Lotus Island and the control dam and from above Point Three Points to below Ogden Island designed to give a maximum mean velocity in any cross-section not exceeding 2¼ feet per second with the flow and at the stage to be permitted on the 1st of January of any year, under regulation of outflow and levels of Lake Ontario.

(7) The necessary railroad and highway modifications on either side of the international boundary.

(8) The necessary works to permit the continuance of 14 feet navigation on the Canadian side around the control dam and from the pool above the Long Sault Dam to connect with the existing Cornwall Canal.

(9) The rehabilitation of the towns of Iroquois and Morrisburg, Ontario.

All the works in the pool below the control dam shall be designed to provide for full Lake Ontario level but initially the pool shall be operated at maximum elevation 238.0.

Mr. LUCAS. Mr. President, a careful examination of the 1941 agreement with Canada, which has just been placed in the RECORD, will disclose to the prudent and unprejudiced mind that such an agreement flows directly from article 13 of the 1909 treaty, and that any arrangements between the United States and Canada providing for the uses, obstructions, and diversions, as found in article 3 of the 1909 treaty, can be legally approved by concurrent legislation on the part of the Congress of the United States and the Parliament of Canada.

Legally speaking, I am convinced beyond a shadow of a doubt that Congress is on safe grounds in considering this compact in the form of an executive agreement rather than as a treaty. Be that as it may, however, the question of treaties versus agreements has been debated in the Senate from the beginning of the history of the Nation. What is and what is not a treaty depends in a great measure upon mere whim, temperament, interest, and caprice. In other words, distinguished Senators have stood upon the floor of the Senate during this debate opposing the agreement on the ground that it should be presented as a treaty. On the other hand, many of the Senators who were in the Senate in 1934 did not support it as a treaty when presented at that time; so I repeat, the difference between an executive agreement and a treaty, in most instances, depends in a great measure upon what the interest may be in the section of the country from which a Senator comes. It may depend upon prejudice. It may depend upon politics. It may depend upon mere whim or caprice.

Mr. VANDENBERG. Mr. President, I have been greatly interested in the Senator's discussion of the distinction between agreements and treaties. He has been using the phrase "executive agreement." I know he has in mind the fact that an executive agreement, as such, usually is an agreement exclusively within the jurisdiction of the Executive. The agreement which he is discussing is of a slightly different type. It is an executive agreement subject to legislative approval.

Mr. LUCAS. That is correct.

Mr. VANDENBERG. I think it is important constantly to keep that distinction in mind.

Mr. LUCAS. I am very grateful to the able Senator from Michigan for calling that to my attention. That is, of course, exactly what I had in mind. There are any number of executive agreements that have been made by our Presidents without any authority whatever from the Congress. And few have ever been seriously questioned.

The agreement before the Senate is an executive agreement, as the able Senator has said, by which we seek to reach an understanding, by means of a joint resolution passed by both the Senate and the House of Representatives. The point I am making is that between that kind of agreement and a treaty there is very

little difference. In one case the Congress of the United States passes on an agreement by a majority vote; in the other case the Senate of the United States, by a two-thirds vote, passes on a treaty. But to get back to the point I made, I shall cite a number of cases which seem to prove my point, and which are tremendously interesting in the development of the history of this Nation.

Mr. President, there have been a great number of agreements which have been made in the past with Canada through legislation, the kind of legislation which is now pending before the Senate. I shall not refer to all of them, but the ones which are closely identified with the agreement now before us can be found among agreements which have been made between the United States and Canada respecting international bridges.

We have entered into agreements with foreign countries times without number, under the commerce clause of the Constitution, relative to construction projects. Bonds have been issued, tolls have been considered, and practically everything required or requested in the agreement now before the Senate has been done in the past respecting similar executive agreements between the two countries.

One outstanding example I cite: With regard to the bridge which crosses the Niagara River at Buffalo, as I understand from the record, the International Commission was authorized to charge tolls and to issue bonds, in order to provide for the payment of the cost of the bridge. The income from the bonds to be issued was to be exempt from all Federal, State, and local taxation. That is one example of the many reciprocal arrangements which have been made between this country and Canada.

One of the most fascinating cases with respect to a treaty and an agreement occurred many years ago, when the Government was acquiring more territory. It happened in connection with the annexation of Texas. After Texas had established its independence from Mexico, and had gained the recognition of the United States as a sovereign power, negotiations were undertaken for its incorporation into the United States, and on April 12, 1944, a treaty of annexation was signed by representatives of the United States of America and of Mexico.

What happened to that treaty, Mr. President? It was brought into the United States Senate, and, after long debate, was rejected by the Senate on June 8, 1844, by a vote of 16 yeas to 35 nays. We find thereafter the President of the United States—President Tyler—bypassing the treaty and sending to the Congress a message in which he stated that—

> The power of Congress is, however, fully competent in some other form of proceeding to accomplish everything that the formal ratification of the treaty could have accomplished.

The President of the United States, after the Senate refused to ratify the treaty of annexation of Texas, told the Congress that there was another method, and "if you do not like the treaty, take the executive agreement."

That is the one statement in all these cases which has convinced me that the arguments regarding the difference between a treaty and an executive agreement of the kind of that before the Senate amounts to very little, because, following that, a joint resolution was passed by a majority vote of both Houses, the vote of the Senate being 27 to 25, on March 1, 1845, which expressed conditionally the consent of the Congress to the admission of Texas, and authorized the President to initiate negotiations.

The joint resolution was transmitted to the American chargé d'affaires in Texas to be presented as an offer of agreement to the Texas Government. The Texas people acquiesced, the Mexican Government acquiesced, and Texas became a State of this Union as the result of an executive agreement, after the Senate of the United States had flatly said "No" to a treaty providing for the annexation of Texas. So a way was found, Mr. President, to bypass a treaty providing for the annexation of a State—one of the most solemn, most sacred and dignified acts a government can perform in negotiating with another nation.

A similar instance occurred with regard to Hawaii. In 1897 President McKinley submitted to the Senate a treaty providing for the annexation of Hawaii, which had already been approved by the Hawaiian authorities. That treaty failed of ratification; so on July 7, 1898, the President approved a joint resolution providing that, the Government of the Republic of Hawaii having signified its consent, all rights of sovereignty of whatsoever kind in and over the Hawaiian Islands were ceded and transferred to the United States, and the Hawaiian Islands were annexed. That is another instance in which a treaty was bypassed by the President of the United States.

If the Members of the Senate at the time Texas was annexed had been so convinced that in order to annex Texas it was necessary to ratify the annexation by a treaty, why did they support the executive agreement in the second instance? They had the necessary votes in the first instance to defeat the treaty. As I said before, the vote was 16 yeas to 35 nays. They had a constitutional majority against the ratification of the treaty, but something happened before action on the executive agreement to change the votes of a number of Senators.

So, Mr. President, much as I dislike to say it, I do not take much stock in the arguments which are made in the Senate regarding the solemnity of treaties in preference to this type of executive agreement, when it is so difficult to distinguish one from the other. I cannot bring myself to feel I am guilty of violation of my oath when I refuse to acknowledge the pending agreement as a treaty reflecting upon what was done in the annexation of Texas and Hawaii.

Mr. President, when the St. Lawrence development agreement was under consideration in Congress in 1941 the Senator from Illinois appeared before the Committee on Foreign Relations and at that time submitted an amendment which was adopted. The adoption of my amendment provides one of the basic reasons for my support of the agreement at this time. The amendment takes care of one of the main arguments made against the pending proposal by the late Senators from Illinois of whom I have heretofore spoken. The amendment dealt with the diversion of the water from Lake Michigan down through the canal into the Illinois River and on into the Mississippi and into the Gulf of Mexico.

Mr. President, there was a time when there was no limitation placed upon the amount of water the sanitary drainage district could turn through the canal; but a few years ago the case dealing with that subject reached the Supreme Court of the United States, and Chief Justice Hughes, in a very persuasive opinion, froze the amount of water we can now divert from Lake Michigan into the Illinois Valley at 1,500 cubic feet per second.

When the agreement was before the Senate in 1941, I objected to the provision which would give to the Canadian Government any right or power to say when or how much more water might be diverted down through the canal. During the debates which were held on the agreement in 1934, there was no provision for such exemption. Canada had equal jurisdiction over the diversion flow as the United States.

The late Senator Lewis took the position that the kind of agreement which was being debated would, if entered into, really make Lake Michigan an international body of water, giving Canada certain rights and powers in Lake Michigan to which she was not entitled. So the committee in 1941 was good enough to go along with the position taken by the then Senator from Illinois.

The joint resolution now pending, while providing for the approval of the agreement between the United States and Canada, specifically withholds approval of article 8 (c) of that agreement. As I stated before, article 8 (c) would place a limitation on the amount of water which would be permitted to flow from the Great Lakes through the Chicago outlet into the Illinois Valley. That article provided in effect that if there were any diversion of water from the Great Lakes system greater than the amount permitted on January 1, 1940, the Government of the United States and the Government of Canada would proceed to arbitrate any disagreements over such diversion. If this article of the agreement were to be approved, the amount of water which could flow through the Chicago drainage canal would be permanently frozen at 1,500 cubic feet per second.

I took the position that this was an artificial limit which failed to take into account two very important things for the people who live in the Illinois Valley. My home is at Havana, Ill., on the Illinois River. I know something about the history of the canal from the very beginning, and the tremendous amount of damage that the diversion of water from Lake Michigan did in the early days to the farm lands of my section, before it

was finally frozen at 1,500 cubic feet per second. However, there comes a time when the water is low in the upper part of the river, and unsanitary conditions in the summertime frequently reach a point which makes necessary more water to flush the stream and move the debris down the canal and on into the river.

There was another matter to be considered, Mr. President. It was the matter of national defense. I could never agree that Canada should have the right to say how much water we should divert in times of a great emergency.

During the last war the War Department established a huge industry at Seneca, Ill., employing thousands of people to construct landing barges which were used all over the world. The time came during the war when it was necessary to raise the level of the Illinois River in order that those barges might be floated down the Illinois and Mississippi Rivers into the Gulf of Mexico without any difficulty. As I said before, the provision dealing with water diversion has been waived. We are left in status quo, so far as the diversion of water is concerned. Obviously, it was one of the points considered, among the controversial questions before us, and the elimination of that particular controversial point was extremely helpful to my section of the country.

Mr. President, after that point was agreed upon, I had no hesitancy in supporting the agreement primarily upon the grounds of national defense. Our world moves on. Our country has grown to greatness because it has recognized that change is necessary and has been able to adapt itself to those changes. In America we are happy and prosperous because we have not remained in status quo. All our mutual relations with Canada from the very beginning have been the best. There has been a gradual evolution from time to time in the relations between our two countries. Mark this word well, Mr. President: Sooner or later the St. Lawrence seaway will be constructed, even though we fail to begin its construction now.

Mr. President, when I think of national defense in connection with a project of this kind my mind immediately flies to the Tennessee Valley Authority. I remember that some Representatives and Senators who have previously opposed the agreement with Canada respecting the St. Lawrence, were also foes of the proposal for the establishment of a Tennessee Valley Authority. If it were not that we had in the United States the Tennessee Valley Authority, the Columbia Valley power project, and many other national-defense projects with which power was connected, I am not so sure—in fact, I know that we would not have made the progress we did in winning the war. I remember very well that during the war, when the President of the United States requested additional appropriations for the Tennessee Valley Authority, some of the biggest industrialists of the country, who were then in Washington as dollar-a-year men, and who in the beginning had called the Tennessee Valley Authority a socialistic and communistic project, came before the Appropriations Committee and requested that more money be appropriated in order further to expand and develop that great project. Without Boulder Dam, the Grand Coulee, Bonneville, and the TVA, we would have been hampered materially in fighting the war.

The other day I picked up a newspaper which contained an article describing the great benefits which have been derived through the TVA. I shall read one or two paragraphs from the article:

Gordon R. Clapp, Chairman of TVA, said: "This region today is paying almost twice the share of the national income (in income taxes) it paid in 1933."

The income of the Tennessee Valley people, so Chairman Clapp says, was $680,000,000 more in the single year of 1945 than it would have been had the per capita income remained at the same relative level in 1933.

Mr. President, this is an amazing thing. It is inspiring to contemplate what the TVA has done for the section of the South in which it is located. Let no one say that the great waterway agreement proposed to be entered into between Canada and the United States, if it shall result in the development contemplated, will not ultimately greatly develop the per capita income of the people of that section of the country for hundreds of miles around.

The article further states that the great object lesson of the TVA is that such developments, by increasing the economic health and educational standards of one area, benefit all other sections of the Nation.

The TVA * * * has repaid the United States Treasury $23,600,000 out of its power earnings, payments applied against the cost of construction. It has saved the valley and its tributary areas many devastating floods by impounding of waters. It has put $132,000,000 of its earnings back into expansion and improvements of its power facilities. And last year it earned $21,800,000, a 5½-percent profit on its total investment.

That is the "socialistic experiment" which many persons believed we were entering into when the TVA was established. Mr. President, time moves on; and unless the American people keep in tempo with the pace of progress we cannot continue to be the leaders of this world in almost every line of human endeavor.

On the question of national defense, the President of the United States, the Secretary of State, the Joint Chiefs of Staff, and the Under Secretary of War are unanimous in telling us that the project would help the national defense. In my judgment, they are correct. In planning our national defense we must be realistic. The total mobilization of all our resources almost became a reality in World War II. If the St. Lawrence seaway project had become an actuality in time for use in World War II it would have been of material assistance by increasing the industrial and transportation potential of the United States.

Much argument has been made to the effect that if we build this seaway project it will be exterminated by a bomb in the next war. To me, that argument is fantastic and somewhat ridiculous. Those who take that position should never ask for another dime for the further expansion, construction, or improvement of any port in America where warships and war materials will be going in and out in the event of a great emergency, because such ports will be just as subject to being exterminated through the force of atomic power as will the St. Lawrence seaway. That gets back to the very point which I made a moment ago. Those who are interested in the ports at Boston, New York, Baltimore, and other places are not seriously considering a long-range security program of America, which is, to my mind, absolutely indispensable if we are to carry the mantle of world leadership which has been thrust upon us as a result of our victory in World War II.

Mr. President, there is another point which I wish to discuss. On May 22, 1946, I submitted the amendment which I have heretofore discussed, which would authorize and empower the two countries to fulfill the undertakings made, with the exception of article VII, article VIII, paragraph (c), and so forth. At that time I made a statement before the Senate, which can be found on page 5406 of the CONGRESSIONAL RECORD, dealing with the diversion of water. At that time I was in consultation with the officials of the Mississippi Valley Association. They were writing to me and conferring with me on this amendment. They gave me to understand, in the correspondence and in our conversations, that if this amendment should be adopted by the Committee on Foreign Relations they would have no objection to the agreement. I should like to read a letter from Mr. Lachlan Macleay, president of the Mississippi Valley Association, dated November 12, 1945, and addressed to Mr. Sidney A. Smith, of the Anchor Storage Co., Chicago, Ill.:

MISSISSIPPI VALLEY ASSOCIATION,
St. Louis, November 12, 1945.

Mr SIDNEY A. SMITH,
Anchor Storage Co., Chicago, Ill.

DEAR SIDNEY: Replying to yours of November 6, which was awaiting me on my return to St. Louis this morning.

It is my sincere belief that if article VIII of the proposed St. Lawrence Treaty or agreement is removed, the greater part of the objections to the St. Lawrence project in the valley would be dissipated. All that would be left in the way of objections would be from cities which might believe that the St. Lawrence seaway would affect their commerce in a detrimental way.

The position of the Valley Association has always been taken on the basis of article VIII, which would have a very bad effect upon the valley as a whole, and so long as article VIII remains in the treaty we will oppose the St. Lawrence project with every influence we possess.

With kindest personal regards,
Sincerely,

LACHLAN MACLEAY,
President.

I was a little surprised that I did not hear from the Mississippi Valley Association group this year on the agreement. I had a right to presume that they still maintained the position which they took in 1946, after this amendment was agreed upon by the Committee on Foreign Relations. But on January 31 of

this year, much to my surprise, I received the following letter:

Hon. SCOTT W. LUCAS,
Senate Office Building,
Washington, D. C.

DEAR SENATOR LUCAS: The Mississippi Valley Association is strongly opposed to the present form of the bill (S. J. Res. 111) to create a Great Lakes-St. Lawrence seaway, now before the Senate.

At the annual meeting of the association in St. Louis, January 26–27, attended by more than 600 delegates from 23 midcontinent and Gulf States, the attached resolution was unanimously approved.

We earnestly urge that the bill be recommitted so that a proper economic survey can be made and the paragraph providing for the charging of tolls can be stricken from the bill.

This is the resolution:

We again disapprove the Great Lakes-St. Lawrence seaway for these reasons:

1. There never has been an economic survey made of the project by the Corps of Army Engineers.

2. The charging of tolls would probably result in the charging of tolls on all the navigable channels in the United States, thus ending the free use of them, and

3. It would further handicap the American merchant marine.

Those are three of the weakest excuses which I think the Mississippi Valley Association could have found to place in a resolution of this kind. I do not know why they have changed their minds, but apparently someone has been working pretty hard on the Mississippi Valley Association to persuade the members to change from the position they took 2 years ago. Could it be that the proposed Missouri Valley Authority and a few other so-called power-and-flood projects may have had some influence on the members of the Mississippi Valley Association, rather than the argument that "the charging of tolls would probably result in the charging of tolls on all the navigable channels of the United States, thus ending the free use of them."

That is "bunk," and they know it.

The resolution says "it would further handicap the American merchant marine."

I never heard that argument 2 years ago.

The association says "there never has been an economic survey made of the project by the Corps of Army Engineers."

These arguments sound like the ones which have been made on the Senate floor in regard to the difference between an Executive agreement and a treaty. The association switches from one argument to the other, according to their particular interests, whims, and so forth, of its members. I regret that I was not advised before this time as to the position of the Mississippi Valley Association. Let me ask my friend from Wisconsin [Mr. WILEY] whether any representatives of the association testified one way or the other before the committee.

Mr. WILEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. HOLLAND in the chair). Does the Senator from Illinois yield to the Senator from Wisconsin?

Mr. LUCAS. I yield.

Mr. WILEY. It is my recollection that they did not. In response to the particular suggestion now presented to the Senate, I wish to say that the opposition to this seaway included the same statement in their minority views, namely, that no appraisal had been made. I wish to say to the Senate that they were totally ignorant of the fact that the Department of Commerce made a complete economic appraisal of the St. Lawrence seaway project, and reduced it to the form of a report. That was done in compliance with a suggestion, made in 1941, that there had not been a complete report.

In regard to the Army engineers, let me say it is testified by General Wheeler that they do not make economic surveys, but make engineering surveys; and the only way to get the Army engineers to make an economic survey is first to have a resolution to that effect adopted by the Congress. Mr. President, that point is just another stumbling block which the opponents of this project attempt to put in the pathway of progress.

Again I call attention to the fact that the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, after taking the figures as to construction, as arrived at by the engineers, and taking the available tonnage and the foreseeable tonnage, and taking all the other factors that the Department of Commerce can evaluate, brought forth an industry report on domestic transportation covering the very subject which the Senator's letter says has not been reported on.

Mr. LUCAS. I thank the Senator from Wisconsin.

Mr. President, I desire to call attention to one more point which has been made. The distinguished Senator from Maryland [Mr. TYDINGS] made quite a point of the fact that when we entered into the 1942 Defense Sites Agreement with Panama, we should have had a treaty, rather than an executive agreement. I should like to have the RECORD show that the 1942 agreement providing for the lease of defense sites in the Republic of Panama was negotiated under the authority of and pursuant to the provisions of the General Treaty of Friendship and Cooperation signed with Panama on March 2, 1936, and approved by the United States Senate on July 25, 1939. Articles II and X of the 1936 treaty specifically provide for possible future arrangements between the two Governments for the use of additional territory in Panama for the effective protection of the Canal in the event of "some new unforeseen contingency" or "in case of an international conflagration or the existence of any threat of aggression." The 1942 defense sites agreement referred in its preamble, in language taken directly from the paramount document, to the 1936 treaty.

To my mind, the argument that this agreement should have been a treaty is a fallacious one. Those who advance that argument may be laboring under a misconception as to what happened previously with respect to a treaty. In other words, if we have a treaty which grants to the respective parties signatory to it the power to make executive agreements thereafter in furtherance of the treaty, it would seem to me highly inconsistent for the same countries to enter into another treaty on the same subject. I am satisfied that the 1942 arrangement for the lease of defense sites was an agreement made under authority of the general treaty of 1936, which, along with those clauses of the original convention of 1903 still in effect, constitutes the principal basis for the current relations of the United States with Panama. I consider the 1942 agreement to be a matter of detailed arrangement emanating from the 1936 treaty, and distinct from an agreement embodying new arrangements or considerations. The question thus propounded in relation to that treaty and that situation is the same as the question which is before us today. In the presently proposed agreement between this country and Canada, there are no new arrangements or considerations, no arrangements that are not based upon action previously taken by this country and Canada in the various treaties that have been negotiated, and to which I have referred. The same situation exists with respect to the defense sites agreement which was made in 1942. That agreement flowed from the original convention that was entered into between the United States and Panama in 1903, following the friendship treaty of 1936, which was ratified by the Senate in 1939. On the basis of those two treaties, of course, the two countries had the power to do what they did.

Mr. President, in conclusion I repeat what I said before, namely, that while it is doubtful that this seaway agreement will be approved I regret that the Senate of the United States may take such negative action. Everyone knows that we are in a world of trouble and turmoil at this particular moment. No man can tell what may happen in the future. But I should like to have the United States be able, 8 or 10 years from now, or at any other future time, to mobilize every possible resource in the event any emergency occurs; and if the emergency I am thinking about should occur, we shall need every national resource at our command fully developed. Here is a self-liquidating project, a project that will be liquidated through the charge of tolls. That principle has proved successful in the case of the Suez Canal and in the case of the Panama Canal. The countries in charge of those canals have lost no money.

Here is an opportunity to begin to plan for the future; and yet there are those who react unfavorably toward it because of some local interest which some may think is going to be affected in their own territory. I am not one who says that sectional interests should not be considered, but I undertake to say that it is a short-sighted policy to do so at the expense of the national interest. This project will hurt no one. On the other hand, it will give to this Nation an additional defense that may be needed at some time in the future.

Mr. President, this project should be authorized now. We should not follow

the footsteps of the past. This project has been considered from time to time, but it never has commanded sufficient votes to permit it to be constructed. One President after another has recommended it.

Men who have studied the problems involved, men who know and understand engineering, men who have a knowledge of what the country needs in the way of a sound defense, have recommended this project throughout the years. Yet some persons are afraid that some community will suffer economically if the seaway is built. This I challenge—but even so it would be better to lose a little here and a little there than at some future time possibly lose all because we were inadequately prepared. It is such groundless fears and lack of vision that is retarding, it seems to me, one of the greatest projects for the national defense that ever has been conceived by the mind of man.

Mr. President, I now yield the floor.

Mr. WILEY. Mr. President, I wish to compliment the distinguished Senator from Illinois. As I listened to his fervent expression of the Nation's need, I was reminded of these lines by Sam Foss:

Bring me men to match my mountains,
Bring me men to match my plains,
Not men with clouded visions,
But with sunlight in their brains.

That is the need of America and the world right now not only in relation to evaluating the St. Lawrence waterway, but it is the need in evaluating every great problem. The need is for men who are not sectionally minded, for men who have the broader outlook.

Mr. President, there have been repeated charges that the proponents of the St. Lawrence seaway have injected the issue of sectionalism into the discussion. The record, I believe, shows that nothing could be further from the truth. The members of the opposition stand accused by their own record of placing the interests of their particular sections and of a few economic interests within those sections above the national welfare. What is the proof of this? I ask my colleagues to look at the record of the hearings on the St. Lawrence seaway, particularly those of 1946. Within more than 1,300 pages of those hearings, my colleagues will find page after page in which representatives and legislators from the ports of New Orleans, Boston, and Baltimore, and from other areas, time and time again devoted their testimony exclusively to trying to prove that the St. Lawrence seaway would hurt their particular section or the interests of a few of their particular constituents.

So when we state, as we have stated here on the floor of the Senate, that the opposition is basing its real assault on the seaway upon sectional grounds, we do not get the idea out of a hat. We get it from the record of the St. Lawrence seaway discussion over the years.

It is obvious, of course, that the State of Wisconsin is vitally interested in the seaway project, just as is the State of Minnesota and all the other Great Lakes States. But I am sure that my colleague the distinguished Senator from Illinois [Mr. LUCAS], will agree that the project is basically a national project and, indeed, a continental project. While it is up to us to represent the interests of Wisconsin and Michigan and Illinois and Minnesota, we have a greater obligation. What do we owe the Nation? When we answer that question, we shall then be ready to face the situation that lies ahead. When the distinguished Senator from Illinois speaks, he speaks not as a Senator from Illinois, but as a United States Senator, representing the people of all the 48 States, who clamor for the St. Lawrence seaway in the interest of the national welfare.

Mr. President, I wish to comment for a few moments on a subject that was brought up by the distinguished Senator from Illinois, who so well presented the many phases of the discussion. I heartily agree with his conclusion that the agreement entered into in 1941 by the President was a valid exercise of constitutional authority, but there was one angle that was not stressed today, and I desire to spend a few moments on that.

In 1909 the United States entered into a Boundary Waters Treaty with Canada, which was ratified by the Senate. It is entirely clear in my mind that the 1941 agreement which the President entered into was a special agreement within the terms of article 8 of the treaty of 1909, because it was a mutual arrangement between the United States and Canada, to be approved by concurrent or reciprocal legislation. I wish to read article 8 of the treaty of 1909:

The following order of precedence shall be observed among the various uses enumerated hereinafter for these waters, and no use shall be permitted which tends materially to conflict with or restrain any other use which is given preference over it in this order of precedence:

(1) Uses for domestic and sanitary purposes.

(2) Uses for navigation, including the service of canals for the purposes of navigation.

(3) Uses for power and for irrigation purposes.

The crux of the matter is this: "Uses for navigation, including the service of canals for the purpose of navigation."

Article 4 provides:

The high contracting parties agree that, except in cases provided for by special agreement between them, they will not permit the construction or maintenance on their respective sides of the boundary of any remedial or protective works or any dams or other obstructions in waters flowing from boundary waters or in waters at a lower level than the boundary in rivers flowing across the boundary, the effect of which is to raise the natural level of waters on the other side of the boundary unless the construction or maintenance thereof is approved by the aforesaid International Joint Commission.

Mr. President, when the treaty was entered into, it was contemplated that we would, by special agreement, provide, as set up in article 8, for—

(2) Uses for navigation, including the service of canals for the purposes of navigation.

(3) Uses for power and for irrigation purposes.

I realize that what I say now will probably have no particular influence on those who have reached a definite conclusion, but I am not one of those who criticize the President of the United States every time he performs a constitutional function. I never criticize the President except when I think he invades the legislative field. Under the Constitution, it is for him to spearhead the making of international arrangements through agreements and treaties. The pattern was laid down in 1909, and in 1941 he proceeded to negotiate an agreement, under his constitutional authority as the Chief Executive, and pursuant to the language of the 1909 treaty. It was ready to be brought before the Congress when the Pearl Harbor incident occurred. When that occurred, everything else was laid aside. But now the agreement is before the Senate, and we are asked by resolution to confirm the arrangement. That is a simple analysis of the situation.

I call attention to the fact because objection was made, as the Senator from Illinois [Mr. LUCAS] stated today. Certain matters that were debatable were eliminated, matters which it was thought should properly be handled by treaty. I repeat that not one dollar is asked for, not one dollar is appropriated. All that Congress is being asked to do is to confirm the arrangement made by the President. The joint resolution would first authorize him to negotiate a treaty in relation to the perpetual rights of citizens of both countries with respect to boundary waters. Second, after he shall have negotiated such an agreement, it is expected that he will bring back to the Senate the contemplated toll arrangement. The Senate will then be asked to review the treaty. The arrangement as to tolls would be reviewed by the Congress, to determine whether it was satisfactory. Within 1, 2, or 3 years from the time that is done, we shall be in a position to decide, in the event the economic conditions of the country are such as to result in a recession or a depression, whether or not to appropriate money for this great constructive upbuilding of the Nation, instead of appropriating money for a WPA project.

Mr. President, I had expected that another Senator would speak today. I am now informed that he will speak on Friday. Apparently there has been some misunderstanding in the newspapers, as the result of which an effort is made to blame the proponents of the St. Lawrence seaway for the recesses that have occurred. We are not trying to delay the matter in the slightest. Let it be known that the Senate of the United States agreed that the vote on the matter would be had on February 27. Let it also be known that the Senate of the United States agreed that during the present week no vote would be had on any controversial matter. That agreement undoubtedly will hold over until next week, because of the number of Senators now absent.

Let it further be known that the Congress of the United States is working. Those of us who are here are working 10 or 12 hours a day in committee sessions. The Committee on Foreign Relations meets in the morning and will meet at 2 o'clock this afternoon to carry on in relation to the so-called Marshall

plan. The Senate will meet on Friday, pursuant to arrangement, and on that occasion there will be one or two more speeches. At that time, if there are any bills which are noncontroversial, they will probably be taken up. I can assure the Senate, Mr. President, that there is no desire on the part of the proponents of the St. Lawrence seaway to delay the consideration of any matters which can be considered under the mutual-consent agreement.

RECESS TO FRIDAY

Mr. IVES. Mr. President, if the business of the Senate is concluded for the day, I move that the Senate now stand in recess until 12 o'clock noon on Friday.

The motion was agreed to; and (at 1 o'clock and 50 minutes p. m.) the Senate took a recess until Friday, February 13, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 11 (legislative day of February 2), 1948:

DIPLOMATIC AND FOREIGN SERVICE

Henry F. Grady, of California, now Ambassador Extraordinary and Plenipotentiary to India, to serve concurrently and without additional compensation as Envoy Extraordinary and Minister Plenipotentiary of the United States of America to Nepal.

DEPARTMENT OF JUSTICE

H. Graham Morison, of Virginia, to be an Assistant Attorney General, to fill an existing vacancy.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 11 (legislative day of February 2), 1948:

MUNICIPAL COURT, DISTRICT OF COLUMBIA

Frank Hammett Myers to be an associate judge of the municipal court for the District of Columbia.

DIPLOMATIC AND FOREIGN SERVICE

TO BE CONSULS GENERAL OF THE UNITED STATES OF AMERICA

John M. Cabot
Wilson C. Flake
Nelson R. Park
Carl W. Strom
William T. Turner

TO BE CONSULS OF THE UNITED STATES OF AMERICA

Glen W. Bruner
C. Vaughan Ferguson, Jr.
Delano McKelvey

TO BE SECRETARIES IN THE DIPLOMATIC SERVICE OF THE UNITED STATES OF AMERICA

William L. Hamilton, Jr.
James L. Meader

TO BE CONSULS OF THE UNITED STATES OF AMERICA

Linton Crook
Philip Ernst
George F. Kelly
L. Pittman Springs

TO BE CONSULS GENERAL OF THE UNITED STATES OF AMERICA

William H. Beach

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 12, 1948

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. MICHENER). The Clerk will report a communication from the Speaker.

The Clerk read as follows:

FEBRUARY 12, 1948.

I hereby designate Hon. EARL C. MICHENER to act as Speaker pro tempore today.

JOSEPH W. MARTIN, Jr.,
Speaker.

PRAYER

The SPEAKER pro tempore. Prayer will be offered by Dr. Leo Baeck, former chief rabbi of Berlin, Germany.

Dr. Leo Baeck offered the following prayer:

Our Father, our God, we pray unto Thee on this day on which sixscore and nineteen years ago was born that man who came to be Thy servant, "the man in whom is the spirit," and who for the sake of this land became witness and testimony of humanity, herald of Thy command and Thy promise, to the everlasting blessing of this country and of mankind.

Our Father, day by day Thou sendest forth Thy messengers, Thy angels—our chances to be unselfish and righteous, our opportunities to walk in Thy ways—they are the messengers that come from Thee. We must not miss them nor disregard them.

Almighty God, Thou choosest people and selectest nations "to bring them into the place which Thou hast prepared"; Thou changest the times and the seasons; Thou makest history enter the world. Thy servant, Abraham Lincoln, in a message to Congress, said, "We cannot escape history," so help us, O God, that we may not evade history, but may we be granted history.

Reverently I pray Thee to bless Congress, its men, and its days. From the bottom of my heart I pray: God bless America.

The Journal of the proceedings of Monday, February 9, 1948, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment bills and concurrent resolutions of the House of the following titles:

H. R. 422. An act for the relief of Francesco and Natalia Picchi.

H. R. 648. An act for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue;

H. R. 650. An act for the relief of Ruston Jamsetji Patell;

H. R. 928. An act for the relief of Riyoko Patell;

H. R. 1078. An act for the relief of Mrs. Audrey Ellen Gooch;

H. R. 1408. An act for the relief of August W. Dietz;

H. R. 1650. An act for the relief of Maria Hedwig Feresz;

H. R. 1788. An act for the relief of the estate of John F. Hopperton, a minor, deceased;

H. R. 2350. An act for the relief of Mrs. Daisy Park Farrow;

H. R. 3168. An act for the relief of Antone G. Pina;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25);

H. R. 4115. An act to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.;

H. Con. Res. 139. Concurrent resolution providing for a joint session of the two Houses on Monday, April 19, 1948, in commemoration of the fiftieth anniversary of the liberation of Cuba; and

H. Con. Res. 140. Concurrent resolution extending the life of the Joint Committee on the Observance and Celebration of the Victory Over Spain.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 3503. An act to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 111. An act for the relief of Donat and Laura Laroche;

S. 511. An act for the relief of Francisco Gamboa Giocoechea;

S. 936. An act for the relief of Burnett A. Pyle;

S. 981. An act for the relief of Carl W. Sundstrom;

S. 1037. An act to authorize the revision of the boundaries of the Caribou National Forest in the State of Idaho;

S. 1395. An act for the relief of Jose Maria Gerardo de Amusategui and Ramon de Amusategui;

S. 1706. An act to limit the operation of sections 109 and 113 of the Criminal Code and section 190 of the Revised Statutes of the United States with respect to counsel in certain cases;

S. 1782. An act to provide for selection of superintendents of national cemeteries from meritorious and trustworthy members of the armed forces who have been disabled in line of duty for active field service;

S. 1795. An act to repeal section 1 of the act of April 20, 1874, prescribing regulations governing inquiries to be made in connection with disbursements made by disbursing officers of the Army (18 Stat. 33; 10 U. S. C. 184);

S. 1801. An act to authorize attendance of civilians at schools conducted by the Departments of the Army, Navy, and Air Force, and joint-service schools, and for other purposes; and

S. 1990. An act to provide a means for the orderly continuation and completion of the Deer Creek and aqueduct divisions of the Provo River project, Utah.

The message also announced that the President pro tempore has appointed the Senator from North Dakota, Mr. YOUNG, and the Senator from New Mexico, Mr. CHAVEZ, members of the committee on the part of the Senate to attend the ceremonies in Habana, Cuba, on February 15, 1948, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*.

The message also announced that the Senate had adopted the following resolution (S. Res. 198):

Resolved, That the Senate has heard with profound sorrow and extreme regret the announcement of the death of Hon. Joseph S. Frelinghuysen, who served in the United States Senate from the State of New Jersey from March 4, 1917, to March 3, 1923.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased, together with a transcript of remarks made in the Senate in praise of his distinguished service to the Nation.

The message also announced that the President pro tempore has appointed Mr. LANGER and Mr. CHAVEZ members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers in the following departments and agencies:

1. Departments of the Army and the Air Force.
2. Department of Justice.
3. Department of the Navy.
4. Department of the Treasury.
5. Federal Security Agency.
6. National Archives.
7. Veterans' Administration.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had on the following dates examined and found truly enrolled bills of the House of the following titles:

On February 3, 1948:

H. R. 1634. An act to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

On February 9, 1948:

H. R. 1366. An act to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes.

The SPEAKER pro tempore. The Chair desires to announce that, pursuant to the authority granted on February 9, 1948, the Speaker did, on February 11, 1948, sign the following enrolled bills:

H. R. 1634. An act to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

H. R. 1366. An act to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes.

CONTESTED-ELECTION CASE—DAVID J. WILSON AGAINST WALTER K. GRANGER

The SPEAKER laid before the House the following communication from the Clerk of the House:

FEBRUARY 12, 1948.

The Honorable the SPEAKER,
House of Representatives.

SIR: The Clerk has received from Frank W. Otterstrom, the officer before whom testimony was taken in the contested-election case of David J. Wilson against Walter K. Granger, for a seat in the Eightieth Congress from the First Congressional District of the State of Utah, letters dated January 10, February 3, and February 6, 1948, with reference to the transmission of testimony and exhibits in the aforesaid case.

The letters from this officer, together with the two express packages, the air-mail package, and exhibit No. 109 referred to therein, as well as copies of all other papers heretofore filed with the Clerk relating to this case, are transmitted to the House for its action.

Very truly yours,

JOHN ANDREWS,
Clerk of the House of Representatives.

The SPEAKER pro tempore. The communication will be referred to the Committee on House Administration.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House:

FEBRUARY 12, 1948.

The Honorable the SPEAKER,
House of Representatives.

SIR: The attached sealed envelope indicating on its face that it contains a message from the President of the United States, and addressed to the Speaker of the House of Representatives of the United States, was received in the Office of the Clerk on February 10, 1948.

Respectfully yours,

JOHN ANDREWS,
Clerk of the House of Representatives.

SUBMARGINAL LANDS—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 527)

The SPEAKER pro tempore laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I return herewith without my approval H. R. 3153, "to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota."

During the drought period of 1932 to 1938 the United States acquired in the drought areas, out of funds appropriated under the statutes referred to in H. R. 3153, approximately 10,000,000 acres of submarginal lands, much of which is suited only for carefully limited and controlled grazing use. Of the submarginal lands so acquired in the States of Montana, North Dakota, and South Dakota, approximately 245,000 acres were in 1938 and 1939 placed by Executive order under the administrative jurisdiction of the Secretary of the Interior in order to facilitate their use for the benefit of the Indian tribes occupying reservations in the same localities. The underlying purpose of H. R. 3153 appears to be that of making provision by law for the permanent disposition of these lands, through the transfer to Indian tribal ownership of those lands needed for and adapted to Indian grazing use, through the transfer to individual Indians of those lands needed for and adapted to Indian agricultural use, and through the transfer to individual veterans of the other agricultural or grazing lands upon appropriate conditions as to price and future use. While this underlying purpose is sound, the manner in which the bill attempts to provide for its accomplishment seems to me to be altogether unsound from several aspects.

First, the bill would grant to local disposal committees absolute authority, not merely to determine factual matters, but also to decide the entire policy question of how these submarginal lands should be disposed of, without any effective guidance in the form of statutory standards to channel and control the discretion of their members. Nor does the bill provide any means whereby the decisions of the local disposal committees may be reviewed. On the contrary, it expressly directs the Secretary of the Interior "to make such transfers of title

as shall carry out the recommendations of the committee."

I cannot consider this a sound method of legislation. Local boards, having no real responsibility to either the legislative or the executive branch of the Government, should not be granted the authority to dispose of large tracts of land belonging to the United States, merely in accordance with their own opinions as to what would be the best manner of disposing of these lands. Yet this is what the bill would do. Local committees may serve a helpful purpose in the classification of lands for disposal, but certainly adequate standards to govern their actions should be prescribed by law, and adequate means for the review of their determinations should be provided. Yet this is what the bill does not do. Such broad policy issues as whether in a semiarid country grazing land should be disposed of in the same manner as agricultural land, or whether individual applicants for grants of land should be required to pay or not to pay for the lands they receive, ought not to be left to the untrammeled and unreviewable judgment of local boards. Under the bill it would be possible for each local committee to decide these policy issues for itself, with the result that contradictory policies might be established for neighboring areas.

Second, H. R. 3153 would permit the disposition of the lands affected by its provisions in ways that would be decidedly contrary to the public interest. The primary purpose of the acquisition of these lands was to prevent overgrazing and other land-use practices which had so accelerated the wind-and-water erosion of the soil in many drought areas as to produce dust-bowl conditions. A second purpose of their acquisition was the relief of the agricultural poverty which had been brought about through the subdivision of lands best adapted for grazing use into farm units far too small to support the families then attempting to draw a living from these lands. Notwithstanding the large expenditures made for the purchase of submarginal lands in order to prevent the recurrence of these conditions, H. R. 3153 would permit some of these lands to be returned to private ownership without any safeguards whatsoever against their use in ways that would tend to produce dust-bowl conditions and agricultural poverty.

Lands which should be retained permanently under Federal supervision could be given or sold by the local disposal committees to private individuals, and lands which can be economically used only under carefully worked out conservation programs might be disposed of without the imposition of necessary safeguards against mal-use and deterioration. The inevitable tendency would be to invite the plowing of lands which should be used only for grazing, the destruction of grass through overgrazing, and the resumption of other bad land-use practices. Such practices would, in turn, tend to produce the same conditions of soil depletion and accelerated erosion, and the same subdivision of ranch lands into unstable farm units, which were basic causes of the agricultural distress that beset the people of Montana, North Dakota, and South Dakota, as well as of other States, during the period immediately prior to the acquisition of the submarginal lands.

We cannot prevent the recurrence of drought cycles, but we should not disregard their lessons. We should not reverse, even to the limited extent inherent in H. R. 3153, the policy of protecting submarginal lands against abuse, born out of the experience of the last great drought cycle, merely because a wet cycle has intervened. To do so would be to throw away the money spent for the acquisition of the submarginal lands, and to intensify agricultural distress whenever drought reappears.

Third, H. R. 3153 substantially disregards the very real equity which the Indians of the localities where the submarginal lands are situated have in their continued utilization as a part of the otherwise sorely deficient land base of these Indians. While it is true that under the broad discretion conferred on the local disposal committees by the terms of the bill every single acre of these lands could be placed in Indian tribal ownership, it is also true that under the same broad discretion most, if not all, of the tracts involved could be granted by the local committees to non-Indians.

When the submarginal lands affected by H. R. 3153 were acquired, it was definitely contemplated that they would be used to assist the neighboring Indian tribes in consolidating their scattered land holdings, in creating economic range units which would support Indian families, in developing conservational land-use practices, and in establishing a better pattern of Indian land ownership and use. To this end, the Secretary of the Interior in 1938 and 1939 was directed to administer the lands for the benefit of the Indians, insofar as consistent with the uses for which the lands had been acquired. Since that time the Secretary, in cooperation with the tribes concerned, has developed and put into effect programs for the improvement of the Indian economy to which continued Indian use of at least large parts of the submarginal lands is essential. These programs, and the legitimate Indian aspirations founded upon them, would be frustrated by many of the dispositions which could be accomplished under the terms of the bill. To cite but one example, many existing Indian range units are composed in part of Indian-owned lands and in part of federally owned submarginal lands, and in these units the Indian-owned home properties frequently could not be operated except in conjunction with the submarginal lands upon which they are dependent. The bill provides no safeguards for the protection of these established operations other than the judgment of the local disposal committees.

Thus, H. R. 3153 would open the door to disruption of the Indian economy built up, at no little labor and expense, in reliance upon the continued availability for Indian use of many of the areas covered by the bill. In addition, it would deny the Indians any immediate recompense for this disruption, since it provides that any receipts from the use or sale of the submarginal lands shall be deposited in the Federal Treasury as miscellaneous receipts.

Fourth, a detailed examination of the bill reveals that a number of its provisions are either ambiguous or impracticable. For example, reference is made at various places to "the county in which the major portion of the Indian reservation lies." This reference does not fit several of the reservations involved which are so divided by county lines that no one county contains "the major portion" of the reservation.

For these reasons, I am constrained to withhold my approval from H. R. 3153.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 10, 1948.*

The SPEAKER pro tempore. The objections of the President will be spread at large upon the Journal, and, without objection, the bill and message will be referred to the Committee on Public Lands and ordered to be printed.

There was no objection.

ADJOURNMENT OVER

Mr. REED of New York. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EXTENSION OF REMARKS

Mr. MILLER of Connecticut (at the request of Mr. REED of New York) was given permission to extend his remarks in the RECORD and include extraneous matter.

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD.

AMENDING CIVIL SERVICE ACT

Mr. REES submitted a conference report and statement on the bill (H. R. 4127) to amend the Civil Service Retirement Act of May 29, 1930, as amended.

LEGISLATION AMENDING CIVIL SERVICE RETIREMENT ACT

Mr. REES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES. Mr. Speaker, I desire to call the attention of the membership of the House to a conference report that I have just filed on H. R. 4127, being an amendment to the Civil Service Retirement Act. A detailed statement with respect to this legislation is set forth in this report. This measure is of considerable importance. I suggest that the Members read the report rather carefully so that they may be familiar with its provisions when it is called for consideration on the floor of the House, which we expect will be some time during next week.

AMENDING REVISED STATUTES, UNITED STATES CODE, TITLE 2, SECTION 25

Mr. HOBBS. Mr. Speaker, I ask unanimous consent for the immediate

consideration of House Concurrent Resolution 148.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill H. R. 3778, to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25), the Clerk of the House is authorized and directed to make the following corrections:

Strike out in lines 4 and 5, page 1, of the engrossed bill the words "so as to read as follows" and insert in lieu thereof "by adding at the end thereof the following"; on page 1, line 6, strike out "Sec. 30."; and on page 2, lines 9 and 13, strike out the quotation marks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HOBBS. Mr. Speaker, occasionally even the most careful of committees may make mistakes. It is to correct one on the part of the Committee on the Judiciary of the House that this resolution is presented. For years there has never been any record evidence whatsoever of the membership of any Member of the House in the event it ever should become necessary to prove such membership. To correct that deficiency, this bill, H. R. 3778, was introduced. It does so, but in committee amendments a short paragraph, section 30 of the revised statutes (U. S. C., title 2, sec. 25), which was not intended to be stricken, was also stricken, together with many of the provisions of the bill. But there was no intent to strike out that section. The bill was reported unanimously by the committee and was passed by the other body as it was passed in the House. This concurrent resolution would simply restore that paragraph which was unintentionally stricken by the committee amendment. I think there cannot possibly be any objection to the resolution which would simply authorize that as enrolled the bill contain exactly what the committee intended in its unanimous report and which has been agreed in by Senate action.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama [Mr. HOBBS]?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. RIEHLMAN asked and was granted permission to extend his remarks in the RECORD and include a statement by Mr. George J. Burger, director of the Washington office of the Small Business Corp.

Mr. DEVITT asked and was granted permission to extend his remarks in the RECORD and include an editorial.

FOREIGN RELIEF

Mr. DEVITT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD in connection with a bill I have introduced today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. DEVITT. Mr. Speaker, I have today introduced a bill entitled "The American Peoples Foreign Assistance Act of 1948." It embodies a different approach to the great problem of foreign relief.

I am well satisfied that it is the humanitarian obligation of this country to help in the relief and rehabilitation of the devastated countries of the world, especially those of western Europe. How can we best accomplish this obligation without jeopardizing the economic health and welfare of our own people? I think it can best be done by encouraging our own people to give individual aid and assistance to the needful peoples of the devastated countries.

It must be remembered that about seven-eighths of the present relief contemplated to be furnished in the first year of the recovery program is for food, clothing, and the necessaries of life, and that approximately one-eighth of it is to be used for rehabilitation purposes, such as the furnishing of machinery and industrial equipment. I am one of those who believe that "feeding the hungry and clothing the naked" is essentially a humanitarian obligation of the peoples of the United States as distinguished from the Government of the United States, and that this Government should take every feasible step toward encouraging the assumption of that obligation by the people of this country. To that end I have provided in this bill for two things:

First. An authorized deduction of up to 15 percent from individual tax payments for the value of contributions or gifts of food, clothing, and other necessaries of life made available for persons in need in overseas foreign countries. This 15-percent deduction is in addition to the present 15-percent deduction authorized to be made for contributions for religious and charitable purposes.

Second. A provision authorizing the sending of relief packages to peoples in overseas foreign countries in need at one-fourth the regular postal rate, the deficit to be paid for from relief appropriations.

The provision permitting the additional 15-percent income-tax deduction is meant to encourage a greater giving by peoples of this country. I know of literally hundreds of people in my district who send relief packages to the needy people of the war-devastated countries ranging in value from $10 to $300 each month.

Under the law, as written today, income-tax deductions are permissible only in those cases where the relief packages are intended for general distribution. The deduction may not be claimed where the package is directed to a particular individual. I see no distinction between the two cases, and feel that the discrimination should be done away with. This bill does that.

What is more, many persons contribute much more than 15 percent of their total income to charitable purposes, and persons who do should be permitted to claim income-tax deductions for it.

This provision of the proposed bill is surrounded by safeguards so as to prevent transgression of the intent of the provision. It is to be noted that such contributions or gifts are allowable as deductions only if verified under rules and regulations prescribed by the Commissioner with the approval of the Secretary. This is the same provision which prevails in the case of the subsection of the present Internal Revenue Code dealing with the present 15-percent charitable contribution provision.

The reduced postal rate provision is likewise intended to encourage the greater giving by our people. The present high postal rates are prohibitive, and in many instances exceed the actual value of the food or clothing sent abroad. The arguments in support of this provision have been expounded by many Members of the Congress in the pages of the CONGRESSIONAL RECORD, and several bills to accomplish this single purpose have been introduced.

I would like to comment that early last year the idea of reduced postal rates on relief packages occurred to me. At that time I importuned the President of the United States to urge legislative action looking to the accomplishment of this idea, but through the Postmaster General I received a very discouraging response. This prompted me to obtain from the Library of Congress an excellent report dealing with the feasibility of the proposed idea. I do not want to take the time of the membership to explain the many facets of the proposal together with the statistics in support of its feasibility, but I will confine myself to saying that in testimony before the Senate Post Office and Civil Service Committee, the Post Office Department has stated its ability and willingness to assume the additional transportation burden which would undoubtedly follow as a result of reducing the rates. No additional deficit will be incurred in the Post Office budget because the bill provides for reimbursement for additional expense from regularly appropriated relief funds.

The volume of shipment of parcel post packages to Europe has been tremendous. In the fiscal year 1946 the people of this country sent more than 132,000,000 pounds of packages to civilians in Europe. In the fiscal year 1947 this sum rose to better than 317,000,000 pounds. It is conservatively estimated by the Post Office Department that in the present fiscal year 1948 almost 700,000,000 pounds of parcel post packages will be sent to Europe. The average postal rate is 14 cents a pound. This means that some $28,000,000 will be spent by our citizens in postage on these packages alone. In the normal case, the cost of sending a package is about the same as the cost of purchasing the contents; and in many cases, the postage exceeds the value, especially in instances where second-hand clothing is sent.

It is reasonably estimated that by reducing the postage rate to one-fourth of the present rate and authorizing deductions from income taxes for the value of merchandise sent, the volume of gift packages to Europe will probably treble the present volume. This would probably mean the shipment of better than a million tons of relief packages in the coming year. Such a shipment would go

a long way toward relieving hunger and suffering in Europe, would create a splendid spirit of international good will between the sender and recipient, and would lower the expenditures necessary under the contemplated Marshall proposals.

I emphasize that this bill is entitled "The American Peoples Foreign Assistance Act of 1948," and is intended to shift the principal responsibility for the burden of relief, especially in the first year of the contemplated Marshall plan, from the shoulders of the Government to the individual shoulders of the people of the Government.

At a time when the Government of the United States is already overburdened with financial obligations incident to maintaining its own economic and social existence, it is timely and proper that this principle be recognized in a practical manner. For too many years now there has been a thought current that the Treasury of the United States consists of an inexhaustible supply of greenbacks and gold. By encouraging the giving of voluntary relief by our own people, we are bringing home to them the all-important concept that operating the Government is a very expensive proposition and at the same time we are discharging our humanitarian obligations.

I hope that this two-pronged effort to encourage the giving of voluntary relief will meet with favorable response from the Members of Congress.

EXTENSION OF REMARKS

Mr. HESELTON asked and was granted permission to extend his remarks in the Appendix of the RECORD.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that on today, after the disposition of business on the Speaker's desk and following other special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE FUEL-OIL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I want to read from a card I received this morning from my home town:

"Twenty-two below zero this a. m." Referring to a man who has lived through some 70 winters in New England, "He has never seen a winter like this. There has been no January thaw." The January thaw up our way is the only measure of relief we have so we can build up our meager stock piles. That is a marked difference between the low of 30 we had here—52° difference.

I have read previously from editorials with reference to the situation, appearing in the Boston Post, one of the most influential newspapers in New England. I wish to read another short editorial. It is headed "Too little, too late?"

TOO LITTLE, TOO LATE?

Official announcement that oil shipments abroad from east coast ports would be discontinued comes on the day that the Massachusetts fuel czar describes the oil situation as the worst yet. Perhaps it wouldn't be so bad at the present time if the ban on oil shipments abroad had been imposed earlier instead of at this late date. Government officials have been deplorably slow to recognize the oil emergency in New England despite the warnings that have been given them right from the start of the cold weather. We are right in the midst of the crisis and it is doubtful if action taken now will be effective.

I agree that "it is doubtful if action taken now will be effective" unless further vigorous and prompt action is taken immediately along the lines recommended by the House Committee on Interstate and Foreign Commerce on December 19 and again on January 26. I have wired the President asking him to order the Department of Commerce to exercise the authority vested in it.

After having studied carefully the texts of each of these announcements by the Department of Commerce on January 16, February 4 and 10, I decided the only course I could take to obtain any consideration of actual conditions which I know have prevailed in the First District of Massachusetts, as well as in many other areas in New England and elsewhere, was to urge the President, with all the sincerity I possess, to order immediately a further flat reduction of these announced quotas by 50 percent through March 31. I sent the following telegram Tuesday night:

WASHINGTON, D. C., *February 10, 1948.*

The PRESIDENT,
The White House:

After careful consideration of the text of the releases of the Office of International Trade of January 30, February 4, and February 10, as a Member of Congress responsible to all the residents of the First Congressional District of Massachusetts, and knowing what has been happening there this past month, I urge that you direct the Secretary of Commerce to order the Office of International Trade to send a cable immediately, such as the following, to the Governments of Argentina, Australia, Belgium, British Honduras, China, Costa Rica, Denmark, El Salvador, France, Guatemala, Honduras, Mexico, New Zealand, Norway, Republic of Panama, Philippines, Portugal, Sweden, United Kingdom, Netherlands, British West Africa, Switzerland, and French West Africa:

"Because petroleum products are in critical short supply in this country and because we must insure that supplies in our shortage areas are substantially increased immediately, and because we may find it necessary to extend the existing restrictions beyond March 31 unless we can readjust the situation in this country promptly, we regret to advise you that we believe, in the interest of continuing production in this country, maintaining transportation and public utilities, keeping our schools and hospitals and churches and other institutions, and individual homes heated to a minimum degree, and in the interests of being able to assist your government and your people, as the American people hope to do, we must ask you to accept a 50-percent reduction in the allocations to your country as announced by this Department on February 9, effective immediately."

I strongly urge that you order the proper authorities in the War Department to immediately reduce the allotment to Japan and the Ryukyus by the same percentage. I further urge that immediate consideration be given to the shipment of motor fuel oil to the above countries adding Brazil, Italy, and Paraguay. I do this because of the current reports that we are faced with a motor gas shortage next summer which will be disastrous not only to the farmers in many areas, including the First District of Massachusetts, but to the people dependent upon essential travel by automobile for entire annual income. Finally, I urge that the entire item of reserve be made available for shortage areas at once, specifically 399,000 barrels of other motor fuel, 147,000 barrels kerosene, 353,500 barrels gas oil and distillate fuel oil, and 151,000 barrels residual fuel oil, a total of 1,050,500 barrels of petroleum products. I hope to have an official report as to the daily amount of these needed oils which were shipped from the Gulf Coast during the month of January and the first 10 days of February, which I know you will consider. Obviously, we shall be losing very substantial amounts daily unless you direct this action at once.

JOHN W. HESELTON,
Member of Congress.

Because there is no question, in terms of the existing law and in terms of the authority which has been exercised in making these previous reductions, I sent Secretary Harriman a telegram, quoting the telegram to the President and adding:

Since existing law gives you full authority, as you testified before the Banking and Currency Committee last fall, I hope you will anticipate the gravity of this request by myself to the President.

And, because it is my understanding that the staff of the Office of International Trade is engaged in many other phases of the export program, I also wired the chief of that office, Mr. Thomas C. Blaisdell, advising what I had done, and adding:

You will note that your office would be authorized to act promptly in cutting the quota allotments of February 10 by 50 percent, that you also be authorized to include a similar reduction in motor fuel to build our stock piles against diminishing supplies, and that I have asked the President to order the proper military authorities to take similar action as to the allocations to Japan and the Ryukyus. Will you kindly advise me as soon as possible how quickly you could issue such a cable, if authorized? Also, advise me as to what the reserve item includes, particularly as to whether these amounts are now available for shortage areas.

Apart from the cogent and, I believe, compelling reasons for this action in the interest of the economy, the safety, and the security of this country, I want to call your particular attention to this announcement of February 10, which does not apply to any shipments from the Gulf coast or the west coast to any other country. It is difficult to get satisfactory information as to amounts shipped in the 42 days, although that has been requested repeatedly by the staff of the House Interstate and Foreign Commerce Committee. I am under the impression that shipments overseas from the west coast are not in sufficient amounts to have any adverse effect upon domestic users of west coast petroleum and petroleum products. If that is correct, then

I submit an embargo of 50 percent on those shipments for 46 days cannot possibly have any substantially injurious effect upon those countries, which I assume include many where a midsummer climate is now prevailing.

Certainly the same holds true as to shipments to the Caribbean and South American area, as well as to Africa. The only question remaining is whether there will be an immediate injurious effect, so far as north European shipments are concerned. Since the announcement of February 4 involved a 100-percent embargo to the continental area of three types to six countries, the expressed concern over a reduction of 50 percent of these generous quotas does not seem to be particularly impressive.

Now I want to submit to you some very significant testimony of Ambassador Lewis Douglas before the House Interstate and Foreign Commerce Committee on last Friday:

I asked the Ambassador if he thought 1934 to 1938, inclusive, was "a fair base period over which we might average our exports to the end users in other countries and then compare it with our projected program for this year." He said that although he did not know the figures well enough, it "might be, I think, a fair plan." He added that it "might well be too generous a standard because the increase in demand percentagewise in the European countries is not as great as it is in the United States."

I attempted to outline to the Ambassador the several proposals I have made in an attempt to provide a fair formula for handling these exports during the rest of the heating season here and asked for his opinion as to which was the better approach. He replied that it was a broad question and that he had been plunged into it very suddenly. He added that, therefore, he was not as well equipped as he should be to give a categorical answer that would mean anything. I can fully understand that, as I am sure that each of you do. But I am also confident that you share my high opinion of the complete honesty and great ability of Ambassador Douglas and I do hope we shall have the benefit of his counsel on this phase of the problem facing us so clearly at this time.

Again today I heard the statement that the President is reported to have made to the Florida group which came here to report its recommendations and to present its petition for relief to him and to the Congress. Subsection (s) reads as follows:

If exportation of oil has contributed to the current and contemplated shortage of oil and the scandalous prices thereof and also whether exportation of oil should be curbed or prohibited.

Yet I understand that these earnest and sincere Americans, who had traveled here to tell us of their troubles and their worries were led to believe that Congress has been derelict in its duties in failing to provide the Executive with the means through which it could control or prohibit exports. I cannot understand this in the face of the repeated recommendations of the House Committee on Interstate and Foreign Commerce. Let me underline them again. December 19, "calling for the export control authorities granted by section 6, Public Law 703, of the Seventy-sixth Congress, as amended, should be exercised to place such prohibitions or curtailments on the exportation of fuel oil and other petroleum products for such a period of time as may be necessary to alleviate such shortages." The only difference is that the committee used the words "prohibitions or curtailments," while the Florida group chose "curbed or prohibited." January 26, the committee recommended "the immediate cessation of the exportation of all petroleum products" and gave as its reason that "it appears that the situation is now so grave that exports should be stopped completely until it can be determined whether further exports are damaging the economy of this country." Can anyone doubt but that the draining off of these short supplies has been damaging and will continue to damage the economy of this country? Consider the testimony of Mr. Donald Montgomery, chief Washington representative of the UAW-CIO, before the House Interstate and Foreign Commerce Committee on yesterday. He said:

Industry in the city of Detroit is paralyzed by a shortage of natural gas. More than 90,000 auto workers have been thrown out of their jobs. Newspapers report a total of 200,000 factory workers idle because of the gas shortage. This unemployment is spreading to outlying cities as parts produced in Detroit plants fail to reach other plants that need them. In western Michigan many industries have been virtually abandoned by the gas utility and most of them will soon be forced to curtail or completely shut down. * * * Shut-downs in Detroit began on Thursday of the week before last. Yesterday was the ninth day. * * * The Michigan Unemployment Compensation Commission said that claims filed last week exceeded by 60 percent the previous high record touched on VJ-day. It predicted the filing of 110,000 claims during the week. * * * By the end of last week our workers had lost, through lay-offs during this crisis, 4,333,000 hours of work. At our average pay of $1.50 an hour, the loss in pay adds up to more than $6,500,000; that is, up to the end of last week. Every week this continues will cost these workers over $5,300,000. * * * Chrysler Corp. says it has had a production loss of $20,000,000 and a pay-roll loss to its workers of $3,000,000. * * * Effect of the Detroit shut-down on auto production is reflected in Ward's reports for the United States. For last week it reported output of 58,100 cars, 22,300 trucks—a total of 80,400. During 3 weeks of January the output averaged 80,500 cars per week, 25,900 trucks—a total of 106,400. Last week's production fell below this recent average by 28 percent in cars, 16 percent in trucks, and 25 percent in the total.

While the prime shortage is in natural gas, everyone agrees that the situation is also attributable to the lack of fuel oil with which to manufacture gas.

The same story could be told, in probably less dramatic figures, from Pittsburgh, from Ohio, from New York, from New England, and from many other areas. No one knows the loss of pay and of production because workers have been cold or have contracted colds and pneumonia and have had to stay away from work all over this country.

How long must this go on before we can have action? Must it come to a complete break-down?

Maybe what we have left of the 650,000 barrels of kerosene, of the 2,900,000 barrels of gas oil and distillate fuel oil, and the 1,375,000 barrels of residual fuel oil, if shipped into shortage areas would not carry us through. But can anyone deny it would not help?

How can we explain this continued failure to act on the recommendation of the immediate cessation of the exportation of all petroleum products with the embargo—100 percent—on three types to six countries and the refusal to reduce them to any appreciable degree to 48 countries.

If you feel as the Boston Post does that "Government officials have been deplorably slow to recognize the oil emergency in New England despite the warnings that have been given to them right from the start of the cold weather," would not you join in helping me by asking the President now to order the Department of Commerce to take this step at once, before the end of this week?

SPECIAL ORDER GRANTED

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent that on next Monday after the disposition of business on the Speaker's table and any other special orders I may address the House for 15 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. JOHNSON of California (at the request of Mr. SMITH of Wisconsin) was granted permission to extend his remarks in the RECORD in two instances and to include extraneous matter.

ABRAHAM LINCOLN

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Speaker, I think it is advisable that we might at this time just refer to a statement once made by Abraham Lincoln. He said:

No man living is more worthy to be trusted than those who toil up from poverty—none less inclined to take or touch aught which they have not honestly earned.

Nor should this lead to a war upon property or the owners of property. Property is the fruit of labor, property is desirable, is a positive good to the world.

That some should be rich shows that others may become rich, and hence is just encouragement to industry and enterprise. Let not him who is houseless pull down the house of another, but let him labor diligently and build one for himself, thus by example assuring that his own shall be safe from violence when built.

What a great "guy" he was. He becomes greater as time marches on. To this day the above lines reveal the true spirit of the United States of America.

EXTENSION OF REMARKS

Mr. MONRONEY asked and was given permission to extend his remarks in the

Appendix of the RECORD and include therein certain testimony.

Mr. MANASCO asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. HAYS asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. MILLER of California asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. MADDEN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a resolution from the Erie, Ind., Jewish Welfare Federation.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the Appendix and include an editorial from the St. Louis Post-Dispatch.

Mr. HUBER asked and was given permission to extend his remarks in the RECORD and include a letter from the Military Order of Cooties.

Mr. NORBLAD asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article.

Mr. SMITH of Kansas asked and was given permission to extend his remarks in the RECORD and include an essay on Americanism.

MORE EFFECTIVE LAWS NEEDED TO PROTECT LABOR UNIONS AGAINST COMMUNISTS

Mr. FISHER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. FISHER. Mr. Speaker, Local 471 of the United Public Workers-CIO, which is striking against 42 Government cafeterias, has now complied with the law regarding non-Communist affidavits by local officers. The national officers of UPW, however, have refused to swear they are not Communists.

The president of local 471 last week refused to answer questions propounded to him by our subcommittee regarding his Communist connections. Evidently to keep from signing a non-Communist affidavit, he resigned as president of the local.

This incident, Mr. Speaker, serves to point up the effectiveness of the Taft-Hartley law in squeezing Communists out of union leadership. But it also shows that overnight shift of officers may be only a sleight-of-hand maneuver, and may not really cleanse the union leadership as the law intended.

For example, one Oliver T. Palmer is the chief negotiator and business agent for local 471. He has recently signed the non-Communist affidavit. That is well and good. I do not know if he is a Communist or not. But I do know that when Palmer appeared before our subcommittee last week he refused to answer questions regarding his alleged Communist activities and connections. Our evidence showed, for example, that on March 6, 1946, Palmer appeared as one of the principal guests at a farewell dinner for Al Lannon, high-ranking Negro Communist, who had been in charge of District 4 of the Communist Party. Our information was that at the conclusion of that party the participants sang the Internationale, theme song of the Communist Party everywhere. When asked about those incidents, Palmer refused to answer.

I mention this to illustrate the fact that it is possible for one to have been a Communist yesterday and sign a non-Communist affidavit today and yet be in a position to make prosecution for false swearing very difficult. He can say: "I was a Communist yesterday, but I changed my mind last night. Today I am not a Communist."

It follows that while the law has been very effective in driving the Communists out of offices in labor unions, the law can be greatly strengthened in that respect. The law would be far more effective if it required all union officers to swear they are not Communists and have not been within a period of 5 years.

To strike at this loophole in the law, I have today introduced a bill to amend the existing law to make all union officers who take advantage of the law sign affidavits to the effect they are not Communists and have not been for a period of 5 years preceding. That would catch most of them and would go a long way toward preventing overnight evasions of the law.

Mr. Speaker, as further evidence of the fact that the local 471 is, despite the signing of non-Communist affidavits by the local officers following the resignation of their president, still under Communist influence, I call attention to the fact that Abram Flaxer, president of the United Public Workers-CIO, a Russian-born Communist Party-liner, refused to answer questions regarding his Communist activities and refused to answer the question of whether he is a member of the Communist Party, when he was subpenaed before our subcommittee investigating the GSI strike last week. And he has refused to sign the non-Communist affidavit. The same is true of all the officers of the United Public Workers-CIO.

As still further evidence of the continuing Communist influence in local 471, I call attention to the fact that according to the press, Paul Robeson, well known in Communist circles, is to make an appearance in Washington tonight for the benefit of local 471. It is, of course, well and good for the strikers to have voluntary donations. They have been unemployed because of unwise leadership, and have been replaced by others who were unemployed and who wanted to work.

It may be that local sponsors do not know of Robeson's Communist connections, or it may be that they do not care about that. That is their business. It is of interest to note that, according to a newspaper clipping which I hold in my hand, one of the places where tickets may be purchased for tonight's performance is the Washington Bookshop. It is well known that the Bookshop is the Capital outlet for Communist Party literature and smear propaganda written by William Z. Foster, Eugene Dennis, and the Bolsheviks of Russia. The Washington Bookshop has been listed as a Communist-dominated front by former Attorney General Biddle, Attorney General Clark, and the House Committee on Un-American Activities.

Robeson has been connected with Communist Party activities for many years. He has been associated with innumerable party organizations and fronts. Walter S. Steele, of the Coalition of Patriotic Societies, in testifying before the House Committee on Un-American Activities identified Robeson as a member of the Communist Party in Chicago.

Further evidence of the love that Robeson bears for the Soviet Union is provided by the fact that he sent his son to Russia to be educated. When indications of World War II appeared, he transferred his son to London, where Robeson obtained permission from the Soviet Ambassador to enroll his son in the Communist school provided for children of Russian diplomats.

From this record it is easy to understand why many people associate Paul Robeson with the hammer and sickle.

This Congress will be rendering a great service if existing laws can be strengthened in a way that life will be made more miserable for those living in free America who pay allegiance to the Soviet flag above our own. J. Edgar Hoover, perhaps the most respected man in America today, says if a war should occur between this country and Russia, the American Communists would be on the side of Russia. In view of this, who can say we should not tighten the laws to more effectively drive the Communists from positions of influence in the labor unions that are Communist-dominated, and free the loyal union members of such perfidy?

THE COMMODITY MARKET CRASH AND THE MARSHALL PLAN

Mr. ROBERTSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. ROBERTSON. Mr. Speaker, the commodity market crash of recent days has cost the farmers of North Dakota an estimated one hundred and fifty to two hundred millions of dollars. It has cost the farmers of America billions of dollars.

It is, I believe, the only time in our history that any administration has deliberately caused a panic. And I charge that this panic has been created for purely political reasons.

First. It represents an attempt to buy CIO–PAC votes with cheap food, even though it means the ruination of American agriculture.

Second. I see it as an effort to force the Marshall plan through Congress under the threat that farmers will be bankrupted unless their Representatives in Congress vote to give away billions of dollars' worth of food to foreign nations.

The stage for this commodity price break was set months ago when President Truman began railing against

"speculators in human misery," while other spokesmen accused farmers of profiteering. Publication of lists of traders in the Nation's commodity markets, together with the administration criticism of their activities, led many people to withdraw completely from the exchanges. This created what is called a "thin market." Prices held at or near their previous levels but the cushion had been removed.

Then it only remained for the Department of Agriculture to pull the rug right out from under the farmer.

A few months ago, when the ill-fated Luckman conservation program was inaugurated, the people were told that there was a serious shortage of wheat and other grains. Last week, however, Mr. Anderson came forward with the theory that the outlook had greatly improved and that it might even be possible to ship 500,000,000 bushels of wheat abroad, rather than the 450,000,000 originally contemplated.

The Commodity Credit Corporation, with some 77,000,000 bushels of wheat still to buy under the smaller export figure and one hundred and twenty-seven million under the larger, quietly withdrew from the market.

The Government, which has been the greatest commodity buyer in all history, just stopped buying. There seems to be some question as to what happened next. Mr. Anderson said Sunday there had been a "leak" in connection with the Government's decision to withdraw from the market. He denied having said any such thing yesterday but, in any event, the gentleman from Minnesota [Mr. AUGUST H. ANDRESEN] is investigating that phase of the market break and I am satisfied we shall have the real truth shortly.

As to what happened early last week and as to what has happened every day since, there can be no question. The bottom simply fell out of the grain market, while other major farm commodities moved down the daily trading limit. One man, Mr. Maynard, made nearly half a million dollars by selling wheat "short."

The Commodity Credit Corporation, which had not been averse to paying $3 per bushel, and even more, for wheat only a short time ago, declined to enter the market as prices tumbled day after day.

One word from the Secretary of Agriculture—the man who is supposed to represent the farmers of America in the Cabinet—just one word from this man—"buy"—would have halted the plummeting market. But that one word has not been uttered yet.

To those who would say that American farm prices were too high, my answer is that this country, even before the recent crash, had by far the cheapest and most abundant supply of food of any nation on the face of the earth.

Only day before yesterday, May rye was selling on the Canadian market in Winnipeg at $4.07½ per bushel. On the same day, May rye brought only $2.37 on the Minneapolis market—a difference of $1.70½ per bushel.

This tremendous spread is accounted for by one thing alone. Canadian rye producers are permitted to sell their product on the open market—most of it going to distillers in Canada and in England. On the other hand, allocations for export of American rye are rigidly controlled and the domestic market has been further depressed by controls on domestic liquor production.

The Argentine Government has been selling wheat to European nations at from $5 to $6 per bushel—payment being made with American dollars supplied to England, France, and other countries on a gift-loan basis by us. Australian wheat earmarked for export has been commanding a price of $3.16 per bushel.

I remember the crash of 1929 and the tragic events which followed it all too well. I wonder if the present Democratic administration realizes the price this Nation may be called upon to pay for its political follies.

With a national debt of nearly two hundred and sixty billions, with a proposed annual budget of nearly forty billions, we must preserve a tremendously high rate of national income if we are to remain solvent. And if our national income is to remain near its present level, we must all realize that neither wages nor prices can be pushed down to prewar levels without dragging the other with it.

If our national income is to remain above the $200,000,000,000 a year rate, we can no more have $1.50 hourly factory pay scales and $1 wheat than we can have $2.50 wheat and 75-cent wages. Farm income and city income must be held in some sort of reasonable balance or we face an inevitable crash.

In his state of the Nation message to the Congress, Mr. Truman himself pointed out that the per capita income of American farmers is far below that of nonfarm residents. He even suggested that this differential should be wiped out. Just how this is to be accomplished by wrecking farm prices is something which only the administration apologists can undertake to explain.

City housewives who have been led to believe that the commodity market crash will mean greatly reduced food costs are doomed to disappointment. The farmer receives a very small part of the final selling price of most staple food items. They were not told that a reduction in farm income will force an equal reduction in pay rolls.

Taxes, labor, transportation, packaging, advertising, and distribution costs account for the major share. Even though the farmer received only $1 per bushel for his wheat—less than half of the parity price—housewives would find that a loaf of bread would still cost them more than it did before the war.

I am wondering too whether the powers who precipitated this market crash have considered its possible effects upon the Federal Treasury under the Steagall amendment. They are driving prices down to a point where the Congress may be called upon to appropriate billions to support farm prices for this year's crop.

On the Nation's exchanges yesterday, cotton for October and December delivery closed below parity—below the figure which Congress by law has said represents a fair return to the American farmer in relationship to prices of the things which he buys.

Wheat for September and December delivery dropped to the parity level and was prevented from going lower only because of the limitation on daily price fluctuations.

July and September oats sold not only below parity but actually below the figure at which the Government is compelled to support prices by Government loan.

By their actions—or rather by their lack of action—Mr. Truman and Mr. Anderson have demonstrated that they are highly pleased at this turn of events. They can, in fact, say in the words of the New Dealers who came before them: "We planned it that way."

As labor prepares to demand another round of wage increases—a move in which they will just as certainly have administration support as they have had in the past—the American farmer sees his real wages tobogganing down toward prewar levels.

The farmer may recall that during the war he met and exceeded every Government demand for increased production—with never a threat of a strike and in the face of critical shortages of labor and machinery. He will remember that this year, as last year, he was urged to increase his production further to feed America better than it had ever been fed before and to feed millions of people in Europe and Asia as well. He was assured by administration spokesmen and by Congress itself, through enactment of the Steagall amendment, that he would be protected against the dangers of rapid price declines which might be brought about by overproduction or through other causes.

And in spite of these promises, he has seen the administration deliberately break the market and then stand idly by while prices dropped lower and lower.

I see several possible results which may well follow the administration's ill-conceived program to deflate agriculture.

In the first place, farm production may be expected to decline this year. And it should be evident to everyone that only through greatly increased farm production can we meet the unprecedented demands for food both at home and abroad.

With the spring planting season approaching, farmers will be understandably reluctant to increase their seeded acreage in the face of sharply declining food prices and with the knowledge that the administration is determined to depress them even further.

With commodity prices dropping, farmers will find it more difficult to obtain the bank credit which many of them will require to carry forward their operations until another crop is harvested.

The population trend from the farms to the cities will continue at an accelerated pace. The migration of young people from the rural areas to the cities, which has increased at an alarming rate during recent years, will be given added impetus. Even under the most favorable conditions, life on the farm means hard work and privation. If even the opportunity to make a decent living is withdrawn, no one can blame the farmer

who goes out of business and takes a job in town where wages are high, hours are short, and much better educational and recreational facilities are available to him and his family.

I would be the last to argue that skyrocketing commodity prices are the sign of a healthy economy. But at the same time, I maintain that the sudden and violent depression in farm prices which we have witnessed during recent days could send our entire national economy into a tailspin.

What this has meant to the farmers of my own State of North Dakota can be illustrated with a few figures.

Perhaps 90,000,000 bushels of wheat remain on North Dakota farms, and in elevators throughout the State. One reason for this is the lack of boxcars to bring the grain to market. Another is that the confiscatory wartime income tax rates which the Truman administration insists upon maintaining make it highly unprofitable for a farmer to market an entire harvest in one tax year.

In recent days, the value of this wheat has dropped more than $50,000,000. Farmers cannot sell their wheat at any price in a market which drops the daily limit each trading day. The reason is simple: the elevators cannot hedge against purchases in a sell-out market and therefore they cannot buy the farmer's grain.

North Dakota farmers have lost even more money on their corn, oats, rye, barley, flax, and other crops—perhaps as much as $75,000,000. They have lost additional millions in the depreciated value of their cattle, hogs, and other livestock. Altogether, I believe their total losses are at least $150,000,000 and they may be as high as $200,000,000. The farmers of America can count their losses in the billions.

And all of this has happened in a market over which the farmer has no control whatsoever. He does not set the price of the commodities which he sends to market. That is set in the Nation's grain exchanges and livestock markets by a variety of factors, the most important of which are the policies of the Federal Government itself.

The Government today, through its huge buying program, can make or break farm prices in America. The responsibility should be clearly fixed now.

I hope that it will not be too late in November of this year for the American electorate to oust the men who would deliberately plunge the Nation into another depression. New Dealism can survive and perpetuate itself only by feeding upon one man-made crisis after another. Bread lines, WPA, and all of the kindred relief agencies are the political stock in trade of the group which knows it can remain in power only if the people are poor enough and hungry enough to respond to the promises of better days to come.

They do not understand an economy under which there is full employment and a record high income. They mean to put a stop to it. In order to halt this decline and to restore confidence, this Congress should extend the Steagall amendment for a 2-year period and in addition support other basic raw materials with a 90-percent-of-parity floor.

PROPOSED JOINT COMMITTEE ON CIVIL RIGHTS

Mr. HUBER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HUBER. Mr. Speaker, although I support the spirit of the La Follette-Monroney Act which reorganized the congressional committee structure and was designed to eliminate special committees, nevertheless I feel it is imperative that one additional committee be created. With this in mind I have today introduced a House joint resolution to create a joint congressional committee to be known as the Joint Committee on Civil Rights to be composed of five Members of the House and five Members of the Senate.

I feel it is appropriate that this legislation be introduced today on the birthday of the great American Emancipator and I want it distinctly understood, Mr. Speaker, that this legislation is not introduced for the protection of any one segment of our citizenry.

As we protect the civil rights of the masses we shall be protecting the civil rights of the classes.

EXTENSION OF REMARKS

Mr. MUNDT (at the request of Mr. HOEVEN) was given permission to extend his remarks in the RECORD and include a radio address.

Mr. BUCHANAN asked and was given permission to extend his remarks in the RECORD and include a communication to the President of the United States and his reply thereto.

Mr. McCORMACK (at the request of Mr. BUCHANAN) was given permission to extend his remarks in the RECORD and include a resolution of the Senate of the State of Massachusetts.

Mr. MULTER asked and was given permission to extend his remarks in the Appendix of the RECORD and include two telegrams.

Mr. HAGEN asked and was given permission to extend his remarks in the RECORD in two instances.

CONSUMPTION OF OIL IN THE GENERATION OF ELECTRICITY IN HYDROELECTRIC-POWER-PRODUCING STATES

Mr. WELCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include a letter from the Assistant Secretary of the Interior, William E. Warne.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WELCH. Mr. Speaker, I include as a part of my remarks a letter from the Assistant Secretary of the Interior, William E. Warne, in response to a request made by me with reference to the number of barrels of oil consumed in the generation of electricity in the hydroelectric-power-producing States of California, Oregon, and Washington in 1947. The total number of barrels was 16,796,442 in those three States. Nearly every barrel could have been saved under the provisions of the Rockwell-Lemke bill, H. R. 2873, as reported by unanimous vote of the Committee on Public Lands, had it been on the statute books.

UNITED STATES,
DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, February 9, 1948.

Hon. RICHARD J. WELCH,
Chairman, House Public Lands Committee, House of Representatives.

MY DEAR MR. WELCH: The following information is in response to your several questions of December 22, pertinent to the conservation of oil through the development of hydroelectric power.

We do not have in our Washington office information relative to the oil produced on the submerged lands that goes out of the United States. This information has been requested from the field. Nor do we have information which would enable us to determine the difference between the price of this oil sold outside of the United States over the domestic price.

The amount of oil produced on the submerged lands is only a small percentage of the oil produced in California. California oil is exported principally to Canada, Alaska, Hawaii, Philippines, Japan, China, Australia, and islands in the Pacific. A small amount does get to our eastern seaboard.

As to what is being done to make oil available from the Middle East, the American oil companies are actively engaged in the development of oil supplies in the Middle East, with the work advancing as rapidly as could be expected under present conditions; particularly, the difficulty of obtaining steel for pipe-line construction. Oil production in the Middle East now approximates 1,000,000 barrels daily, or about one-ninth of the world's output. The lack of sufficient transportation to move more oil in quantity holds back the development of production facilities. Several pipe lines are planned or under construction to move crude oil to the eastern Mediterranean, but these will not be ready for use for about 2 years. When additional transportation becomes available through the completion of the pipe lines, it is expected that Middle East oil production will increase to about 1,800,000 barrels daily. Even with such an increase it is believed generally that the oil fields of the Eastern Hemisphere will not provide enough oil to meet Eastern Hemisphere demands and that the gap will have to be filled by oil shipped from the Western Hemisphere. The present proved reserves of the Eastern Hemisphere are considerably larger than those of the Western Hemisphere, and the ultimate oil resources of the Eastern Hemisphere are estimated to be twice as large as those of the Western Hemisphere, indicating that the Eastern Hemisphere readily can meet its own oil needs when and if adequate facilities for producing, refining, and transporting are developed.

The following amounts of oil were used to generate steam for power in California, Oregon, and Washington in the years 1946 and 1947:

	Barrels
Washington:	
1946	429,551
Oregon:	
1946	261,959
California:	
1946	10,213,341
Total, Pacific, 1946	10,904,851
Washington:	
1947	530,159
Oregon:	
1947	266,792
California:	
1947	15,999,491
Total, Pacific, 1947	16,796,442

Steam plants for producing energy for resale under construction at the present time on the Pacific coast are all located in California. New steam electric-power plants totaling 956,000 kilowatts are scheduled for construction prior to 1951. If these new plants are operated on the same annual plant factor of 28 percent as the existing steam and internal combustion engines, they will generate 2,340,000,000 kilowatt-hours annually. If oil were used for fuel, the oil requirements for this amount of generation would result in an added consumption of five to six million barrels of oil per annum. Unless the natural gas supply is increased, oil will be used. The supply of gas necessary for this generation would amount to between thirty and forty billion cubic feet per year.

The employment of our natural resources in water power is ideal as a means of conserving oil which otherwise could be used for the generation of electricity. The nature of water power, wherein less power can be generated in periods of low precipitation, is such that in California it is economical to develop some steam power along with hydro power. However, with the need of conserving oil, and with oil costs probably remaining at a higher level than hydroelectric costs, it will not only be imperative for water power to be developed, but it will be more economical and possibly in greater proportion in relation to steam plants whose future fuel supply is in such serious question.

The distinct possibility of an early shortage of indigenous petroleum production on the Pacific coast to meet constantly rising demands has been evident for some time. Already it has become necessary to bring in natural gas from Texas. At the present time numerous users of fuel oil in this area are unable to get firm contracts for their 1948 requirements. Industrial and commercial conditions might well become critical if the armed forces in an emergency had to take large quantities of California oil for their Pacific operations.

The States of Oregon and Washington are fortunately placed on the Columbia River with its large amount of potential power within their borders. California, however, must reach out for water power in large quantities. A vast amount of electrical energy is now being generated in hydroelectric plants at Hoover and Parker Dams on the Colorado River, mostly for service in California. The Davis Dam will start generating in 1950 or 1951, and it will be employed principally to supply service in Arizona and Nevada. The market requirements in this area in 1947, including the Los Angeles area, absorbed all of the available hydro output of the Colorado River, amounting to 9,000,000,000 kilowatt-hours, and, in addition, required 4,000,000,000 kilowatt-hours of energy generated at fuel-burning plants.

It is estimated that by 1957 approximately 18,000,000,000 kilowatt-hours of hydroelectric energy can be produced annually in that area. Immediately upstream from Hoover Dam are undeveloped projects: Bridge Canyon with a proposed installation of 750,000 kilowatts, Kanab Creek with 1,250,000 kilowatts, and Glen Canyon with 400,000 kilowatts. The market which now absorbs 13,000,000,000 kilowatt-hours will require 25,000,000,000 kilowatt-hours by 1957, provided fuel or hydro power, or both, are available. To provide hydroelectric power for use on the Pacific coast and in the Southwest is no longer a question of conserving oil only; but it is also a question of either developing hydro power or retarding the growth of industry and population.

The Federal Government under the existing critical fuel shortage and cost situation should not be in the position of having hydro developments trail the demand for energy. These developments should be made in advance of the market in order to relieve the fuel shortage to the extent possible in the coming decade and provide some leeway for national defense.

Please let me know if I can be of further assistance to you.

Sincerely yours,

WILLIAM E. WARNE,
Assistant Secretary.

SILVER JUBILEE OF THE NATIONAL FEDERATION OF TEMPLE BROTHERHOODS

Mr. MULTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include the program of the convention of the National Federation of Temple Brotherhoods.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MULTER. Mr. Speaker, the silver jubilee of the National Federation of Temple Brotherhoods is being observed in connection with the conduct by the federation of its twelfth biennial convention, now being held in Washington at the Shoreham Hotel, beginning today and continuing daily through Sunday, February 15, 1948. The federation represents more than 200 men's clubs affiliated with Reform Temples throughout the country. The president of the federation, Mr. Jesse Cohen, who, incidentally, is an honorary president, and a past president, of the Men's Club over which I, too, had the honor to preside, has requested me to extend a cordial invitation on behalf of the federation to all of the Members of Congress to attend such of the sessions of the convention as they may find convenient.

For their convenience I append the program of the convention.

This will afford an ideal opportunity for the Members of Congress to see one segment of American Jewry in action, advancing the brotherhood of man under the fatherhood of God. The officers of the federation will be pleased to welcome any Members of Congress who desire to attend.

SILVER JUBILEE, TWELFTH BIENNIAL NATIONAL FEDERATION OF TEMPLE BROTHERHOODS CONVENTION, FEBRUARY 12, 13, 14, 15, 1948, WASHINGTON, D. C., SHOREHAM HOTEL

Thursday, February 12: General registration.

11 a. m., joint National Federation of Temple Brotherhoods and Jewish Chautauqua Society board meeting.

2 p. m., opening session, twelfth biennial convention:

Chairman, Jesse Cohen.

Invocation, James L. Magrish, first vice president, National Federation of Temple Brotherhoods, Cincinnati.

National anthem, assembly.

Welcome, Bernard H. Conn, president, Washington Hebrew Congregational Brotherhood.

Welcome, Hon. John Russell Young, Chairman, Board of Commissioners, District of Columbia.

Response, Maury Lieber, president, Chicago Conference of Temple Brotherhoods.

Appointment of convention committees.

Greetings, Rabbi Maurice N. Eisendrath, president, Union of American Hebrew Congregations, New York; Mrs. Louis Rosett, president, National Federation of Temple Sisterhoods, New Rochelle; Leonard Spring, president, National Federation of Temple Youth, New York; Max Feder, first vice president, National Association of Temple Secretaries, New York.

President's message, Jesse Cohen.

The Silver Jubilee of Achievement, Arthur L. Reinhart, executive director, National Federation of Temple Brotherhoods-Jewish Chautauqua Society, Cincinnati.

A Blueprint for the Decades Ahead, S. Herbert Kaufman, member, National Federation of Temple Brotherhoods executive board, Harrisburg.

Action on constitutional amendments.

8 p. m., Jewish Chautauqua Society symposium:

Chairman, Leon L. Berkowitz, Jewish Chautauqua Society, Philadelphia.

Invocation, Rabbi Hugo Schiff, Temple Beth El, Alexandria.

Symposium, Education's Positive Role, Dr. Mordecai W. Johnson, president, Howard University, Washington, D. C.; Rabbi Abraham Shusterman, Har Sinai Congregation, Baltimore.

Benediction, Max Berkowitz, member, Jewish Chautauqua Society board, Mount Vernon.

Friday, February 13, 10 a. m., Brotherhood open forum:

Chairman, S. Herbert Kaufman.

Invocation, Sam Kolin, president, Metropolitan Conference of Temple Brotherhoods, New York.

Membership Participation in Programs and Projects, Earle G. Kallen, president, Sinai Men's Club, Chicago.

Discussion topics: Membership campaigns, dues collection, bulletins, Jewish content in meetings, advancing Jewish education, recruiting leadership, utilizing National Federation of Temple Brotherhoods aids.

12:30 p. m., luncheon to delegates and male visitors.

2 p. m., union program:

Chairman, Jesse Cohen.

Union program, Jacob Aronson, chairman of board, Union of American Hebrew Congregations, New York.

Union problems, Max Robert Schrayer, member union board, Chicago.

Hebrew Union College, Rabbi Alvin I. Fine, assistant to president, Hebrew Union College, Cincinnati.

Election board members, National Federation of Temple Brotherhoods and Jewish Chautauqua Society.

4:30 p. m., National Federation of Temple Brotherhoods board meeting, election of officers.

8 p. m., religious services at Washington Hebrew Congregation; ritual, Rabbi Norman Gerstenfeld assisted by Dr. Bernard A. Baer, acting president Washington Hebrew Congregation; sermon, The House That Stands, Rabbi Maurice N. Eisendrath.

Reception at temple.

Saturday, February 14, 11 a. m., religious services at Washington Hebrew Congregation; ritual, Rabbi Norman Gerstenfeld; sermon, Rabbi Abraham Feldman, president, Central Conference of American Rabbis, Hartford.

5 p. m., Jewish Chautauqua Society board meeting; election of members and officers.

7:30 p. m., twenty-fifth anniversary banquet and dance.

Invocation, David Perlman, member National Federation of Temple Brotherhoods board, Baltimore.

Address, Hon. Tom C. Clark, Attorney General, United States of America.

Presentation of new officers, National Federation of Temple Brotherhoods and Jewish Chautauqua Society.

Closing remarks and benediction, Rabbi Norman Gerstenfeld.

Dance.

Sunday, February 15, 10 a. m., Jewish Chautauqua Society round table:

Chairman, newly elected national chairman, Jewish Chautauqua Society.

Invocation, Edward Miller, president, Temple Emanuel Brotherhood, Denver.

Chautauqua Membership Campaigning, Joseph Finkelstein, member, Jewish Chautauqua Society board, Brooklyn.

Open forum on all phases of Jewish Chautauqua Society: Membership, finance, program.

Presentation of awards to brotherhoods and Jewish Chautauqua Society chairmen for fulfilling 1947 quota, Leon L. Berkowitz.

11:30 a. m., concluding session:

Chairman, newly elected national president, National Federation of Temple Brotherhoods.

Committee reports.

New business.

Benediction, Sam Silverman, Rockdale Avenue Temple Men's Club, Cincinnati.

The National Federation of Temple Brotherhoods, organized in 1923 by its parent body, the Union of American Hebrew Congregations, has, in its first quarter century, grown to a body of over 40,000 men in 200 affiliated men's clubs in 39 States and Canada. It is the right arm of the UAHC in stimulating lay responsibility and activity in the Reform congregations throughout the land.

Through its program to stimulate Jewish living, the NFTB distributes a variety of aids for adult Jewish education, religious expression, and the building of warm social ties within the congregation. A wide range of organizational aids assists the affiliated clubs in effective functioning.

In 1939 the NFTB assumed sponsorship of the Jewish Chautauqua Society, which was organized 55 years ago by the late Rabbi Henry Berkowitz. The JCS educational program disseminates authentic information about the Jew and Judaism to America's Christian college youth and faculties. In 1947 over 375,000 persons heard 165 JCS speakers on 412 campuses in every State of the Union. A dozen resident lectureships dealing with Judaism are being underwritten by JCS, and in the past 2½ years over 12,000 volumes of Judaica have been presented to over 400 college libraries. To reach a younger group, JCS supplied Rabbinic teachers to 100 Christian Church camps in the summer of 1947. Over 7,000 JCS members supported the work of the society during the past year.

This twenty-fifth year of the NFTB has marked the greatest growth and expansion thus far recorded in any single year of brotherhood history.

FALLING PRICES AND THE MARSHALL PLAN

Mr. TWYMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include an editorial.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. TWYMAN. Mr. Speaker, I wish to quote the following logical editorial from the Chicago Daily Tribune of February 10, 1948, entitled "Falling Prices and the Marshall Plan":

FALLING PRICES AND THE MARSHALL PLAN

The prices of wheat, corn, cotton, and many other commodities are much lower than they were when General Marshall announced what the bill for the Marshall plan was going to be.

The general said that he and his State Department boys had gone over the European requirements with the utmost care. Everything had been whittled down to the lowest possible figure. The gift of any less wheat, cotton, or anything else the plan called for would invite a Russian conquest of western Europe. At the prices then being quoted for commodities, the total bill would be $6,800,000,000. Congress should give that much or drop the whole idea, because anything less than the sum named would be wasted. Of course, if prices rose, the bill would go up proportionately.

But prices didn't stay the same and they didn't rise. Instead, they fell and fell sharply. If $6,800,000,000 was the right figure a few weeks ago, it is much too high a figure today. General Marshall can now buy all the wheat, corn, cotton, eggs, pork, and a lot of other things that he was going to buy for the Europeans at much less cost than he had calculated.

Anyone who continues to talk about $6,800,000,000 as the absolute minimum of Marshall plan relief is demonstrably insincere. The same goes, of course, for the advocates of all the other foreign-relief appropriations which, according to the figures submitted to the Senate by Lewis Douglas a few days ago bring the grand total for the year to nine and one-third billion dollars. Even assuming (as we do not) that anything like this sum is required to avert starvation or prevent revolutions abroad, the bill is grossly excessive in view of the price changes which have occurred.

INDICTMENT OF PHILIP MURRAY AND CIO

Mr. BREHM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BREHM. Mr. Speaker, certain individuals are attempting to propagandize the country into thinking that a huge battle is shaping up over the indictment of Mr. Philip Murray and the CIO regarding one phase of the Taft-Hartley bill, namely, that of endorsing candidates for election. They are attempting to give the impression that the decision in this case, if in their favor, will tend to show one of the weaknesses of the Taft-Hartley bill.

Mr. Speaker, this is just a sham battle with but one objective in view. It was not the intent of the Labor Committee who wrote the bill that this provision should prohibit free speech or freedom of the press. The only purpose of that section of the bill was, to put unions on the same footing as corporations have been placed in this respect. I offered an amendment in the Committee on Labor in an attempt to clarify this provision of the law; however, in speaking with Senator TAFT he told me that he felt the law was clear and that it would not prohibit the endorsement of candidates by bona fide newspapers, but if it did, he wanted the law amended, as it was not his intent to in any way limit free speech or a free press.

Mr. Speaker, it seems to me that it should be possible to call upon the Attorney General and ask him for an interpretation of this section without all the delay and waste of time which is necessary to drag this subject through the courts. In other words, Mr. Speaker, if those responsible for writing this legislation state unequivocally that it was not their intent that this section of the law should prevent any bona fide newspaper, CIO News or otherwise, from expressing themselves for or against any candidate for office, would it not simplify matters to call upon the Attorney General to consult with his constitutional lawyers and render an opinion. If this opinion indicates that the law as presently written does attempt to limit free speech, then it would be a very easy matter for the Labor Committees of both the House and the Senate to amend the law so as to clarify it. I have every reason to believe that the membership of both committees would welcome the opportunity to clarify and correct not only this section, but any other section which failed to depict the true intent of those who are responsible for writing this legislation.

I have just talked with the Attorney General's office and have been informed that many times the intent is so clear that no interpretation seems necessary. However, when it is not clear in their own minds and the law does not seem to specifically state the intent and someone commits some act to raise a question as to whether or not the law as written is being broken, then they can only try him under criminal prosecution statutes and call upon the courts for an interpretation of that particular provision of the law which is not clear. Sounds silly, doesn't it? Everybody agreed, and still the courts must be called upon to render an opinion.

EXTENSION OF REMARKS

Mr. SIKES asked and was given permission to extend his remarks in the RECORD in three instances.

Mr. MCDONOUGH asked and was given permission to extend his remarks in the RECORD in three instances, to include in one excerpts from letters, in one to include an address delivered by Judge Orie L. Phillips, of Los Angeles, and in the other to include a statement by Mr. Vicente Villamin.

Mr. JENISON asked and was given permission to extend his remarks in the RECORD and include an address by Dr. Allen D. Albert, former president of Rotary International.

Mr. DAWSON of Utah asked and was given permission to extend his remarks in the RECORD.

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD in two instances, to include in one an address he delivered on the Alaskan Highway and in the other an article on the work of the Fraternal Order of Eagles of Milwaukee, Wis.

Mr. MILLER of Nebraska asked and was given permission to extend his remarks in the RECORD and include a letter from a soldier in the occupied area of Germany.

Mr. EBERHARTER asked and was given permission to extend his remarks in the RECORD and include an editorial on the subject of taxation entitled "A Point of View," appearing in the January 1948 issue of the Michigan Teacher.

STEVE PACE, MAN OF THE YEAR IN AGRICULTURE

Mr. SIKES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SIKES. Mr. Speaker, the House, which has long watched and benefited

from his fine work, will learn with appreciation that our distinguished and able colleague, the gentleman from Georgia, the Honorable STEPHEN PACE, has been designated man-of-the-year in agriculture for Georgia by the Progressive Farmer, one of the Nation's outstanding farm publications. It is gratifying to realize that the fine stature which he has gained in Congress is in keeping with the recognition which has been given him throughout the South for his great work in the field of agriculture. Timely recognition of this patient, able, and effective work for agriculture will, I am confident, continue throughout the Nation.

I call attention herewith to the article which accompanied the Progressive Farmer's "man of the year" awards:

FOR GEORGIA: STEVE PACE

When history comes to write the story of American agricultural statesmen of the present day, few are likely to stand higher in the list than STEPHEN PACE, of Georgia's Third Congressional District. The son of a farmer and a boy who grew up reading by oil lamps and pineknots, Congressman STEVE PACE has made it his business to support, sponsor, and fight for legislation that would rid all farm families.

Mr. PACE was author of legislation to make peanuts a basic crop, to set up support prices, and to establish marketing quotas when needed.

In 1944 as chairman of a special postwar subcommittee on agriculture, he gave first attention to cotton and its problems. The hearings of December 1944 and the reports that followed are recognized as the most valuable study ever made of cotton and the problems of the Cotton Belt. They are used for constant reference by groups everywhere and as textbooks in some schools.

Believing that fertile fields are the foundation of all farm prosperity, Mr. PACE has been active in support and aggressive in expanding programs to save and build the soil. Having studied the fate and the condition of other nations which were unmindful of the loss of their soil, he is alarmed at the rapid rate of loss in this country.

It was to save soil and people and to further promote the family-type farm that Mr. PACE started 7 years ago his efforts to set up an insured farm-mortgage plan, similar to the FHA insured mortgage plan for city homes, to enable tenants, sharecroppers, and other farm workers to buy farms for themselves. He knew that a good percentage of soil destruction comes because a tenant has neither the incentive nor the opportunity to preserve and build up the rich topsoil. He knew that a home is the foundation of democracy and prosperity and a safeguard against the spread of foreign "isms." He had also seen what a fine start had been made through the Farm Security home-ownership program and wanted to see its opportunities expanded.

This legislation is now in effect. A number of these loans have been made in Georgia, Alabama, and Florida since the first one was closed in Mr. PACE's home county of Sumter last October 3.

Mr. PACE has been one of the most active champions of REA. He has often said that he could not rest until there is a power line to every farmhouse in the Nation. He is seeking funds adequate to complete this job by January 1, 1950.

These are but a few of the things STEVE PACE has supported for the good of southern farm families. He will always be found in the forefront in securing a square national deal for those who produce the food and fiber to feed and clothe the Nation.

PETROLEUM: TONS, BARRELS, OR GALLONS

Mr. EDWIN ARTHUR HALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include a letter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. EDWIN ARTHUR HALL. Mr. Speaker, besides being the founder of the great Republican Party, Abraham Lincoln was the first Republican President and one of the foremost Americans of all times.

He would have called the bluff of those who seem to misrepresent our supplies and requirements of oil for domestic and foreign purposes.

There seems to be a confusion in the public mind that ought to be cleared up. Let us compare, tons, barrels, gallons.

I have been very interested in the figures given in news items about the oil shortage, especially the fact that domestic requirements are usually shown in gallons; export figures were frequently stated in barrels; but today—the State Department announced that only 227,000,000 tons would be available for export to western Europe.

Two hundred and twenty-seven million tons of petroleum equals approximately 13,500,000,000 barrels which equals approximately 56,750,000,000 gallons.

Fifty-six and three-fourths billion gallons of fuel oil would furnish heat for 1 year for 56,750,000 homes.

Fifty-six and three-fourths billion gallons of gasoline would furnish fuel for 110,000,000 passenger automobiles for 1 year.

A shortage of tank cars has been reported for the transportation of petroleum, therefore let us examine the number of tank cars required to transport 56,750,000,000 gallons. The average tank car capacity is 10,000 gallons, accordingly 5,750,000 tank-car loads would be needed.

Or visualize 71 continuous lines of tank trucks across the United States of America from the Atlantic to the Pacific.

Do not overlook how much our modern agriculture production is dependent upon petroleum for cultivating the soil, preparing for crops, transportation to market, and finally for processing.

This method of kidding the people should be exposed and the real picture made clear.

SPECIAL ORDER GRANTED

Mr. EBERHARTER. Mr. Speaker, by special order heretofore entered, I have been granted permission to address the House today for 15 minutes. I ask unanimous consent that this time be extended 15 minutes. I understand there are no special orders to follow mine.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

FIFTIETH ANNIVERSARY OF SINKING OF U. S. S. "MAINE"

Mr. EBERHARTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. EBERHARTER. Mr. Speaker, next Sunday, February 15, will be the fiftieth anniversary of the sinking of the U. S. battleship *Maine* in Habana Harbor. Nowadays many Americans somehow overlook this anniversary or treat it lightly, but it seems to me this incident set the United States of America on the road to become the world power it is today. The world was electrified with the announcement of the sinking with the heavy loss of 266 officers and men.

Lt. Friend W. Jenkins, of my native city of Pittsburgh, Pa., was executive officer of the *Maine* at the time of the sinking, and I am informed that he was the only commissioned officer who lost his life in the sinking. His body was brought to Pittsburgh and laid in state in the rotunda of the courthouse, and his funeral was a notable event in the patriotic history of that city and State.

It should be remembered that for many years the people of this country had been told that the Cubans were being treated with cruelty by the Spanish, and were therefore quite sympathetic to the attempt of the Cuban people to obtain their liberation. The reason for the sending of the U. S. S. *Maine* to Cuban waters was for the protection of American interests in that area, and when the news of the sinking reached America there was an immediate demand for a declaration of war, which occurred 2 months later.

The action started the United States on a new era. It resulted in obtaining for us friendly neighbors to the south and opened the seas of that area to many peoples who were kindly disposed toward us. It helped to make possible the building of the Panama Canal. It led to the eradication of jungle and kindred diseases and brought to us vast possessions in the far reaches of the Pacific Ocean.

In that war sons of the North and the South fought in a common cause and thus helped to heal the wounds of the War Between the States, which had ended more than 30 years before. In the Spanish-American War the people of this country, as always before and ever since, exhibited a brand of patriotism unmatched in the history of the world.

EXTENSION OF REMARKS

Mr. CASE of South Dakota asked and was given permission to extend his remarks in the RECORD and include a statement by Walter Lippmann on the cost of containment.

Mr. VURSELL asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. PRESTON asked and was given permission to extend his remarks in the RECORD and include a statement made by him in connection with the introduction of a joint resolution directing the Postmaster General to issue a series of commemorative stamps honoring Juliette Low, founder and organizer of Girl Scouting in the United States.

Mr. COX asked and was given permission to extend his remarks in the RECORD and include an article on Red Russia by Mr. Ansel E. Talbert.

SPECIAL ORDER GRANTED

Mr. HÉBERT. Mr. Speaker, I ask unanimous consent that on Monday next, at the conclusion of the legislative program of the day and following any special orders heretofore granted, I may be permitted to address the House for 1 hour.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

COMMODITY PRICES

Mr. VURSELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. VURSELL. Mr. Speaker, the present chaotic condition in the crash of farm commodity prices and the stock market is the result of the administration throughout the past several months playing the role of the greatest gambler in the history of the world.

During the past few months they plunged into the wheat market and bought 400,000,000 bushels of wheat, which has driven wheat and grain prices and the cost of living to a pinnacle and peak which was bound to bring about this present crash. Such buying over a few months and the constant giving out of "scare" headlines of wheat and grain shortages in this country has driven prices through the roof. They were so interested in wheat for export to the world, and showed such little interest in protecting prices to our people at home, that the present inevitable results are upon us.

If they had announced to the American people they intended to buy this wheat gradually at, say, 40,000,000 bushels a month and stop their fear psychology, prices would never have reached the peaks of a few weeks ago.

Millions of bushels of wheat and bumper crops were raised on cheap marginal lands of the West because of favorable moisture, which wheat the farmers held over into this year for tax purposes. They are still holding it rather than to sell it in 1947.

With a gradual buying program prices would have remained lower and millions of bushels of this wheat from marginal lands could have been bought after January 1 at reasonable prices.

Mr. Speaker, buying it all in a few months has largely caused the debacle.

Mr. Speaker, another dangerous element contributing to the drop in commodity prices has been the break in the stock market. The crash in both of these markets reflects the lack of confidence of the people in the policies of this administration.

Everyone capable of thinking things through when the President asked the American people to finance a $20,000,000,000 European loan, and asked for a $40,000,000,000 budget to finance the Government for the next year, knew that it was beyond the ability of the economy of this country, and that a crash was inevitable. That fear has hit the Nation with a financial tornado.

Mr. Speaker, because of our big national debt, we must keep the national income around $200,000,000,000 a year. If farm prices are allowed to plunge below parity, the financial structure of the Nation will be in danger.

Three things appear to be necessary to prevent such condition. The President's budget should be drastically reduced and governmental expenses cut to the bone. The large amounts requested by the President for foreign relief should be drastically cut. But probably most important, the Members of the Congress should assure the American people and the farmers that agricultural prices will not be allowed to go below parity, and they should immediately extend price supports at a minimum of 90 percent of parity on all basic farm products which are nonperishable.

These three moves can be made if the administration will cooperate. These three moves will stabilize the economy of the Nation, keep the national income at around $200,000,000,000 a year, and return the people to confidence in the future of our country. Such a move will stabilize prices with a proper reduction of the cost of living and will expand business on a sound basis. They will bring about greater production which, after all, is the surest foundation for a reasonable cost of living to the people and general prosperity in the future.

Fundamentally, our economy is sound at present. We have no large surpluses and we have full employment. The cost of living is too high, but the drop in prices will take care of that if they can be stabilized at parity.

Everyone must realize that the entire financial structure of this Government is predicated on a reasonably prosperous agriculture. If we do not maintain agriculture in that position, national incomes will drop, no tax reduction can be had, business will be slowed down with millions of men out of employment. This must not be allowed to happen.

THE PRESIDENT'S MESSAGE OF FEBRUARY 2

Mr. COX. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. COX. My friends of the South, our people were again kicked in the teeth by the President in his message of February 2, and they want to know what we are going to do about it.

Some of us have publicly expressed our indignation and determination to resist, but not all. Do you not think that it is time that all of us from the South should stand up and be counted? We are either mice or men. What are we?

It has been indicated that the governors of the southern States would like that the Representatives of these States in Congress cooperate with them in the formulation of plans for the recapture of the influence within the Democratic Party which was lost with the abrogation of the two-thirds rule governing the nomination of candidates of the party for the Presidency.

I am in complete sympathy with this suggestion and would like to know what you think about it.

If we do nothing, will not our people be saying to us, "Where is your courage and what has become of your faith? Come, let us take a muster speedily. Doomsday is near." Let us say to the President, as King Claudius said to Laer in Hamlet:

> You must not think that we are made of stuff so fat and dull that we can let our beard be shook with danger and think it pastime.

PACE, HOPE, AND PARITY

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, I think it is appropriate on the commemoration of Abraham Lincoln's birthday to second the speech which was made here a few minutes ago in regard to our distinguished colleague, the gentleman from Georgia, Mr. STEPHEN PACE. In earlier years we have all believed in faith, hope, and charity. I am sure if you had the opportunity of coming in close contact with the gentleman from Georgia [Mr. PACE] for the number of years that I have you would also believe at this time in PACE, hope, and parity. In connection with parity may I say that one reason why the Progressive Farmer selected the gentleman from Georgia, Congressman STEPHEN PACE, was because his concept of parity is not the narrow concept of parity in its relationship to the accepted term of parity. Mr. PACE's concept of parity is one of fairness and equity to all agricultural groups everywhere in the United States. There is no Member of the House who has made a more constructive approach to the problem of food production during the war than has our colleague the gentleman from Georgia [Mr. PACE]. So far as I am concerned the Progressive Farmer can make the gentleman from Georgia [Mr. PACE] not only the outstanding agriculturalist of the South but also of the United States of America as well.

EXTENSION OF REMARKS

Mr. BRYSON asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD in three instances and to include in each instance extraneous matter.

Mr. WILLIAMS asked and was given permission to extend his remarks in the RECORD and include an editorial.

PERMISSION TO ADDRESS THE HOUSE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that I may address the House for 30 minutes today after the disposition of business on the Speaker's

desk and the conclusion of special orders heretofore granted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include a short article.

Mr. ANGELL. Mr. Speaker, I received permission to extend in the RECORD an article which I am informed by the Public Printer will comprise two and a quarter pages of the RECORD at a cost of $159.75. I ask unanimous consent that the extension may be made notwithstanding that fact.

The SPEAKER pro tempore. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mr. LARCADE asked and was given permission to extend his remarks in two instances in the RECORD and in each instance to include a newspaper article.

Mr. TEAGUE (at the request of Mr. DORN) was given permission to extend his remarks in the RECORD in two instances.

AMENDING THE SOCIAL SECURITY ACT

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks and include a short concurrent resolution from the General Assembly of the State of South Carolina.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, this concurrent resolution has to do with memorializing Congress to amend the Social Security Act by reducing the age from 65 to 60 years as the minimum requirement for old-age insurance benefits. I heartily endorse that resolution passed by the general assembly of South Carolina. It represents the feeling of a vast majority of the people of South Carolina. The people in my State who labor in the great textile industry are in favor of lowering the age limit. Textile work is hard and it takes a lot out of its employees before they reach the age of 60. They would like to have an opportunity to enjoy old-age insurance benefits before they are too old. I commend State Representative Agnew for introducing this resolution. I hope the House and the Congress will act on it during this session.

Concurrent resolution memorializing the Congress of the United States to amend the Social Security Act by reducing from 65 to 60 years the minimum age for receiving old-age insurance benefits

Whereas under the Social Security Act of Congress the minimum age at which covered employees may retire and receive old-age benefits is 65 years; and

Whereas in industry employees who have reached the age of 60 years are at substantially equal disadvantage with those who have reached the age of 65 years, by reason of the competition of younger employees; and

Whereas the beneficient purposes of the old-age and survivors-insurance provisions of the Social Security Act would be more fully accomplished, and opportunities for younger employees would be enhanced by reducing from 65 to 60 years the age at which insured employees may retire: Now, therefore, be it

Resolved by the House of Representatives of the State of South Carolina (the Senate concurring), That the Congress of the United States be, and it is hereby, respectfully urged to amend the Social Security Act by reducing from 65 to 60 years the age at which employees may begin receiving retirement benefits; and be it further

Resolved, That certified copies of this resolution be forwarded to the President pro tempore of the Senate of the United States, to the Speaker of the National House of Representatives, and to each Senator and Representative from the State of South Carolina in the Congress of the United States.

Mr. Speaker, at this time I want to join with the distinguished Speaker, the gentleman from Michigan [Mr. MICHENER], and the gentleman who just spoke, as well as with other Members on the other side of the aisle in commemorating the birthday of one of the greatest men who ever lived, Abraham Lincoln.

EXTENSION OF REMARKS

Mr. BARRETT (at the request of Mr. D'EWART) was granted permission to extend his remarks in the RECORD concerning H. R. 2161, the synthetic fuel bill.

SALE OF CEMETERY IN KANSAS CITY

Mr. D'EWART. Mr. Speaker, at the request of Mr. WELCH, chairman of the Committee on Public Lands, I ask unanimous consent that the bill (H. R. 3685) having to do with a cemetery in Kansas City and the sale of the cemetery by the Indians that own it, be recommitted to the Committee on Public Lands. The author of the bill has been consulted; the minority floor leader has been consulted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

Mr. RANKIN. Mr. Speaker, reserving the right to object, what is the bill?

Mr. D'EWART. The bill has to do with a cemetery in Kansas City and the sale of the cemetery by the Indians that own it.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

DEEDS FOR TOWN-SITE LANDS HELD BY ALASKA NATIVES

Mr. D'EWART. Mr. Speaker, at the request of Mr. WELCH, chairman of the Committee on Public Lands, I ask unanimous consent to take from the Speaker's table the bill H. R. 3503, an act to permit the issuance of unrestricted deeds for townsite lands held by Alaska natives, and for other purposes, with Senate amendments and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, strike out "(a)."

Page 1, line 11, strike out all after "or" over to and including "native," in line 5, page 2.

Page 2, strike out all after line 10 over to and including line 2, page 3.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Senate amendments were agreed to.

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include three newspaper articles.

Mr. MURRAY of Wisconsin asked and was granted permission to extend his remarks in the RECORD in two instances, in one to include an editorial Oleo Rears Its Head Again.

PERMISSION TO ADDRESS THE HOUSE

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and that the same be printed in the Appendix of the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

[Mr. RANKIN addressed the House. His remarks appear in the Appendix.]

SPECIAL ORDER GRANTED

Mr. HORAN. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. DIRKSEN] may address the House for 10 minutes on Monday next following the legislative business of the day and any special orders heretofore granted for that day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

EXTENSION OF REMARKS

Mr. BUTLER asked and was given permission to extend his remarks in the Appendix of the RECORD by including a resolution on the St. Lawrence waterway by the city of Buffalo.

Mr. SPENCE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter from Hon. A. N. Overby, United States Executive Director of the International Monetary Fund, in regard to certain changes in the value of the French franc.

Mr. GEARHART asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and in each to include extraneous matter.

HOUSE MEMBERS OF DELEGATION TO ATTEND HABANA CEREMONIES

The SPEAKER pro tempore. The Chair desires to announce that pursuant to the provisions of Senate Concurrent Resolution 41, Eightieth Congress, and the order of the House of February 9, 1948, the Speaker did on February 11, 1948, appoint as members of the delegation to attend the ceremonies in Habana, Cuba, on Sunday, February 15, 1948, in connection with the observance of the fiftieth anniversary of the sinking of the U. S. battleship *Maine*, the following Members on the part of the House: Mr. ROBERTSON and Mr. JONES of Alabama.

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Georgia [Mr. PACE] is recognized for 30 minutes.

FARM PRODUCTION AND THE FARMERS OF AMERICA

Mr. PACE. Mr. Speaker, last Thursday, February 5, there was published on the front page of the Washington Evening Star an Associated Press dispatch with regard to the testimony before the Senate Foreign Relations Committee by Mr. Walter P. Reuther, president of the CIO auto workers.

This news account contained the following paragraph:

> The CIO United Auto Workers told the committee today that industry and farmers are holding down output to keep their profits high.

So far as the farmers are concerned, there has never been broadcast across this country a more false or unfair statement. I do not believe it is true as to industry, although I do not have the exact figures as to their production. But I do have some knowledge of the production on the farms of the Nation, and I know this charge that the farmers have held down production to secure higher prices is an irresponsible disregard for the truth and the facts.

I have serious doubt that Mr. Reuther made any such charge, as I have read his testimony before the Senate committee and do not find there any such statement. He either made such a charge off the record or to the reporter privately, or else the reporter used the facilities of the Associated Press to slander the farmers of the Nation without the slightest foundation of facts.

But whoever was responsible for this charge, it has been published throughout the country, it is calculated to create a false impression among the people and needs to be corrected. I have called the matter to the attention of the managing editor of the Evening Star and the Associated Press, but neither has issued a correction.

Now, what is the record of production on the farms of the Nation? As it is too early for planting the 1948 crop, this charge about farmers holding down production must necessarily refer to last year.

Nineteen hundred and forty-seven was another year of all-out production effort on the part of the farmers. They planted nearly 358,000,000 acres to the various crops. Production of crops for sale was 31 percent above prewar. Harvested acreage of 52 crops was 348,000,000 acres. Except for 1944, this was the largest acreage since the predrought period, 1928–32. This outstanding record was achieved in spite of unfavorable weather. Wet, cold weather in the spring retarded seeding of crops in most of the areas east of the Rocky Mountains. By taking advantage of every break in the adverse spring weather, farmers were able to complete most of their planting by July. Hot, humid weather with subnormal rainfall during August irreparably damaged some crops and greatly reduced the production of corn.

The volume of agricultural production for sale and home consumption in 1947 was 35 percent above 1935–39. Production of livestock products was 37 percent above the prewar average.

Farmers harvested 1,365,000,000 bushels of wheat last year. This was the fourth successive year in which the farmers of this country produced more than a billion bushels of wheat and exceeded the record established the previous year by over 200,000,000 bushels. This outstanding production record enabled us to establish an export goal of 450,000,000 bushels. Is that holding down production?

Production of vitally needed oilseeds was nearly 12,400,000 tons, compared with 11,200,000 tons in 1946 and 10,200,000 tons for the 10-year average 1936–45. Is that holding down production? Farmers produced a record crop of peanuts, almost double the 1935–39 average. They produced the third largest crop of flaxseed in our history and a considerably larger crop of cottonseed than in 1946. Is that holding down production? Largely because of adverse weather conditions, production of soybeans was below the last few years but was still over three times the average production in 1935–39.

Production of 15 fruits, 17,620,000 tons, was second only to the 1946 record production and well above any previous year. Production of grapefruit and pears established new high records. Production of peaches and all citrus fruits was second only to the 1946 record crop.

Meat production in 1947 was 23,300,000,000 pounds. Consumption of meat last year reached a level of about 155 pounds per person, the highest since 1909 and 30 pounds greater than the 1935–39 average. Production of beef was 10,400,000,000 pounds, the highest on record. Is that holding down production? Per capita civilian consumption of pork was 69 pounds, which was 23 percent above the 1935–39 average.

While the number of milk cows on farms declined during 1947, yet with better feeding and improved management the average output of milk per cow, for the Nation as a whole, was increased to a new high record. Total milk production on farms during the year was 120,000,000,000 pounds, the second highest on record and 16 percent over the 1935–39 average. Farmers attained this level of output despite very unfavorable relationships between feed prices and prices received for their dairy products during much of the year.

Although exports of dairy products were much greater than prewar, civilian consumption of all major dairy items except butter were much larger than in 1935–39. By major items, the percentage increases over prewar were as follows: Fluid milk and cream, 19 percent; cheese, 31 percent; evaporated milk, 29 percent; ice cream, 106 percent. Butter consumption was 33 percent smaller in 1947 than prewar, reflecting both consumers' preference for more expensive items including butterfat, such as ice cream and fluid milk and cream, and the readily available supply of margarine.

Poultry farmers in 1947 produced near record quantities of poultry products which was substantially larger than in prewar years. Farm egg production totaled 4,600,000,000 dozen, 52 percent over 1935–39 average and only 5 percent below the 1944 wartime peak. The number of turkeys raised in 1937, 347,000,000, was 28 percent above prewar. Chicken meat output was almost one-half greater than in 1935–39. Does that sound like holding down production?

Per capita egg consumption in 1947 was about 380, more than one-fourth above prewar and only slightly below the 1945 peak. Consumption of chicken meat was close to 24 pounds compared with a prewar average of nearly 18 pounds. Consumption of turkeys per person in 1947 was about 4 pounds or about 50 percent higher than in prewar years.

It is not necessary for me to relate here the figures on Irish potatoes, for everyone knows we produced so many of these potatoes in 1946 and 1947 that our Government had considerable difficulty and had to undergo considerable expense in order to get rid of the enormous surplus. There was also high production of sweet potatoes and today the canners have 1,000,000 cases, or 24,000,000 cans, of the 1946 sweet potato crop which they have been unable to dispose of. Does that sound like holding down production?

Over-all civilian per capita food consumption in 1947 was 17 percent greater than prewar. Major food groups for which consumption exceeded prewar were dairy products, about 20 percent; meat, poultry, and fish, about 24 percent; eggs, 26 percent; beans, peas, and nuts, 10 percent; fats and oils (excluding butter), 10 percent; total fruits, 24 percent; and vegetables, 20 percent. In addition to supplying our own people with these large quantities of food, farm production in this country supplied food for our armed forces and permitted us to ship abroad a record quantity of over 19,000,000 tons of food in the year July 1946 to June 1947. Does that indicate holding down production?

I hope no one will ever again undertake to make such a charge against the farmers of this Nation. Throughout the period of the war, with a shortage of nearly everything they needed, they produced the food and fiber required to feed and clothe our own people, our own military forces, and millions of our allies. Outside of the boys and girls who wore the uniform I do not believe there is any group in this Nation which was more loyal, more patriotic, or contributed more to the winning of the war than the farmers of this Nation. And now they are responding without complaint to the appeal to keep producing in order to aid in feeding the needy people in other lands. Certainly they should be commended rather than slandered.

May I, in conclusion, express the earnest hope something can be done to bring about a more cordial relation between agriculture and labor. They have a community of interest which should be recognized and promoted.

The farmers want the wage earners to enjoy a good standard of living and earn a good wage. Not merely a living wage, but an income sufficient to provide the necessities of life and also to educate their children, to protect their health, to enjoy some of the comforts

and pleasures of life, and take care of them when the evening of life comes and they can work no more.

Not only is the wage earner entitled to such wages as a matter of right, but the farmer needs somebody in town with money in his pocket to buy his commodities. The farmer realizes the wage earners of the Nation provide his best market and he is profoundly interested in maintaining a strong purchasing power.

At the same time the wage earner should understand that the farmer's wage for his labor is fixed by the price he receives for his commodities. They should understand that the American farmer is the finest market in the world today for American industrial goods, because for the most part, they still have a low standard of living and need so much.

The union leaders should stop demanding a high industrial wage and cheap food, for that can only mean a low return to the farmer for his labor and a low standard of living for his family. The farmers will never accept such an arrangement. The farmer is entitled to his cost of production and a profit which will provide him the same benefits and standards of living which the organized workers demand.

The farmer wants to sell his commodities at a fair price to the wage earner and, in turn, buy the manufactured and industrial goods made by the wage earner at a fair price. The price of each will generally determine the wage of each. When the price of either breaks, the income of both will break.

There is a close community of interests and there should be a mutual understanding and appreciation in each group of the problems and welfare of the other. There must be if the prosperity of this country is to survive and the welfare of each group is protected.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. PACE. I yield to the gentleman from Arkansas.

Mr. HAYS. I am sure the House appreciates very much the interesting statement the gentleman from Georgia has just presented. He has added color and interest to figures that sometimes are dull and uninspiring, and has focused attention upon one of the most remarkable records in history. I am sure there is nothing like the performance of the American farmer during the war.

In the brief period in which I was in the European theater in 1944 I constantly heard expressions of gratitude on the part of people whom our food had saved. It would be ironic if we were being praised in other parts of the world for that great performance and condemned in our own country. Consequently the gentleman is rendering a service in reminding us of this monumental effort by our farmers. This was often at great sacrifice and inconvenience and these exertions of the farmers were not withheld because it required night work. The story has been told here more than once that automobile lights were turned on in the fields in order that the farmers might continue after the sun had gone down to harvest their crops and produce the food that the world had to have to wage war.

Mr. PACE. I am sure the gentleman can understand it was impossible for me to remain silent after reading the statement published by the Associated Press and broadcast throughout the Nation charging that the farmers were holding down production in order to get higher prices. It was the most inconsiderate, unfair, and uncalled-for statement that has ever been published, in my judgment, and I felt called upon to present to the Congress and to the people, I hope through the very same Associated Press agency which sent out this false statement, the true facts. I hope they will be considerate enough of the feelings of the 25,000,000 people, farmers of this country, to correct that statement and give the true facts to all the people everywhere.

Mr. HAYS. May I say also that I thoroughly agree with the concluding remarks of the gentleman with reference to the community of interest between labor and agriculture. I hope these words will fall upon receptive minds.

Mr. PACE. I thank the gentleman. I consider it most unfortunate that there are elements that seek to drive a wedge between the people who till the soil and the people who work for a daily wage in the plants and establishments of this country. As I have tried to say, there is a community of interest. The welfare of one is in good measure dependent upon the welfare of the other. There should be a most cordial understanding and relationship between them rather than the conditions which we have today.

Mr. H. CARL ANDERSEN. Mr. Speaker, will the gentleman yield?

Mr. PACE. I am delighted to yield to the gentleman from Minnesota.

Mr. H. CARL ANDERSEN. I wish to compliment the gentleman on his address and to say that I have always considered him as one of the very best friends the farmers of America have in the House of Representatives.

Mr. PACE. I thank the gentleman.

Mr. JOHNSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. PACE. I yield to the gentleman from Illinois.

Mr. JOHNSON of Illinois. I wish to compliment my distinguished colleague, who also is a member of the Committee on Agriculture. The gentleman has rendered not only the American farmer, but the Nation at large, a service when he comes forth with the facts and gives credit where credit is due. That is in keeping with his general policy. I notice he wants to go along and cooperate with labor. I want to say there is no one on our committee who is any more nonpolitical in his fight for agriculture and for a fair and square deal for all sides concerned than the gentleman who has been addressing us. I have personal admiration for him and am pleased to count him as one of my best friends because politics never enters into the matter when he discusses with me the problems confronting our Nation regarding agriculture and the interest of the consuming public and the Nation in general.

Mr. PACE. I am overwhelmed and most gratified at the remarks of my distinguished friend from Illinois. He, of course, can appreciate my feeling when a charge like this is brought against the farmers of the Nation.

Mr. PRESTON. Mr. Speaker, will the gentleman yield?

Mr. PACE. I yield to my colleague from Georgia.

Mr. PRESTON. May I observe in connection with what my colleague has so ably said here today that while I served in the armed forces overseas, not once did I ever find occasion to complain over the amount of food that the farmers of America produced and sent to us overseas, but I did on more than one occasion have reason to complain for the shortage of ammunition caused by strikes in industrial plants in this country during the war.

Mr. PACE. I appreciate the comments of the gentleman and am gratified to have the benefit of the experience of one who entered the service of our country as a private and came out with a captaincy.

Mr. HARDY. Mr. Speaker, will the gentleman yield?

Mr. PACE. I yield to the gentleman from Virginia.

Mr. HARDY. I am deeply grateful that the gentleman has made these remarks which are so apt and which have been so ably presented. I certainly hope that those who are responsible for this false information will take the necessary steps to correct it. I am also grateful that the gentleman from Georgia has so clearly pointed out the interrelationship and the community of interests between our working people and our agricultural people. I certainly hope both of these great groups will draw closer together. Realization and understanding that a community of interests does exist between farmers and industrial workers will promote not only their well-being but the welfare of our Nation.

Mr. PACE. I am truly delighted to get that response from the gentleman from Virginia, because I do profoundly believe that we can never, over a long pull, maintain prosperous conditions in this country unless the farmer has a real interest in the welfare and purchasing power of the wage earner and, on the other hand, the wage earner has a similar interest in the welfare and earnings of the people who work in the sun and in the fields. I am gratified at the gentleman's response. Perhaps I have said something here that will contribute in some way to a better relation in the future.

Mr. HARDY. The interdependence of these two great segments of American life is so closely interwoven in our total economic structure that unless their problems and activities are closely correlated a disaster to either could cause a complete economic collapse.

Mr. PACE. I might say following that, I hope that somewhere in this country we can find someone with that high quality of leadership who can take these two great segments of our population and give them a better understanding of the problems of each group and lead

them closer together in the consideration of their mutual welfare.

The SPEAKER pro tempore. The time of the gentleman from Georgia [Mr. PACE] has expired.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Pennsylvania [Mr. EBERHARTER] is recognized for 30 minutes.

TAXATION OF FARM COOPERATIVES AND REPEAL OF THE WAGE-HOUR LAW

Mr. EBERHARTER. Mr. Speaker, the Congress of the United States and the people of the country at large are going to be grateful, I am sure, to the gentleman from Georgia [Mr. PACE] for the address he made this afternoon. I heartily concur with him when he says that the American farmer produced more patriotically and more energetically during the recent war than at any previous time in the history of this country, or of any other nation in the entire world. I am sorry to see these mistaken releases given out in the press, which sometimes happens. Occasionally somebody who is too strong an advocate of certain measures for the farm groups will also give out statements which do not entirely conform to the facts. I believe that the cause of organized and unorganized labor is also the cause of the farmers of this country, and that they should work together. Both have a hard struggle to get along and in some respects they have a common enemy, and they should work together in harmony and try to achieve the same goal, and the same ends; that is, a higher standard of living and a happier life for themselves and their families.

Mr. PACE. Will the gentleman yield?

Mr. EBERHARTER. I yield.

Mr. PACE. May I thank the gentleman from Pennsylvania for his statement. Coming from one of our great industrial States as well as agricultural States, I am gratified that he, too, appreciates the importance of a more cordial relation between these two groups.

Mr. EBERHARTER. I am sure the gentleman from Georgia has rendered a great service to the country.

Mr. Speaker, the remarks I will make this afternoon are by some happy or unhappy circumstance, going to be somewhat along the same line. They are going to be in behalf of the interest of the farmer. I am going to open by quoting from the report of the majority members of the Committee on Ways and Means of the House, Report No. 1274, to accompany H. R. 4790, on page 16;

This is the report on the so-called Knutson tax-reduction bill. The quotation is as follows:

> Although it is conceded that small businesses are the keystone in the free-enterprise system, their destruction continues unabated. It is a three-way squeeze. They are being bankrupted by competition of tax-free cooperatives, exorbitant Federal taxes, and strait-jacket Government regulations like the wage-hour law. Providing Congress fails to recognize the urgency and neglects to take prompt action to remove the cause for this crushing misfortune, commercial failures will not decrease but increase, and small manufacturers will in all likelihood be destroyed or obliterated.

Mr. Speaker, this report—and it is no secret—was very closely scrutinized by all of the majority members of the Ways and Means Committee. My understanding is that it was gone over in the most minute detail. It is also officially known that this report was unanimously approved by the majority members, the Republican members. At this point I should like to say that the Democratic members of the committee unanimously disapproved of the report and rejected the report.

I wish first to call your attention to one of the items mentioned in this so-called three-way squeeze. They say that business is being bankrupted by the competition of tax-free cooperatives. What is a tax-free cooperative? It is generally known that so-called consumer cooperatives are not tax free; in other words, they are compelled to pay income taxes the same as any other corporation, but the farmers' cooperatives that meet certain standards are not compelled to pay taxes the same as other corporations. This can mean only one thing; it means that it is the purpose of the Republican members of the Committee on Ways and Means to levy a tax on farmers' cooperative associations. We all know, Mr. Speaker, that the Ways and Means Committee is considered the leading committee of the House of Representatives. We know they are very powerful in their leadership. We know they generally express the views of the leadership of the majority party.

I call attention, Mr. Speaker, to the hearings that were held by the Committee on Ways and Means with regard to the subject of taxing farmers' cooperatives. Here is the volume. You will notice that it is very closely printed and very compact. It is at least 2 inches or more in thickness and over 1,300 pages in length. I shudder to think what the cost of compiling that record was; and the sole purpose was to find a reason to tax the farmers' cooperatives of this Nation. During the many hearings that were held on the subject I got the impression that there was a sort of smear campaign being conducted against the farmers' cooperatives. The term "communism" was constantly brought into the question by some members of the majority. The word "socialism" was brought in also. The inference was left that farmers' cooperatives were the commencement of a socialistic state, that they worked together, that they divided their profits, that they pooled their resources, and they attempted to save money when they were purchasing things. In evidence were offered some periodicals in which articles intimated it was a communistic idea, and that that was the way communism started in other lands throughout the world. In other words, it was a smear campaign. The cross-examination of the witnesses bears that out in detail.

Mr. Speaker, I want to call attention to what appears in the evidence at page 2191 of the hearings. A witness was being questioned, and he in turn asked if he could make an inquiry of the chairman of the committee. He was permitted to do so. So the witness stated:

> Mr. Chairman, in regard to revenue, I am just a little bit confused about the purpose of this hearing. I wonder if it is for the purpose of finding a way to penalize farmers and their cooperatives or is it for the purpose of finding ways and means to get revenue to finance the budget?

The chairman of the committee answered:

> It is the latter.

To which the witness responded:

> Then it rather astonishes me that only last year two tax bills proposing to reduce taxes $4,000,000,000, which is four thousand million dollars, were passed by the Republican House, and now we are talking about just a little, piddling sum of a few million dollars that might be obtained from farmer cooperatives which are not and should not be subject to the payment of an income tax because they do not operate in a fashion like those who do pay taxes.

Mr. Speaker, I want to call attention also to the fact that all of the farmers' organizations, all of the labor organizations of the country, and practically every religious denomination favor the cooperative movement. We have in the official record strong language supporting the cooperative movement from the National Grange, from the Federal Council of the Churches of Christ in America, from the president of the American Federation of Labor, from the president of the Congress of Industrial Organizations, from the president of the National Farmers' Union, from the president of the Synagogue Council of America, from the executive secretary of the Association of Railway Labor Executives, and from the executive secretary of the National Catholic Rural Life Conference.

Mr. Speaker, they are trying to smear the farmers' cooperative associations with the tag of communism and socialism. Right here may I say that it has been the historic policy of the Democratic Party, which has always carried out that policy, to try to foster farmers' cooperatives and to try to help their existence, because it is easy to understand that, if a farmer were to sell his goods to the great corporations that own the grain elevators, the great distributing agencies, if he has to sell his goods that he produces to them alone without any help or protection from his neighbor farmers, he will be at the mercy of those who are heavily financed. The same is true when the farmer acting by himself wants to buy farm equipment or he wants to buy fertilizer, seed, or many of the things he needs on the farm. If farmers do not join together so that they can purchase cheaper, they will be at the mercy of the business, financial, and other monopolistic elements of this great Nation. So the historic policy of the Democratic Party has been to try to foster agricultural cooperatives, realizing the great handicaps that the individual farmer always has in encouraging the formation of cooperatives.

In contrast with the record of the Democratic Party, take this language in the official report of the Republican majority of the Committee on Ways and Means:

> Providing Congress fails to recognize the urgency, and neglects to take a prompt action to eliminate the cause for this crushing misfortune.

How do they propose to eliminate the cause, as they call it? Why, by taxing

the farmers' cooperatives. That is what they propose to do.

We have right there, Mr. Speaker, a foretaste of what will happen should this country be entirely in control of the Republican Party. That statement in the official report of the most powerful committee of the House of Representatives, the leading committee of the House, is practically a call for action by this Congress or the next Congress at least to tax out of existence the farmers' cooperatives. In support of that conclusion I call your attention to the record just made within the past 6 or 8 months by the so-called Ploeser committee. That committee was formed for the purpose of ostensibly aiding small business. But what did they do? They went all over this country and called in witness after witness to testify, and tried to show that it was absolutely necessary to impose heavy taxation on farmers' cooperatives, because they said that the farmers' cooperatives were hurting business. And with great fanfare they harassed and embarrassed these very worth-while farm cooperative organizations.

Well, now, let me move on to another item here in "the three-way squeeze" to "the strait-jacket Government regulations, like the wage-and-hour law." Now, what is the wage-and-hour law—the Fair Labor Standards Act? It provides that a person who is an employer must pay his employee not less than 40 cents an hour. That is a total of $16 a week. There are no regulations under that act that are hard to follow. Any person who employs anybody under the act simply must pay 40 cents an hour, or if they work 40 hours a week $16 per week. Is there any employer in the congressional district of any Member of Congress who wants to hire an employee for less than $16 a week? Why, how is a man, even if he is single, going to support himself in these days on less than $16 a week? It takes that much to support a boy. How in the world is a man with a family going to try to get along on less than $16 a week? That is also an indication of what would happen to this country if the Republicans gained control: Wipe off the books of the Fair Labor Standards Act; go back to sweatshops; go back to paying just whatever you can buy labor for; let the children go hungry; let them live in huts. That would be the result of wiping out the Fair Labor Standards Act. Maybe the Ways and Means majority have some other acts in mind, for they refer to other "strait-jacket Government regulations." Maybe they have in mind changing the provisions of the Social Security Act. You know, right now the Committee on Ways and Means has reported out two bills that would restrict the scope of social-security coverage and benefits instead of expanding them. They say they favor expanded coverage and then they report out legislation to deprive workers of this basic protection. Mr. Speaker, it is time for some people in this country to awaken to what faces us.

They should begin to realize what a threat Republican control is to the social progress of this Nation. They should realize that only under a Democratic Congress will we be able to attain the recommendation of President Truman for lifting the minimum wage to 75 cents an hour. Likewise, I want to quote just what the Democratic Party feels about farm cooperatives. This statement was made by the distinguished chairman of the Democratic National Committee just a few weeks ago, reaffirming the long-standing position of the Democratic Party with respect to farmers:

I wish to make it clear that the Democratic Party has not modified its support of the organization and development of farm cooperatives. The Democratic Party will continue to seek actively in Congress and elsewhere to aid farm cooperatives and to halt the efforts to discredit and destroy these organizations.

In conclusion, Mr. Speaker, let me say that I think it is time for the workers in the fields, as well as those in the factories, to know who their true friends are.

SPECIAL ORDER

The SPEAKER pro tempore (Mr. NORBLAD). Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 30 minutes.

Mr. MICHENER. Mr. Speaker, the gentleman from Massachusetts [Mr. HESELTON] was called to a meeting of the Committee on Interstate and Foreign Commerce. I ask unanimous consent that he be permitted to extend his remarks at this point in the RECORD and to include reprints of certain telegrams and observations. I further ask unanimous consent that he be permitted to address the House for 30 minutes on Monday next, following any special orders heretofore entered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HESELTON. Mr. Speaker, I wish to include in my remarks a report on the fuel-oil conditions in Massachusetts made by George F. Hines, special representative of the Commonwealth of Massachusetts:

REPORT ON FUEL CONDITIONS IN MASSACHUSETTS

FEBRUARY 11, 1948.

This week is the most critical period in the Massachusetts fuel situation since the shortage began, according to George Rockwell, State fuel coordinator, with the probability that even more critical periods are coming in the next 5 weeks. This estimate of the situation I obtained in Boston yesterday.

Nevertheless, no home in the State has been reported as cold from lack of fuel. The Massachusetts volunteer organization of area, city, and town emergency coordinators, working closely with oil companies and dealers, have been able to meet each crisis by rushing emergency supplies or borrowed kerosene or No. 2 oil to the danger spots. Many times the supplies made available have been small, only enough to last a few days, but so far the system has worked well.

This is not true in other States. The entire east coast is in a critical situation because of the continued cold spell and reduced supplies coming through. Stocks of kerosene and No. 2 have fallen more rapidly than was expected.

Excess supplies are practically all consumed and the whole east coast is almost at the point of hand-to-mouth deliveries, which further complicates equalizing deliveries, because of irregularities in distribution of supplies.

The Washington area, Virginia, Indiana, and New York are at the moment the most critical spots. There have been reports from these and other areas of complete exhaustion of supplies and some distress.

It is considered remarkable here that Massachusetts has so far escaped distress. There are no indications, however, that Massachusetts may not be in a more critical situation next week.

In the Boston area the sudden crisis involving the State Fuel Co. has been relieved by emergency action by Governor Bradford, Senators SALTONSTALL and LODGE, Speaker MARTIN, and Congressman MCCORMACK. As a consequence, State Fuel has enough supplies on hand or in sight to last them at least a week or more.

A number of other companies in the Boston area, however, White Fuel, Quincy Oil, and Hartol, are threatened with exhaustion of supply. These crises both in the Boston area, Lynn, the Fall River area, and the western part of the State are being met by manipulation of supplies obtained from the major oil companies.

The sudden emergency which arose a few days ago at the Cambridge Gas Co. has been met by diverting 66,000 barrels of the Navy Diesel oil from the emergency stocks created by Navy for that area. Practically all of the Navy Diesel No. 2 oil is gone but there is about 200,000 barrels of the heavy oil still available from this source. Unfortunately this heavy oil cannot be used to heat homes except possibly some apartment houses.

The great shortage remains in kerosene and No. 2 in that order. Representatives of the large oil companies following a conference are turning over accredited supplies of 23,810 barrels of kerosene and a similar amount of No. 2 to the State fuel administrator which the State organization can draw on to meet emergencies. These commitments are allocated 10 days at a time and have been one of the principal sources of emergency supplies.

The State organization using existing delivery facilities is administratively working in two divisions. Robert Montgomery, general counsel, New England Telephone & Telegraph Co. is deputy coordinator with a skilled staff of loaned oil men who labor with the large oil companies and large distributors in working out top level supply problems.

A similar staff working directly under Mr. Rockwell deals with emergency spot shortages arising in areas, cities, and towns from small dealers and the area coordinators. Both of these central bodies in Boston work closely together and with the area coordinators.

It is important that:

1. All calls for emergency supplies be directed to the area coordinator and not to the top State organization or the Governor's office.

2. It should be recognized that the area directors may be able to relieve the situation from nearby stocks at once. If they cannot find immediate relief within their districts they call on Rockwell's office at the State house for help and supplies outside of the areas are tapped.

All of the oil companies in the State work through this system and this team organization is working effectively and so far successfully. No oil can be obtained through Washington or from other States except through the Governor who has been devoting a considerable portion of his time to the problems of negotiating with other States.

Nearby States are working in close cooperation with Massachusetts. Everyone is working hard. They are all on top of the problem and if organization can do the job, then Massachusetts will come out of this emergency with a minimum of distress.

A regional committee handling major supply and distribution problems of an interstate character from Maine to Florida is now

operating in New York under B. I. Graves, president, Tidewater Oil Co., chairman; and M. J. Rathbone, president of the Esso Standard Oil Co., as vice chairman. June Richdale, J. J. Birmingham, president, White Fuel Co. (vice, Clyde Morrill); and J. W. Scott, of Buckley & Scott are the New England representatives.

Constant emphasis must be maintained on conservation of petroleum by everyone but particularly by householders who use kerosene and No. 2. Massachusetts is now borrowing on March oil. The weather is severe, temperatures are well below normal, and there is serious fear that if the cold spell continues much longer real suffering will prevail. Outside of a few localities there has been no hysteria and these instances were of short duration.

Because many States are involved in as bad or worse condition than Massachusetts larger oil companies cannot divert flows to meet spot emergencies. These must be met on State or area levels. It may become necessary at any moment for Governor Bradford to invoke emergency regulations such as were imposed in New York City but so far it has not been found necessary to do so.

I hope you will find this information of help to you.

Yours very truly,

GEORGE F. HINES,
Special Representative.

Mr. Speaker, a great many Members who have been most sympathetic and anxious to assist have inquired daily as to how things are working out in New England and in Massachusetts. I think the report is a vivid account of how close the situation is for us. You will note Mr. Hines states that "coast supplies are practically all consumed and the whole east coast is almost at the point of hand to mouth deliveries." Another significant sentence is, "There are no indications, however, that Massachusetts may not be in a more critical situation next week." Finally, Mr. Hines warns that "it may become necessary at any moment for Governor Bradford to invoke emergency regulations such as were imposed in New York City."

In view of the fact that the Interstate and Foreign Commerce Committee has scheduled hearings on Tuesday at which representatives of the oil industry are expected to testify with reference not only to the supply situation but with reference to the price situation, I want to include, also, in these remarks an editorial written by the late Clyde Morrow, executive director, Atlantic Coast Oil Conference, which, I understand, has been the subject of much controversy within the oil industry:

MORRILL URGES AGGRESSIVE OIL INDUSTRY LEADERSHIP AS THE ALTERNATIVE TO A FEDERAL OIL COMMISSION

(By Clyde G. Morrill, executive secretary, Atlantic Coast Oil Conference)

The oil industry has a right to expect more constructive leadership from those who guide our large integrated operations than it has been receiving. They, by virtue of their position are assumed to have at their command the advice of petroleum economists, a wealth of statistics that will yield full current information as well as long-range projections, a world viewpoint, and finally a staff to prepare and issue their findings and conclusions. These factual reports and policy decisions would, it should be assumed, deal practically with the state of the industry in relation to the needs of the consumers it serves. Proceeding from the same available basic statistics there should be no wide diversity in conclusions reached. In fact there should be enough unanimity so far as factual reporting to the public is concerned to prevent the confusion in the public's mind that has been prevalent everywhere on petroleum products supply since midsummer.

As long ago as April the tanker shortage was obvious. Yet in spite of complete and full statistical information on the subject major companies were refusing to buy tankers for their needs, tankers that 6 months later they were desperately seeking. Certainly during August fuel oil shortages were becoming more and more apparent. Most statements as were forthcoming were guarded, sort of a worried frown over a tight situation with careful optimism for field men in every large company so that company prestige or position might not suffer.

THE CONSUMER IN THE DARK

Where were the facts for the consumer? Why was he kept confused? Where were forthright announcements concerning availability of product that would have permitted purchasers of Diesel equipment, oil burners, and space heaters to know the fuel-supply difficulties they were facing?

Somebody lacked the courage to tell the truth.

The public-relations campaign was blithely ignoring approaching disasters with its delightful copy on free competition in America, and especially in oil. Not until the Wherry committee consigned a million dollars' worth of public-relations promotion to the wastebasket did this slow-burning campaign attempt to catch the consumers' attention with answers to the one question the consumer was interested in, "Will there be enough oil this winter to keep me warm?" To date, 6 months late, the question is being answered in the customer's home by State fuel coordinators who desperately search for product and by the Red Cross which is setting up emergency shelters.

Eventually the ponderous moving National Petroleum Council glanced furtively at such matters as tankers and supply, shying violently away from octane ratings and refinery yields, giving birth after hours of labor to several completely innocuous reports. These contributed nothing much more than some added pressure on the Maritime Commission, where little was needed by the time NPC got around to it, and some added confusion for public and industry consumption.

AN AGGRESSIVE REPORT WAS NEEDED

What prevented an aggressive report from the National Petroleum Council that might have offered an industry plan to meet a growing emergency? Isn't it the duty of the council to advise the Government and its people on the facts in anticipation of an emergency? Isn't it the duty of the council to prepare a plan of operation where an emergency is evident? Shouldn't it be an authoritative and unfailing source for the guidance of our citizens?

Throughout the summer and early fall any dealer or jobber would have reported unfailing veiled assurances from his supplier concerning the supply of fuel oils, and aside from some spot shortages confidence concerning gasoline supply. Being close to the consumer the distibutor could but report that he expected—because his supplier had not given him a positive no—to take care of their needs. Even in the Midwest where warnings were more insistent on such matters, contradictory statements kept small distributors continuously confused. Only one large company had taken a positive position on the sale of oil burners and that company only so far as the sale of its own burner was concerned.

On the east coast rapid deterioration of the fuel-oil supply was screamingly evident in October. Even under such compulsion a warm October sun lulled integrated suppliers on the east coast into such complacency that there was no attempt on the part of industry to gird itself for battle with a certain shortage of fuel oil.

Not until the New England governors became thoroughly aroused on behalf of their constituency and demanded a senatorial investigation, not until Senator TOBEY and Congressman WOLVERTON held hearings, not until the full import of the Wherry committee report became evident was a program proposed on December 17 and this program was developed by an industry advisory committee selected by Senator TOBEY, a committee or one like it that could have submitted a report far earlier of far more import had industry been on its job. Industry had to be prodded by three congressional committees before a constructive program was prepared and the report was finally issued by a senatorial committee and to the senatorial committee the credit belongs. The report, a last-ditch proposition to avert consumer suffering, prepared under great pressure, depends on industry cooperation and consumer cooperation for success. It is already evident that it will get a modicum of industry cooperation reluctantly and a minimum of suspicious consumer cooperation. Only such publicity as Senator TOBEY may develop, a tactic employed so successfully by Senator WHERRY, will force necessary industry compliance to his program.

IS MADISON A REASON OR AN EXCUSE?

Now why are these things so and what do they portend?

These things are so because the size of the business units involved make it necessary for every key executive to act only in accordance with two primary guiding directives: 1. What does the legal department say that I can do? And 2, How will any decision of mine affect our gasoline position? At least so it seems to thousands of fuel-oil distributors who serve the consumers.

The Madison specter grows with age in potency to thwart what might be normal approaches and sensible ways of dealing with problems discussed here. On more than one occasion a muted reference to Madison has been enough to negate constructive argumentation. Too frequently it has been put forward by an executive as an excuse for not doing something when a more honest reason for not doing the same thing was reasonably apparent. Executive action tied completely to Madison negation can never be forward looking for our industry as a whole.

FUEL OIL YIELDS KEPT TOO LOW

For years the industry accepted and later courted the responsibility of a growing fuel-oil demand. Balanced refinery yields that made for greater economy and lower prices to the public encouraged more and more fuel-oil use. Moreover, in all integrated operation gasoline was king, company position was determined by gasoline position and refinery pricing was made accordingly. The responsibilities to the consumer accepted with the fuel-oil load have rested lightly on refining companies. This is supremely evident as of the moment when report after report indicates the reluctance of refiners to increase fuel-oil yields at the expense of gasoline even if consumers are going cold.

The January 12 issue of the New York Journal of Commerce reported that in spite of the Tobey report asking for distillate yield increase, the 2 weeks ending January 3, distillate yield dropped in East coast and Gulf refineries from 22.2 to 21.15 percent and gasoline yield increased from 38.5 to 40 percent. This in the face of an emergency. Industry refining units, with one or two notable exceptions, have denied this consumer responsibility rather than sacrifice gasoline position and gasoline profits.

Those who market fuel oil, mostly small independent distributors, after months of indecision on the part of their major suppliers

as to just what the fuel oil situation would be, find gasoline generally in adequate supply while they are forced to cut consumer deliveries in the product their customer wants most, heating oil. If the distributor asks why, can he be blamed? If he gets choleric in trying to explain this to his customer and damns the industry (in spite of Saturday Evening Post advertisements on free competition in oil amongst 34,000 companies), can he be censured?

LIKE THE RAILROADS BEFORE THE ICC

How many supplying companies were so complacent concerning their fuel oil position that they failed to recognize that as soon as people started to freeze the State must step in and when the State did step in every citizen had equal rights to the heating oil available in any market, including oil in all supplying-company tanks. Answer, too many!

And so the maintenance of gasoline position by integrated companies and their obtuseness over what really happens when people go cold and fuel oil is short have placed the industry in the same position that the railroads occupied within the memory of men now living, a position that established the Interstate Commerce Commission. The industry has failed to accept its responsibility to keep homes warm just as blatantly as labor has on occasion denied its responsibility to keep production moving as a necessary of life.

Where is the industry leadership that should have had the situation so well in hand that there was no occasion for Members of Congress to arise and demand investigation? Where was the public relations program that should have so well informed our consumers that such speeches would have had little public approval instead of commendation?

NO RECOGNITION FOR THE DISTRIBUTOR

While prices have mounted and integrated earnings skyrocketed, price structures continued to reflect no recognition of the increased costs at the distributor's level in spite of expansive rhetoric on the subject amongst policy-making executives. Hence, integrated policies on this vital matter gave the fuel-oil distributor reason to believe that he as well as his customer was being discriminated against. He is, in increasing numbers, more than willing, nay anxious, to join with his customer and demand a look-see by Government, into the whole sorry mess, particularly since he is already being told that next year will be fully as bad or worse than this.

Government regulation? Can a distributor lose more than good will—the respect and confidence of his customer? Can he lose more than a fair opportunity to make a profit commensurate with the services he renders?

Do not those who meet and talk with the customers have the right to expect something better than a leadership that seems impotent to act in the face of an emergency? Hasn't the public the right to become concerned about one of its most basic needs, petroleum products, when such leadership is absent? Isn't it a natural demand when a citizen is confused and cold and angry for him to approve suggestions for some kind of a regulatory body in oil similar to the Interstate Commerce Commission for the railroads? Almost every move to date upon the part of the petroleum industry tends to encourage such a reaction and unfortunately at the same time persuades small marketers to join the consumer in his position. The marketer's fears have hardly been alleviated when many suppliers took advantage of short supply to eliminate spot accounts, that were welcome enough under conditions of plenty, or other accounts that for one reason or another had become undesirable. Oil distributors remember that in 1941 a Government directive was necessary to freeze accounts under similar provocation and a glance at the Wherry report indicates that again, government in the person of Senator WHERRY, had to step in the breech. Industry has provided concrete evidence to stimulate many whose first and foremost thought is to run to government when in trouble.

So we are back to leadership again. Men in industry are needed of vision who will be willing to take some risks to thoughtfully prepare a policy, not of protest and negation and mouthings about free enterprise and fancy rhetoric on the importance of the independent distributor, but a practical all-embracing plan that recognizes responsibilities to the consumer, ways of advising the consumer on the product he purchases, truthfully, and methods by which industry as a whole may serve him equitably in times of shortage.

We need leaders in large companies who will insist on being so well informed on their distributors' needs that their company policies acknowledge his function and give practical concern to his welfare and sees to it that those policies are carried out in the field. Further, we need leaders who are more fully cognizant of consumer reactions and who are so sensitive to such reaction that they can guide industry public relations in practical channels.

Do we have such men? If we have, do they have that much courage?

If not, is the only alternative a Federal Oil Commission?

Mr. Speaker, finally, I wish to quote briefly from an editorial in the National Petroleum News of December 10:

Never in more than a dozen years in Washington has the writer seen Congress so hot on a single subject as it is now with oil. * * * Under the circumstances, and realizing the extremes to which the Truman administration might go, had it the power, it apparently is incumbent on the industry to convince Congress that:

1. Within the limits of private competitive enterprise it is doing the best possible job already of meeting an exorbitant demand, but also * * *.

2. To evolve and present a plan that will enable it, voluntarily and cooperatively, to do a still better job.

Congress, I believe, would like to be shown, but unless it is—watch out.

Mr. Yocom is, I believe, supremely right. I take this opportunity to urge the oil industry to send the leaders Mr. Morrill suggested to this hearing. The information they present Tuesday may well be the basis upon which Members of Congress must base their opinions as to the proper course to take in the interest of the welfare and security of all the people of this Nation. I am convinced that is the sole objective of most Members of Congress, but I think the majority of us would agree that the hour is late and adequate information from the industry is long overdue.

SPECIAL ORDER

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Mississippi [Mr. WILLIAMS] is recognized for 30 minutes.

Mr. WILLIAMS. Mr. Speaker, in my opinion, the most dangerous current threat to our democratic form of government in the United States is the presence of selfishly organized groups of radical special-interest minorities and their efforts through political intimidation to coerce the Congress of the United States into passing legislation which is contrary to the basic principles upon which this Government was founded.

Chief among these are radical Negro, Communist, and off-color mongrel organizations which, conceived in hate, whelped in treason and deceit, and nurtured on the breast of communism, are attempting to bring about in this great country moral disintegration and mongrelization through a forced amalgamation of the races.

Hiding the rotten stench of their insidious aims under an outward cloak of purity, these professional purveyors of hate and indecency—these enemies of the American way of life—have succeeded in injecting their venom into the unsuspecting in such numbers that they have managed to attain the position in many States of holding the balance of political power separating the two major political parties. Through the conscienceless racketeers who head these parasitic groups, they are today asserting their strength as never before in an attempt to bring about a forced amalgamation of the white and black races, eventually reducing us to a state of mongrels, ruled over by mulattoes, with every vestige of human rights destroyed.

In his civil-rights message to this Congress, the President of the United States lent aid and comfort to these enemies of the American way of life. This infamous message, with its accompanying preposterous recommendations, constitutes the most flagrant attack ever perpetrated by any President in the history of our country upon the American Constitution. Not only did he show his utter contempt for the time-honored principles on which his party was founded, but at the same time he repudiated the friendship and loyalty of those who were directly responsible for his becoming President.

We of the South will never forget those trying days during the 1944 Democratic convention when southern Democrats banded together as a bloc to prevent the nomination of Henry Wallace as a Vice Presidential candidate on the Democratic ticket. The people of the South are directly responsible for Mr. Truman's ascendancy to the Presidency; yet, despite this, he has seen fit to run a political dagger into our backs and now he is trying to drink our blood.

Never since the shameful and disastrous years of Reconstruction following the war for southern independence have the valiant people of the South faced a crisis of such severity as that which has been brough down upon our heads by the President. We of the South must and will face the impending battle in the same courageous manner with which our forebears faced the carpetbaggers and scalawags of Reconstruction.

In those, the darkest days of American history, when the people of the Southern States, both white and black, were being exploited by unscrupulous money-mad and power-hungry scavengers, when the governments of the Southern States had been wrested from the hands of their chosen leaders and had been taken over by organized enemies of law and order, the great Democratic Party of Thomas Jefferson rallied its forces to the aid of

these stricken people. We have never since forgotten nor have we failed to give evidence at every opportunity of our unwavering gratitude as well as devotion to the principles of this great party. Through its leanest as well as its more prosperous years, the Democratic Party has enjoyed and relied upon the determined spirit of its southern friends for its continued existence.

President Truman today holds the highest office within the gift of his people by virtue of southern loyalty to the Democratic Party as well as their activities in his behalf in the 1944 convention, and, I say, Mr. Speaker, that his message on civil rights constitutes mighty poor evidence of any gratitude on his part for these concessions. President Truman knows that if these outrageous recommendations were adopted and became law, that they would eventually destroy not only our democratic form of government and our democratic way of life, but would also destroy our very civilization.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS. I yield.

Mr. RANKIN. It has been well and wisely said that a President these days is a prisoner of his "palace guard." If President Truman would clean house and fumigate, get rid of that bunch around him and get some real American Democrats in their places, he would change his position on these vicious measures.

Mr. WILLIAMS. Yes; and there is no time like the present for that fumigating.

He cites the fact that today the American people enjoy more freedom and opportunity than ever before, but in the next breath makes recommendations for immediate revolutionary changes. Now as a matter of fact, everyone knows that we of the United States enjoy more individual freedom and opportunity than any other people or country on the face of the earth. We must remember that these freedoms were bought with the blood of ourselves and our ancestors, and that these freedoms were not merely voted into being overnight. We must remember that these freedoms carry with them responsibilities of citizenship which the President has seen fit to leave unmentioned in his civil-rights message.

I shall speak of his message here as being a direct insult to the white people of the Southern States, because the President has made it obvious that he so intended.

It is a matter of record that we of the South today are spending more on Negro education than we have at any time since the war for southern independence. We are by the same token, willing to admit that it is not enough but we intend to spend more. Despite what you might hear to the contrary, more Negroes vote today in our elections than have ever voted or attempted to vote in the past, though our voting laws have not been changed appreciably during the past 50 years. More money is being spent in the South today on Negro health programs, hospitalization, and social welfare than ever before in the history of our country.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS. I yield.

Mr. ABERNETHY. It might be pointed out that it is a greater problem in the South because a larger proportion of the Negro population is located in the South.

Mr. RANKIN. It might also be pointed out, as I pointed out before the Committee on Un-American Activities on yesterday, that every Communist agitator who goes down South to stir up race trouble seems to get the blessing of the so-called Department of Justice, and I am referring particularly to what happened at Magee, Miss., with which my distinguished colleague is thoroughly familiar.

Mr. WILLIAMS. Yes, and I agree with the gentleman, of course.

We have less racial trouble than any other section of the country where there is an appreciable number of opposing races. The people of the Southern States are making valiant strides toward bettering social conditions and racial relations despite communistic propaganda to the contrary. The President has asked for a Federal antilynching bill, which would not only provide protection for the guilty at the expense of the innocent, but would provide a free $10,000 life insurance policy at the expense of innocent taxpayers, payable to the designated beneficiaries of any criminal who happens to become the victim of a lynching.

Mr. RANKIN. During the debate in 1922, of which the Republicans have been ashamed ever since, Hon. Finis J. Garrett, the Democratic leader, read that clause and he said it ought to be called a bill to encourage rape, because it insures the life of the Negro rapist at the expense of the taxpayers of the county, and ignores the multitudes that are killed in race troubles in States outside the solid South.

Mr. WILLIAMS. I thank the gentleman.

I, as much as any other man in this House, despise and detest the crime of lynching. It is not only un-American and contrary to every principle of law and order, but it is murder in the worst and lowest form. No; we who oppose this measure are not advocating lynching or mob violence—let there be no mistake about this. We do advocate the enforcement of currently existing laws which are completely adequate to meet any such situation. There is not a State in the Union which does not provide proper punishment for those who are found guilty of the crime of murder. Under the Constitution of the United States those officers who are guilty of negligence or malfeasance which makes it possible for such crimes to be perpetrated may be punished under the provisions of the Constitution of the United States wherein it is provided, and I quote:

> Nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

No, Mr. Speaker, there is no need for such drastic unconstitutional legislation. According to the Tuskegee Institute, which keeps records of lynchings, there was only one such crime in the United States last year. Furthermore, those who perpetrated this crime were immediately brought to the bar of justice and given a fair and speedy trial.

The President also recommends a permanent Fair Employment Practices Commission, which he states would be established for the purpose of eliminating discrimination in employment. The President in his zeal for looking out after the interests of his favored minorities apparently overlooks or does not care about the rights of the majority. A Fair Employment Practices Commission could only mean the setting up of a gestapo in the United States for the purpose of intimidating employers and forcing them to submit to the whims and fancies of the bureaucracy administering such a program. An FEPC would completely destroy any semblance of free enterprise and would bring upon us a police state exceeding even the wildest dreams of Hitler, Mussolini, or Stalin. The anti-poll-tax bill, clearly an invasion of the rights of the individual States by the Federal Government, is but a first step toward the Federal ballot, and Federal control of elections, and qualifications of electors. This is clearly in conflict with the spirit of the Constitution and the intentions of the assembly which wrote this great document.

The President has summed up all of these recommendations in his final proposal—legislation to outlaw segregation. This, along with a totalitarian communistic state, is the ultimate aim and desire of the radicals who have high-pressured the President into making such requests.

Mr. Speaker, segregation is the only answer to the Negro problem. This Congress can pass laws from now until doomsday, outlawing segregation and attempting to force upon both white and black an integral society, but until such time as people are willing voluntarily to intermingle socially, these laws could and would be of no value whatsoever.

A great American—an abolitionist—speaking of the slave problem, said:

> Nothing is more certainly written in the book of fate than that these people—
>
> Meaning Negroes—
>
> are to be free; nor is it less certain that the two races, equally free, cannot live in the same government.

Mr. RANKIN. That is Thomas Jefferson you are quoting?

Mr. WILLIAMS. Yes, my friends, these are the words of the greatest Democrat who ever lived; the founder of the Democratic Party, the author of the Declaration of Independence, Thomas Jefferson. He recognized the gravity of the impending racial conflict, and we could do well to heed his words.

Abraham Lincoln, the Great Emancipator, the man who is today recognized as the best friend the Negro ever had, said in a speech at Springfield, Ill., on June 26, 1857, while debating the slave issue with Douglas:

> Now, I protest the counterfeit logic which concluded that because I do not want a black woman for a slave I must necessarily want one for a wife. I need not have her for either. A separation of the races is the

only perfect preventive of amalgamation; but as an immediate separation is impossible, then the next best thing is to keep them apart where they are not already together.

And again, speaking at Charleston, Ill., on September 18, 1858, the same Abraham Lincoln said:

I will say, then, that I am not nor have ever been in favor of bringing about in any way the social and political equality of the white and black races. That I am not, nor have ever been in favor of making voters or jurors of Negroes nor of qualifying them to hold office, nor to intermarry with white people, and I will say in addition to this that there is a physical difference between the white and black races which I believe will forever forbid the two races living together on terms of social and political equality, and inasmuch as they cannot so live, while they do remain together there must be the position of superior and inferior, and I, much as any other man, am in favor of having the superior position assigned to the white man.

Mr. Speaker, Mr. Lincoln was a friend to the Negro race. He realized that the two races could not live together free from rules and laws of segregation without reducing both to a common mongrel race, eventually destroying the integrity of both races and bringing upon us a state of national moral disintegration. These eternal truths have made themselves manifest throughout the ages.

Can the two races live segregated lives and yet promote their common welfare? Only those who are too prejudiced to open their eyes to fact would contend negatively.

The greatest exponent of the Negro's cause in United States history, the Negro who, more than any other, did more constructively for his people was Booker T. Washington. And yet this great man who certainly had the interests of his people foremost in his heart, decried the efforts of those who would exploit his people and destroy their racial integrity through a forced amalgamation with the white race, when he so wisely said:

In all things which are purely social, we can be as separate as the fingers, yet one as the hand in all things essential to mutual progress.

Too, remember that Abraham Lincoln, the man who freed the slaves, when a member of the Illinois Legislature, voted to exclude Negroes from that State, and, even after the cause of the southerners had been defeated, proposed the setting up of a Negro colony and the deportation of the former slaves to that colony.

To me, Mr. Speaker, the most dangerous single proposal of the President's message was the following:

As a first step, we must strengthen the organization of the Federal Government in order to enforce civil-rights legislation more adequately and to watch over the state of our traditional liberties.

To me, this constitutes a complete abrogation on the part of the President of any belief in the individual sovereignty of the States, as well as a desire on his part to set up a Federal "gestapo" to enforce the laws of an appointed bureaucracy.

This could lead to nothing more or less than a police state, federally regulated elections, and, in time a dictatorship under a totalitarian regime. We cannot—and I speak now more as an American than as a southerner—sit idly by and see travesty upon human freedom consummated. We must repudiate in no uncertain terms these sugar-coated grabs for power, and we must take action to stop these attempts to move our county courthouse and State capitols to Washington; we must give the Government back to the people and take it away from the bureaucrats.

If there are those here who would deny that this so-called civil-rights movement is a Communist movement, let me read to you from a news article which appeared in the Washington Times Herald on Friday, July 18, 1947:

Two former Communists testified in Federal court yesterday that Gerhart Eisler, masquerading under the name of Edwards, worked ceaselessly on orders from Moscow for ultimate establishment of a Negro republic in the South where the colored race would have full political self-determination. The men, William Nowell and Charles White, both Negroes, had been subpenaed by the Government as witnesses in Eisler's trial.

White described the American Communist party line as the "Doctrine of self-determination for the Black Belt, or building a black republic in a white ocean."

The proposals recommended by the President follow almost word for word the first several planks in the platform of the Communist Party in America.

Mr. RANKIN. I want to say to my colleague from Mississippi that the Negro, Nowell, he refers to testified before the Committee on Un-American Activities that they took him to Moscow to teach him how to carry on a revolution in this country. It became so horrible to him that he ran out on them. He testified that they taught him how to knock out light plants, put waterworks out of commission, blow up bridges, barricade streets, wreck streetcars, and so forth.

He testified that this fellow Gerhart Eisler, who was parading around here as a refugee from Hitler, was one of the instructors in that Communist school in Moscow teaching that stuff to him. Eisler also has a brother, Hans Eisler, that they are trying to keep in this country.

Mr. WILLIAMS. According to this news item that I have quoted, these two Negroes who had been trained as Communists in Russia awakened to the things that the Communists were trying to do to their own people. Not to the white people, but to their own people in the South, and they could not stomach it any longer.

Mr. RANKIN. That is what Nowell testified to before our committee.

Mr. WILLIAMS. That is right.

Mr. RANKIN. May I say here that Mrs. Eleanor Roosevelt, who yesterday took a dig at the white people of the South, helped to get this Hans Eisler into this country, according to the testimony of Sumner Wells, a former Under Secretary of State, who appeared before our committee.

Mr. WILLIAMS. The gentleman knows I have no more love for Mrs. Roosevelt than he does.

Mr. Speaker, who are these groups who would destroy our way of living? Let me name a few. There is the NAACP, which has been labeled by the House Committee on Un-American Activities as "Communist infiltrated." There is the National Negro Congress, the Civil Rights Congress, Friends of Democracy, Inc., the infamous Southern Conference for Human Welfare, the Political Action Committee of the CIO, the Antilynching League, the Committee for the Abolition of the Poll Tax, and so on, ad infinitum. All of these are either actual Communist fronts or have become infiltrated with Communists. These are mostly mongrel organizations, which care no more about the welfare of the Negro than they do about the welfare of the wildest ape in the jungles of Africa or South America.

It should be noted, Mr. Speaker, that every organization so far cited by the House Committee on Un-American Activities as a Communist front or as being infiltrated with Communists, places foremost among its aims the same kind of stuff that is now being recommended by the President of the United States.

As further indisputable evidence of the Communist desire for this kind of tommyrot, let me quote from a cablegram sent Secretary of State Marshall during his visit to Russia on March 16, 1947, by Eugene Dennis, general secretary of the Communist Party in the United States:

I also respectfully suggest that you recommend to the Congress * * *.

First, an effective guaranty of civil rights.

Let there be no mistake about it. The people who are behind this legislation are not attempting to free anyone from any kind of political or social enslavement. Their desire is to destroy racial segregation and with an accompanying grab for power. We have no Negro problem in the South. We know and understand our Negroes and they know and understand us. Thinking members of both races know that it is to the best interests of both whites and Negroes that we keep our people apart from social intermingling. To say that segregation is necessarily discrimination is akin to saying that it is discriminatory for the Democrats to sit on one side of the House and Republicans on the other. The southern Negro does not care about being thrown into social contact with the white man any more than the white man wants to associate with him. Our Negroes are interested in bringing about more good will and happy relations with their white friends than they are in promoting hate for the white man. They realize that the only way to solve their problems is through the normal evolutionary processes, and that their people as a race cannot be benefited by legislation which forces upon them the assumption of responsibilities which they do not want and for which they are not yet ready.

It is significant to note that there is no agitation on the part of our Negroes in the South for this kind of legislation. Our Negroes know that we have their interests at heart, and that in time, through orderly processes, their conditions will be much better improved than through revolutionary and drastic processes.

It is also significant to note, Mr. Speaker, that the southern people—the people who are most vitally affected by this proposed legislation—were not given a single spokesman on the President's Civil Rights Committee. It is true that two members claimed southern origin, but both of these had indicated positively through previous actions and statements that they would rubber stamp the rest of the committee and would do what the President intended for them to do. And what is even more significant, Mr. Speaker, every member of this infamous committee has at one time or another been associated or affiliated with one or more of these communistic crusading minority pressure groups.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. Does not the gentleman rather suspect that that report was written before the committee was ever appointed?

Mr. WILLIAMS. I have heard rumors that the report was not even written by the committee, but was written by a gentleman in New York.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS. I yield to the gentleman from Mississippi.

Mr. RANKIN. The two members of the committee to whom he referred, who were supposed to represent the South, have both been found to be members of Communist front organizations by the Committee on Un-American Activities.

Mr. WILLIAMS. I thank the gentleman.

Mr. RANKIN. One of them, this Frank Graham who disgraces the University of North Carolina, has been the head of that Communist front.

Mr. WILLIAMS. That is the Southern Conference for Human Welfare, is it not?

Mr. RANKIN. Yes.

Mr. WILLIAMS. Then what is the solution to this political dilemma in which the South finds itself? How can we best fight this carpetbag legislation which we know will mean the ruination of the United States as well as the South?

Mr. Speaker, we must fight fire with fire. These mongrel organizations which crusade against our chosen way of life are organized; they fight collectively as one toward the same shameful ends; they fight unscrupulously without regard to rules of ethics or fair play.

In the same manner we must organize to combat this stream of filth directed at our people.

I would, indeed, hate to see the day when southern Democrats are forced out of the Democratic Party by these communistic political misfits. But that day is here unless our southern Democrats take immediate positive action to preserve their institutions.

The question is asked: "Where can we go?"

Yes, it is true that we cannot join the Republicans; they are the originators of this carpetbag legislation. But we do have a place to go; we can provide in each Southern State an independent set of electors who would be free to cast their ballots in the electoral college for a southern Democrat, thereby preventing either major party from receiving a majority of the electoral votes and throwing the election into the House of Representatives. In this way, it is believed by many that we could succeed in electing a southerner to the Presidency, because Republicans would not vote for a northern Democrat in preference to a southern Democrat; and northern Democrats would in all probability vote for a southern Democrat rather than a Republican.

But, Mr. Speaker, these are drastic measures to which we should resort only after every other means of fighting within the party has been exhausted. But the times demand drastic measures such as this if our American heritage is to be preserved.

The time has come for every southerner to stand up and be counted. As my Governor stated in his recent message to the State legislature on this subject:

> Vital principles and eternal truths transcend party lines, and the time is now at hand when determined action must be taken.

The time is at hand when the President and National Democratic Party must face the issue. The South has taken as much of its own party's scorn as it is possible for a people to endure. The time has come when President Truman and the National Democratic Party leaders must declare openly and in no uncertain terms whether they desire the continued support and friendship of the Southern States. If they do, then they must also, in no uncertain terms, repudiate these communistic barnacles which have attached themselves to our party. They must face the issue now; there must be no evasion of the question. The choice is theirs; the alternative, ours.

EXTENSION OF REMARKS

Mr. CANNON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein an open letter from the student body of William Jewell College to the Members of the Congress. Also a letter similarly addressed to all student bodies of American colleges and universities.

Jewell College is one of the oldest colleges west of the Mississippi River. It is the alma mater of approximately one-fourth of the Missouri delegation in the House of Representatives in the Eightieth Congress.

The accompanying letters represent the sentiment of the college by an overwhelming majority of the student body in a vote taken after exhaustive discussion of the subject in the open forum of an all-school convocation held for the purpose on January 27, 1948.

The SPEAKER pro tempore (Mr. MICHENER). Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. DORN asked and was given permission to extend his remarks in the RECORD and include an article by David Lawrence on the Southern States and elections.

LINCOLN AND KOSCIUSKO

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. MADDEN. Mr. Speaker, our Nation today is very fittingly doing honor to the memory of a great wartime President, Abraham Lincoln. As generations pass, the character and deeds of this statesman, who rose to majestic heights when our Nation was divided, increases in grandeur. It is a remarkable coincidence that today we celebrate the birth anniversary of another great man of history, Thaddeus Kosciusko, who contributed greatly to the battle of freedom, not only for his native Poland, but also America. Schools, churches, civic groups, and fraternal organizations throughout America today are holding exercises to commemorate the memory of the great emancipator. The debt which America owes to him is being more appreciated as the years pass. His memory will be perpetuated in the minds of all Americans as long as our Republic exists.

The deeds and accomplishments of Thaddeus Kosciusko's battle for the freedom of his own people and also colonial America, may be overlooked on this day by reason of our reverence for the great Lincoln. Kosciusko came to our shores in the dark days of the Revolution and in the true spirit of a patriot, contributed his great ability to establish freedom and independence in America. Besides extending his invaluable leadership to the cause, his presence and activity brought thousands of his patriotic Polish comrades into the fight for American freedom. Kosciusko's contribution to the cause of the young Republic can only be cutrivaled by the outstanding fight for freedom and independence which he also devoted to his native Poland. Today, all the people of America can join with Americans of Polish descent in also revering and honoring the deeds of this great Polish patriot. Today his name lives in the hearts of all Polish people who believe in free, unfettered, and independent government for their homeland. The love of self-government and free religious worship flows through the veins of all true Poles. The centuries have demonstrated that the Polish people will never be submerged by any power or government which shackles or curtails civic or religious freedom. We in America, as well as the peoples throughout the globe, are today in the dark shadows of a reconstruction brought about by the aftermath of the most destructive war in world history. I firmly believe that as we emerge from the shadows of this catastrophic war, the principles of right and justice will prevail and the freedom for which many Polish heroes fought will be restored to their native Poland. A reapplication of the spirit of Lincoln and Kosciusko on the part of liberty-loving nations, and also the people who are now submerged, will bring this about.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 111. An act for the relief of Donat and Laura Laroche; to the Committee on the Judiciary.

S. 511. An act for the relief of Francisco Gamboa Giovoechea; to the Committee on the Judiciary.

S. 936. An act for the relief of Burnett A. Pyle; to the Committee on the Judiciary.

S. 981. An act for the relief of Carl W. Sundstrom; to the Committee on the Judiciary.

S. 1037. An act to authorize the revision of the boundaries of the Caribou National Forest in the State of Idaho; to the Committee on Public Lands.

S. 1395. An act for the relief of Jose Maria Gerardo de Amusategui and Ramon de Amusategui; to the Committee on the Judiciary.

S. 1706. An act to limit the operation of sections 109 and 113 of the Criminal Code and section 190 of the Revised Statutes of the United States with respect to counsel in certain cases; to the Committee on the Judiciary.

S. 1795. An act to repeal section 1 of the act of April 20, 1874, prescribing regulations governing inquiries to be made in connection with disbursements made by disbursing officers of the Army (18 Stat. 33; 10 U. S. C. 184); to the Committee on Armed Services.

S. 1801. An act to authorize attendance of civilians at schools conducted by the Departments of the Army, Navy, and Air Force, and joint-service schools, and for other purposes; to the Committee on Armed Services.

S. 1990. An act to provide a means for the orderly continuation and completion of the Deer Creek and aqueduct divisions of the Provo River project, Utah; to the Committee on Public Lands.

ADJOURNMENT

Mr. ANDERSON of California. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 15 minutes p. m.), under its previous order, the House adjourned until Monday, February 16, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1297. A letter from the Acting Archivist of the United States, transmitting a report on records proposed for disposal by various Government agencies; to the Committee on House Administration.

1298. A letter from the Attorney General, transmitting a report reciting the facts and pertinent provisions of law in the cases of 172 individuals whose deportation has been suspended for more than 6 months under the authority vested in the Attorney General, together with a statement of the reasons for such suspension; to the Committee on the Judiciary.

1299. A letter from the Acting Secretary of the Navy, transmitting a draft of a proposed bill to amend further sections 10 and 12 of the Pay Readjustment Act of 1942, as amended (37 U. S. C. 110 and 112), relating to allowances; to the Committee on Armed Services.

1300. A letter from the Secretary of the Interior, transmitting a draft of a proposed bill to promote the interests of the Fort Hall Indian irrigation project, Idaho, and for other purposes; to the Committee on Public Lands.

1301. A letter from the Under Secretary of Agriculture, transmitting reports showing the names of all persons against whom claims in excess of $1,000 have been compromised, the address of such persons, the nature of claims, the amount of compromise, and the reasons therefor; to the Committee on Agriculture.

1302. A letter from the Assistant Administrator for Airports, Civil Aeronautics Administration, Department of Commerce, transmitting two copies of the National Airport plan for 1948; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 1369. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. HUBER: Joint Committee on the Economic Report. Report relative to allocation and inventory control of grain for the production of ethyl alcohol (Rept. No. 1371). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. S. 1698. An act to define the exterior boundary of the Uintah and Ouray Indian Reservation in the State of Utah, and for other purposes; with an amendment (Rept. No. 1372). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 5049. A bill to reopen the revested Oregon & California Railroad and reconveyed Coos Bay Wagon Road grant lands to exploration, location, entry, and disposition under the general mining laws; without amendment (Rept. No. 1373). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4167. A bill to authorize the State of Montana to lease her State lands for the production of oil, gas, and other hydrocarbons for such terms of years and on such conditions as may be from time to time provided by the Legislative Assembly of the State of Montana; with an amendment (Rept. No. 1374). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4837. A bill to provide an engineering study of the mine-water problem of the Pennsylvania anthracite mining area for the purpose of obtaining information and presenting a solution relating to the health, safety, and economic conditions of the area, State, and Nation as affected by the encroachment of water that progressively floods the mines, threatens to destroy the anthracite reserves of the Nation, contributes to a waste of a valuable natural resource, and seriously affects the whole economy of the anthracite mining area; without amendment (Rept. No. 1375). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREWS of New York:

H. R. 5344. A bill to prevent retroactive checkage of retired pay in the cases of certain enlisted men and warrant officers appointed or advanced to commissioned rank or grade under the act of July 24, 1941 (55 Stat. 603), as amended, and for other purposes; to the Committee on Armed Services.

H. R. 5345. A bill to amend section 8 of the Pay Readjustment Act of 1942, as amended, so as to allow certain commissioned warrant officers of the armed forces to count other active commissioned service in the computation of service for advancement to certain pay periods; to the Committee on Armed Services.

By Mr. BLAND:

H. R. 5346. A bill to provide for a preliminary examination and survey of Assateague Channel and Smallers Drain, Accomac County, Va.; to the Committee on Public Works.

By Mr. BOGGS of Louisiana:

H. R. 5347. A bill repealing certain taxes with respect to oleomargarine; to the Committee on Agriculture.

By Mr. COLMER:

H. R. 5348. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to provide parity for tung nuts, and for other purposes; to the Committee on Agriculture.

H. R. 5349. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

H. R. 5350. A bill to impose a duty on tung oil; to the Committee on Ways and Means.

By Mr. DEVITT:

H. R. 5351. A bill to promote the general welfare, the national interest, and the foreign policy of the United States by encouraging the giving of aid to the peoples of certain foreign countries; to the Committee on Ways and Means.

By Mr. FISHER:

H. R. 5352. A bill for the retirement of the public debt; to the Committee on Ways and Means.

H. R. 5353. A bill to amend section 9 (h) of Public Law 101; to the Committee on Education and Labor.

By Mr. HAGEN:

H. R. 5354. A bill to authorize a further preliminary examination and a new survey of the following streams, which are tributaries to the Red River of the North: Snake River, Middle River (tributary to Snake River), Tamarac River, and Two Rivers (including North, South, and Middle Branches), Big Joe and Little Joe Rivers, in the State of Minnesota, for flood control, for run-off and water-flow retardation, and soil-erosion prevention; to the Committee on Public Works.

H. R. 5355. A bill authorizing a per capita payment of $50 each to the members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation; to the Committee on Public Lands.

By Mr. JACKSON of Washington:

H. R. 5356. A bill to provide for a national program of retirement, survivors, and extended disability insurance; to the Committee on Ways and Means.

By Mr. LARCADE:

H. R. 5357. A bill for the purpose of erecting in Oberlin, La., a post office building; to the Committee on Public Works.

H. R. 5358. A bill for the purpose of erecting in Kinder, La., a post-office building; to the Committee on Public Works.

H. R. 5359. A bill for the purpose of erecting in Welsh, La., a post-office building; to the Committee on Public Works.

H. R. 5360. A bill for the purpose of erecting in Sulphur, La., a post-office building; to the Committee on Public Works.

H. R. 5361. A bill for the purpose of erecting in Rayne, La., a post-office building; to the Committee on Public Works.

H. R. 5362. A bill for the purpose of erecting in Church Point, La., a post-office building; to the Committee on Public Works.

H. R. 5363. A bill for the purpose of erecting in Vinton, La., a post-office building; to the Committee on Public Works.

H. R. 5364. A bill for the purpose of erecting in Lake Charles, La., a post-office and courthouse building; to the Committee on Public Works.

H. R. 5365. A bill for the purpose of erecting in Westlake, La., a post-office building; to the Committee on Public Works.

H. R. 5366. A bill for the purpose of erecting in De Quincy, La., a post-office building; to the Committee on Public Works.

H. R. 5367. A bill for the purpose of erecting in Lake Arthur, La., a post-office building; to the Committee on Public Works.

H. R. 5368. A bill for the purpose of erecting in Opelousas, La., a post-office and Federal court building; to the Committee on Public Works.

By Mr. LATHAM:

H. R. 5369. A bill to establish a Commission on Tax Coordination in the United States; to the Committee on Ways and Means.

By Mr. LYNCH:

H. R. 5370. A bill to liberalize the provisions of law under which the widow or child of a deceased veteran of World War I or II may receive a pension; to the Committee on Veterans' Affairs.

By Mr. McMILLEN of Illinois:

H. R. 5371. A bill for the relief of soldiers who were discharged from the Army during the Indian wars because of minority or misrepresentation of age; to the Committee on Veterans' Affairs.

By Mr. MACK:

H. R. 5372. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. MEADE of Kentucky:

H. R. 5373. A bill to exempt admissions to activities of elementary and secondary schools from the tax on admissions; to the Committee on Ways and Means.

H. R. 5374. A bill to repeal the tax on oleomargarine; to the Committee on Agriculture.

By Mr. MERROW:

H. R. 5375. A bill making an initial appropriation to enable the Fish and Wildlife Service to carry on certain studies of the soft-shell clam; to the Committee on Appropriations.

H. R. 5376. A bill directing the Fish and Wildlife Service to undertake certain studies of the soft-shell clam in Maine, Massachusetts, Connecticut, and New Hampshire; to the Committee on Merchant Marine and Fisheries.

By Mr. MILLER of Nebraska:

H. R. 5377. A bill authorizing the execution of an amendatory repayment contract with the Northport irrigation district, and for other purposes; to the Committee on Public Lands.

By Mr. PRICE of Florida:

H. R. 5378. A bill to authorize the Federal Works Administrator to make loans to the States and their political subdivisions for the purpose of constructing public works which will protect from damage land along the coasts and navigable lakes and streams of the United States; to the Committee on Public Works.

By Mr. TEAGUE:

H. R. 5379. A bill relating to appointments of veterans of World War II in the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

H. R. 5380. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. BRADLEY:

H. J. Res. 325. Joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. HUBER:

H. J. Res. 326. Joint resolution creating a Joint Committee on Civil Rights; to the Committee on Rules.

By Mr. PRESTON:

H. J. Res. 327. Joint resolution to authorize the issuance of a special series of stamps commemorative of Juliette Low, founder and organizer of Girl Scouting in the United States of America; to the Committee on Post Office and Civil Service.

By Mr. BUCKLEY:

H. Con. Res. 149. Concurrent resolution calling upon President to modify the United States embargo on arms and ammunition to the Middle East, and for other purposes; to the Committee on Foreign Affairs.

By Mr. KERSTEN of Wisconsin:

H. Con. Res. 150. Concurrent resolution expressing the sense of Congress with respect to the use by the United States of that portion of the Alaska Highway located in Canada; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States to amend the Social Security Act by reducing from 65 to 60 years the minimum age for receiving old-age insurance benefits; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States to assure an adequate supply of nitrates and other fertilizers for the use of South Carolina farmers during the year 1948; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COLMER:

H. R. 5381. A bill for the relief of George M. Beesley, Edward D. Sexton, and Herman J. Williams; to the Committee on the Judiciary.

By Mr. BONNER:

H. R. 5382. A bill for the relief of Thomas H. Moss; to the Committee on the Judiciary.

By Mr. FOGARTY:

H. R. 5383. A bill for the relief of William D. Fales; to the Committee on the Judiciary.

By Mr. HAVENNER:

H. R. 5384. A bill for the relief of Jeannette and Jesus Esteva and their four children; to the Committee on the Judiciary.

By Mr. HESELTON:

H. R. 5385. A bill for the relief of George Kedzierski; to the Committee on the Judiciary.

By Mr. LEA:

H. R. 5386. A bill for the relief of Ralph Martin Elzingre, also known as Ralph Seawell; to the Committee on the Judiciary.

By Mr. MICHENER (by request):

H. R. 5387. A bill for the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury claim board; to the Committee on the Judiciary.

By Mr. SASSCER:

H. R. 5388. A bill authorizing the Secretary of Agriculture to execute a quit-claim deed to property owned by Jacob F. Riedel; to the Committee on Agriculture.

By Mr. THOMAS of Texas:

H. R. 5389. A bill for the relief of Tuk Kede Wong; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1326. By Mr. FORAND: Memorial of the Rhode Island General Assembly, memorializing Congress with relation to the repeal of certain Federal taxes and restrictions upon the sales of oleomargarine; to the Committee on Agriculture.

1327. Also, petition of Mrs. Helen T. Richards and 11 others, in favor of universal military training; to the Committee on Armed Services.

1328. Also, petition of Marion L. Benjamin and 44 others, in favor of universal military training; to the Committee on Armed Services.

1329. By Mr. RICH: Petition of residents of Lock Haven, Pa., and vicinity, protesting against H. R. 4902; to the Committee on the District of Columbia.

1330. By Mr. HARDIE SCOTT: Resolution presented by Joseph Vasella Post, No. 277, Department of Pennsylvania, the American Legion, at the meeting of the Philadelphia County Council on January 27, 1948, and unanimously adopted, urging that Tokyo Rose be denied reentry to the United States; to the Committee on the Judiciary.

1331. By Mr. SMITH of Wisconsin: Petition of 36 voters of Kenosha, Wis., urging passage of legislation to establish a system of universal military training; to the Committee on Armed Services.

1332. By Mr. TIBBOTT: Petition of citizens of Cambria County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1333. Also, petition of citizens of Indiana County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1334. By the SPEAKER: Petition of Andrew S. Smith, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1335. Also, petition of F. A. Winchell, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1336. Also, petition of Joseph F. Petrus, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1337. Also, petition of Ross C. Patton, Philadelphia, Pa., petitioning consideration of his resolution with reference to compensation for patent application; to the Committee on the Judiciary.

1338. Also, petition of M. D. Adams, Washington, D. C., and others, petitioning consideration of their resolution with reference to requesting amendment to an oath of allegiance to the United States of America, in United States Code, 1940, title 8, section 735b; to the Committee on the Judiciary.

1339. Also, petition of James E. Schofer and others, petitioning consideration of their resolution with reference to opposition to peacetime conscription; to the Committee on Armed Services.

1340. Also, petition of Wiston L. Wood and others, petitioning consideration of their resolution with reference to prohibiting the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1341. Also, petition relative to the passage of S. 265; to the Committee on Interstate and Foreign Commerce.

1342. Also, petition of Mrs. Francis Carey and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1343. Also, petition of J. B. Rudy and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1344. By Mr. LARCADE: Petition signed by constituents from Crowley, Rayne, Church Point, Morse, Iota, Breaux Bridge, and Denham Springs, La., in favor of universal military training; to the Committee on Armed Services.

1345. Also, petition of Roland A. Bahan, president, Louisiana Hotel Association, Baton Rouge, La., and E. Lysle Aschaffenburg, president, New Orleans Hotel Association, New Orleans, La., opposing the 20-percent Federal cabaret tax; to the Committee on Ways and Means.

SENATE

FRIDAY, FEBRUARY 13, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Father, on this World Day of Prayer, we join the ten million women in our own country and their sisters in many other lands in this their petition for Christian fellowship and world brotherhood.

"Father of all mankind, we come in deep humility, giving Thee our thanks and praise.

"Here and now we confess our sins.

"Forgive us our mistakes and transgressions.

"Grant us faith to look with fearless eyes beyond the chaos of our world and time, knowing that out of this shall rise, lifted by Thy grace, peace with justice and a time of brotherhood.

"Vouchsafe unto us the will to work together.

"Create within us the unselfish purpose of Thy Son, who gave His life for all peoples, and may our deeds reflect the mind of Christ.

"Remove from us greed and suspicion.

"Lift us above pettiness and destroy the hate that is the great destroyer. Throughout the earth, may that which we profess come alive in human relations.

"May we serve Thee better and love Thee more, that Thy kingdom may come on earth as it is in heaven. Through Jesus Christ Thy Son, our Lord." Amen.

THE JOURNAL

On request of Mr. SMITH, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, February 11, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on February 9, 1948, the President had approved and signed the following acts:

S. 664. An act for the relief of Mr. and Mrs. Edward H. Isenhart; and

S. 1411. An act for the relief of Willie Ruth Chapman.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 3503) to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 148) authorizing the Clerk of the House, in the enrollment of the bill (H. R. 3778) to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25), to make certain corrections, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H. R. 1366. An act to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes; and

H. R. 1634. An act to amend section 1 and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF ATLANTIC STATES MARINE FISHERIES COMMISSION

A letter from the Secretary-Treasurer, Atlantic States Marine Fisheries Commission, transmitting, pursuant to law, the sixth annual report of that Commission, dated December 1, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF UNITED STATES ARCHIVIST

A letter from the Acting Archivist of the United States, transmitting, pursuant to law, the Thirteenth Annual Report of the Archivist of the United States for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Post Office and Civil Service.

PETITION

The PRESIDENT pro tempore laid before the Senate a petition of the Miami Friendship Townsend Club No. 1, Miami, Fla., praying for the enactment of legislation providing for a uniform national pension system, which was referred to the Committee on Finance.

AMENDMENT OF SOCIAL SECURITY ACT—CONCURRENT RESOLUTION OF SOUTH CAROLINA LEGISLATURE

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the Legislature of the State of South Carolina at the instance of Representative Harry Agnew, of Anderson, S. C. This resolution memorializes Congress to amend the Social Security Act by reducing from 65 to 60 years the minimum age for receiving old-age and survivor insurance benefits.

In this connection, I call attention to the fact that my bill, S. 466, to accomplish this very purpose, is still pending in the Committee on Finance. It is my sincere hope that the committee will see fit to report this bill for the consideration of the Senate at an early date. It is a commonly known fact that persons who are forced to spend their working years in industry are in many cases unable to continue efficient and effective work after they have passed the age of 60.

There being no objection, the concurrent resolution was received, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Concurrent resolution memorializing the Congress of the United States to amend the Social Security Act by reducing from 65 to 60 years the minimum age for receiving old-age insurance benefits

Whereas under the Social Security Act of Congress the minimum age at which covered employees may retire and receive old-age benefits is 65 years; and

Whereas in industry employees who have reached the age of 60 years are at substantially equal disadvantage with those who have reached the age of 65 years by reason of competition of younger employees; and

Whereas the beneficent purposes of the old-age and survivors' insurance provisions of the Social Security Act would be more fully accomplished and opportunities for younger employees would be enhanced by reducing from 65 to 60 years the age at which insured employees may retire: Now, therefore, be it

Resolved by the House of Representatives of the State of South Carolina (the Senate concurring), That the Congress of the United States be, and it is hereby, respectfully urged to amend the Social Security Act by reducing from 65 to 60 years the age at which employees may begin receiving retirement benefits; and be it further

Resolved, That certified copies of this resolution be forwarded to the President pro tempore of the Senate of the United States, to the Speaker of the National House of Representatives, and to each Senator and Representative from the State of South Carolina in the Congress of the United States.

EUROPEAN RECOVERY PROGRAM—RESOLUTION OF ILLINOIS JUNIOR CHAMBER OF COMMERCE

Mr. LUCAS. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution which was recently adopted by the board of directors of the Illinois Junior Chamber of Commerce, assembled in Aurora, Ill., wherein they whole-heartedly endorse the Marshall plan.

There being no objection, the resolution was received, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Whereas the starving peoples of the world are in great need of assistance; and

Whereas the threat and spread of communism is becoming more imminent with the passing of time; and

Whereas a bill to assist European economic recovery has been submitted to the Eightieth Congress of the United States; and

Whereas such assistance will materially aid in the preservation of the democratic way of life and will substantially forestall the possibility of a third world war: Therefore be it

Resolved, That the board of directors of the Illinois Junior Chamber of Commerce assembled in Aurora January 17 and 18, 1948, do urge the passage of the European economic recovery plan and ask that the entire Illinois congressional delegation vote in favor of said bill; be it further

Resolved, That the board of directors of the Illinois Junior Chamber of Commerce assembled in Aurora January 17 and 18, 1948, request and urge the United States State Department to adequately publicize the fact that such assistance is provided by the people of the United States.

DEVELOPMENT OF MARYLAND-NATIONAL CAPITAL PARK—RESOLUTION OF MONTGOMERY COUNTY (MD.) CIVIC FEDERATION

Mr. CAPPER. Mr. President, I ask unanimous consent to present for reference to the Committee on Appropriations and to have printed in the RECORD a resolution recently adopted by the Montgomery County Civic Federation urging the inclusion of funds for the development of the Maryland-National Capital Park.

There being no objection, the resolution was received, referred to the Committee on Appropriations, and ordered to be printed in the RECORD, as follows:

Whereas the Maryland-National Capital Park and Planning Commission has requested an appropriation of $1,494,000 from the Federal Government for the acquisition of public park lands in Montgomery and Prince Georges Counties, Md., in pursuance of the policy laid down by Congress in the Capper-Crampton Act; and

Whereas the House Appropriations Committee has stricken this item from the independent offices appropriations bill for 1949 despite the testimony of competent public officials to the effect that the contemplated park lands are in critical areas of booming real-estate development and may be lost forever if not acquired without delay: Be it therefore

Resolved, That the Montgomery County Civic Federation earnestly exhorts its Representatives in Congress to work for the reinstatement in the independent offices appropriation bill for 1949 the sum of $1,494,000 for the acquisition of public park lands in Montgomery and Prince Georges Counties under the Capper-Crampton Act; and be it further

Resolved, That copies of this resolution be sent to Senators TYDINGS and O'CONOR, Representatives BEALL and SASSCER, the National Capital Park and Planning Commission and the Maryland-National Capital Park and Planning Commission.

EUROPEAN RECOVERY PROGRAM—PETITION

Mr. CAPPER. Mr. President, I ask unanimous consent to present for appropriate reference a petition signed by the members of the Business and Professional Women's Club of Hays, Kans., in which they express their approval of the Marshall plan and urge their Representatives in Congress to support a sound European recovery program. The petition reads as follows:

It is our belief that in this winter of 1947–48, the United States is faced with the responsibility and the pressing necessity to prevent mass starvation and to aid in restoring the normal economic life of the war-ravaged nations of Europe cooperating in the Marshall plan. We believe that this is "the immediate and pressing challenge to our belief in freedom and prosperity" and that "it is our simple duty as neighbors to take a generous part in helping these great people to help themselves." Therefore, we urge our duly elected representatives in the Congress to cast a favorable vote on legislation designed, in the light of Secretary of State Marshall's proposal, to fulfill the needs of a sound European recovery program.

The PRESIDENT pro tempore. Without objection, the petition will be received and referred to the Committee on Foreign Relations.

THE OIL SITUATION IN FLORIDA—PETITION

Mr. HOLLAND. Mr. President, my colleague, the senior Senator from Florida [Mr. PEPPER] has been called out of Washington on official business, and he asked me to present for him, and I also present for myself and ask to have incorporated in the RECORD, without the illustrations attached, a petition on behalf of the city of Daytona Beach, Fla., through its regularly accredited officials, in which it is joined by the cities of Miama, Coral Gables, Fort Lauderdale, West Palm Beach, Fort Pierce, Melbourne, New Smyrna Beach, Tampa, St. Petersburg, Bradenton, Fort Myers, Tallahassee, Gainesville, Lakeland, De Land, and Jacksonville.

The subject matter of the petition is the small supply and the high price of oil and oil products, and the substance of the petition is a request for an investigation by appropriate Senate and House committees of the present situation in the oil industry.

I ask that the petition be received and filed, and referred to the appropriate Senate committee.

There being no objection, the petition was received, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, without the illustrations, as follows:

Petition of the city of Daytona Beach, Fla., to the Government of the United States, on behalf of the 40,000 citizens of Daytona Beach, and on behalf of millions of other citizens and businesses of the United States, in accordance with the right granted citizens under the Constitution of the United States, for a redress of grievances against the monopolistic oil industry because of such industry's scandalous, reckless, and high-handed boosting of oil prices at a time when its earnings and profits have reached the highest level of its history and because of the industry's shortage of oil supplies with resulting physical and economic distress and suffering to home, business, and other users, and because such industry's actions have adversely and will continue to adversely affect the entire economic structure of the United States and its people unless Congress, in the interest of the people of the United States, eliminates such grievances and related practices by immediate and courageous action:

FEBRUARY 12, 1948.

To the Government of the United States, the President of the United States, the Congress of the United States:

The city of Daytona Beach, a municipal corporation of the State of Florida, on behalf of its 40,000 citizens and on behalf of millions of other citizens and businesses of the United States, in accordance with the right guaranteed citizens under the Constitution of the United States, petitions the Government of the United States for a redress of grievances against the monopolistic oil industry because of such industry's scandalous, reckless, and high-handed boosting of oil prices at a time when its earnings and profits have reached the highest level of its history and because of the industry's shortage of oil supplies with resulting physical and economic distress and suffering to home, business, and other users, and because such industry's actions have adversely and will continue to adversely affect the entire economic structure of the United States and its people unless Congress, in the interest of the people of the United States, eliminates such grievances and related practices by immediate and courageous action. The grievances on which petitioner seeks relief include the following:

I

The oil industry, a monopolistic system in its nature because of lack of Federal, State, or other effective regulation, in full disregard of public interest and with the apparent attitude of the "public be damned" to those persons whose everyday life and business depend on the use of oil supplies, has unwarrantedly, recklessly, and unjustifiably boosted prices of oil supplies to such an extent that such increases are scandalous. Reference to attached exhibit A will show that as regards "Gulf coast grade C bunker fuel oil cargo lots" oil the price thereof has more than tripled since before the war.

II

The earnings per share of major oil companies are going up even faster than the price of certain oils. For example, the earnings per share of Standard Oil Co. of New Jersey have gone up from $3.27 in 1939 to $10.50 (latest available estimate) for the year 1947. It has been reported with respect to this company that the "Earnings in first 6 months of 1947 were highest for any half year in the company's history. Operations during last 6 months expected to hold around high rate of initial half of this year." For other examples, see attached exhibit B.

III

That notwithstanding a Nation-wide clamor for relief against this unregulated and multistate monopoly by way of full, effective, and adequate Federal regulation as to prices, separation of production from marketing, unfair practice relations with dealers and independent oil distributors, full inquiry as to violation of Federal antitrust laws, and other phases of such industry's operations and which have such an economic bearing on the users of such oil and the economic structure of the United States, the oil industry herein complained about has gone scot free to date and is enjoying "mountain top" earnings, even though other interstate and multistate operations, such as stock exchanges, communications, transportation, and other public-utility companies and like interests whose operations could be inimical to the public interest are effectively regulated and supervised under Federal laws with resulting benefit to the people of these United States.

IV

That the present and asserted future shortage of oil and the unwarranted and scandalous prices now being charged therefor have brought forth comments or action by Members of the Congress of the United States, including the following:

Senator JOHNSTON (Democrat, South Carolina): "It looks like the big oil companies are holding oil off the market so that the people will be scared and they can run prices up. If the big companies are doing this, as

indicated in my State, prosecutions are in order."

Representative Ross (Republican, New York): Called for immediate and sweeping investigation of the entire fuel-oil situation.

Representative LANE (Democrat, Massachusetts): Demanded a probe to see if a monopoly condition is behind the New England supply problem and higher prices to consumers there.

Senator FLANDERS (Republican, Vermont): Suggested to American Petroleum Institute's President Boyd the desirability of the industry not only "arresting further price advances" but also, "if at all possible, making an appreciable decrease in the price (of fuel oil) at an early date."

V

That as yet no action has been taken on the many, many complaints which have come to the Justice Department of the United States and which have complained bitterly about increased prices of oil and shortages in oil. These included a complaint by a Detroit citizen who saw conspiracy by the oil industry in the situation.

VI

That the shortage in oil and outrageous and reckless increased prices therefor have caused individual action and investigations by numerous States of the United States but because of the far-flung and multistate empire and its operations the several States are legally impotent to adequately, effectively, and properly regulate and supervise this American business giant, thus leaving as the only door or hope to protection of the adversely affected citizens and businesses full, adequate, immediate, and courageous regulation by the Government of the United States.

VII

That, according to the news, a high official of one of the major oil companies (W. H. Garbode, assistant treasurer, Shell Oil Co., Inc.) asserted that replacement of oil facilities dictate need for high corporate earnings by the oil industry, which view is apparently in wholesale and "full throttle" and "what the traffic will bear" practice by the oil industry today, with the result that current scandalous prices of fuel and other oils make the home, business, or other user pay and unjustifiably create such higher earnings which nefarious and obnoxious practice could not be indulged in under appropriate and effective Federal regulation, which is so sorely needed at this time and in the future but which is so sorely lacking now and which lack is to the detriment of the fuel and other oil user and which lack may cause the economic structure of these United States and its people to be severely impaired, if not destroyed.

VIII

That Interior Secretary Krug's announced policy of oil price and rationing controls and his announced intentions to freeze oil prices at all levels and to roll back prices under certain circumstances (which are naturally opposed by the oil industry) and which action would serve the public interests as compared to the present wide-open increase-price policy of the oil industry have not materialized, even though this ranking official of the Government later commented, "It looks quite likely that we'll have to ration fuel oil next winter," and called attention to people suffering from cold because of the situation.

IX

That Federal control, regulation, and supervision of the oil industry is essential in the public interest and welfare and so that practices and abuses not in the public good, including shortages, unwarranted prices from the users to create mountaintop earnings to replace and add improvements; the monopolistic operations of the major oil companies; producing activities; unfair practices with dealers and independent oil distributors; marketing activities; allocation activities; control by this dominant and many-pronged industry through mediums of stock ownership or otherwise; imports and exports; lobbying before Congress; joint but not disclosed action by the oil industry on allocations of oil, fixing of prices, and other operations; and other practices and operations detrimental to the public good, be eliminated from the economic life of these United States and its people.

X

Inert (except in scandalous price increases and more price increases) and the apparent public-be-damned management of the oil industry and its operations and activities must be fully and effectively regulated and controlled now by an alert and public-be-served Congress and Government.

XI

Pending hearings and passage of full and adequate regulatory legislation with respect to all phases and activities of the oil industry and their multi State-regulatory free operations, including fixing of price increases and a follow-the-leader attitude by the entire oil industry in increasing prices, proper action should be taken by the Government, the Congress, and President of the United States to freeze and roll back oil prices to an appropriate level consistent with public interest, which action is that heretofore advocated by Interior Secretary Krug.

XII

The Government of the United States and the Congress of the United States, with their unlimited respective powers to investigate and legislate, should answer now the call of complaints filed with the Justice Department and other agencies of the Government about the shortage of oils and the scandalous price thereof, because if such is not done, continued and justified hue and cry will be made that the best interests of the people are not being served, and even the veriest tyro in matters governmental and political will be satisfied that for reasons unknown to the public and contrary to the interest of the public, the oil industry herein grieved against is absolutely immune from governmental control and regulation and is free to go its way unregulated and increase prices and again increase prices and do those other acts and practices which require regulation now and in the future.

XIII

Abuses prevalent in the oil industry should be legislated out of existence by the Congress of the United States as was done by the Federal Government with respect to other multistate and uncontrolled corporations and activities such as the sale of securities, public-utility companies, managements, labor unions, and other operations and corporations not susceptible of effective regulation by a State or States. That old theories to the contrary notwithstanding, oil companies are proper subjects for full and effective Federal regulation at this time and in the future.

Wherefore, petitioner in its capacities as aforesaid, petitions the Government and Congress of the United States and the President of the United States in the public interest and because such interest requires immediate and full protection from an industry which is an integral part of the woof and warp of the economic life of the United States and its people and requests:

1. That the President of the United States, acting under emergency or other powers properly vested in him, take such action as he deems advisable to cause the grievances to be eliminated, including the sending of a copy or copies of this petition to the Attorney General of the United States for immediate action and investigation under the antitrust or other applicable laws of the United States.

2. That the President pro tempore of the United States Senate immediately receive and refer this constitutional petition for redress of grievances against the oil industry of the United States to an appropriate committee of the United States Senate.

3. That the Speaker of the House of Representatives immediately receive and refer this constitutional petition for redress of grievances against the oil industry of the United States to an appropriate committee of the House of Representatives.

4. That without delay the Attorney General of the United States conduct a vigorous concurrent investigation of the oil industry and the violation of any Federal laws and if criminal or civil action is justified, prosecute vigorously and expeditiously any violation by man or corporations to a speedy conclusion.

5. That committees of both Houses, jointly or separately, immediately institute and conclude a fearless and sweeping investigation of the oil industry of the United States and its managements, operations, and activities, including:

(a) the present and contemplated continued shortage in oil supplies, including failure of the oil industry to step up production of crude and fuel oils and also the failure of the oil industry to get tankers through construction or acquisition from the Government and at a time when shortages were generally predicted by the oil industry;

(b) the present scandalous price of oil;

(c) the reasons why the price of certain oils have more than tripled since before the war and when the oil industry has contended that there was no shortage of crude oil;

(d) the destructive effect of the shortage of oil and prices therefor upon the economic structure of the United States and whether such effect has been destructive or beneficial to the Government's policy of conservation of national resources;

(e) the monopolistic set-up of the oil industry;

(f) the manner in which the oil industry and major companies making up the same are controlled by stock ownership, voting trusts, interlocking officers and directors, or otherwise;

(g) why and how prices of any one oil company are maintained at levels similar to prices of other oil companies;

(h) if competition does exist in fact among the oil companies when it is apparent that as one oil company does the other oil companies do through decisions and means and methods not known to the petitioner, but which the Government and Congress can ascertain through an exhaustive congressional investigation;

(i) the advisability of separating by law the production and marketing of oils;

(j) the allocation by oil companies to other concerns of oil supplies, including fuel oil, and whether fair or unfair practices are indulged in by the oil industry in its relations with dealers and independent oil distributors;

(k) means and methods of preventing or minimizing an oil shortage during 1948–49, as now contemplated by Interior Secretary Krug, and in subsequent years;

(l) the advisability of breaking down the oil industry as was done with respect to the public-utility holding companies;

(m) the advisability of legislating and prohibiting including in the price of oil an amount deemed advisable by oil-industry management to take care of cost of new improvements and also replacements;

(n) to what extent lobbying by the oil industry has prevented earlier Federal regulation of the oil industry;

(o) to what extent lobbying by the oil industry and activities by trade and other oil industry associations and the National Petroleum Council have prevented Federal regulation or roll-back of oil prices and rationing of oil during this critical postwar period;

(p) whether through oil-industry institutes, associations, or other mediums the price of oil is raised at the whim and caprice of the oil industry and without regard to the public interest, the oil industry and such institutes, associations, and mediums do not constitute a domestic cartel inimical to the best interests of the public;

(q) to what extent the oil industry has been guilty of creating shortages in oil supplies in order to bring about increased prices of oil and so as to create those mountaintop earnings for the construction of new improvements or replacements of existing facilities;

(r) to what extent officials, directors, officers, stockholders, and employees of the oil industry have been and now are in Federal Government service or on boards advisory thereto (including the National Petroleum Council) and what positions they now hold and whether they have influenced in the past; influence at the present time, or may influence in the future the destiny and fate of the oil industry because of their serving two masters and whether they have retarded or prevented governmental control of the oil industry;

(s) if exportation of oil has contributed to the current and contemplated shortage of oil and the scandalous prices thereof and also whether exportation of oil should be curbed or prohibited; and

(t) such other matters as are related to or in any way connected with any of the above matters or practices arising out of the same.

6. That any such investigation by the Government, the Congress, and the Attorney General of the United States include immediate and complete investigation of any and all petroleum associations, exchanges, institutes, conferences, publications, or other bodies or mediums in which the oil industry maintains subscriptions or memberships or operates or directly or indirectly controls for the benefit of the industry and so that it may be found if by or through such associations, prices are raised, maintained at uniform levels or otherwise handled or manipulated for the benefit of the oil industry or the companies making up such industry.

7. That all such requested action and investigations be instituted now and concluded as quickly as possible.

8. That the Congress enact such legislation as will fully and completely cause a redress of the grievances hereinabove listed.

9. That pending the enactment of such legislation, the President and the Congress, through whatever legislation is required or otherwise and as quickly as such can be done, roll back prices of oils to the extent required in the public interest.

10. That oil prices be immediately controlled by the Government.

11. That rationing control of oil be initiated and carried out by the Government now.

12. That voluntary correction of abuses be not left to oil-industry management or the National Petroleum Council, but that such corrections be immediately enforced by action of the President, the Congress, the Attorney General, and other governmental means and officials.

13. That the Government of the United States and the Congress of the United States recognize now—not in the future—that (1) the oil industry is affected with a public interest; (2) the sales and other contractual activities of the oil industry are made and performed by means of instrumentalities of interstate commerce; (3) the oil companies and their subsidiaries sell and transport oil by the use of instrumentalities of interstate commerce; (4) the practices of the oil industry often materially affect the interstate commerce in which the oil industry engages; (5) the oil industry's activities extending over many States are not susceptible of effective control by any State and make difficult, if not impossible, effective State regulation of the oil industry; (6) abuses by the oil industry, unless regulated, are injurious to consumers, the general public, and the economic and other welfare of the United States as a whole; (7) that to meet the problems of the oil industry and to eliminate the evils of the oil industry, including its monopolistic setup and practices, its uncontrolled, scandalous prices, and other practices and abuses injurious to the general public and the welfare of the United States, Federal regulation of the oil industry is essential and necessary in the public welfare and that such regulation should be initiated and completed just as quickly as legislative processes will permit.

Petitioner, in the capacities aforesaid, respectfully seeks redress of the outlined grievances and also request that the action requested of the President of the United States, the Congress of the United States, the Government of the United States, and the Attorney General of the United States be taken now so as to bring about early discontinuance of the uncontrolled and unregulated practices of the oil industry—a great monopolistic industry now impairing and capable of destroying the economic welfare of the United States and its people.

The City of Daytona Beach, by Ernest L. Padgett, Mayor-Commissioner; Areal C. Sage, Commissioner; LeRoy J. Hall, Commissioner; Walter A. Shelley, Commissioner; Ralph Richards, Commissioner; James M. Titus, City Manager; Curtis H. Gardiner, City Attorney.

We hereby join in the foregoing petition:

The City of Miami, by Robert L. Floyd, Mayor; the City of Coral Gables, by William T. McIlwain, City Manager; the City of Fort Lauderdale, by Reed A. Bryan, Mayor; the City of West Palm Beach, by E. Tinsley Halter, Mayor; the City of Fort Pierce, by Howard F. Stanton, Mayor; William H. Reed, City Commissioner, Donald Mustaine, City Commissioner; the City of Melbourne, by Purley E. Tucker, Mayor; the City of New Smyrna Beach, by Hugh K. Pierson, Mayor; the City of Tampa, by William E. Thompson, Attorney; the City of St. Petersburg, by Bruce B. Blackburn, Mayor; the City of Bradenton, by A. Sterling Hall, Mayor; the City of Fort Myers, by L. H. Blouch, Councilman; the city of Tallahassee, by Robert C. Parker, City Commissioner; the City of Gainesville, by H. L. Gray, Mayor; Junius B. Mobley, Jr., City Manager; the City of Lakeland, by Charles Larson, Manager of Utilities; the City of De Land, by Leo Fugle, Mayor; C. Frank Whitehead, Mayor, Jacksonville.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH (for himself and Mr. MARTIN):

S. 2156. A bill to authorize the appropriation of funds to assist the States and Territories in the further development of their programs of general university extension education of college grade; to the Committee on Labor and Public Welfare.

By Mr. LANGER:

S. 2157. A bill for the relief of Jacob Herman Weissman, also known as Eugene Vale; to the Committee on the Judiciary.

By Mr. BUSHFIELD (for himself and Mr. YOUNG):

S. 2158. A bill to amend the Foreign Aid Act of 1947 and the Third Supplemental Appropriation Act, 1948, so as to eliminate certain provisions of such acts requiring the retention of a specified carry-over of wheat in the United States; to the Committee on Foreign Relations.

By Mr. LUCAS:

S. 2159. A bill for the relief of Everett C. French; to the Committee on the Judiciary.

By Mr. SPARKMAN:

S. 2160. A bill to equalize the rates of compensation payable for wartime and peacetime service-connected disabilities; to the Committee on Finance.

By Mr. SPARKMAN (for himself and Mr. HILL):

S. 2161. A bill for the relief of James Greenwood; to the Committee on the Judiciary.

By Mr. JOHNSON of Colorado:

S. 2162. A bill to amend section 25 of the Interstate Commerce Act to require certain common carriers by railroad to install and maintain communication systems and to establish and observe operating rules, regulations, and practices to promote safety of employees and travelers on railroads, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FULBRIGHT:

S. 2163. A bill authorizing the acquisition of a site and the construction thereon of a public building in Hot Springs, Ark.; to the Committee on Public Works.

By Mr. HAWKES:

S. 2164. A bill to amend the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, as amended; to the Committee on the Judiciary.

BOULDER CANYON PROJECT ADJUSTMENT ACT—AMENDMENTS

Mr. GURNEY submitted amendments intended to be proposed by him to the bill (S. 1985) to amend the act entitled "Boulder Canyon Project Adjustment Act," approved July 19, 1940, which were referred to the Committee on Interior and Insular Affairs, and ordered to be printed.

LINCOLN DAY ADDRESS BY SENATOR SALTONSTALL

[Mr. SMITH asked and obtained leave to have printed in the RECORD an address by Senator SALTONSTALL at the Lincoln Day banquet of the Young Men's Republican Club of King County, Wash., at Seattle, February 12, 1948, which appears in the Appendix.]

TRIBUTE TO MOHANDAS K. GANDHI BY SENATOR THOMAS OF UTAH

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an address by him at memorial services in tribute to Mohandas K. Gandhi, Departmental Auditorium, Washington, D. C., February 11, 1948, which appears in the Appendix.]

INCOME-TAX DEDUCTIONS FOR DONATIONS TO ALLEGEDLY SUBVERSIVE GROUPS

[Mr. LUCAS asked and obtained leave to have printed in the RECORD a release by him regarding charges that the Treasury Department was approving income-tax deductions for donations to certain groups labeled subversive by the Attorney General, which appears in the Appendix.]

SUBSISTENCE ALLOWANCES TO VETERANS IN SCHOOL—LETTER FROM M. V. M. PIKE

[Mr. REED asked and obtained leave to have printed in the RECORD a letter from M. V. M. Pike regarding an increase in subsistence allowances for veterans in school and on-the-job-training programs, from the New York Sun of January 24, 1948, which appears in the Appendix.]

BRITISH HEALTH PLAN—EDITORIAL FROM THE MIAMI HERALD

[Mr. STEWART asked and obtained leave to have printed in the RECORD an editorial entitled "British Health Plan," from the Miami Herald, which appears in the Appendix.]

GOVERNMENT AND INDUSTRIAL DECENTRALIZATION—EDITORIAL FROM THE DALLAS MORNING NEWS

[Mr. WILEY asked and obtained leave to have printed in the RECORD an editorial endorsing his stand on Government and industrial decentralization, from the Dallas (Tex.) Morning News of February 7, 1948, which appears in the Appendix.]

THE MARSHALL PLAN—EDITORIAL FROM COTTON'S WEEK

[Mr. SPARKMAN asked and obtained leave to have printed in the RECORD an editorial regarding the Marshall plan, published in the February 6, 1948, issue of Cotton's Week, which appears in the Appendix.]

THE CAUSES OF INDUSTRIAL PEACE—ARTICLE BY CLARENCE FRANCIS

[Mr. MORSE asked and obtained leave to have printed in the RECORD an article entitled "The Causes of Industrial Peace," by Clarence Francis, chairman of the board, General Foods Corp., published in the Christian Science Monitor of Monday, February 9, 1948, which appears in the Appendix.]

CONVEYANCE OF LAND FOR USE OF THE UNIVERSITY OF MARYLAND

Mr. TYDINGS. Mr. President, on February 9 the Senate passed a local bill, Senate bill 1583, to provide for the conveyance to the State of Maryland, for the use of the University of Maryland, of the northern portion of a parcel of land previously constituting a part of the campus of the university and previously conveyed by the State of Maryland to the United States for the use of the Bureau of Mines. This bill conveys back to the State of Maryland a very small section of that parcel.

However, when the bill was passed unanimously by the Senate, the word "thousands" was inadvertently substituted for the word "thousandths." The purpose of the bill is to straighten out some of the roads and buildings on the campus, and it is desired to have a small part of this land reconveyed so that the landscaping and buildings will be in harmony.

Therefore, I ask unanimous consent that the vote by which the bill was passed be reconsidered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the bill is now before the Senate.

Mr. TYDINGS. Mr. President, I now ask unanimous consent that the vote ordering the engrossment and third reading of the bill be reconsidered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TYDINGS. Mr. President, I now offer the following amendment, on page 3, in line 3, to substitute the word "thousandths" for "one-thousands", so that the legal phraseology will be in harmony with what the Senate intended when it acted on the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Maryland.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the engrossment and third reading of the bill.

The bill (S. 1583) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to convey by quitclaim deed to the State of Maryland, for the use of the University of Maryland, a tract of land in Prince Georges County, Md., described as follows: Beginning at the stone monument that marks the corner formed by the intersection of boundary lines of the lands now or formerly owned by John and Rachel Keiley (liber S. D. H. 332, folio 113); Sam and ——— Buckley (liber 47, folio 325); Charles E. Harry W., James E., and Mary E. McNamee; and the University of Maryland (Maryland Agricultural College, liber C. S. M. 2, folio 294); near College Park, Prince Georges County, Md., and running thence with the line formerly owned by McNamee on the one side and the Bureau of Mines on the other side, south forty degrees forty-seven minutes, four seconds west nine hundred and thirty-nine and forty-six one-hundredths feet to an iron pipe marking what was formerly the Engle-McNamee corner (being part of the north forty-four degrees east two hundred and sixty-two and twenty twenty-fifths perches line of Maryland Agricultural College, liber C. S. M. 2, folio 294); thence north eighty-nine degrees thirty minutes no seconds east until it intersects the east line of the Bureau of Mines property seven hundred and one and eighty-eight one-hundredths feet; thence north no degrees thirty minutes west six hundred and sixty-six and thirty-nine one-hundredths feet to an iron pipe marking the northeast corner of the Bureau of Mines property; thence north sixty-four degree. forty-five minutes twenty-four seconds west ninety-one and seven one-hundredths feet along the University of Maryland (formerly Keiley) line to the point of beginning and containing six and three thousand one hundred and forty-eight ten-thousandths acres.

TRIBUTE TO MOHANDAS K. GANDHI BY SENATOR MORSE

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD the brief address which I made at the memorial services for Mohandas K. Gandhi a few days ago.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY WAYNE MORSE, UNITED STATES SENATOR FROM OREGON, AT THE MEMORIAL SERVICE FOR MOHANDAS K. GANDHI, DEPARTMENTAL AUDITORIUM, DEPARTMENT OF LABOR BUILDING, FEBRUARY 11, 1948

We meet to revere the forever-living force of a world citizen, a citizen of the world whose lifelong devotion to immutable spiritual values has carved deeply into the history of the ages the name Gandhi.

The ingredients of greatness do not subject themselves to scientific analysis as does a chemical compound. The qualities of greatness are too inseparably a part of the mysteries of life itself to be taken apart element by element and then reassembled into a pattern of behavior called greatness.

Gandhi was a great man, but the soul of his greatness will forever remain a mystery, subject to analysis only in terms of its effects upon all human, social, political, and religious institutions. Certain broad verbal symbols can be used to describe outstanding manifestations of his greatness, and in this passing moment I would mention but two.

He, like all truly great men possessed the qualities of selflessness and spiritual faith. Not a selflessness of self-imposed martyrdom; not the selflessness of futile struggle against wrong; not the type of selflessness which is but a psychological escape from selfish personal aggrandizement and exhibitionism; but a selflessness which springs from an all-consuming motivation of love for one's fellow men. He possessed a spiritual faith that rose above the limitation of creed and dogma; a spiritual faith that God is good and that true religious practice requires devoting oneself to promoting those things which are good.

A few lines from his own writings best illustrate these two qualities of Gandhi's greatness, selflessness, and spiritual faith. He wrote:

"To me God is truth and love; God is ethics and morality; God is fearlessness; God is the source of light and life; and yet He is above and beyond all these. God is conscience. He is even the atheism of the atheist. For in His boundless love God permits the atheist to live. He is the searcher of hearts. He transcends speech and reason. He knows us and our hearts better than we do ourselves. He does not take us at our word; for He knows that we often do not mean it, some knowingly and others unknowingly.

"God is personal to those who need His personal presence. He is embodied to those who need His touch. He is all things to all men. He is in us and yet above and beyond us. Man may banish the word 'God' in taking an oath, but he has no power to banish the thing itself.

"Withal He is ever forgiving; for He always gives us the chance to repent. He is the greatest democrat the world knows, for He leaves us 'unfettered' to make our own choice between evil and good."

The lines of Edwin Markham, written in tribute to the greatness of Lincoln, whose virtues of selflessness and spiritual faith will cause a nation to bow in reverence tomorrow, likewise are applicable to Gandhi. Listen to Markham once again:

"The color of the ground was in him;
The red earth, the smell and smack of elemental things:
The rectitude and patience of the cliff:
The good will of the rain that loves all leaves;
The friendly welcome of the wayside well;
The courage of the bird who dares the sea;
The gladness of the wind that shakes the corn.
The mercy of the snow that hides all scars;
The secrecy of streams that make their way beneath the mountain to the rifted rock;
The undelaying justice of the light that glides as freely to the shrinking flower as to the great oak flaring to the wind;
To the grave's low hill as to the Matterhorn that shoulders out the sky."

Such a man also was Gandhi.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The PRESIDENT pro tempore. The question before the Senate is the first amendment of the Committee on Foreign Relations to Senate Joint Resolution 111.

Mr. LANGER. Mr. President, some of the opponents of the St. Lawrence seaway project have said that the American people now have the advantage of a sufficient amount of electrical power, and do not need the St. Lawrence seaway constructed in order that more power

may be created and farmers all over our country may have another source of electricity, so that the various lines erected by the REA may be energized.

In this connection I wish to read the testimony of Mr. Claude R. Wickard, National Administrator of the REA, who testified last week before the Senate Committee on Post Office and Civil Service in regard to the personnel of his agency. On Thursday, February 5, Mr. Wickard testified as follows:

I can tell you this, Senator LANGER, that I have been talking the last few days with the representative of the Aluminum Co. of America and we were shocked no end when we found out that this cut-back in the amount of aluminum the Aluminum Co. of America is delivering to fabricators of conductors.

I might say, Mr. President, that some of the members of the REA's all over this country paid in their money 3 or 4 or 5 or 6 years ago, and in some cases as many as 7 years ago, as is shown by the testimony. In many instances the poles are up, in some instances the wires are on the poles, but, as Mr. Wickard has said, there is no electricity to supply hundreds of thousands of farmers all over this country, as is desired. That is particularly true in Nebraska, in North and South Dakota, in Montana, and in portions of the State of Minnesota.

I might say that I expect to make some remarks on REA in a few days, but in the meantime I wish to call the attention of my colleagues to the desperate situation of REA in what is known as the Great Plains area.

To cite a few comparisons, in the State of Rhode Island, for example, 95 out of every 100 farmers have facilities for light and power on their farms furnished by REA. In the State of Washington 81 farmers out of every 100 have light and power on their farms. But in the Great Plains area, in the State of Minnesota, for instance, only 40 out of every 100 farmers have light and power, in the State of Montana 45 out of every 100, in the State of South Dakota a little over 9 percent, and in the State of North Dakota 7 percent.

Mr. President, many young men who served in our armed forces in Japan during the last war stated, upon their return, that approximately 95 farmers out of every 100 in Japan have light and power upon their farms. Young soldiers who returned from the Scandinavian countries reported that over 95 percent of the farmers of Sweden and Norway have light and power upon their farms, and that approximately 95 percent of the farmers of Finland have light and power upon their farms. Those who had visited Denmark reported that the farms of Denmark are almost 100 percent electrified. Young soldiers who had served in Germany stated on their return that the farms of Germany are more than 95 percent electrified.

Mr. President, as a result of these statements I made an investigation through the Department of Agriculture to ascertain whether what these young soldiers said was true or false. I found that in every instance what was said by these young men respecting electrification of farms was substantiated by the investigation made by our Department of Agriculture.

Mr. President, it can readily be seen that when a young soldier returns to this country and marries a fine young lady and decides to go into farming, if he is intelligent—and most of our young soldiers who served in foreign countries are—first of all after he gets married and decides to go into farming he will look around to find an electrified farm, for if he loves the girl he has married, it will be his great desire to take the usual farm drudgery off the shoulders and back of his young bride. No matter how fine the land may be—it may even be land in the very heart of the Red River Valley, the finest valley in the entire United States of America—if there is no electricity upon the farm, he may be able to acquire in the Red River Valley, that young soldier, on the basis of his observation in the matter of electrification of farms in the countries he has visited, will look further, and finally locate on land which may not have as good soil as the land in the Red River Valley, for example.

Mr. President, why has the population in the Great Plains area decreased, as the record shows? Why should a great State like Kansas have lost so large a proportion of its population during the last 6 years? Why should the States of South Dakota, North Dakota, and Montana have lost nearly 20 percent of their population during the last 6 or 7 years? I submit that one of the reasons for the loss of population in the States I have mentioned is the fact that those States do not have sufficient electric power available for their farmers; that there has not been the development of the REA in those States that the Government has undertaken and completed in some of the Southern States, and in some other States of the Nation. Yet in the debate which is now taking place with respect to the St. Lawrence seaway we find that some present the argument that we do not need the power which would be produced by the development of the St. Lawrence. The argument is made by many opponents of the seaway that we do not need the seaway because there is already sufficient power in the United States. In that connection I return to the testimony given by the National Administrator of REA, the Honorable Claude R. Wickard. He testified before the committee:

When I called him—

Referring to the representative of the Aluminum Co. of America—

When I called him to find out about this cut-back he told me that in one of the States the people went to work late because they didn't have power enough to keep the electric clocks going.

Mr. President, everyone knows how small an amount of electricity is required to run an electric clock. Yet here we find the National Administrator of REA testifying that some farmers got to work late because there was not enough electricity to keep the clocks upon the farms in operation. That shortage of electric power was due to the shortage of rainfall.

Mr. Wickard said there was a story to the effect that last year during the potato harvest in Maine, right up in the St. Lawrence River area, there was great danger of the loss of a vast amount of potatoes because of the lack of electric power.

I read further from the testimony of Claude Wickard, himself a farmer, formerly Secretary of Agriculture, and now head of REA. Mr. Wickard said:

They had to bring in a gunboat to furnish the electricity because they had a drought up there.

The Aluminum Co. of America, Senator, is not making aluminum to put into the conductors because they have got a shortage of electricity.

Mr. President, we find, according to the testimony, that in South Dakota, in Montana, in North Dakota, and I do not have the least doubt the same is true in Oklahoma, and in every State where there are local REA's, the power poles are erected, and the power wires are placed in position, but there is not the power available to energize the wires. Yet it is said by some that we do not need the St. Lawrence waterway or the vast amount of power which the testimony shows the development of that waterway would create.

According to the testimony given by Mr. Wickard, even after the poles are erected and the wires are in place, the wires cannot be energized, although some have been in place for 2 years, because there are no aluminum conductors available. Mr. Wickard testified that the representative of the Aluminum Co. of America, when called upon by him for an explanation, stated that the company could not manufacture the needed conductors because of the shortage of electricity itself.

Mr. President, I called before our committee one of the REA engineers, the man who has charge of buying supplies, and he said it would be 3 years before one of the largest manufacturers of aluminum conductors in America would be able to supply the REA with its needs. The conductors heretofore manufactured have all been bought up, and no others are available.

Mr. Wickard continued:

Yesterday a man came into my office and said that in western Missouri they were turning off the power 2 hours every evening for about 2,000 consumers because of the power shortage, and they had gone to the utilities and the utilities told them they could not help them get more power.

That, Mr. President, is in the State of the President of the United States. Two thousand farmers have to get along without power 2 hours every night because of the lack of power.

Mr. Wickard further said:

The point is, Senator LANGER, that we cannot increase the amount of power or make the power available to the people until we have more conductors, and we cannot have more conductors until we have more power.

Could anything be simpler than that? I interrogated him. I said:

I wish you were on the floor of the Senate these last 2 weeks, because with reference to the St. Lawrence waterway, I think it was stated that there was too much power available.

Mr. WICKARD. That, Senator LANGER, is definitely not true. Don't let anybody tell you that there is too much power in this country, because it is not true.

The CHAIRMAN. Can I quote you that there is a power shortage throughout the country?

Mr. WICKARD. Yes, sir.

The CHAIRMAN. Even though a Senator from South Dakota should say that there is a surplus of power?

Mr. WICKARD. That is right.

The CHAIRMAN. The reason I ask you about this is because I am going to have this particular part of the testimony transcribed right away, and I am going to quote you word for word.

Mr. WICKARD. That is perfectly all right with me, Senator LANGER.

The CHAIRMAN. And if a Senator from South Dakota should say that there is too much power now, you disagree with him?

Mr. WICKARD. Absolutely.

Mr. Stoneman, manager of the Dairyland Cooperative of Plattesville, Wis., the largest REA in America, a businessman and a farmer who has had charge of REA's all his life, offered to testify in the middle of Mr. Wickard's testimony. He said:

Those definitely are the facts, Senator LANGER, and I want to supplement Mr. Wickard's statement by saying that in our own area there is a definite shortage of power and where one of the larger power companies—just within the last year—was saying that there was plenty of generation out there.

I should like to repeat that. A year ago one of the large power concerns said that they had plenty of power. Mr. Stoneman says that only within the past year they were saying that there was plenty of generation.

Today that same company is buying 27,000 to 28,000 kilowatt-hours a day from our Dairyland Power Cooperative.

It had come to my knowledge that some of the power companies in that area have asked that their field agents not push the matter of heavy electrical equipment, such as refrigerators and stoves, etc., in the area because they feared that they would not be able to serve them.

That is the testimony of a great man in the State of Wisconsin. We have also the testimony of Mr. Donnelly, president of the North Dakota Electric Cooperative, of Grand Forks. He says:

I myself do know that the two major power companies in North Dakota asked their people and the REA cooperatives that they were serving to cut down as much as possible so that they could carry their load; and since the heavy season, which is the Christmas season, I have seen with my own eyes a statement printed by the Otter Tail Power Co., in which they thanked the people for cooperating with them, and hoping that they could serve them to the fullest extent. We asked the Otter Tail Power Co. to sell us some power in the Adams section of Walsh County, N. Dak., and they said that it would be at least 1949 before they could take care of us, which indicated very clearly that they were short of power.

Is it not strange, Mr. President, that there is a power shortage in this great country of ours? We like to boast about our country and say that it is the finest in the whole world. Within 3 blocks of the Capitol, in the Union Station, there is an inscription to the effect that agriculture is the very basis of the prosperity of this country. In comparison with Germany, with whom we fought, in proportion to the population, we have only half as many farmers enjoying light and power. During the war we said that Japan was a nation of barbarians; and yet in Japan 95 percent of the farmers have light and power. In the United States less than 50 percent of the farmers enjoy light and power on the farms.

Apparently we have money for everything under the sun in other countries; but what do we find at the first session of Congress? We find REA cut by $25,000,000. We find, because of the reduction, that 167 field engineers were removed from REA, so that they could not go out among the farmers and build REA's. Some of them—not the best men—were rehired, until finally all were replaced except 71. Seventy-one more men are needed every day in the field. Those who testified stated that some of the regions were composed of three States, and that they saw a field man only once a year.

Mr. President, I invite attention to the fact that I am the only Senator who voted against giving England a single dollar of the $4,000,000,000 loan. I voted against the loan—or gift—to Greece and Turkey. I voted against giving money to the Governments of Austria, Italy, and France; and I am proud of those votes. I said that I would vote to give them food and clothing if they were hungry and unclothed; but I said in this very place, Mr. President, that until the people of America were taken care of—hundreds of thousands of underprivileged about whom Franklin Delano Roosevelt used to talk so much, and helped so little—I would never vote to give money away to foreign countries.

What is the situation today? I have before me four letters, which I received in the morning mail, which will give some idea as to what my mail shows.

The first letter is from Kensal, N. Dak., dated February 9:

KENSAL, N. DAK., *February 9, 1948.*

Hon. Mr. LANGER,
Washington, D. C.

DEAR SIR: Am writing to you today in regards to a grain drill. I have been trying to buy one for 3 years, and just can't get one.

I have been using my neighbor's drill for 2 years, but this year he will use it himself.

I put in about 400 acres in crop every year.

Would appreciate it if you could get me a 12- or 14-foot John Deere press drill or an Oliver press drill with superior feed.

I just don't like to bother you with something like this, but I didn't know what else to do.

Hope I can return the favor someday.

Yours truly,

ARTHUR SPITZER.

Just think of the situation, Mr. President. If Senators will come to my office I can show them thousands of such letters. The farmers cannot get drills; they cannot get tractors; they cannot get pick-ups; they cannot get swathers. These farmers cannot get mowers; they cannot get automobiles of any kind or character. Of course, some of them say that if they pay some money under the table they can go on the black market and occasionally can pick up a piece of farm machinery or an automobile.

But, Mr. President, let me refer to what may be found if one goes to New York City, as I did a few weeks ago, and goes to where the ships are being loaded. Let me mention automobiles, for example. There, there were Kaiser-Frazer cars, Nash cars, Cadillac cars, every imaginable kind of automobile, being picked up and shipped out of this country by the hundreds and by the thousands.

I hold in my hand another letter I received this morning, which reads as follows:

DAVENPORT, N. DAK., *February 11, 1948.*

DEAR SENATOR LANGER: Well, Senator, back here in North Dakota it has been a hard and cold winter.

Of course, Mr. President, it never is as cold in North Dakota as it is in South Dakota, as my distinguished friend the Senator from South Dakota [Mr. BUSHFIELD], who sits on my right, will testify. That is due to reasons which I shall not discuss now. Nevertheless, I admit that the present winter in North Dakota has been unusually cold.

The letter continues:

Most of the country roads have been blocked with snow. But here is what I would like to know. What is going on in Washington and with this grain and other goods that made the market go to pieces? I think most farmers like I myself are confused. I think most farmers were not looking for higher prices, but they did not look for the bottom to fall out all at once. I think the Government has put out a lot of false propaganda regarding grain needs and meat and lots of other things, and then out of a clear sky they come out and say they have got plenty of grains and meats. Just like a few years ago, the Government came out and told the farmers, "Sell your wheat. We are not going to raise the ceiling." Most farmers sold. Then it was not long before they paid a 30-cent bonus. But by that time our wheat was gone.

Yes, Mr. President, that is the way the Government operates. This farmer is absolutely right. The Government made those loans to the farmers at threshing time. The Government said to the farmers all over this country, wherever wheat is raised, "You do not have to sell your wheat if you do not like the price. We will lend you the money you need." In our State the loan was $1.51 a bushel. So the farmers signed notes to our Government, and those notes were not due for 3 months, or, in some instances, 4 months; and the wheat was there on the farms as collateral or security. Then, about 30 days later, out of a clear sky, though the notes were not due for 2 months, those farmers received letters from our Government saying, "Deliver this wheat. We are calling the loans."

Mr. President, some of those farmers who did not have trucks hired trucks and paid 1 cent or 2 cents or 3 cents a bushel, depending on how far they lived from the elevator, to haul their grain to the elevator, because the Government said it needed the grain in order to carry out its commitments to keep the people of Europe from starving.

As we all know, the President appointed an advisory committee, and on that advisory committee he placed, among others, one of the largest wheat producers in the entire United States, a man who had half a million bushels of wheat stored on a large farm in Montana. On

the 19th day of April, after all these patriotic farmers had delivered their grain, the Secretary of Agriculture and Mr. LaGuardia, who at that time was head of UNRRA, went to Climax, Minn., and there they said, "On the advice of our advisory committee, and after consulting with them, we will pay a 30-cent bonus."

Mr. President, the farmers who had been patriotic did not get that 30-cents-a-bushel bonus; but one of the President's advisers, a member of his advisory committee, who had kept his half million bushels of wheat on his farm until he could get this bonus of 30 cents a bushel, then promptly delivered it to the elevators in Montana.

So, Mr. President, can we blame this farmer, a man by the name of Erhardt Krabbenhoft, when he complains? Of course we cannot. He says:

> So why do they have to take it out on the farmer? We have to work for our profit. What we have to pay out for expenses and machinery is not going to come down for a while, that I can see.
